Graduate of the Royal College of Dental Surgeons of Ontario. Honor Graduate of Toronto University Dental Department. Master of Dental Surgery. Graduate of the Dr. Meyers' two Graduate School of Prosthetic Dentistry, New York. Office over Moore's Drug Store, opposite the Post Office.

MEDICAL

DR. H. E. GAGE, Physician, Surgeon and Accoucheur. Specialist in Diseases of the Eye, Ear, Throat and Nose. Late Lecturer and Clinical Assistant Kingston General Hospital. Office hours—10 to 11 a.m., 1 to 3 p.m. Successor to Dr. O'Neill.

DR. F. J. F. HOUSTON, Honor Graduate of Toronto University Licentiate of the Royal College of Physicians and Surgeons of Edinburgh and Glasgow. Late Graduate Moorfields Ophthalmic Hospital, London, Eng. Specialties—Ophthalmology, Eye Infirmary, Eye Glasses. Diseases of the Eye, Ear, Nose and Throat. Successor to Dr. Morrison.

VETERINARY

BOYD BROS., Veterinary Surgeons, Paisley. Graduates of Ontario Veterinary College. Day office at Andrew's livery stable, Main Street. Night office—Two doors north of Post Office. Phone numbers—Bell 81, Bruce 12.

AUCTIONEERS

R. G. PEARSON, Licensed Auctioneer, Saltfleet, attended to all parts of the County of Bruce. Satisfaction guaranteed. Orders left at this office will receive prompt attention. Terms reasonable.

STEPPING TOWARDS CHURCH UNION

Chesley Enterprise: Representatives of the Bruce, Owen Sound and Orangeville Presbyteries are meeting representatives from Wiarton, Owen Sound, Mount Forest and part of the Collingwood District of the Methodist Churches to arrange for withdrawals in certain localities where the Presbyterians or Methodists predominate, in order to prevent overlapping. This is the next best thing to church union and will liberate ministers for work on the home or foreign mission fields.

Walkerton Telescope: A movement is reported to be under way to consolidate the North Brant Presbyterian work which at present has churches at Malcolm, West Bentinck and Crawford. The proposal is to unite the Presbyterian and Methodist congregations at Crawford, close the church at West Bentinck, and hold service for the West Bentinck and Elmwood neighborhood at Elmwood but making no change at Malcolm. The scheme is in line with the process of consolidating the rural charges which is being undertaken throughout the rural sections for the more effective carrying on of the work.

ARRAN COUNCIL.

Council met March 9th, all present. Treasurer submitted statement showing cash on hand and in bank, $7022.69. Messrs. Scarrow and George reported that they had sold the timber on highway, con. 9, lot 18, to Geo. Mills and Reg. Crawford for the sum of $12. By-law No. 5, appointing collectors, was finally passed. By-law No. 6, re Arran Rural Telephone No. 1, was passed. Letter from J. H. Wismer thanking the council for grant of $10 to the W. B. Board of Agriculture. The members of council were appointed to look after the bridges during the freshet. Communication from the county treas., showing lots which had been patented, read and filed. Communication from the Hydro-Electric Association read and filed. On motion of George and Thomas the reeve was instructed to procure 3,000 feet of plank for floor for bridges. The question of the abolition of statute labor was taken up and thoroughly discussed. It was moved by Sam Miller, seconded by Fred George, that whereas a number of roads in Arran have been assumed by the county, and whereas such action will interfere with our present system of statute labor, we are of the opinion that we would be acting wisely to abolish statute labor and we hereby do so, and that a by-law be passed to that effect. This was carried, Councillor Thomas voting nay. Orders to the amount of $250 were passed, chief of which were: Treasurer, 3 months, $12.50; clerk, $62.50; John Harrison & Son, Owen Sound, two snowplows and freight, $81.42. Council adjourned until April 9th.

H. T. POTTS, Clerk

—Tara has a Business Association, composed of local merchants and business men. The organization was formed with the idea of bettering the town in any way possible. Paisley might profitably take the same step.

Reroof with Brantford Asphalt Roofing

Don't let a leaky roof damage the wall paper, carpets or furniture in your home, the crops in your barn or the goods in your store. Tear off the old shingles or other worn out roofing material and put on a lasting roof of Brantford Asphalt Roofing.

This roofing is made of a blend of hard and soft asphalts on a long-fibred felt base. By blending the asphalts a roofing of remarkable elasticity is secured—one that is flexible, durable and capable of resisting all kinds of severe climatic extremes.

Brantford Asphalt Roofing is, in addition, surfaced with silica sand on both sides, which adds to its weight, fire-resistance and durability. You may be offered other sanded roofing, but it will not have the quality of material or weight of saturation of Brantford Asphalt Roofing.

Made in three weights:—60 lb., 70 lb., 80 lb. per square.

Brantford Rubber Roofing

Is the same quality as Brantford Asphalt, but has a smooth, rubbery surface instead of the sand. It is particularly suitable for verandah decks and floor coverings. Three weights:—40 lb., 50 lb., and 60 lb. per square.

Standard Mohawk Roofing

consists of the same grade of materials as Brantford Asphalt Roofing but is lighter in weight—a thoroughly reliable roofing at a low price. Tested for years and has given entire satisfaction. Sanded on one side. One weight:—40 lbs. per square.

Mohawk Rubber Roofing

The same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunkhouses, camp sites, even dugouts in the trenches. 35 lb., 45 lb., and 55 lb. weights.

Leatheroid Roofing

Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb., and 55 lb. weights.

Samples of any of these roofings and prices will be furnished by either the makers or their agents in this locality.

Income Tax Forms
Are now available

Returns must be filed on or before 31st March

THE Dominion Income War Tax Act requires you to fill in one or more of the five special Forms provided before 31st March, 1918. In order to assist the public to understand just what is required of them, information on each Form is given below. Read carefully, then get three copies of the form that fits your case and fill them in. Answer all questions fully and accurately. For making false statements, a penalty of $10,000 or six months' imprisonment, or both, is provided.

Individuals.—All persons unmarried, and all widows or widowers without dependent children, whose income is $1500 a year or more, must fill in Form T1. All other persons whose income is $3000 or more, use the same Form. Where any income is derived from dividends, list amounts received from Canadian and Foreign securities separately. Fill in pages 1, 2 and 3 only. Do not mark on page 4. Partnerships, as such need not file returns, but the individuals forming the partnerships must.

Corporations and Joint Stock Companies, no matter how created or organized, shall pay the normal tax on income exceeding $3000. Use Form T2—giving particulars of income. Also attach a financial statement. Under Deductions, show in detail amounts paid to Patriotic Fund and Canadian Red Cross or other approved War Funds.

Trustees, Executors, Administrators of Estates and Assignees use Form T3. Full particulars of the distribution of income from all estates handled must be shown as well as details of amounts distributed. A separate Form must be filled in for each estate.

Employers must use Form T4 to give names and amounts of salaries, bonuses, commissions and other remuneration paid to all employees during 1917 where such remuneration amounted in the aggregate to $1000 or over.

Corporation Lists of Shareholders.—On Form T5 corporations shall give a statement of all bonuses, and dividends paid to Shareholders residing in Canada during 1917 stating to whom paid, and the amounts.

Figures in every case are to cover 1917 income—all Forms must be filed by 31st March. For neglect, a fine of $100 for each day of default may be imposed.

In the case of Forms T1 and T2, keep one copy of the filled in Form and file the other two with the Inspector of Taxation for your District. In the case of T3, T4 and T5, keep one copy and file the other two, with the Commissioner of Taxation, Dept. of Finance, Ottawa.

Forms may be obtained from the District Inspectors of Taxation and from the Postmasters at all leading centres.

Postage must be paid on all letters and documents forwarded by mail to Inspector of Taxation.

Department of Finance,
Ottawa, Canada

3

Inspector of Taxation, Geo. R. Tambling, London, Ont.

—Since the war commenced Mrs. J. A. Linton, of Mitchell, has knitted over 600 pairs of socks for the soldiers. For the month of February she knitted 29 pairs, a little better than one pair per day. On the first day of March she knitted five socks, but worked up to near midnight. Mrs. Linton sent the five hundredth pair to Queen Mary and received a very nice letter in reply from Her Majesty's secretary, which makes two letters received from the Queen, praising the good work she has been doing for the soldiers. Has record of knitting socks will be hard to beat, as she has a good sized family to look after besides.

BRANT TP. COUNCIL

March 4th, 1918.

The Municipal Council of the Tp. of Brant met on the 4th day of March. Members all present. Minutes of last meeting read and declared correct.

Johnston — Rowand — That this council do now go into committee of the whole with the reeve in the chair.—Carried.

Gregg—Findlay—That the following named persons be appointed as Pathmasters, Poundkeepers, Fence-viewers, Sheep Valuators and Engineers for road grades and the clerk prepare a by-law confirming the appointments.

(The list will appear in next issue.)

Johnston—Rowand—That this council make a grant of $300 to the various Red Cross Societies doing work in the Township.—Carried.

Rowand—Johnston—That the customary grant of $10 be made to each of the Cargill and Elmwood Public Library.—Carried.

Johnston — Rowand — That the Reeve and Clerk issue orders on the Treasurer for all accounts passed at this meeting of council.—Carried.

John Lundy, repairing road F. W. G. Hastie, treas. of Bentinck Tp., for townline work and grant on deviation road south of Hanover..... $9 15

Treasurer of Greenock Tp., in care of T. H. Purdy, clerk, amount due Greenock for townline work 33 00

Dr. J. G. Bricker, salary as Medical Officer of Health for J. H. Dierstine, refund of Hydro-Electric tax re Elmwood 82 75

David Mauer, 34 yds. gravel, $1 40, road to pit, $2..... 5 40

25 YEARS IN THE LION HOUSE

KEEPER AT THE LONDON ZOOLOGICAL GARDENS.

Tells of the Peculiar Habits and Traits of Wild Animals in Captivity.

I began as a parrot-boy, and after spending a little time in the prosectors' office—the Zoo mortuary, it might be called—I came among the lions, tigers, bears, leopards, and wolves twenty-five years ago, says Herbert Pilsher, keeper of the lions at the Zoological Gardens, London.

"Old Sutton," who was head of the lion-keepers, and spent forty years at the Zoo, was my chief in those days. Nobody could tell Sutton anything he didn't know about the habits of carnivorous beasts, and especially the king of beasts. Like him. I suppose, I shall end my days as a lion-keeper. I don't suppose I'd care to take on any other work now. One gets to like these big, wild fellows, and it rather flatters your vanity to be on a spot of nodding acquaintance with them.

They all know my footsteps as I approach their dens. I believe if I were to appear in the centre of a Bank Holiday crowd at the lion-house, Dick or Harry, the two lions with the manes, would spot me in a minute, and make signs of recognition by jumping about their cages.

Not Looking For Trouble.

Lions, like human beings, have their likes and dislikes, and once they take a dislike to you nothing can ever change their minds. Kindness certainly wouldn't do it. You cannot "come it" on lions by that plan. It is much the same with other wild beasts. There was a snow leopard that couldn't bear the sight of me, so that I had always to keep out of its reach. Yet that leopard would allow any of the other keepers to stroke it and make a fuss about it. I never did the beast any harm. It just didn't take to me from the beginning, and never troubled to give me a chance of proving that I was all right.

On the other hand there was a tigress which simply couldn't abide the headkeeper in those days, though nobody ever treated wild beasts better. Strange to say, I had not been in the lion-house a month before I could pat the tigress and do anything I liked with her, except, of course, go into the cage with her. I never presumed so far as to look for trouble in that way.

The Honest Tiger.

Sometimes a lion or a tiger will spot a person among the public and begin snarling. For instance, the very sight of a Chinaman sends a lion into a rage. I never could tell why. It is just one of those strange things about the beasts that nobody can explain.

There are eleven lions and lionesses at the Zoo to-day, and Dick and Harry are a pair of shaggy brothers in the lion-house. They came from North-West Rhodesia as cubs. Dick is fairly good-natured, but Harry is a testy fellow. He has some fine lung power, and the echoes of his biggest roars can be heard a mile away on still nights.

Tigers are, on the whole, more friendly and trustworthy than a good many lions. A lion is either a gentleman or a cad; a lioness is either a lady or a shrew. There is no middle course with them.

Tigers, on the other hand, are very straightforward. They never "let on" they like you. Either they do or they don't. They always make it quite clear to you what they think of you. A waiter once tried to give a lion some bread through the bars of an outer den at the back of the lion-house. The beast caught hold of his arm, and I ran to the rescue on hearing the waiter's screams. We took him to the hospital to have his arm dressed. He had paid a painful price for his lesson.

Cruel to be Kind.

Only one mishap ever came my way. It was through a lioness called Leone. We were moving a leopard, and I was standing on top of the box, my head on a level with the bars of Leone's den in the open air. She patted me on the head, in pure friendliness I am certain, but the effect of the pat was that I was stunned, and the doctor had to pull a scratch together, with sixteen stitches. I never suffered any harm at the claws of a tiger, and my experience goes to show that the tiger takes pretty well to captivity, though here and there one meets with a villain or a vixen.

The jolliest little fellow that ever came to the Zoo in my time is Ranji, the Indian lion, who arrived as a fluffy brown cub from the estate of H.H. Maharajah Ranjitsinhji, Jam-saheb of Nawanagar, long known on the cricket field as "Ranjitsinghi." The lion was presented by Lieutenant Pole-Carew a little while ago.

Ranji is as friendly as a chow dog, and not very unlike one. But don't go near him when he is feeding. He is wilder than all the other lions put together then, and none of them is very amiable at feeding-time. He cannot bear being meddled with, or even talked to, with his ten pounds of flesh between his paws. Once he has finished, and Ranji has well wiped his mouth with his long tongue, he becomes as nice as ever in a few moments.

The bear is never to be trusted. He or she is always bad-tempered. Jennie, the big grizzly, has been here about thirty years, and—well, she is about as cross as a "she bear." Perhaps the reason is that bears have more brains than other animals, and just know enough to resent confinement.

The two Polar bears, Sam and Barbara, escaped one morning, by lifting the latch of their den and walking out. I was roused early to join in the chase. They were got back into their place in the funniest way. A laborer was coming along one of the paths with a plank on his shoulder. Instead of dropping it and running for his life, he simply drove them in front of him, and, to our astonishment, manoeuvred the bears through the doors of their dens.

Polar Bear Caught Cold.

I remember when Sam was brought here at six months old from the Arctic regions the first thing he did was to catch a cold. He shivered like a human being with influenza. For a month I shut him up and fed him with cod liver oil. He would take nothing else, and got well on it. Lions and tigers are also rather liable to catch colds. Many lion cubs and bear cubs have died at the Zoo of pneumonia. We have never been able to rear to full maturity cubs of these animals born at the Zoo. If any have lived a few years they have developed rickets, and had to be destroyed. The young of wolves and dingoes thrive all right under the care of dogs as foster-mothers.

Lions and tigers live on one meal in twenty-four hours. On the average it consists of ten pounds of horse-flesh. Since horses have been rationed during the war their flesh is not so nourishing, and the beasts hardly seem to do so well on it.

If I were to give Dick or Harry, the brother lions, a double ration, they might eat it, but they would want little or nothing next day. Lions are not exactly gluttons or hogs. They are not always hungry, but show wonderful regularity with their food. Big game hunters tell me that a lion in its wild state may go a week without food after a tremendous feed.

I have never known a dentist to be called to pull a tooth from a lion's mouth, but the veterinary surgeon often comes to cut claws that have grown back into their pads, causing the animal to limp painfully. In the old days we used to lasso the lion round the neck, and it took about twenty men to drag the beast up to the bars of the cage, with its claws held in position for the "cut," to operate when the lion had been chloroformed.

Brainy Brute.

This is all changed now. The beast is coaxed by bits of appetising meat into a chloroform box, fitted with six barred windows, through which we can see when the chloroform has taken effect. His claws are then pulled through a space in the bottom of the box.

Some time ago one of the Canadian mascots, a little black bear, which we took after at the Zoo for the regiment, was placed in this box. Half an hour afterwards we found that the bear had gnawed his way out at the top, and was walking about the grounds. There you have the difference between bears and other animals. A lion or a tiger would have remained in the box for any length of time without ever thinking of devising a means of escape. The brains of the bear were equal to the occasion. Brain is a clever animal, and you never know what he may be up to when his keeper's back is turned.

A MODERN AHAB AND NABOTH.

Method by Which the Kaiser Obtained the Coveted "Vineyard."

A large part of Potsdam belongs to the German emperor. Some of the royal estate has been in the possession of the Hohenzollerns for a long time, but the greater part of it was secured by purchase by the kaiser's grandfather, his father, and by the "All Highest" himself.

At a political gathering in Berlin, says Miss Edith Keen in Seven Years at the Prussian Court," I heard the story of how the kaiser, a short time after his accession, obtained about six acres that is now one of the most valuable parts of the Potsdam property. His manner of accomplishing it redounded more to his astuteness in business than to his kingly honor.

The kaiser was advised by his estate agent to acquire the ground, but the owner declined to part with it except at a much higher figure than the emperor wished to pay. This owner was a tradesman in Berlin, who had received the ground in settlement of a debt amounting, I believe, to two hundred and fifty pounds, which was at the time more than the ground would have fetched in the open market for land about Potsdam was at that time comparatively cheap. The tradesman, however, believed that in acquiring the ground he had made a good speculative investment, especially as it had been a choice between losing the amount of his debt altogether and taking the land in settlement of it. He resolved to hold his land, and did so for five years, until the kaiser's eyes were attracted to it.

The kaiser's agent ascertained the figure at which the tradesman had bought it and offered him the same sum plus five per cent. interest on it for five years. When the offer was refused, the agent raised his bid to four hundred pounds, but seven hundred pounds was the lowest figure that the tradesman would accept. The matter then dropped, but a month later the tradesman was served with a notice stating that his land was required for military purposes, and shortly afterwards he received an official offer from the German government of one hundred and fifty pounds for the six acres.

In Germany when land is required for military purposes the owner is generally advised to accept any offer that the government may make. He can, if he pleases, put his own valuation on it and have the selling price fixed in a court of law, but in nine cases out of ten that is a proceeding which brings loss to the owner, for usually it results in his having to accept the government's offer, or even a lower one; rarely does he get an increase on the original offer.

The tradesman wisely recognized that it would be useless for him to attempt to obtain a higher price for his land than the value the military authorities had put on it, and he parted with it at the government figure. Six months later the kaiser acquired the land for himself from the government exactly the amount that the German had paid for it.

March.

March, March, March winds
Cutting winds and cold;
Over mead and pasture lands,
Over plain and wold.
Rude, rude, rude winds,
Blustry winds and bold;
Over closely guarded kine,
Over sheep in fold.

Fierce, fierce, fierce winds,
Searching winds and chill;
Round the palace and the hall
Round the cot and mill.
March, March, March winds,
Loud your voice and shrill.
But your gladsome promises
Springtime shall fulfill.

—L. M. Thornton.

DEVELOPMENTS IN SCIENCE OF WAR

CLEVER WORK OF ENGINEERS ON THE FIRING LINE.

What the British Have Accomplished in Map Making and Barrage Effects.

It can be said concisely of this war now on in Europe that it is no place for a nervous woman or a homesick man. It demands the best, mentally and physically, that everybody contains. As a result of three years' struggle entirely new lines of data have been evolved and much of the engineering work in military science, as almost everything else of war, has been relegated to the scrapheap, says Major General Clement of the American Forces.

Take difficulties that confronted the engineers and the way they have been handled. The Allied forces had no common unit of measurement. The first necessity that met the engineer officers of the French and English armies was to devise a system of maps—to get over that necessity without any hope of teaching the ordinary soldier or officer how to reduce yards to meters and kilometers to miles—to make a map that, once printed, would be perfectly serviceable in every army. And they have worked out a perfect scheme that ignores any idea of yards, feet, meters or miles, and co-ordinates everything on fractionations alone.

The Latest War Map.

The maps are made on scales that are universally 1-2500, 1-10,000 and 1-40,000. When a man sees that map, whether he can read it in meters or yards it matters not, he reads all that is on it to his understanding, which is all that is necessary. The old cumbersome ways of designating routes have also been overcome by the engineer. The old army rule that required a general to put in his order, spelling out in Roman capitals, the names of all towns and roads, and needlessly prolonging the order, is abolished by this system of maps. All of France has been mapped in a section of sheets numbered from 1 up. Each sheet is divided into a number of squares, and they are all exactly alike in number. Each square is again divided into four principal parts, so that when a man receives an order to do a certain thing he is referred to sheet 1, No. 27, and one of the four subdivisions which are designated by the first four letters of the alphabet.

For the very simple reason that men speaking different languages cannot and do not pronounce the first four letters of the alphabet alike, they have substituted arbitrary symbols to represent them; so that C, which can be hissed over every tongue, is the only one of the four letters which remains as it was. "A" is "ah." "B" is "beer," and "D" is "don." The sections are divided that way, and if they want to locate a cannon they may mark one of these subdivided, "1-den-19, sheet 6," and they send that to the battery commander and he can locate that within fifty feet.

Triumph of Military Art.

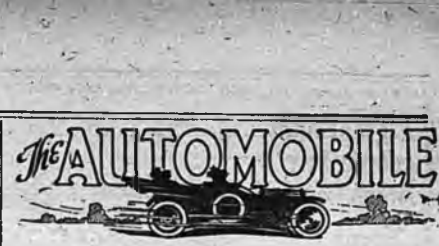
Such messages can be sent by wireless or wigwagged from an airplane. It is a high triumph of military art. By the substitution of the new system for the old, whether the reader be an Englishman, a Frenchman, an Italian or an American, the map means just the same to him. It used to be that a map was handed to a regimental commander and by him passed to a battalion commander and upon that map he formulated his orders. It is not so to-day. The map goes into the hands of the squad leader, because the science is so changed that the fighting is not done by the commanding general. His work is to see that his men are kept healthy, well fed and well equipped and held to the highest type of discipline.

The fighting is done by the squad leaders and company commanders. The men who do the fighting must be intelligently taught what they have to do. The bayonet positively thinks in this war. It was not until the British and French soldiers learned that the bayonet must think that they became effective, so that they are changing their past defeat into present victory, and so they are gathering strength which must inevitably carry them across the Rhine, unless there is a collapse in Germany before that day comes.

When it is planned to attack a certain point, the commander dictates to the engineers the thing he has in his mind and the chief of engineers goes out and produces on the ground to a perfect scale a map of the whole country that has to be traversed in that engagement.

Six Months to Prepare.

In the fight on the Messines Ridge, where I had an opportunity to study such a map, they were nearly six months preparing this map—I called it this plan—on the ground, of the region to be traversed. The airplanes took their photographs every day, both the panoramic photograph out of the side of the machine and flat photographs from the bottom. They were read by the microscope, printed by the photographer and then sent to the engineer to be worked up not only on the practical map that goes to the men, but on this outline by which they were to learn to read their maps.



In the preparation for that attack, which took nearly six months of time, every woods, every house, every tree was marked, and if they discovered that they had made a mistake and a better photograph showed an error, it was corrected and everybody brought back to study that part over. Here was a new development of military engineering by the aid of photography and the airplane. The French engineers co-ordinated and put upon the ground an exact picture of the area occupied by the German army, and when the time came to move they moved irresistibly over the lines laid down to complete victory, because every man engaged had in him mind his primary object, his secondary object and the ultimate object of attack and worked with an intelligence that had been unknown.

Field of Messines Ridge.

Now the study of that field of fire over the Messine Ridge was a revelation to me of the discipline of engineering. The patience that was displayed all that time in reducing fifteen miles in length and six miles in depth to a scale that could be put on a field of about 1000 to 2500 feet, and put on so accurately that when the order came through in the morning to move forward every man could find his path as surely as if he were on his home street under a row of electric lights, was indeed wonderful. Each man had completely absorbed the surroundings. He had taken in all that the engineer had done and was able to carry it out.

The British engineers have perfected barrage work. I wish I could show you a diagram that is issued to an artillery commander from the chief engineer's office telling him how to put down his barrage in a certain fight, and then he calculates it out according to all this modern figuring with regard to artillery range in a way that produces results. They were successful in their last two raids because they had invented a new species of barrage fire which I think I am not permitted to say anything about, except to say that it is the highest kind of engineering art.

The AUTOMOBILE

Respect For Self-Starters.

The self-starter on the modern automobile is a wonderful but highly efficient apparatus. The greatest percentage of them are electrically operated, taking their current from a storage battery; and because they are of this character it is probably one of the chief reasons why they are not properly understood or are badly abused by the ordinary owner. The function of a self-starter as the term indicates, is for turning the engine over at the time of starting and doing away with the task of cranking by hand. That it is sometimes fearfully abused when used for pulling the car—at very short distances of course—is a fact borne out by testimony and other ways, and not only is such a practice extremely hard on the battery, but it also injures the starter brushes and windings.

Beginning with the first instant the starting pedal is depressed, the flow of current from the battery to the starting mechanism is very heavy. This heavy discharge should not continue longer than is necessary for the motor to begin operations on its own power, which may be all the way from two or three seconds to not more than one minute at a period. With the starter doing its part, the starting of the motor depends upon the presence of gas in the cylinders and a competent spark at the plug. If the starting pedal be held down too long, the result will surely be damaged brushes and commutator. Damaged brushes must either be replaced with new ones or else trued down to perfect seating on commutator. If the commutator be damaged by the heat that accumulates during the heavy discharge of battery current, it may also need replacement by repairmen familiar with such things, or else put in a lathe and carefully ground down. You will see that any one of these circumstances occasions time and expense in getting the apparatus back into shape if damaged. The brushes and commutator are designed to stand periodic starting discharges of at least a minute's duration, but any instruction book or the makers themselves, as well as any electrician, will say that such unnecessary imposition on the parts of the starter deserves to be met with both expense and trouble. If the motor does not start after several trials with the starter, there is something else needing attention. Nearly all carburetors will respond as soon as the grade of gasoline used will allow them, and too many times the grade of gasoline is the cause for imposing on the starter. In the greatest percentage of cases it has been found that the ignition system is the least at fault in the motor's failure to start. In some cases, too, it is due to ignorance on the part of the driver in not hastening the activity of the carburetor.

Another detriment to a self-starter's activities and life is the improper use of oil. All electrical contrivances must be oiled carefully. If oil gets on the brushes from an overoiled bearing near by, there will surely be trouble, for the heat will burn the oil to the brushes and commutator and form a non-conducting crust that will cause pitting and act as an inculator. So, even in this phase of the self-starter's career, the brushes and commutator must be kept dry, clean of dirt, and free of oil and water. Care in this will mean long service from reliable starters, which, of course, means much for the car owner's peace of mind.

The Doings of the Duffs.

WEAK, NERVOUS PEOPLE

Such Sufferers Can be Restored by Building Up the Blood.

Nervous people who have not yet developed a disease that can be recognized and treated by the medical profession have the greatest trouble in finding relief. Irritation, headaches, sleeplessness, nervous dyspepsia, all these discomforts make life miserable, but are endured rather than run a doctor's bill without definite hope of an improved condition.

Every sufferer should know the danger of such a condition to the nervous system. Nervous debility and even paralysis may result if the tone of the nerves is not restored.

The one big fact that brings hope and relief is that the nerves can be restored by building up the blood. It cannot be too often repeated that only through the blood can nourishment or medicine reach the nerves. Dr. Williams' Pink Pills make the blood rich and red and quickly restore vitality and energy to a weak, nervous system. A nervous person who gives these pills a trial is almost certain to see good results; and what is more, the benefit will be lasting because the trouble is attacked at its root; building up the blood restores the nerve force. That is why people who occasionally take Dr. Williams' Pink Pills always feel bright, active and strong. Mrs. Wm. McIntyre, Gananoque, Ont., says:—"For a number of years I was always tired and listless. The least noise would so startle me that I would tremble and shake; my heart would flutter, and I would feel as though I were choking. I was almost wholly unfitted for housework, and always so nervous that life was almost a burden. I tried several medicines, but they did not help me in the least. One day I received a pamphlet describing Dr. Williams' Pink Pills and decided to give them a trial. I am glad now that I did so for after using eight boxes they have so strengthened and built up my run-down, nervous system that I can work with pleasure and feel refreshed after a night's sleep. I sincerely hope some similar sufferer may benefit by my experience."

If you are weak, nervous or feeling "out of sorts," give Dr. Williams' Pink Pills a trial and you will be surprised to see how quickly the nervousness will pass away and your former energy return. You can get these pills through your medicine dealer, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The True Celtic Wit.

A good story of an episode that befell him in Dublin a little while before the war, is told to a London newspaper by Adm. Sir Cecil Burney, who was commander of a division at the battle of Jutland.

Accompanied by a friend, he was strolling along the quays when the conversation turned on the alleged gift of repartee possessed by the Irish common people. His companion ventured to throw doubt upon that gift, saying that he believed that it was only a legend.

"Well," retorted Sir Cecil, "I can tell you this, that if you care to test your theory by making some jesting remark to anyone you like round here, you'll get just as good as you give."

"We'll try it!" said the other, and walked over to where an old woman was displaying some fruit for sale on a stall. Taking up a fine melon and addressing the old lady, he said gravely, "You grow pretty good apples over here, mother; but in England we have them twice that size."

The old lady looked up, surveyed the joker coolly, and replied in a tone of pity, "Ah, what far should I be wastin' me breath to talk to wan that takes our Irish gooseberries for apples."

It is not the finding of a thing, but the making of something out of it after it is found, that is of consequence. —Lowell.

when you use it as your regular table beverage for a few days.

It so readily proves its own worth in flavor, comfort, convenience and economy that its amazing increase in use is quickly explained upon trial.

"There's a Reason"

JOFFRE PRESENTS A MEDAL.

And Right Bravely It Was Received By a Real Hero.

Since early morning, writes Mr. Gerald Brandon, ward sixty-seven had seethed with suppressed excitement, for this was to be a red-letter day in its history. The calmest patient was Paul Villiers, who occupied bed No. 9—and yet M. Villiers had special reason to be excited, for he was the cause of "Papa" Joffre's expected visit.

After lunch the ward was furbished up by la petite miss until not a speck of dust remained. Flower vases were borrowed from adjoining wards, and pictures of Washington, Lafayette and the distinguished visitor were draped with French and American flags.

At two o'clock la petite miss, who had been standing guard in the hall, tiptoed in.

"They are here!"

The door swung open, and a broad-shouldered figure in faded blue entered.

"Fixe!" cried Sergt. Levallois from his bed in the corner, and every patient stiffened under his covers, to lie at attention in honor of the generalissimo.

"Repos!" said Joffre kindly; and as the wounded men, with sighs of relief, slid back into comfortable positions, the hero of the Marne approached bed No. 9 and began to read from an official paper:

"Corp. Villiers of the 146th Chasseurs, noncommissioned officer of unusual bravery and initiative, remained at his post in an observation station under heavy bombardment and continued to transmit valuable information after having been gravely wounded. Cited in the order of the day of the entire army, and awarded the military medal and the war cross with palm."

The general stooped over the bed and pinned the medals on Villier's breast; then he kissed him on both cheeks and shook his least wounded hand warmly, while he questioned him about his hurts, his family, and his plans for the future.

Villiers, overcome by emotion, could scarcely answer, although the general, smiling at him in a fatherly way, tried to put him at his ease. Then Joffre's eyes noticed a widening splotch of red that spread slowly on the hero's breast.

"See, doctor," he said to a member of the hospital staff, "the boy has a hemorrhage. Perhaps he is not yet well enough for so much excitement."

The surgeon approached wonderingly, for he knew that Villiers' wounds were in the hip and the arm. Where was this blood coming from? As he jerked open the pyjama coat, Villiers, biting his lip, could not suppress an ejaculation of pain. The sharp pin of the military medal had pierced through his flesh and punctured a vein.

The general poured forth a torrent of self-blame, but Villiers had regained his voice.

"I thank you, my general," he said. "I shall treasure the hurt you gave me more than the medals."

A SPLENDID LAXATIVE FOR THE BABY

Baby's Own Tablets are a splendid laxative for the baby. They are mild but thorough in their action; do not gripe; are easy and pleasant to take and are absolutely free from injurious drugs. Concerning them Mrs. S. P. Moulton, St. Stephen, N. B., writes:—"I have used Baby's Own Tablets for a long time and have found them the most effective laxative I have ever used for the baby." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Advancement of Agricultural Education.

The promotion of welfare of the agricultural community as a basis for the industrial and commercial prosperity of the country, was the object aimed at by the Parliament of Canada, when, in 1913, at the instance of the Minister of Agriculture, the Honorable Martin Burrell, it adopted the measure known as the Agricultural Instruction Act. By means of this Act the sum of ten million dollars was set apart for distribution among the provinces over a period of ten years to provide for a greater extension of instruction and education for those engaged in farming.

An investigation made prior to the introduction of the measure has revealed two outstanding deficiencies in connection with agricultural development. In the first instance, the response to the teachings of colleges of agriculture and experimental farms was too slow to effect an immediate and noteworthy improvement in the conditions surrounding farm life. The second weakness was found in the fact that little or no attempt was being made to adapt the country's educational system to the specific requirements of country boys and girls. The form of instruction was the same whether the child was destined for employment in the country or in the town.

The placing of funds at the disposal of the provinces in the manner indicated has led to a much wider extension of instructional work among the men and women and boys and girls who are living on the land. A marked development of the short course idea has resulted in the extension of courses in agricultural topics and in household science throughout the country. These courses are designed not only for farmers and their wives but for the young men and women who have left school and are about to actively enter upon the affairs of life. In the schools themselves an attempt is being made to develop a system of instruction which will utilize the objects associated with rural life as a medium through which to educate the child. In the higher departments of education, the efficiency of the provincial colleges of agriculture has been promoted, and, in several provinces, at least, schools of an intermediate grade, as between the public school and the agricultural college, have been established. The object of these special schools is to provide vocational training in agriculture and household science. As time goes on and their usefulness is demonstrated, it is certain that, owing to the financial assistance given by the Act, their influence will be greatly extended. How wide a field is being covered by agricultural instruction work is indicated in a pamphlet just issued by the Dominion Commissioner of Agricultural Instruction, Mr. W. J. Black. It is entitled "Agricultural Instruction in Canada," and a copy may be had on application to the Publications Branch of the Department of Agriculture at Ottawa.

FERTILIZER

ONTARIO FERTILIZERS, LIMITED
WEST TORONTO - CANADA

SILK-MAKING BUTTERFLIES.

Product Compares in Quality to That of Silkworm.

There is a species of butterfly, native to British East Africa, that builds communal nests as big as a man's two fists. These nests, attached to branches of the trees on whose leaves the insects as caterpillars feed, are made of a good quality of silk.

Inside the nest, however, are some hundreds of individual cocoons. Thus one might say that the bunch represents a whole flock of butterflies.

But the important point is that the silk of the cocoons is comparable in quality to that spun by the silkworm, and claim is made that it might be utilized profitably for the weaving of fabrics, the coarser material of the nests finding industrial employment as "floss."

GIRLS! LEMON JUICE IS SKIN WHITENER.

How to make a creamy beauty lotion for a few cents.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth as no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

Relieving Congestion at Terminals.

Serious congestion in Grand Trunk and Canadian Pacific terminals at Toronto and other points, has been obviated by the co-operation of the Canadian Northern Railway in handling over its trunk line between Toronto, Ottawa and Montreal, a large number of cars which the other roads were unable to forward, according to figures issued here yesterday.

Up to Feb. 18th a total of 1256 loaded Grand Trunk cars destined for eastern points, had been accepted by the Canadian Northern at Toronto and moved east over its lines. Relief was extended to the C.P.R. to the extent of 360 cars, making a grand total of 1616 cars.

It is officially announced by the Canadian Northern that the road will further co-operate with the other lines to the extent of 60 cars daily from the Grand Trunk at Toronto and 40 cars each day from the C.P.R. at Sudbury to be handled over the transcontinental line of the C.N.R. as far as Ottawa.

Thrift.

She was comely and a widow, and moreover she was Scotch. She mourned MacIntosh, her late husband, for eighteen months, and then from a crowd of suitors chose honest, homely Macintire for her second.

"I'm no guid enough for ye, dear!" he whispered. "What for did ye choose me oot o' sae mony?"

"Ah, weel, ye see, your name's Macintire."

"Yes, but—," began the bewildered suitor.

"An' ye ken," finished the widow, "all my linen's marked 'Macl.'—that's why, Donald."

Gunns Shur-Gain Fertilizer

Quiet Life.

Happy the man whose wish and care
A few paternal acres bound,
Content to breathe his native air
In his own ground.

Whose herds with milk,
Whose fields with bread,
Whose fields supply him with attire,
Whose trees in summer yield him shade,
In winter fire.

Blest who can unconcernedly find
Hours, days and years slide soft away
In health of body, peace of mind;
Quiet by day,
Sound sleep by night; study and ease
Together mixed; sweet recreation
And innocence, which most does please
With meditation.

He Knows Just Why He Admires Them

Dodd's Kidney Pills Cured Mrs. Mercredi.

She Had Been Ill Two Years and Could Find No Cure. That's Why Her Husband Is Enthusiastic Over Dodd's Kidney Pills.

Fort Smith, Alberta, March 11th (Special.)—Among all the thousands of Canadians who praise Dodd's Kidney Pills for the good they have done, there is no more fervent admirer of the great kidney remedy than Isidore Mercredi, of this place.

"Yes, it always gives me pleasure to say a good word for Dodd's Kidney Pills," Mr. Mercredi says. "My wife was sick for two years. We could not find anything to restore her to health. Then we found a pamphlet telling of several persons who had been cured by Dodd's Kidney Pills.

"My wife used just two boxes of them and she is perfectly well, to the great surprise of all our neighbors. They can tell you the same thing. I cannot recommend Dodd's Kidney Pills enough."

Dodd's Kidney Pills are the greatest of all remedies for weak, suffering women. They cure the kidneys. The kidneys are the root of nine-tenths of women's ills. Moreover, cured kidneys mean pure clear blood all over the body. That means good health everywhere.

Unselfish.

Auntie was trying to teach her spoiled nephew to be unselfish.

"Did you do as you were told, Billy, and give your brother the best part of that apple?"

"Yes, aunt," said the youngster, "I gave him the seeds. He can plant 'em and have a whole orchard himself!"

Minard's Liniment for sale everywhere.

Cooking bags are paper bags used for steaming or warming up food. Common store bags make good ones. Biscuits, etc., are put in these. Then the bags are sprinkled lightly with water, tied up at the end and put in the oven for five or ten minutes.

THE BELGIAN NEED.

A letter has just been received from the wife of the French Ambassador to the Belgian Government at Havre, saying: "Can you not raise funds for our poor Belgian prisoners? or even if you could go to the hotels and restaurants and ask for their waste bread; when first dried in the oven it keeps well, and is far better than anything they get from the Germans."

Andrew Carnegie was once asked which he considered to be the most important factor in industry, labor, capital or brains? The canny Scot replied, with a twinkle in his eye, "Which is the most important part of a three-legged stool?"

We have been using MINARD'S LINIMENT in our home for a number of years and use no other Liniment but MINARD'S, and we can recommend it highly for sprains, bruises, pains or tightness of the chest, soreness of the throat, headache or anything of that sort. We will not be without it one single day, for we get a new bottle before the other is all used. I can recommend it highly to anyone.

JOHN WALKFIELD.
Lallave Islands, Lunenburg Co., N.S.

A quickly made glue is obtained by rubbing a little piece of cold boiled potato on a sheet of paper with the fingers.

Patriotism.

Breathes there a man with soul so dead,
Who never to himself hath said,
"This is my own, my native land!"
Whose heart hath ne'er within him burn'd
As home his footsteps he hath turn'd
From wandering on a foreign strand?

—Sir Walter Scott.

Minard's Liniment Relieves Neuralgia.

To Make Clothes White.

Few people know that /to take stains out of clothes and make them beautifully white, a sliced lemon put into the boiler, when boiling, and allowed to remain until the clothes are ready to come out, will accomplish this happy result. The rind of the lemon must be removed and the fruit cut up in slices.

Minard's Liniment Cures Dandruff.

The white of a negg when used instead of water for mixing mustard poultices prevents the skin from blistering.

WITH THE FINGERS!
SAYS CORNS LIFT OUT
WITHOUT ANY PAIN

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding tissue. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.

The Soul of a Piano is the Action. Insist on the "OTTO HIGEL" PIANO ACTION

Doctors Recommend Bon-Opto for the Eyes

Physicians and eye specialists prescribe Bon-Opto as a safe home remedy in the treatment of eye troubles and to strengthen eyesight. Sold under money refund guaranty by all druggists.

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. 15 to 30 drops of Mother Seigel's Syrup will correct faulty digestion and afford relief.

No Need to Rub

Try Sloan's Liniment and see how quickly the swelling is reduced and the pain disappears. No need to rub it in—penetrates quickly and brings relief. Have a bottle handy for rheumatic pains, neuralgia, backache and all muscle soreness.

Generous sized bottles, at your druggist, 25c., 50c., $1.00.

Sloan's The World's Liniment

Sloan's prices not increased 25c 50c $1

Hard boiled eggs that are to be served cold in salad should directly after cooking be placed in cold water. This will prevent the outside of the yolk from turning dark.

Minard's Liniment Cures Burns, Etc.

HAULING BIGGER LOADS

without extra spanning is easily accomplished when you use

MICA AXLE GREASE

"Use half as much as any other"

Axles are rough and porous, causing friction. The mica flakes fill the pores and the grease keeps them there. Mica Grease prevents locked wheels and hot boxes, gives sure relief for unnecessary strain on horses and harness.

EUREKA HARNESS OIL

"Lengthens leather life"

replaces the natural oils that dry out of the leather and puts new life in old harness. It penetrates the leather leaving it soft and pliable, and overcomes the worst enemies of harness—water and dirt.

Sold in standard sized packages by live dealers everywhere.

IMPERIAL OIL LIMITED

BRANCHES IN ALL CITIES

DOES YOUR STOMACH CONTAIN A GLASSFUL OF ACID?

95 OUT OF 100 DYSPEPTICS HAVE DANGEROUS ACID IN THEIR STOMACHS, WHICH MUST BE NEUTRALIZED IF GOOD HEALTH IS TO BE MAINTAINED.

If you hold a teaspoonful of hydrochloric acid in your mouth for only a second you would not be surprised at its burning and infamies all the tissues; yet an eminent specialist states that 95 out of 100 dyspeptics go about with a glassful or more of this powerful acid in their stomachs and then wonder what causes the burning and aches and why they suffer so discomfort after meals. To put wholesome food into an acid stomach only increases the discomfort, because the acid mixes with the fresh food and turns it sour, making a lot more acid. The acid condition causes food fermentation which irritates, distends and inflames the tender stomach lining, and it is not surprising that specialists say acid stomachs are dangerous. This decidedly dangerous and uncomfortable condition can be overcome either by following a strict diet or, and this is far easier and more quickly effective, by taking a teaspoonful of Bisurated Magnesia in a quarter glassful of water after meals to neutralize the acidity. The latter course is much more satisfactory because it corrects the acidity and banishes discomfort without any need for diet.

PINKERTON

The whole community was shocked and saddened when it was learned that Mr Albert Pinkerton had passed away on Sunday morning. The deceased contracted a severe attack of pneumonia and after a short illness succumbed, although everything was done for him that could be done. He was well known throughout the country and took an active interest in everything which was for the welfare of the community and state. He was an active member of the Presbyterian church, being treasurer for some years and also on the managing board; he was a school trustee and sec'y-treas of the Pinkerton Agricultural Society. His place as postmaster and general merchant will be hard to fill and he will always be remembered for his honesty and straightforwardness and by his efforts to please everyone. The late Mr Pinkerton was a staunch supporter of the Conservative party and was a valued member of the Bruce Preparadness League. He leaves to mourn his loss, his wife and eight children, Gordon, the eldest being overseas with the 166th Batt., Aileen attending Stratford Normal, Marie attending Walkerton High School and Harvey, Alberta, Everett, Elwood and Ronald at home. The sympathy of the whole community goes out to the widow and children. The funeral on Tuesday afternoon was largely attended and was conducted by Rev Mr Gale.

Rev Mr Richardson, of Arthur, visited at the manse last week.

Lieut Harold Pinkerton, who joined the Aviation Corps some time ago, is training in Texas and is now making flights in his aeroplane.

The remains of the late Sarah Jane Bell, daughter of Mrs S Bell, arrived home from London on Saturday. The funeral took place on Monday afternoon to Purdy's cemetery.

Rev Mr Wilson will conduct the service here on Sunday afternoon.

Mr Horace Moffatt had the misfortune to cut his foot while working in the bush and is now confined to the house.

Mr and Mrs Stringer (nee Irene Culham) called on friends here last week, prior to leaving for the west.

Rev Mr Gale attended a committee meeting in London on Friday.

The ladies of the Red Cross Society are grateful for the following sums: Mr D Pinkerton, $6 50, proceeds of cheque for work on county road; Greenock Tp council, $50; and to Mrs A Bain for her donation of $64, being proceeds of social and money received for cushion.

GLAMIS

The St Patrick's box social on Friday, the 15th, in aid of the Red Cross was a great success. The hall was packed. A good program was rendered, consisting of Irish songs, recitations, violin music with organ accompaniment, dialogues and tableaux. Mr McCauley made a good chairman. His stock of humorous Irish stories was inexhaustible. Mr D Robertson made a splendid auctioneer. About 65 boxes were sold, bringing in altogether over $165. Two pair of socks were sold, one pair knit by the oldest knitter, Mrs MacIntyre, aged 91, the other by the youngest, Evelyn Green, aged 12 years.

Mr Dan McLean's mother on the 2nd met with an accident from a fall downstairs.

Mr Neil Currie and daughter Margaret, were called to Kincardine on account of the serious illness of an aunt, Mrs McKenzie.

Another well known and highly respected citizen of the boundary passed away on Friday afternoon in the person of Miss Mary F Mg-Padyen. Her death came as a surprise and shock to her many friends, as she had only been sick a few days. The funeral on Monday to Tiverton cemetery was well attended. She was laid beside her father and mother, one sister and several brothers who predeceased her a good many years ago. Much sympathy is felt for her brother Neil, with whom she lived and kept house. She leaves to mourn her loss two other brothers, Hugh and Gideon, and a sister, Mrs Atkinson, all of Manitoba.

Mrs Parkhouse, of Kincardine, was up attending the funeral of the late Mrs McFadyen.

—Tara council is advertising the Greenock foundry, with a view to getting some individual or firm to carry on manufacturing there.

SECOND CON. ELDERSLIE

Mr and Mrs Wm Pruder have moved to the Ackenmad farm.

Henry Schmidt, from Bentinck, has moved to the Pepper farm, lot 21, con 2.

Mr Paglo, of 2nd con Brant is moving to the Hope farm and Russel Maxwell will soon be settled in his new home on lot 25, con 3.

D C Lillico of Toronto is spending this week at the home of his parents here.

A number of the farmers of this con intend to go into the maple syrup making on a large scale.

Mr and Mrs A McCulloch and family of Saugeen visited friends here on Saturday.

Gordon Vancise who has been visiting his brother James here for the last two months, has gone to Saskatoon to spend the summer.

Thos Smith, jr, is preparing to improve his barn during the coming summer.

Calvin Jackson who has spent the winter visiting friends here has returned to his home in the west.

Mr J Allen was in Toronto for a couple of days last week.

Robt Henderson of St Marys is visiting his mother on this con.

The sympathy of this community is extended to Mr and Mrs H Catto by the death of the latter's brother, Mr J W Turner of Scone.

While assisting in the moving operations at Mrs S Gribble's last week Jas Henderson had the misfortune to have his leg broken. A barrel of salt which he and another man were taking from the cellar, accidentally slipped, causing the fracture.

Mrs S Gribble and family have moved to their new home in Chesley.

Died—In Chesley, on March 9th Isabella Reard, relict of the late Vickerman Addison, aged 79 yrs and 8 months.

After an illness extending over almost a year, Mrs Addison passed peacefully away on Saturday. Deceased was born in Yorkshire, England, and came to Canada in 1856. She lived in Vaughan Tp for four years, where she was married to Vickerman Addison, and they moved to Brant Tp., where they lived until 1876, when they came to the 2nd con Elderslie. Over four years ago Mr Addison was called away, following which the widow and two daughters moved to Chesley. The members of her family who mourn the loss of a kind and loving mother are David, Annie (Mrs McLeod), Dina, Isabella, (Mrs H Adolph) os Chesley and Geo, on the homestead. The funeral on Tuesday last was largely attended.

Mr. and Mrs. M. Thompson spent Sunday with Mr. and Mrs. W. Young.

Mrs. A. McGregor and little son Donald visited for a few days last week with Mrs. McGregor's parents, Mr. and Mrs. R. Tulloch, 8th Brant.

The 2nd con. robins and thrushes are singing their welcome to spring.

Mrs. J. Caldwell has been under the doctor's care again with another attack of kidney trouble, but is somewhat improved.

Mrs. W. J. Allen and daughters, Catherine, Elizabeth and Fina, visited Brant friends on Saturday and Sunday.

Mrs. J. B. Allen and Miss M. Burrell visited Paisley friends one day recently.

SIXTH BRUCE

Miss Pearl Reptke has been visiting for the past week at Mr David Wittig's, 4th con.

Quite a number from here took in the presentation at Mr R Teeple's on Thursday evening. All report a good time.

Miss Marie Mewhinney is at present at Mr D Lyon's, Paisley.

Mr Jos Foster sold a valuable team to Mr David Bryce

Miss Olive Foster is visiting friends in Paisley.

Mrs Wm Woods, from Tiverton has been visiting at the home of her mother Mrs A Colwell.

Miss Maimie Foster is at present at Dr Gage's.

Mr John Reptke has purchased the farm of Mr Chas Johnston, 2nd Saugeen, and intends moving shortly.

Children Cry
FOR FLETCHER'S
CASTORIA

ELORA ROAD NORTH

Messrs Neil McArthur and Rich Harcourt have gone west in charge of a shipment of horses.

Miss Katie and Mr Garnett Campbell are visiting their brother at Waterford.

Mr Richard McGill had a fine yield of sweet clover seed.

Mr Sam Rae had his foot badly cut with an ax last week.

Mr Dave Bryce has bought a new team and also a driver.

Mr Dinsmore, of the 10th con, has bought Mr Thos Sparrow's 40 acres in Hungry Hollow.

Mr John Walker sold his bay team to Mr Thos Irwin.

The Dunblane hill has been shovelled out so that people going north at night will not be so likely to get lost in the fields.

PRESENTATION IN GREENOCK

After a life-long residence on the 20th con. of Greenock, Mr. Geo. J. Davison is about to remove from this farm there, and before doing so the neighbors gave him a pleasant surprise and hearty send-off. On Friday evening last a large number assembled at the Davison home, informally taking possession thereof. Mr. Roscoe Teeple was chosen as master of ceremonies. The initial proceedings of the evening was the presentation of a fine club bag to Mr. Davison, gold pins to his daughters Bessie and Edith, also a manicure set to his sister, Miss Davison. The following address was read by R. J. Nelson, while Messrs. H. Lyon and Wm. Stewart, and Miss Beatrice Lyon made the presentations:

To Mr. Davison,—daughters and Miss Davison:

That you are about to remove from our midst, we feel that we cannot allow you to do so without in some way expressing our esteem and good wishes. For that purpose we have assembled in your home this evening. We feel that during your long residence amongst us—which means from early childhood—you have always conducted yourselves in such a manner as to merit the esteem of your neighbors. You have been ever ready to aid those in need of assistance, ever ready to assist in any enterprise of a public nature, and you, Mr. Davison, in your capacity as secretary of the school board, have given unstintingly of your time in the interests of the school section. We feel that in your removal the section is sustaining an irreparable loss. As a remembrance of the good wishes of your friends, we ask you, Mr. Davison, to accept this club bag, you, Miss Davison, this manicure set, and you, Misses Bessie and Edith, these pins, which only in a very slight way express the respect in which you are held. We trust that long years of happiness and good health may follow you in your future home wherever it may be, and that you will ever remember with friends in Greenock.

Signed, Harry G. Lyon, R. W. Stewart.

Mr. Davison made a suitable reply, after which a short programme was rendered at the call of the chairman. Short speeches were made by Messrs. W. H. Davison and R. Acton; recitations by Miss Hazel Ritchie and W. Megraw; duet by Annie and Bertie Ritchie. For several hours later the company found enjoyment in games, amusements and dancing.

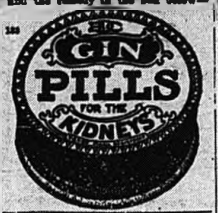
FOR FLETCHER'S
CASTORIA

WALKERTON

Mr. Jas. Cahoon sold his 100-acre farm on the 6th con. Brant, on Monday of this week to Mrs. L. Dietrich for $10,000.

Irwin Bros. shipped four cars of horses to the west on Tuesday. Alvin Glintz accompanied a palace car of young Percheron stallions from here and Wm. Wakefield a car of heavy mixed horses, while Herbert Neilly took charge of two cars from Paisley. All told seventy steeds went over the rails to Saskatchewan for Irwins on Tuesday.



Mr. David Noble, a former reeve of Brant township, is retiring from farming after successfully following agriculture on the same farm near Walkerton for about sixty years. Mr. Noble has all told three hundred acres of the finest land to be found in Brant, and having worked hard and prospered immensely he can now rest from his labors without fear that any pecuniary want will ever overtake him.

Mr. and Mrs. Arthur Grierson, of Brant, are mourning the loss of their only child, John Robert Grierson, a bright little chap of nearly ten months, who succumbed on Sunday morning under sad and peculiar circumstances. The little fellow had been having trouble teething, and in an effort to relieve and assist him, the gums of the youngster were lanced. All went well until a few days after the operation, when the gums suddenly started bleeding, and although everything was done to stop the hemorrhage, the babe gradually declined until its tender life went out.

A delegation representing a number of the members of Knox church here gave Rev. Thos. Wilson a surprise when they called on him last Friday night and presented him with an address and a purse containing $215 in testimony of their esteem and appreciation of his services to his congregation in spiritual matters, and also the services he had rendered to the community in general as a citizen. . . . The presentation had been decided on before it was known that Mr. Wilson intended to separate himself from Knox church and the original intention was to present the gift on the fifteenth anniversary of Mr. Wilson's coming to town, but as the revered gentleman had decided to resign his pastorate it was thought once. . . . Mrs. Wilson was similarly better to make the presentation at honored, when about twenty ladies of the congregation met at the home of Mrs. J. Rowland on Monday afternoon, and after a dainty tea had been served, the guest of honor was presented by Mrs. Rowland on behalf of the ladies with a handsome gold wrist watch and an address.

The big auction sale staged on the market square, Walkerton, on Thursday last by the Bruce County Stock Breeders' Association, drew an immense crowd and was an unqualified success. All the fifteen pedigreed animals which came under Auctioneer Purvis' hammer changed hands, the average price being $130 per head. A Shorthorn bull consigned by Mr. Edwin Tolton, of Brant, brought the highest figure at the sale, it being turned over to Mr. Thos. Mercer, of Markdale, for $170. A Shorthorn heifer consigned by Mr. Herbert H. Pletsch, of Carrick, came second at $156, the purchaser being Mr. Louis Baster, of Cargill. The Association is doing good work by inciting the raising of better stock and improving the herds of the county.—Herald and Times.

Are These YOUR SYMPTOMS?
Pains in the Back or Sides, Constant Headaches, Swollen Joints, Urinary Troubles, Stone or Gravel? You will find the remedy in the box below—

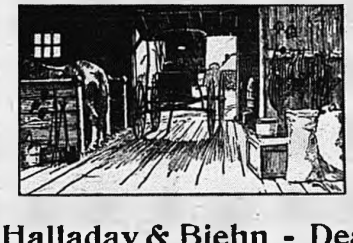
SINCLAIR'S HARDWARE



A Ford Car Takes the Place of all These Things

WHEN you own a Ford you can do away with many articles that are a source of continuous expense to the man who still drives a horse. For instance, not only your driving-horse and buggy, but the single harness, blankets, whips, currycombs, brushes, horse-shoes, pitch-forks, feed-bins, etc.

In their place you have a speedy, dependable, dignified, roomy Ford Car—complete in itself. It is vastly superior to the narrow, cramped buggy that travels so slowly. And when a Ford is standing idle it does not eat three meals a day, and it requires no "looking after."

A Ford will save you time, trouble, and money. It is the utility car for the busy farmer and his family.

CARGILL

Mr. Saunders, of the Dominion Well Supply Co., made a business trip to London last week.

Mr. and Mrs. J. T. Clancy, of Walkerton, visited at Mr. John Clancy's last week.

Rev. Storey is preaching a series of sermons in the Methodist church on the influence of Jesus. Last Sunday his topic was "Christ, the bread of life." Next Sunday it will be "Excuses men make for not following Christ. Easter Sunday his subject will be "The influence of Christ's resurrection."

Corp. Harold Loughleen, of the A. M. C. of London, spent Sunday at his home here.

Mr. H. Zettler and family have left for the wild and woolly west, where they go to try their luck at farming.

During the month of February the Women's Patriotic League made and shipped the following articles: 128 lined sox, 49 personal property bags, 39 suits pyjamas, 29 surgical shirts, 6 quilts, 84 prs sox.

Miss T. Wurm left for Guelph last week, where she has taken a position.

Mr. John Hall, jr., is home from Guelph with an injured hand, which he had hurt while working in a munition factory.

The home of ex-Reeve and Mrs. Samuel Hawthorne, of Greenock, was the scene of a very pretty wedding, when their third daughter, Myrtle, was united in marriage to Gordon L. Collins, of Toronto, Rev. J. W. Sanderson officiating. The bride, who was unattended, was prettily attired in navy blue chiffon taffeta, and carried a boquet of bridal roses. The bride, who was a C.P.R. telegraph operator at Toronto, was the recipient of many costly gifts. The young couple will reside in Toronto, where the groom has a lucrative position.

The sap has commenced running in this section, and a good flow is anticipated. James Garland has 1,300 trees tapped, and Arthur Johnston 1,000. Many farmers who never did any tapping before are doing so this year.

To Clover Seed Growers

HAVING bought a machine for cleaning Buckhorn or Ribgrass from clover seed, am prepared to clean all brought to my premises, 2 miles from Paisley, on township line, Greenock. Also a quantity of good red clover seed for sale, also some timothy seed. D J PORTER.

—Kincardine had a visit from G.T.R. railway officials a few days ago. The Reporter says that in conversation with Supt. Fish he pointed out that the present service was by order of the railway board. He did not know how long it would last. He realized the inconvenience the branches affected were having to put up with. He trusted that this would be overcome shortly and the old service restored.

Notice our Crepe de Chene in black, navy, green and white, very special value, sold in all the leading stores at $1 50 a yd, we have it at $1 35 spot cash. We have also a beautiful line of Serge Dress Goods in all the leading shades and at special value. We are showing a big range of Wash Goods in Voiles, Marquisettes, Zephyrs, Dimitys and Ginghams. We have also a wide range of

Goods for the Men and Boys

at special value. See our Ready-to-wear Suits, Shoes, Rubbers, Hats, Caps, Shirts, Braces, Neckties and Gloves, all of which are new and up-to-date goods for our spring trade, and if you purpose taking a trip we can also fit you out with a Trunk, Suitcase or Club Bag.

Groceries

Our shelves are now well filled with fresh Groceries of all kinds. We have very special value in Tea. See our Uncoloured Japan at 3 lbs for $1 to. SUGAR—We can supply you with the Sugar you require from time to time, but owing to the present congested state of railroads and the importance of giving preference to all supplies for soldiers' overseas shipments, sugar to the trade is somewhat limited. We will, however, sell you Redpath's Sugar, 11 lbs. for $1, Cash, and as soon as transportation gets back to normal conditions after the severe winter, there will be lots of sugar, and it is almost sure to be as cheap as ever, cheaper than at present.

Bring us your Butter, Eggs, Potatoes, and all other Farm Produce, for which we always pay Highest Market Prices

Our Milliners

Were much pleased with the orders so kindly given them on their formal opening days, and this week will see a big boom in this department. Leave your orders early in the week so as to be sure of your new headdress for Easter Sunday.

D. H. COOPER

—Mr. Hugh Watt has bought Mr. W. Anstead's property on Goldie St., just outside the village. Mr. and Mrs. Anstead have moved to the McPhee farm house on Elora road north.

—The inhabitants of the Venetian end of Paisley were relieved of great apprehensions when the weather turned colder after the three days' thaw last week. Another half day of the warm spell would have put us all on Water St. sure. As it was, long rubber boots were in demand for a few days.

Supervisor Gets a Raise

At a special meeting of council on Thursday night it was decided to increase the salary of Supervisor Murdoch Leitch to $650. This will help the chief some in meeting the h. c. l., which affects men in his position as much as others nowadays.

In the Drafts to France

The first definite word we have heard as to which and how many of the boys of the 160th from Paisley and vicinity have gone to France gives only six names—Dick Mills, Stewart McLaren, Asst. Bain, Wm. Cunningham, Jas. Forrester and — Kidd (Saugeen).

Farmers' Stock Shipping Club

At a meeting of representatives from the Farmers' Clubs in Elderslie, Greenock and Bruce, a live stock shipping club has been formed, with Messrs. John Barnafather, E. J. Nelson and J. W. Howe as a board of management, and Wallace Megraw as manager. They solicit the patronage of the farmers, and promise a square deal. See their adv.

—The property of Mrs. A. H. McCallum was not long on the market. An advertisement offering it for sale appeared in The Advocate last week, and a sale was effected next day to Mr. John McGillivray, of 6th Bruce.

—Major John Aird and Mrs. Aird were up from Toronto last week visiting the latter's sister, Mrs. T. Muir. Major Aird is an officer in the Royal Flying Corps. He was a year on the air service in France, and is the only one of three aviators sent out to take observation photos before the Ypres engagement who returned to the lines, and the snaps he secured were of great value to the Allies' army plans. He returns to England this month.

Pte. Sam Babcock Home from Overseas

With his eyesight badly affected by a dose of German gas, but otherwise in very fit condition, Pte. Sam. Babcock was among the returned soldiers who arrived in Canada last week. Pte. Babcock went over with the forestry battalion last year, and for several months was engaged in cutting operations in a forest in France. Later he was sent with a railway construction corps to repair the damages that Frits was making to the military railroads at the front. It was while working there that a mustard gas shell came over, and Sam was nearly blinded by the pungent fumes. The treatment he received since has partially restored his sight, and while he is unable to do his bit in France, it is hoped that he can still count for a good deal somewhere on the producing line at home.

ADVERTISING RATES

EASTERN SIBERIA COLDEST REGION

WHERE THE SOIL IS ETERNALLY FROZEN.

Inhabitants of the Province of Zakutsk Dwell in Air Chilled to Eighty Degrees Below Zero.

The earth's coldest region is the Siberian Province of Zakutsk, where the mercury often records 80 degrees below zero!

Here the soil is eternally frozen for hundreds of feet downward, and the inhabitants dwell in a frigid blight of chilled air, so cold as to ward off storms.

This vast Siberian oblast, unknown even by name to the average man, is as big as the whole of Russia in Europe. Situated between longitudes 102 and 172 and latitudes 54 and 73, it lies directly north of Mongolia and well north of the Trans-Siberian Railway zone of semi-civilization. Walled off by the Yablonov Mountains from the warm winds blowing from the great deserts of Central Asia and exposed to the Arctic storms from the north this territory surrounds the Asiatic pole of cold, with far lower temperatures than the region about the North Pole itself.

Though the broad, trackless belt of the sub-Arctic forest sweeps through its southern latitudes and mountain chains rising to peaks of 6000 and 7000 feet are to be found in the northeast, the great bulk of the oblast of Yakutsk is dreary tundra, impassable swamp during the brief summer thaw and a featureless sea of driven snow for nine months of the year.

Influence of Ever-Frozen Soil.

The eternally frozen soil begins in the southern parts of the province. Around the City of Yakutsk, its chief town and administrative centre, experiments show the ground is frozen to a depth of many hundred feet. At the height of summer only a yard of unfrozen soil veneers the admixture of earth and ice, affording foothold for the gray tundra moss and occasional patches of bilberry, dwarf willow and grass.

This ever-frozen soil exerts a great influence on the configuration of the lakes and rivers. It prevents the absorbtion of the water by the earth. There are no springs and no subterranean waters. It accounts, too, for the greater number of lakes and marshes in northern Siberia. For the same reason the rivers are very prone to rise and overflow their banks after a day or two of heavy rain.

The multitudinous streams and pools freeze up at the end of August, and before the end of September the region is clad in its mantle of snow. Down, down sinks the mercury day by day. Early in October it is hovering just above zero, Fahrenheit, and during the next few weeks it sinks to 22 under. December, January and February produce degrees of cold of which dwellers in a more fortunate clime can form little conception.

A warm February day may give as high a reading as 40 under in the north of the province, while a chilly spell sends the mercury diving down to 80 and even 90 degrees Fahrenheit below zero.

Months of Darkness.

The terror of the Yakut winter is increased by the darkness, especially in the northern regions, where the winter might continue for months. Only in the month of April do the horns of the bull of winter begin to break, as the Yakuts say. The sun rises higher and higher every day. Its rays in the clear air begin to melt the snow on the roofs of houses, while in the shadow the temperature still marks 20 degrees Fahrenheit below zero.

In April terrible storms prevail. The transition between winter and summer is so sudden that one can hardly speak of spring and fall. The snow melts with incredible rapidity, and the water, flowing into the valleys, lakes and rivers, lifts the thick ice that has been riven into fragments by the intense cold.

In the lakes the ice melts slowly and the storms which drive it against the shore only crush it little by little. In the rivers, on the other hand, the ice is broken up and borne toward the sea by the powerful spring floods.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Kites For Air Targets.

Accurate marksmanship with anti-aircraft guns is very difficult. To develop it requires special practice, for which, it goes without saying, ground targets are unsuitable.

One puzzle involved is to judge the height at which an airplane is flying. This is of utmost importance, because shrapnel or other shells must be timed to explode as close as possible to the aircraft aimed at.

Experienced gunners are able to guess pretty closely by noting the apparent size of the airplane. The greater the elevation at which it is flying, the smaller it looks, of course.

For practical purposes our anti-aircraft gunners are using huge kites, which, with piano wires for "string," wound on a big reel, can be sent up half a mile or more. They will stay up, too, until fairly riddled with holes.

The AUTOMOBILE

The Spring Overhauling—I.

The first work on the car itself should consist of a good cleaning to remove all mud and dirt from all parts. The body work is not so important right now as the moving parts of the chassis. You will get underneath and besides using a large soapy sponge and much water you may have to scrape some of the dirt off. Use wooden sticks for scraping. Work around the steering knuckles, around the universal, etc., which the garage washer usually overlooks. The car perfectly clean, proceed with the work on the engine. You probably know from the last performance whether it needs carbon removal or taking up of bearings. Did it overheat, knock, pull hard, miss fire? If it did most likely it needs carbon removal, but if the engine is otherwise all right and there is no detachable cylinder head leave carbon removal for the garage offering the oxygen treatment. If the cylinder head is detachable and you want to scrape out the carbon, the work itself merely means using special tools for scraping off the incrustations on the piston top and cylinder head. Any supply store sells the tools. If you do this work, grind the valves also, since they probably need it and the work is half done with the valves exposed.

Each owner knows whether certain work on the engine proper is needed. For example, a car with a silent chain timing drive may need chain adjustment, another make may have a tire pump drive that is noisy, a third some other part as this which needs attention. Such specific information cannot be given because of lack of space.

Now start with one of the engine systems, either cooling, oiling, ignition, starting and lighting or carburetion, go through each one carefully and then pass to the next. Whether thermo-siphon cooled or pump cooled drain the system. You might flush it with a soda solution, but that will help little if there is any sediment in the radiator tanks or the system otherwise partly obstructed. If the fan belt has too much slack take it up and tighten the fan support. Clean the holes in the radiator, with a small stick, and if you have been using strong anti-freeze solutions, especially kerosene compounds, examine the rubber hose connections. The inside often swells and obstructs the passage. If there is a pump which leaks at the packing nut remove the nut and insert new packing.

Next take the lubrication system, and the time needed for this work will depend largely on the type of system. In an ordinary splash system all you have to do is drain the old oil, flush the crank case with kerosene and refill with fresh oil. In a pressure or combination pressure and splash, aside from draining you will have to clean out all oil carrying lines by means of air from the tire pump. Clean the oil strainer too and tighten all the oil line connections.

Then go over the ignition system. Clean and adjust the spark plug terminals, examine the wiring for poor insulation and tape the bad spots. Bind up all loose wires. Clean the ignition distributer, file the brushes, if there are any, clean and adjust the breaker points, tighten all wires after the terminals have been cleaned.

As to the starting and lighting system little can be said that the average owner is asked to do. An inspection of the wiring and oiling up is all that I would recommend he do unless he is familiar with such apparatus.

ACID STOMACH IS DANGEROUS MOST FREQUENT CAUSE OF CHRONIC DYSPEPSIA.

You must neutralize the acid in your stomach, says Doctor, or give up eating sweets, meats, potatoes and salads and quit drinking tea, coffee or liquor.

Alarming increase in dyspepsia and stomach disorders is largely due to too much rich food, and the widespread use of so-called digestive tablets and pills which give only temporary relief at the expense of ruining the stomach later on.

The best way is to consult a reliable stomach specialist or take a little ordinary bisurated magnesia—nothing else—to correct the stomach acidity, and thereby remove the cause of your stomach distress.

Put a teaspoonful of hydrochloric acid in your mouth, and if there five minutes and all the gases will be burned and inflamed. Yet you go around with a sickly or more of this same powerful acid in your stomach and then wonder why your stomach burns and heats and your food will not digest. And when you put food into an acid stomach, the acid simply combines with the sweets, meats and potatoes you eat and the tea, coffee and liquors you drink, and makes a lot more acid.

Next, the acid may eat into your stomach walls, producing a stomach ulcer or cancer, and only all the cases of stomach ulcer ever get well under the most skilful treatment; the others, sooner or later, all die, and stomach cancer practically always means death in a year at most. But this is not all. The acid in your stomach passes on into the intestines, upsets them and disarranges your liver, so that you may soon require a serious operation with the surgeon's knife for gall stones or appendicitis.

Generally when people have sour or acid belching or eructations, heartburn, or a burning sensation at the pit of the stomach or other symptoms which indicate stomach acidity, they take some advertised digestive pills or buy a box of tablets from the nearest druggist. Such remedies may give temporary relief, but if you go on filling your stomach with a lot of drugs you may get to the point after a while when no food of any kind will stay on your stomach, and you will have an incurable case of stomach trouble. Therefore be very careful what you take. The best way is to consult a reliable stomach specialist or take a little ordinary bisurated magnesia—nothing else—to correct the stomach acidity, and thereby remove the cause of your complaint.

If you have an acid stomach, you must confine yourself to a diet of milk and eggs, or if you wish to eat such articles of food as meat, potatoes, salads, sweets or rich foods or gravies, or drink beer, wine, liquors, tea or coffee, you must take a teaspoonful of bisurated magnesia immediately after eating to neutralize the acidity. Statistics show that 80 per cent. of the people who have dyspepsia and indigestion have an excess of acid, and that this is the real cause of their trouble.

Keep the acid neutralized at all times by the free use of bisurated magnesia so that it no longer inflames the stomach walls, eat slowly and masticate your food thoroughly, and your stomach will soon get well of its own accord.

Bisurated magnesia is absolutely harmless. It is generally prescribed by physicians to be taken in teaspoonful doses immediately after eating or whenever you have any distress from excess acid; but it may be used in much larger quantities and much more frequently with perfect safety.

Be sure to obtain bisurated magnesia and not some other form of magnesia, as other forms are used as laxatives and as mouth washes, but they have not the same power for neutralizing stomach acidity, which is possessed by bisurated magnesia, which is inexpensive and can easily be obtained from any reliable drug store.

CONSERVE FUEL.

Rural Communities Should Make Plans For Next Winter.

All the anthracite coal used in eastern Canada, and much of the bituminous coal, is from mines situated in the United States. Munitions plants alone have increased the demand upon United States coal supplies by 100 million tons a year. Due to labor and transportation shortage, the output could be increased by only 42,000,000 tons. Conservation and the use of substitutes must make up the balance.

Present indications are that the coal shortage will be more serious next winter than this.

The extensive use of wood fuel, particularly in rural communities, is being urged, both in the United States and Canada, to help relieve the present situation and to avert possible disaster next winter.

Wood for next winter's use should be cut now, to allow time for seasoning.

Farmers and rural communities generally can render a distinct patriotic service by reverting to the use of wood fuel, thus, at the same time, helping to relieve the shortage of coal and of freight cars. Substitute team haul or water transportation for rail haul, as far as practicable.

It may become necessary to restrict even more closely than has yet been done, the allotment and distribution of coal in sections where wood fuel is available. Prudence demands provision against this contingency.

A large production of wood fuel is the best safeguard against extortionate prices.

Municipal wood yards will, in many cases, help solve the problem. The large operations thus involved will justify the use of power saws, and power splitters, and perhaps also of motor trucks for hauling. The labor shortage will in some cases make it desirable to transport the wood to the municipal yards in log lengths, there to be cut up and split by the use of machinery.

The farmers' wood-lots should become a large factor in the wood fuel situation. It is, however, of the utmost importance that the wood-lot be not destroyed by cutting clean. Remove dead, diseased, defective and over-mature trees, leaving a sufficient stand of the thrifty stock. Protect the young growth. Retain the forest cover on all lands not suitable, or not needed for cultivation.

WAR ORDER BALKS SHOE MEN.

British Dealers Unable to Sell High Boots.

A little "squeeze" for the public has failed just lately, says a London correspondent. The boot order limiting the height of the tops of women's boots to seven inches allowed the manufacturers and retailers to dispose of their stocks during a limited period. The boot trade, which has been charging excessive prices for this class of goods, failed to understand the order, or expected that women would rush for their stocks, and in consequence either raised their prices or maintained them at the high figure prevailing.

Contrary to expectations the women failed to rise to the bait, and a few days before the time limit expired the majority of the stores advertised considerable reductions in high topped boots. Apparently the dealers thought the Government would allow an extension of time after the fixed date, but the order has not been amended and will not be. The stocks in hand must not be sold and practically all the existing stocks will be placed in storage.

Already there is a demand for smart low shoes, and the hosiery trade is booming, the fashionable stocking being a ribbed all wool one of the type suitable for wear with brogues and country wear.

Leather experts are predicting a famine in boot leathers after the close of the war. They point out that the Central Empires represent between 130,000,000 and 140,000,000 of people who are practically barefooted and who, when peace is declared, will rush into the market.

They predict a rise in leather to gold dust prices, and point out that we must conserve the raw material of the empire, especially in hide products, to supply anything like our own requirements in boots and shoes.

Since the beginning of the war Britain has supplied to the army and the armies of our allies upward of 45,000,000 pairs of boots.

Factory Building Wanted

Factory Building with Railroad siding, one with several acres of ground, and with boiler and engine installed preferred. Give dimensions, condition of buildings, and an inventory of the machinery or equipment which goes with the building. State approximate prices. This may mean a new industry for your town. Builder's and Contractor's Plant also wanted. Address

E. B. E., P.O. Box 96, Toronto

EVERGREEN SNOW FENCES.

Much Admired by Passengers on Our Government Railway.

Passengers travelling over the Canadian Government Railways are frequently heard commenting favorably on the fine appearance of the beautiful spruce hedges which line the right-of-way between Campbellton and Bathurst. To the traveller the appeal is purely to the esthetic sense, and the dense growth and well-kept appearance of these hedges rest the eye and captivate the sight in spite of the enchantment of the many natural beauties of mountain, bay and forest, with which the region is so generously adorned; but to the railway man they mean more than a decoration, as they are utilitarian as well. Here is the beautiful combined with the useful in the highest sense.

Primarily these hedges were designed to protect the railways' tracks from the drifting snow in winter time; that they have grown beautiful is due to the great care with which they were planted, and tended by the sectionmen, and to the mellowing influence of the passing years. Now the railway has natural snow fences, serviceable, efficient, beautiful, a combination well planned and patiently perfected.

To James Patterson, of Campbellton, retired roadmaster, is due in no small measure the credit as the originator of this improvement. In a recent interview, Mr. Patterson gave to the writer the following interesting information:

"The winter of 1887 was most severe, the snowfall was very heavy, and the high winds almost continuous. My men and I spent many days and nights endeavoring to keep the tracks clear of snow, so that the trains might not be delayed or the cuts blocked with the heavy drifts. We did the best we could with the snow-fighting apparatus we had, but our best efforts were but feeble ones, and after some of the heaviest storms our wooden snow fences were completely buried, and the cuts snowed up full."

Every Little Helps.

Every available maple tree should be tapped this spring and every sap bucket, pail and pan pressed into service, whether it is the most up-to-date equipment or the old time sugar making outfit that has not been used for years. Every little helps. Every pound of maple sugar is wanted.

OXYGEN FOR EXPLOSIVES.

Curious Experiments Which Demonstrate Value for War Purposes.

The U.S. War Department has been making some curious and very novel experiments with liquid oxygen for explosives.

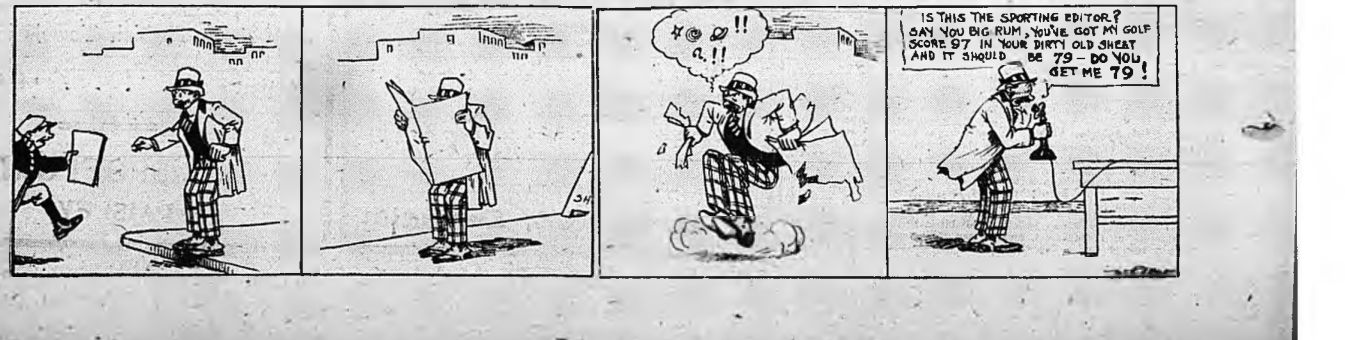
If you make a sausage-shaped bag of cotton cloth, fill it with charcoal, and then dip it into liquid oxygen, you have a formidable bomb—all that is needed to set it off being a detonator of mercury fulminate.

Set off in this way, the charcoal (which is the thing that burns) combines with the oxygen (which supports the burning) and the sausage is instantly transformed into a mass of gas.

Petroleum or any other carbonaceous material will serve the purpose instead of charcoal. But for use in the field the oxyearbon high explosive has yet to prove its usefulness, inasmuch as the liquid oxygen must be manufactured on the spot, and, to make it, powerful machinery is required.

By a queer paradox, enormous heat must be employed to obtain the extreme cold, hundreds of degrees below zero, necessary to reduce oxygen to a liquid. In that form it is of a beautiful pale blue color.

The chemists have not yet been able to reduce oxygen to a solid, but they have frozen atmospheric air to a clear glass at 346 degrees below the zero of Fahrenheit. That is to say, the nitrogen (which is four-fifths of the air) is a solid at that temperature the liquid oxygen being held in it mechanically.



The absolute zero of outer space (where there is no heat at all) is supposed to be 523 2-5 degrees below the Fahrenheit zero. It would freeze a man solid in less than a second.

If the sun were extinguished by some cosmic catastrophe, the solidified oxygen, nitrogen and water vapor would, it is estimated, cover the whole earth with a white mantle thirty-six feet thick.

Gulls in the Henroop.

A curious custom of the Newfoundland fishermen is that of keeping seagulls of a large species as domestic fowls. They capture the young while they are nestlings, and rear them on fish, confining them in pens. Their eggs are eaten, and, for lack of a turkey or goose for Christmas, the fisherman is satisfied with a selection from his coop of fattened gulls.

The Doings of the Duffs.

DISEASE COMES THROUGH THE BLOOD

To Cure Common Ailments the Blood Must be Made Rich and Red.

Nearly all the common diseases that afflict mankind are caused by bad blood—weak, watery blood poisoned by impurities. Bad blood is the cause of headaches and backaches, lumbago and rheumatism, debility and indigestion, neuralgia, sciatica and other nerve troubles. It is bad blood that causes disfiguring skin diseases like eczema, and salt rheum, pimples and eruptions. The severity of the trouble indicates how impure the blood is, and it goes always from bad to worse unless steps are promptly taken to enrich and purify the blood. There is no use doing a different medicine for each disease, for they all come through the one trouble—bad blood. To cure any of these troubles you must get right down to the root of the trouble in the blood. That is just what Dr. Williams Pink Pills do. They make new, rich, red blood. They simply purify and enrich the blood, and the disease disappears. That is why Dr. Williams Pink Pills have cured thousands of cases after other medicines had failed. Here is proof of the power of Dr. Williams Pink Pills to cure. Mrs. M. Stills, who resides near the town of Napanee, says: "I cannot praise Dr. Williams' Pink Pills too highly. I was very much run down in health, suffered from frequent spells of indigestion, biliousness, and sick headache. I had an almost constant pain in my head and my housework was a source of dread. In fact I felt so miserable that life held but little enjoyment. I was advised to try Dr. Williams' Pink Pills, which I did, and the result was simply marvellous, and can best be summed up by saying that they made me feel like a new woman, and fully restored my health. I would advise every woman and girl who has poor blood, or is run down in health to give those wonderful pills a trial. I am never without them in the house."

At the first sign that the blood is out of order take Dr. Williams' Pink Pills, and note the speedy improvement they make in the appetite, health and spirits. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

GLUTTON FOR OYSTERS.

Inhabitants of the Ocean That Are Fond of the Bivalve.

The human gourmand is not the only creature which is fond of an oyster supper. The fact is that the succulent bivalve whose "native heath" is Whitstable has more enemies than any other shellfish, probably for the reason that it is so toothsome and so easily digested.

The whelk, so dear to the East-ender, is one of these. He sits down on the shell, and, by means of an armor-plated tongue, rasps a way through till he comes to the oyster. When he has opened the "tin," so to speak, he devours the contents slowly but surely. Needless to say, the whelk is not encouraged in the oyster-beds.

Another enemy of the oyster, across the Atlantic especially, is the limpet—the little creature which sticks like glue when once he gets hold. The native British limpet is not much good at oyster-fishing, but his Transatlantic brother is great at it. Strange to say, some of those oyster-eating limpets have arrived in home waters, and there is much anxiety as to the result.

But of all the oyster's enemies, the most determined and destructive is the starfish. The sight of a starfish nearly sends an oyster merchant into a fit. The starfish is the hobgoblin, the nightmare, the Old Man of the Sea to the poor long-suffering oyster, whose main duty is to grow large and fat for the dining-table.

Everybody knows how difficult it is to wrench open a determined oyster. But the starfish can do the trick. He is a patient creature. It is his only virtue. He is well content to wait and feed. He is never in a hurry for his lunch. He selects his oyster and settles on it, firmly—even affectionately—curling partly round it so as to grasp the two sides of the shell.

Then it is a case of a long pull and a strong pull. The oyster is doomed. He can resist a sudden pull, he can resist a pull which lasts half an hour, say, but he can't resist a three hours' steady wrench. He throws up the sponge, the shell opens, and the oyster is quietly devoured.

A HUMAN GUN CARRIAGE.

Two Exploits of Capt. Campbell of First Canadian Batt.

For sheer pluck and instantaneous resourcefulness, says Mr. Frank Yeigh in the Canadian Magazine, two exploits of Capt. Frederick William Campbell, V.C., of the First Canadian Battalion, are almost unequalled.

The first incident occurred during the battle of Langemarck, where Capt. Campbell was in charge of a machine gun section. He took two machine guns over a parapet and reached the first German line with one of them; there, in spite of a furious fire, he maintained his position. Nearly all of his men were killed or wounded. His supply of bombs became exhausted, and when he turned to the machine gun he found that the tripod had disappeared. As he seized the gun part from a falling man, he saw that the only unwounded man was young Virtue, who had the ammunition.

Capt. Campbell and his corporal found themselves in the rear of the retreating line and directly in the path of the German advance. The situation was dangerous in the extreme, and all the odds seemed against the two men, when Capt. Campbell, falling on all fours, made himself into a human gun carriage, ordered Virtue to strap the gun on his back, and then, facing the foe, had the corporal fire a thousand rounds. The brave captain carried the gun until the heated barrel burned through his uniform and shirt to his flesh. But he had turned the tide and saved the Canadian battalion.

Afterwards he fell unconscious from the pain of the burn along his back. He recovered, however, only to perform the same feat a few days later, when some of the Canadian forces were in a tight fix at Givenchy. This time a trench had been blown up by a mine and was in such a mess that there was no place in which to set the tripod. Again Capt. Campbell carried the gun on his back, again he helped to save a dangerous situation, but not before he had received a wound from which he died four days later in a hospital. After his death he was awarded the Victoria Cross.

CONSTIPATED CHILDREN

Nothing will so quickly remove childhood constipation as will Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take; do not gripe and never fail to regulate the stomach and bowels. Concerning them Mrs. Adolphe Noel, Petite Lameque, Que., says:—"Baby's Own Tablets are the best remedy for constipation I know of and I would strongly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont.

Clergy Promise Support.

The clergy of all denominations in Canada are promising to do everything in their power to promote the work of food conservation and production. In a number of cases the bishops are sending out pastoral letters to their clergy. Archbishop Matheson, Primate of Canada, has promised his fullest support to the Canadian Food Board.

Minard's Liniment Relieves Neuralgia.

The Boy in France.

When the evenin' lamps are lighted,
And we all sit warm and close,
While father reads his paper
And mother mends the hose,
Us children gather round the fire
And watch the flames that dance;
We don't say much, for we're thinkin'
Of the boy that's gone to France.

There's the books he used to study,
And his old cap's hangin' there,
That's the place he used to sit in,
And the very self-same chair.
Father sighs and wipes his glasses,
There are tears in mother's glance,
For you see that we're all longin'
For the boy 'way off in France.

And then, when it is bedtime,
Mother puts her work away,
And father folds his paper and says,
"Children, let us pray."
So we kneel around the table,
Mighty glad to have the chance,
For you just bet we're prayin'
For the boy 'way off in France.
—Frances Wright Turner.

Just as soon as the frost starts on a vacation, let's sow our oats—about three bushels per acre, put in two inches deep. The best oats we shall harvest this year will be those that get an early start. Late-sowed oats rarely fail to be light in the berry, and the straw is not so good, either.

An excellent breakfast consists wholly of fruit, cereal and milk.

Minard's Liniment Cures Burns, Etc.

Food That Conserves

The recognized value of

Grape-Nuts

as a "saving" food for these serious times, rests upon real merit.

Unlike the ordinary cereal Grape-Nuts requires no sugar, little milk or cream, and requires no cooking or other preparation in serving.

A trial is well worth while for those who sincerely desire to save.

"There's a Reason"

—sold by Grocers.

Speak Of Them In The Highest Terms

Why Mr. and Mrs. West Recommend Dodd's Kidney Pills.

They Cured Mr. West's Lumbago and Made Mrs. West Feel Like a New Person. They Are the Best Tonic.

St. James, Man., March 18th—(Special)—That Dodd's Kidney Pills are living up to their great reputation in the West is twice proved by Mr. and Mrs. G. West, well known and highly respected residents of this place. Let Mrs. West tell the story of what the great Canadian kidney remedy has done for her husband and herself.

"My husband suffered from attacks of lumbago," she states, "and the doctor did him no good, but I can truthfully say that since using Dodd's Kidney Pills he is entirely free from lumbago.

"I myself took six boxes of Dodd's Kidney Pills and am just like a new person. I have gained 10 lbs. since using them and my friends compliment me on how well I look.

"I have recommended Dodd's Kidney Pills to some of my lady friends who were complaining of not feeling well, and they, like myself, speak highly of them."

Dodd's Kidney Pills cure the kidneys. Cured kidneys make pure blood. That is why Dodd's Kidney Pills are the best tonic.

Never work the soil in the spring when it is wet and heavy, as this is injurious. As soon as the ground will work up finely all the garden may be ploughed, spaded or trenched, both for vegetables and flowers.

Minard's Liniment Co., Limited.
Have used MINARD'S LINIMENT for Croup; found nothing equal to it; sure cure.
CHAS E SHARP.
Hawkshaw, N.B., Sept. 1st, 1905.

It is better not to attempt cleaning house from attic to cellar while it is still too cold to leave the warm rooms without shivering.

Minard's Liniment for sale everywhere.

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—it's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

Tractors will some day do away with the necessity for raising millions of dollars' worth of grain and hay for feeding horses and mules, thus releasing an enormous acreage for the support of human beings.

Doctors Recommend Bon-Opto for the Eyes

Physicians and eye specialists prescribe Bon-Opto as a safe, sure remedy in the treatment of eye troubles and to strengthen eyesight. Sold under money refund guaranty by all druggists.

The Cause of Heart Trouble

Faulty digestion causes the generation of gases in the stomach which inflate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup after meals sets digestion right, which allows the heart to beat full and regular.

Minard's Liniment for Lumbago.

Sir Walter's Parritch Pan.

In the museum at Abbotsford there was for many years a small Roman patera, or goblet, that Sir Walter Scott once purchased at the auction of a nobleman's property for the enormous sum of twenty-five guineas. He would have got it for twenty pence if an antiquary who knew its value had not been there and opposed him. Sir Walter was wont to say, however, that he was almost consoled for the high price it cost by the amusement he derived from an old country woman who had evidently come to purchase some trifling kitchen-articles and who had no taste for the antique.

At every successive guinea that was bid for the patera this good old lady's mouth opened wider and wider with unsophisticated astonishment, until at last Sir Walter heard her mutter to herself in a tone that he never forgot: "Five and twenty guineas! If the parritch pan gangs at that, what will the kale pan gang for?"

CUTICURA HEALS ITCHY PIMPLES

On Face. Badly Disfigured. Used 2 Boxes Ointment and 3 Cakes Soap.

"I had a bad itchy lot of pimples on my face which made it badly disfigured. They were inflamed and came to a head, and I could tear my skin as soon as a little heat came near them. I could hardly sleep.

"When I saw Cuticura Soap and Ointment advertised I sent for a free sample which did so much good that I bought more, and I used two boxes of Cuticura Ointment and three cakes of Cuticura Soap when I was healed." (Signed) Miss Bertha Milmoe, Stockbridge, Sask.

If you have a good complexion keep it so by using Cuticura Soap daily and Cuticura Ointment occasionally.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

THE ORIGIN AND DANGER OF CATARRH

—IF YOU SUFFER FROM—

Catarrh, Catarrhal Deafness, Head Noises, Catarrh of the Stomach, (which is often mistaken for Indigestion), Catarrh of the Bowels, Asthma, Bronchitis, Loss of Smell, Phlegm dropping in the back part of the Throat, or if you have a Cough

—YOU SHOULD NOT FAIL TO READ EVERY WORD OF THIS ARTICLE—

What Parmint, the Wonderful English Formula, Has Done for Others, It Will Do For You

CATARRH, A LOATHSOME AND INSIDIOUS DISEASE

Catarrh is a very common name for a very common disease, so common that most people fail to realize how fearful, dangerous and disgusting it is. A cold in the head, hawking, spitting, blowing of the nose, phlegm dropping in the throat, bad breath, dullness of mind, bad memory—these is the case of catarrh.

And where does it end? Frequently in Catarrh of the Stomach, Catarrh of the Bowels, Bronchitis, and often slight or total deafness results.

HOW CATARRH STARTS

Catarrh usually begins with a cold in the head.

The Catarrh germs breathed in through the mouth or nostrils have settled upon the inflamed and delicate mucous membrane that lines the nose and throat. These germs are harmless in healthy tissues; when they lodge upon an irritated surface it means a more and more diseased condition of the membrane. They then produce further inflammatory irritation, and in time even ulceration. The sufferer from catarrh often finds his sight and hearing failing. He suffers from sore throat, a dull ache over the eyes and across the forehead. The mind becomes dull when the membranes of the nasal cavities are in a discharging condition.

It is the pus and decaying matter resulting from these sores that causes the offensive breath so common to victims of catarrh. You may not notice it yourself. You probably do not. But your friends do, though they are too careful of your feelings to tell you so.

NASAL CATARRH

This form of catarrh is to say the least, sickening and disgusting besides being most common and highly dangerous. The changes of weather render the delicate tenacious membranes in the nose and throat very susceptible to inflammation, and thus encourage the birth and growth of catarrhal germs.

The nose and throat are what might be called the highways of life.

The throat itself is divided into two main passages, one the Oesophagus, or gullet, going to the stomach, the other the respiratory tract, or Trachea, going to the bronchial tubes and lungs. Through these passages the blood passes with every heart beat, and these cannot be carried on with the air. If the air breathed in is pure, and if nose, throat and lungs are sound, the dark blood is at once purified and passes out of the lungs in a bright red stream, carrying life and strength to all the body. If however, the air breathed in is bad, or if the nose, throat or lungs are diseased in any way, then the blood instead of being purified by its passage through the lungs is, on the contrary, still further poisoned and goes on its way carrying the disease to all parts of the system.

That nasal catarrh is a nauseating disease any one knows who has had to sit close to, or talk face to face with, a person reeking with purulent catarrh. Have you ever had to endure in sickening silence the hawking and gagging of a catarrh victim, or had to sit close to such a person and experience a disgust, loss of appetite, nausea, feeling that something foul odor which you could not explain, and did not know what it was? That is catarrh, and there are many people who have it and don't know it.

CATARRH OF THE STOMACH (Often mistaken for Dyspepsia or Indigestion)

Many cases of indigestion and dyspepsia are simply the result of catarrh of the throat and stomach. If catarrh is in you while asleep, the mucus drops down from the throat and nose and is swallowed into the stomach. In the morning you awake feeling heavy and tired, there is a bad taste in your mouth, you are in a bad humour; you wonder what ails you. You have catarrh, catarrh of the stomach, and your whole system is poisoned and is reeking with the disease. Your stomach has become clogged and the delicate membrane is filled with a vile sticky substance. The catarrh mucus refuses to be digested and only passes out of the stomach with great difficulty. Little by little, the mucus with the catarrh germs which it has carried settles permanently on the mucous membrane which lines the stomach.

Head trouble and indigestion are caused by a lack of digestive juices. His taste we have a condition where the membrane is able and ready to do its work, but it is prevented by foreign matter which has dropped down from the head and coated it. Now then, can the usual treatment for indigestion be of use? Since catarrh is the cause of the trouble it is the catarrh that must be treated. If you have catarrh of the stomach we believe that if taken faithfully for a reasonable length of time Parmint will bring you an amount of relief that will fully compensate you for the cost and time bestowed.

CAUSE OF DEAFNESS

A cause which is responsible for a great many cases of deafness is catarrh. The whole trouble generally begins in a simple cold in the head. During such a cold almost every person experiences that feeling of stuffiness which tells of inflammation extending into the nasal space where the openings of the Eustachian Tubes are located, and which is accompanied by catarrhal secretions, collected in the nasal space, where it is difficult to blow it out of the nose or hawk it up. When such conditions have become chronic, as is catarrh, the danger is great.

The mucus, carrying the germs drops into the throat. The glue-like coagulating mass sticks for a time to the sides of the throat. The germs are quick to take advantage of the opportunity they find, and invade the Eustachian Tubes. Their presence and irritation if they produce sores and more mucus. Gradually this fills up the ear tube so that sounds can only pass through with difficulty. The patient finds his hearing slowly going. When the tubes are completely filled total deafness may result.

In deafness from nasal catarrh, which affects the middle ear, it often happens that noises or sounds are heard which distress and confuse the patient. These are due to the fact that the mucus which fills the upper part and back of the throat is covering the opening of the Eustachian Tubes and the bursting of bubbles or the movement of mucus causes the sounds, which come from the altered resonance of the ear. After a crackling report the head may seem clearer, and the hearing better for a time. Later on in the case there may be grating sounds when the swollen tubes, which come from the efforts of a stiffened muscle to open the tubes, which fill with mucus.

The above explanation of a most common cause of deafness should make it clear how absurd and useless it is to attempt to overcome such deafness by ear-drums and the various other so-called ear cures.

Let it be understood, however, that Parmint is not for ear troubles other than those caused by catarrh. If your trouble is caused by scarlet fever or any of the children's diseases, or if caused by an injury, Parmint is not for you, and you should thoroughly consult your family physician regarding your case.

DON'T NEGLECT A COUGH

If you have a cold and it has left you with a cough, no matter how slight—you ought not to neglect it.

A cough is generally an indication that there is inflammation in a dangerous form, and proper treatment should be secured at once. Delaying treatment may mean that the cough may settle, develop and stay. Even the slightest cough indicates a danger and should receive prompt attention. Unless your cough has become extremely deep seated or has hung on for a long time, we believe that you will find a quick relief from your trouble by the use of Parmint.

WHAT IS PARMINT?

Parmint is an English formula put on the market in England about 10 years ago. It is a combination of ingredients having values in the treatment of catarrhal conditions, bronchial affections, etc., compounded from the best grade of material it is possible to obtain. Parmint is put on in concentrated form which are labelled "Parmint—Double Strength." These compare bottles can be obtained at a small cost and the one ounce is sufficient to make a full half-pint of Parmint ready to take when mixed as directed in each package.

Ah! That's the Spot

Sloan's Liniment goes right to it. Have you a rheumatic ache or a dull throbbing neuralgic pain? You can find a quick and effective relief in Sloan's Liniment. Thousands of homes have this remedy handy for all external pains because time and time again it has proven the quickest relief.

So clean and easy to apply, too. No rubbing, no strain, no inconvenience to be the case with plasters or ointments. If you once use Sloan's Liniment, you will never be without it.

Conserve sized bottles, at all druggists.

Those who have omitted to attend to payment will greatly oblige the publisher by doing so before we have to go to the trouble and expense of sending out accounts.

LOCAL AND DISTRICT NEWS

—Mr. Thos. Fullerton, of Greenock, has bought Mr. Walter Wyman's farm of 100 acres on the 16th con. for grazing. About 60 acres of this farm is in bush.

Lack of Food Threatens the Battle Line

Read what the Organization of Resources Committee has to say in the full page adv. appearing as a supplement to this issue of The Advocate under the above heading. We say, read it, and then act about doing what you can for food production.

Johnston—Bell

A quiet wedding took place on Wednesday last, at the Methodist parsonage, when Miss Birdie Bell, of Paisley, became the bride of Mr. George Johnston, son of Mr. and Mrs. David Johnston, of Elderslie. Rev. Mr. Crighton officiated. The happy couple have gone to make their home on the groom's farm, 10th Kincardine, and are followed by the best wishes of a large circle of relatives and friends.

Keep Rabbits for Food

One pair of rabbits in one year would increase to 2484 in twelve months at the rate of six young ones per month, which is a very conservative rate, some young families numbering as high as thirteen. This is also allowing for the elimination of surplus male bunnies as they are big enough to eat. Rabbits can live on hay and get along very cheaply. They provide five pounds of meat when full grown.

Red Cross Shipment

The Paisley W.P.L. shipped the following on March 19th: 96 pairs socks, 27 flannel shirts, 8 suits pyjamas, 1 scarf, 6 stretcher caps, 12 furnished housewives, 72 trench towels, 29 huck towels, 47 Turkish towels, 60 pillow covers, 12 face chiefs, 1 parcel old cotton and linen. This includes 42 pairs socks sent to Paisley soldiers in France. Donations—Lockerby Patriotic Workers, 16 pairs socks; Knox church patriotic class, 27 Turkish towels, 15 face cloths, 18 furnished housewives, 10 pair socks.

Was Granted Exemption

The Walkerton Tribunal Board, composed of Messrs. Frank Rennie and John Johnston, with Mr. W. J. McNally officiating as public representative, met in the town hall on Saturday afternoon to hear an appeal for exemption from military service of Peter McLeod, a young chap who came recently from Flint, Mich., where he had been teaming, and who asked exemption to assist his father on his 50-acre farm near Paisley. The Board, after hearing his case, granted him exemption as long as he continues on the farm.—Herald and Times.

Masonic Night

There was a large turnout of Masonic brethren on Friday evening at the meeting of Aldworth Lodge, when R. W. Bro. Jas. A. McDonald, of Tara, the D.D.G.M., paid his official visit to the local temple of this ancient order. Following the lodge proceedings, the brethren adjourned to the town hall, where their wives and other lady friends had gathered in response to invitation to join in the social and entertainment arranged for. The ladies had prepared a nice lunch, to which all sat down and enjoyed, partners being alloted by ticket. The menu being disposed of, a programme of after-dinner speeches and music was gone through, with R. W. Bro. Thos. Muir, Master of Aldworth Lodge, as presiding officer. W. Bro. W. R. Barnett proposed the toast of "The Grand Lodge," which was responded to by the D.D.G.M. "Our Visitors" was proposed by Bro. H. McKerracher, and replies came from W. Bro. Thos. Houston of Pinkerton, and Bro. Hugh Fletcher of Leyat. "Our Veterans" brought a response from Bro. J. B. McArthur. "The Ladies" was proposed by Bro. D. D. Campbell, and replied to by Bro. J. H. Steele. The musical numbers were solos by Miss Edna Carter and Miss Netta Johnston; song by Mr. F. C. Ryan with violin obligato by Miss Nettie Trelford; male quartette by Dr. Gage, J. A. Logie, F. C. Ryan, D. McKenzie. The presence of the ladies throughout the social end of the evening's proceedings is an innovation that will probably be made a regular feature of this annual Masonic function.

Can Now Keep a Hog

The Provincial Board of Health regulations have been relaxed to allow citizens of urban municipalities to keep a pig so long as the animal and its pen are kept in a sanitary condition. The consent of the Local Board of Health must first be secured before anyone can start a piggery. In case there is a dispute between the pig owner and the Local Board, a plan and all the facts connected with the case are sent to Dr. J. W. McCulloch, Provincial M. O. H., and his decision is final. But don't put your hog in the cellar as a Kitchener alderman did. Last year "Grass was" said on the hen as a wealth producer, and this year with the high price of pork and bacon, the watchword of the Agricultural Dept. is "keep a hog."

BRUCE TELEPHONE SYSTEM

Annual Meeting Held in Underwood

Rate for This Year $15.00

The annual meeting of the Bruce Municipal Telephone System was held at Underwood on Thursday, 14th inst. The attendance was not as large as in previous years. President D. McNaughton called the meeting to order, and in a few well chosen words touched upon the work of the past year. The system had made a gain, but not as big a one as he would like to see.

J. G. MacKay, the treasurer, presented the financial statement, which showed a gain of $3,427.71 for the year. He went into the various accounts and answered a number of questions. He said the reason that the system did not show a large gain was the heavy interest account. He favored an increase in rates to cut down the interest.

Hugh McLaren, auditor, was then called upon. He said in his report he had suggested an increase in rates to the commissioners to save the heavy interest charges. He thought the subscribers would be consulting their best interests by raising the rate at least $5 a year for about five years. This would wipe out the capital expenditure, and then the system would only have to pay upkeep and operation. As it was they had never invested any capital, and the payment of the original borrowed money with interest charges did not appeal to him as good business. He presented the idea for their consideration at the next annual meeting.

J. J. Hunter reviewed the work of the year. He did not agree with McLaren's suggestion, believing that those who followed and had the use of the system could afford to pay for it as was being done at present. In answer to R. Carleton as to what the trouble man cost, he stated that during the year Mr. Jones had cost $3,343.21. This took in running the car, depreciation on car and labor for construction. In 1915 rented then financing would become easier. the trouble man cost $1746.72.

Mr. Carleton—I am not objecting to the cost, but I think the trouble man's salary should be big enough to pay his expenses and he provide the car.

Mr. Hunter stated that it was an utter impossibility to get good men on those terms, and the commission, after experience, had adopted the present method. Mr. Jones was a first-class man, courteous and obliging, and he had yet to hear one complaint against him. He only hoped the system would be able to hold him. The system during the year had made a net gain in subscribers of 22, and prospects looked good for further increases.

Mr. MacKay stated Mr. Jones was the best man the system ever had.

Mr. McNaughton stated that Mr. Jones was worth every cent the system paid him. His reports were a pleasure to receive, and since his coming to the system the complaints were very few.

Archie McLean said he was glad to hear so many kind words about Mr. Jones, as he had gone to Kitchener and secured him. The system under him had never been in better condition. He was a valuable man and other companies were after his services, offering him more than we could pay. However, Mr. Jones liked the system and he hoped they would be able to retain his services. He pointed out that the cost of operating would be more this year. The war time expense caught the system as well as all other lines of business. The future looked good. Once the big debenture was retired then financing would become easier. He gave the costs of other systems, showing that of Bruce to be lower.

Reeve J. Johnson said he had always maintained that the system could not be carried on for less than between $37 and $38 a year. He was still of that opinion. He favored Mr. McLaren's idea of a good levy and wiping out some of the big debenture and saving interest. He pointed out that the overdraft was about $2,700.

Mr. Hunter pointed out that the Commission had $8,000 of unsold debentures against this. $4,500 was for new work.

A. F. Mewhinney thought the system was making good progress and was excellently managed. He did not favor Mr. McLaren's idea of a high levy. Every owner was not in a position to put his hand in his pocket and help to pick up the big debenture. He felt an increase was necessary, but it must be remembered that the renters had to be taken into consideration. They could throw their phones out if it was too high. This would mean a heavier burden on the owners. It was a question that required careful handling. His remarks were listened to in an attentive manner.

Mr. Avis said that he would be glad to pay his share off at once, but this would be impossible as the interests of others had to be consulted. The loss of renters would probably place a heavier burden on the owners. He thought a moderate raise

R. Roy Sayka, Port Elgin, pointed out that renters brought in a good revenue, that renters brought in a good revenue, and if they dropped out it meant heavier was the best method.

burdens on owners. He said the main thing for success was good service. This makes contented users.

Moved by P. Dobson, seconded by C. Dobson, that the telephone rate for the coming year be $16 for owners and $15 for renters.

Moved in amendment by Wm. Bottrell, seconded by John McGillivray, that the telephone rate for the year be $15 for subscribers and renters.

Moved in amendment to the amendment, by A. McKenzie, seconded by F. Schmitzer, that the rate be $16 for subscribers and renters alike.

After considerable discussion the amendment to the amendment was withdrawn and the amendment to make the rate $15 was carried.

The election of the Commissioners, on motion of A. F. McWhinney, seconded by E. Shipley, resulted in the old Commissioners, D. McNaughton, J. J. Hunter and A. J. McLean, being re-elected.

At a meeting of the Commissioners following the annual meeting, Mr. D. McNaughton was elected president, J. B. G. MacKay treasurer.

Stenthers was appointed secretary, and J. [illegible]

The following report was submitted by Mr. Norman Jones, superintendent of the system.

Kincardine, March 14, 1918

To the Commissioners:

Dear Sirs—During the past year we have installed 54 telephones and removed 31. This gives us a net gain for the year of 23 instruments in spite of war conditions and [illegible] raise in the rates last year. This gain, as the annual report shows, was accomplished with less outlay for wages than in any previous year. These new subscribers required 135 poles and approximately 40 miles of construction. Among the phones installed were 28 property owners on which the Commission were able to sell $4,000 worth of debentures.

Last year there were 641 cases of trouble at subscriber's stations and over 100 trips to the country on reported trouble only to find weak batteries the cause of their difficulty in making people hear them. Of line trouble or troubles affecting telephones there were 122. Some of these were caused by broken insulators.

The breaking of insulators on our circuits has come to be a serious problem. On one occasion on the 6th of Bruce, west, the circuit went out of order on two days in succession, and the trouble in both cases was broken glass. On an inspection of the line it was found necessary to replace over 100 insulators between the central office and the end of the circuit. Most of the difficulty along this line is in the neighborhood of schools and the roads used by the pupils. On the gravel road near the 7th of Kincardine all broken glass was replaced last year, but I notice at the present time it will require 30 more. This trouble is far reaching and may lead to more serious difficulty. If insulators are not kept in good condition you will have all kinds of transmission difficulties, cross-talk and induction, and very poor service will result.

Another factor towards good service would be the changing of batteries more often. Because your neighbor has been mean enough to keep his batteries in for a few years is no reason that you should do the same. The life of a dry-cells is only supposed to be eight or nine months, so if a person has them for a year they should be satisfied and change them without it being necessary to be told repeatedly by central or someone on the other end of the system. I think I may safely say that over 60 per cent of the batteries on the system are dead, or at least seriously ill.

One other matter I would like to bring to your attention and that is the soaking of batteries. This is a practice that must be discontinued at once. While it may restore life to the cells for a time the risk incurred of doing great damage to the delicate wiring of the instrument is great, and I have found whole circuits on which service has been interrupted by the practice.

The only way that poor batteries on a system can be overcome is by an inspection of the instrument at least once a year including changing of dry cells.

Yours truly,
N. JONES

A Paisley Boy with the U.S. Army.

The noble spirit in which the young men of the U. S. go forth to [illegible] Allies in fighting the Huns is very well exemplified in the case of Pte. John Jeffrey, a former Paisley boy, in a letter to his mother, Mrs. Arch. Jeffrey, the family left here sixteen years ago, and are now living at Grenora, N.D. Mrs. Jeffroy is a sister of Mr. Neil McArthur, Water St. The young soldier wrote as follows:

"I am going to fight to live, and not only that I may live, but that others may live. I am going to fight so that little children shall not be murdered; so that mothers may not see their little ones killed before their eyes; so that the virtue of innocent girls may not be destroyed; so that old men and women may live; so that the rights of humanity may be respected and never again be destroyed by a cruel army of wicked men bent on destroying everything that is in their way. It is be God's will that I should die I am willing, for death is nothing more than being born into heaven, away from sin and sorrow into everlasting joy. Jesus said, 'He who would save his life shall lose it, and he who would lose his life shall save it.' But I hope God will see fit to let me come back to you when the fight is done. I have no fear of what may happen, for I am determined to fight the fight as a man and a Christian, and if I so fight neither death nor life can make any difference, for I will be at peace with God either way."

BEDRIDDEN WITH RHEUMATISM

Felt That He Would Never Walk Again "FRUIT-A-TIVES" Brought Relief.

MR. LORENZO LEDUC

3 Ottawa St., Hull, P.Q.

"Fruit-a-tives" is certainly a wonder. For a year, I suffered with *Rheumatism*; being forced to stay in bed *for five months*. I tried all kinds of medicine but without getting better; and thought I would never be able to walk again.

"One day while lying in bed, I read about 'Fruit-a-tives' the great fruit medicine; and it seemed just what I needed, so I decided to try it.

The first box helped me, and I took the tablets regularly until every trace of the Rheumatism left me.

I have every confidence in 'Fruit-a-tives' and strongly recommend them to every sufferer from Rheumatism".

LORENZO LEDUC.

50c. a box; 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa, Ont.

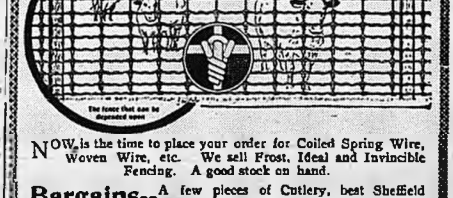
WM. ARCHER, R.S.



—Canadian heating experts have already devised a system of electric steam radiation which seems to be entirely practical once the power rate is brought down to the half-cent rate. The system now being developed is direct application of electric power to each radiator. There is a small boiler into which the electric current passes and comes directly in contact with the water. This water circulates through the radiator and gives off low-pressure steam. The advantage in this system of direct attachment to each radiator lies in the fact that heat can be turned into any part of the house desired or it can be turned into the whole system. There is one hundred per cent. efficiency here, for every atom of heat given off goes directly into the water and is thus radiated into the room. By the time the Hydro Commission has developed power sufficient to heat the homes of the people of this province the devices will have been perfected. In fact they are already near enough to completion so that with power at one-half cent per kilowatt hour and plenty of it, electric heating of homes would be entirely feasible. Then good-bye coal—and ash sifting.

—When the operations, now under way at the Hydro Power plant at Eugenia Falls are completed, the capacity of the plant will have been at least doubled—that is to say, that while the plant is at present developing about 2,800 horse-power, the additional water wheels and dynamos will increase this to approximately 6,000 horse-power. The increased development is expected to result in a lowering of the cost to the consumer and a decided tendency to increase the amount of electricity in general use as a motive power. It is expected that the improvement will be completed this year.

Lack of Food—threatens the Battle Line

ONTARIO.

"The food wanted by mankind does not exist.
The word 'shortage' is not strong enough.
The whole world is up against a scary thing, familiar as the people of India, called 'famine.'"

—Lord Rhondda,
Britain's Food Controller.

One year ago, only the enemy was on rations.

To-day, Great Britain, France and Italy are on rations.

To-day, Germany controls the wheat lands of Roumania, Russia, Poland and Ukrania.

To-day, the shadows of hunger, famine, disease and death hang over the Allies.

Upon the 1918 crop from Canada and the United States depends the fate of the democratic peoples of the world.

If that crop is sufficient the Allies can be fed.

If that crop is not sufficient the Allies may have to accept a German peace.

That Battle-Line in France and Flanders Must Not Want

Do you realize what a German peace would mean to Canada?

Germany covets our natural resources—our agricultural and mineral wealth, our forests, our fisheries, everything that is Canada's.

Germany won't be satisfied with European territory, with teeming masses, wrangling factions and depleted natural resources. She wants colonies—big, thinly-populated countries in temperate zones for her sons and daughters to go to propagate their kind.

The Kaiser would sacrifice millions of Germans to-morrow if he thought that by so doing he could set foot on Canada's shores as Conqueror.

And what's more, the Germans would offer themselves for the sacrifice, so great is their subjection to the military ideal.

The only thing that balks German ambition is that battle line from the North Sea to Switzerland—and the British Navy.

The Only Thing That Sustains Our Men on Land and Sea—is Food

What are we, each one of us, prepared to do to insure that Food supply?

Germany, by her submarine campaign, has seen that great Armada, the British Mercantile Marine, shrink in volume.

Germany has seen South America, Australia, New Zealand, India and far away outposts of the Empire practically cut off from supplying food to the Motherland because of the lack of ships.

Forty million Allied men and women having been put on warwork, food production has dangerously decreased in Europe.

These forty million consume more food than when they were in ordinary occupations, and there are fewer men for farming. Hence an increased demand and decreased supplies.

The harvest of France was one-third less in 1917 than 1916, and this year must be smaller still, owing to lack of fertilizers, which cannot be supplied through shortage of shipping.

The world's decrease in live stock, as compared to 1913, is approximately 115,000,000 head.

Herbert Hoover Says:

"Our European Allies are dependent upon us for greater quantities of food than we have ever before exported. They are the first line of our defence. Our money, our ships, our life blood, and not least of all, OUR FOOD supply, must be of a common stock.

"In pre-war times, Britain, France, Italy and Belgium yearly imported more than 750,000,000 bushels of grain, plus vast quantities of meats and fats.

"The submarine destruction of shipping has made it necessary to abandon the hope of bringing food from South America, Australasia and India.

"Food must, therefore, be shipped from Canada and the United States—the nearest and safest route.

"Canadian and United States supplies are normally 350,000,000 bushels short of the Allied needs. By greater production and conservation Canada and the United States must combine to increase the export of grain by 150,000,000 bushels.

"The remaining shortage of 200,000,000 bushels must be overcome by greater reduction in consumption in the allied countries. And this is being done by Britain, France and Italy rationing her people.

"From two and a half years of contact with the German Army I have come out of the horror with the complete conviction that autocracy is a political faith and a system that directly endangers and jeopardizes the future of our race—that threatens our very independence. It has, however, been able to command complete inspiration of devotion and self-sacrifice in its people to the interest of their nation. The German farmer, in the name of the Fatherland, supports a nation two-thirds as large as the United States and threatens to subject the world from an area one-half the size of Ontario.

"My vision of War is not of an academic problem to be solved by discussion. To me it is a vision of brave, dying men and suffering women and children, for service on whose behalf the greater exertion of the Allies' farmers comes in a direct necessity and a direct plea. The Canadian and the United States citizen who sees war as I see it needs no inducement and no inspiration but the thought that every spade full of earth turned and every animal reared is lessening human suffering and guaranteeing the liberty of the world."

Lloyd George's Warning

"I fear the disciplined people behind the German Army, the rationed family and the determination of wife and sister and daughter and mother to stand and starve—so that their fighting men may be fed—I fear it more than the Imperial German Army itself."

Britain is now on Food Rations.

France is now on Food Rations.

Italy is on the verge of starvation. Only continuous support from us can enable us to hold out.

Only with a disciplined people behind can we hope to win. The rationed British Nation, blood of our blood, bone of our bone, are proudly paying the price and sharing with France and Italy their limited stock of food. For in this there is mighty pride, a conscious measuring of their glory with the best traditions of ancient Sparta, and of Imperial Rome, for Britons know that upon them rests the burden of saving humanity. The story of their service shall ring and echo forever along the billtops of history.

The heart of this problem is labour.

Without more farm labour more food cannot be produced.

If you really want to serve your Country in a big, practical way, register now for farm labour, or urge and assist your male employees to do so.

To Send More Food to Our Allies is Not Charity

It is war. The Allies have a right to demand it. They have a right to resent the offer of only what is "left over." Those who are fighting the common battle for civilization and for our protection have a higher claim than had Lazarus, to only the "crumbs that fall from the rich man's table."

The Canadian people must recognize that our Allies have the first claim on our food supplies.

As the shipping situation makes the Allies dependent upon the North American continent for food, it is vitally necessary that Canada should increase her production of food in order to take a larger part in providing for the Allies' requirements. This is especially urgent as the maintenance of a large United States Army in the European field will cause a very heavy drain on that country's resources.

There must be no peace without victory.

For nearly four years Germany has been struggling against the powers of law and order. She has failed so far to make good her escape with her booty by superior strength and skill. And now she is attempting by intrigue, suggestion, device and propaganda to divert the attention of her antagonists from the struggle itself, and thus to gain her ends by relaxing the strength and skill of her antagonists.

What she can gain from these tactics is plain to all the world in the sorrowful experience of Russia.

Germany's most dangerous weapon is not her Zeppelin—that is obsolete. Not her submarine—that can be overcome. Not her machine-like army—that has been repeatedly hurled back by the living armies of freemen. Her most dangerous weapon is her propaganda of peace.

While with her hands she murders and despoils, with her voice she invites to parleys.

When Liberty is in Peril There is Threat of Lasting Disaster in the Very Word "Peace"

Lord Lowwhulme, long known in Canada as Sir William Lever, who knows well the German mind, in a recent interview stated:

"You will never be able to dictate terms to Germany till she is beaten. The argument you mention is founded on the dangerous fallacy that because Germany is sick of this war she is sick of war in general. She isn't. I doubt if her Government is even sick of this war. You've read the speech of that old brigand, Hertling. Is there any sign of repentance in that speech? Is it a chastened speech? Is it the speech of a statesman who wants disarmament and a league of nations? No! Germany is back in her mood of 1914. She believes she is winning the war. She believes she has won now. And if we talk of peace to her she HAS won it. What it would be better a thousand times that every man in England should be dead than that Germany should issue from this war with the feeling of a conqueror. You hear people use the phrase, 'to the last man, and the last shilling,' and you think it is only a bit of rhetoric, but to my mind it's the most solemn and absolute truth. I mean when I say it that it would be very much be a million times better for the people of these islands to be dead, every one of them, rather than live on as the serfs of a triumphant Prussia."

How can any lover of liberty remain insensible to this peril?

Food means Victory and the world made safe for democracy—

Lack of food means disaster and subjugation to Germany.

The Citizens of Ontario Must Lead This Mighty Crusade for Greater Food Production

They did it last year and will do it again.

As the greatest food-producing Province, Ontario must maintain her leadership in America. Great are our opportunities—our responsibility is tremendous.

Upon every man and woman, boy and girl, rests a personal obligation to serve. Every pound of food produced, in whatever form, is a contribution to the Cause of Freedom.

Ontario farmers should sow 500,000 acres of spring wheat.

Every Ontario farmer whose land is at all suitable should put an extra five acres into wheat, even at the expense of another crop.

What YOU Can Do To Help

At all costs production must be maintained.

That's why farmers and farmers' sons are being exempted from military service. Working on a farm is equivalent to service in the Second Line Trenches.

To enable the farm to do the work two factors are essential. The first is Time. Whatever we are to do must be done at once. Nature waits for no man. The second is Labor. Many farmers cannot plant the acres they would because they cannot get the necessary help. Many are afraid to increase their acreage because they fear they would not be able to cultivate and harvest an unusual crop after they had raised it.

The burden is not one to be placed solely upon the farmer. Neither can it be placed upon the townsman. It is a personal obligation upon every man, woman, boy and girl, in every farm, town and city home in the Province of Ontario.

AWAY WITH CRITICISM—CO-OPERATE! Mr. City Man, don't say that the farmer should do so-and-so, and thus allow criticism in this hour of our Nation's peril to cripple your effort.

Mr. Farmer, don't hastily underestimate the value the city man can be to you.

GET TOGETHER IN THE FIGHT FOR LIBERTY

Let us not lament what MIGHT be, but earnestly face what MUST be.

Fifteen thousand boys between the ages of fifteen and nineteen must be organized as "Soldiers of the Soil" to work on Ontario farms this season.

Farmers can get one or more of these boys by applying to the District Representatives or to the Public Employment Bureaus at Toronto, Ottawa, Hamilton or London.

Unmarried men, exempted from military service, are urged to take up farm work. Married men who have had previous experience on a farm are urged to resume farm work for a season. Employers of labor are asked to assist men to take up farm work.

We urge the farmer and the townsman to get together for greater production in the interests of a free people and democracy.

Let the Organization of Resources Committee, your District Representatives of the Public Employment Bureaux act as your intermediaries.

When we have done our best, the cry for food cannot be wholly met.

For the rest—our Allies are tightening their belts.

Organization of Resources Committee

Parliament Buildings, Toronto, Ont.

CHAIRMAN: His Honor Sir John S. Hendrie, K.C.M.G., C.V.O., Lieutenant-Governor of Ontario. VICE-CHAIRMEN: Honorable Sir William H. Hearst, K.C.M.G., Prime Minister of Ontario; William Proudfoot, Esq., K.C., Leader of the Opposition. SECRETARY: Albert H. Abbott, Esq., Ph.D.

The only thing that balks German ambition is the Battle Line in France and—the British Navy
The only thing that sustains our men on land and sea is Food

A great many people buy shoes here

Who are of the come again and again kind.

Now, that wouldn't be so if our shoes didn't make it so, would it?

All this talk of ours is only intended to get you to be a tryer of our shoes. That's all.

After that it's up to the shoes to hold you as a steady customer.

They generally do it, but if they shouldn't do it in your case, we want you to tell us about it, because there is a mistake somewhere.

It matters not what your present or future needs in shoes may be, we guarantee you a good service.

Bring us your Butter and Eggs. Cash or Trade.

F. CARTER & SON

IN THE SPRING

will be the great test of a life and death struggle on the Western front. In the everyday walks of life, it is the spring time that brings ill health. One of the chief reasons why the run-down man finds himself in a bad state of health in March or April, is because he has spent nearly all his hours for the past four or five months penned up within the walls of house, factory or office. It is the reason for our diminished resistance—that is, lack of out-door life, coupled with perhaps over-eating, lack of good exercise, insufficient sleep, and constipation. In other words, we keep feeding the furnace with food but do not take out the "clinkers," and our fire does not burn brightly. Always keep the liver active.

There is nothing better for health than taking an occasional mild laxative, perhaps once a week; such a one as you can get at any drug store, made up of May-apple, Jalap, Aloes, (sugar-coated, etc.), mildly flavored, which has stood the test of fifty years of approval—namely, Dr. Pierce's Pleasant Pellets. But for the "Spring Fever," the general run-down condition, the lack of ambition, the "blues," one should take a course of treatment every spring; such a standard medicine as Dr. Pierce's Golden Medical Discovery, now to be had in tablet form in fifty-cent vials. Watch the people go plodding along the street. There's no spring, no vitality. A vitalizing tonic such as this vegetable extract of Dr. Pierce's gives you the power to force yourself into action. The brain responds to the new blood in circulation, and thus you're ready to make a fight against stagnation which holds you in bondage. Try it now! Don't wait! To-day is the day to begin. Gain a little "pep," and laugh and live. Vim and vitality are the natural out-pouring of a healthy body. It does not spring up in a night. Try this spring tonic, and you gain the courage that comes with good health.

COLTS ARE PROFITABLE

When Fed and Cared For According to the Best Practice.

TO BUILD FARM WORKSHOP

Full Directions With Plans and Bill of Materials—They Will Appeal to the Farmer Who Does His Own Repairing.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE FIRST WINTER is a critical time in the life of a colt. The care and attention he receives during this period determines, to a great extent, his future usefulness. If he be poorly fed, neglected, and allowed to become thin and weak, it is probable he will never be as good or valuable an animal as he would have been under more favorable circumstances. He, in the first place, should be provided with warm, comfortable and well ventilated quarters; and, while he should be taught to lead, and stand tied, it is much better if he have a roomy stall to stand in.

The next question is: "What, and how much should he be fed?" In our opinion there is little danger of overfeeding at this age. While there are exceptions, it is unusually safe to give a weanling all he will eat, provided he gets regular exercise, but it must be understood that he should not be given more than he will eat. It is a mistake to keep food before him all the time. He should, with apparent relish, eat all that is given him, in at most 1½ hours, and then will be ready for the next meal when the time arrives.

It is not easy to say just how much food a colt of a given age and size should consume, but the attendant, if a careful and observant man, will soon be able to determine the quantity to be given at each meal, and be able to give sufficient without waste. Hay and oats should be the food upon which to depend for growth, both of muscle and bone. If other grain than oats be given we will take back what we have said about "there being little danger of over-feeding." All food should be of first-class quality. Well-saved clover is the best kind of hay, but where this cannot be got, well-saved Timothy makes a good substitute. Hay should be fed in the necessary quantities three times daily, and we prefer whole, to cut hay for such young animals.

The manner in which oats should be fed will admit of argument. In our opinion, and experience, rolled oats that have been scalded and allowed to become cool, and that they thrive on such. The practice of mixing a ration of rolled oats and a little wheat chaff or cut hay, in a pail, pouring some boiling water on it, covering and allowing it to stand for a few hours before feeding, gives excellent results.

The morning's meal can be prepared in the evening, and the evening's meal in the same vessel in the morning, the noon-day meal being either dry rolled or whole oats. In addition to hay and oats the colt should be given a carrot or two with the noon meal, and a feed of bran, either damp or dry, at least twice weekly. This may be extra, or in lieu of oats, as is indicated by the apparent requirements of the colt.

His feet require attention. The wear is usually not sufficient to keep them in proper shape, the toes grow long and the heels deep and narrow, and the wall turns inwards below the quarters. If this be not corrected or prevented, permanent harm may result. The feet should be carefully examined at least once monthly and dressed to as near the normal size and shape as possible by the use of a shoeing smith's knife and rasp.

The stall should be cleaned out at least once weekly.—J. H. R., Ontario Agricultural College, Guelph.

A Farm Workshop.

The progressive farmer recognizes the need of a small building where he can overhaul, paint and repair his farm equipment in the most expeditious manner. Such a building must be compact and conveniently arranged with a floor space that will accommodate any of his larger machines.

The floor should be of concrete to stand the wear and tear. In making the floor it will be necessary to place the anchor bolts, to which the sill is fastened, before the concrete has set.

The work bench, forge and bester must be so placed that the centre of the floor is left clear, but the bench and anvil must be well lighted. The placing of the long window will depend upon which side of the shop receiving the best light.

Stairs lead through a trap-door to the loft, where the lumber, etc., is stored. This loft is lighted with a window at each end and it also has a small door at the front, on a level with the floor.

Income Tax Forms

Are now available

Returns must be filed on or before 31st March

THE Dominion Income War Tax Act requires you to fill in one or more of the five special Forms provided before 31st March, 1918. In order to assist the public to understand just what is required of them, information on each Form is given below. Read carefully, then get three copies of the form that fits your case and fill them in. Answer all questions fully and accurately. For making false statements, **a penalty of $10,000 or six months' imprisonment, or both, is provided.**

Individuals.—All persons unmarried, and all widows or widowers without dependent children, whose income is $1500 a year or more, must fill in Form T1. All other persons whose income is $3000 or more, use the same Form. Where any income is derived from dividends, list amounts received from Canadian and Foreign securities separately. Fill in pages 1, 2 and 3 only. Do not mark on page 4. Partnerships, as such need not file returns, but the individuals forming the partnership must do so.

Corporations and Joint Stock Companies, no matter how created or organized, shall pay the normal tax on income exceeding $3000. Use Form T2—giving particulars of income. Also attach a financial statement. Under Deductions, show in detail amounts paid to Patriotic Fund and Canadian Red Cross or other approved War Funds.

Trustees, Executors, Administrators of Estates and Assignees use Form T3. Full particulars of the distribution of income from all estates handled must be shown as well as details of amounts distributed. A separate Form must be filled in for each estate.

Employers must use Form T4 to give names and amounts of salaries, bonuses, commissions and other remuneration paid to all employees during 1917 where such remuneration amounted in the aggregate to $1000 or over.

Corporation Lists of Shareholders.—On Form T5 corporations shall give a statement of all bonuses, and dividends paid to Shareholders residing in Canada during 1917 stating to whom paid, and the amounts.

Figures in every case are to cover 1917 income—all Forms must be filed by 31st March. For neglect, a fine of $100 for each day of default may be imposed.

In the case of Forms T1 and T3, keep one copy of the filled in Form and file the other two with the Inspector of Taxation for your District. In the case of T2, T4 and T5, keep one copy and file the other two, with the Commissioner of Taxation, Dept. of Finance, Ottawa.

Forms may be obtained from the District Inspectors of Taxation and from the Postmasters at all leading centres.

Postage must be paid on all letters and documents forwarded by mail to Inspector of Taxation.

Department of Finance, Ottawa, Canada

Inspector of Taxation, Geo. R. Tambling, London, Ont.

FARM VALUES IN CANADA

The Census and Statistics Office at Ottawa recently published its annual estimates of farm values in 1917 as compiled from the reports of correspondents at the end of January, 1918. The estimates comprise (1) the average values of farm land, (2) the average wages paid for farm help, and (3) the average value of farm stock and of wool.

Average Values of Farm Land

According to the returns received, the average value of farm land for the whole of Canada, including land improved and unimproved, together with dwelling houses, barns, stables, and other farm buildings, is approximately $44 per acre as compared with $41 in 1916. The average values by provinces are as follows: Prince Edward Island, $43.7; Nova Scotia, $33.6; New Brunswick, $22.8; Quebec, $53.1; Ontario, $55.3; Manitoba, $31; Saskatchewan, $26; Alberta, $26.7; British Columbia, $149. In the last named province the higher average is due to orcharding and fruit growing.

Average Wages of Farm Help

The average wages paid for farm help during the year 1917 have increased substantially since 1916, and have again reached the highest level on record. In many cases they are double what they were before the war. For the whole of Canada the wages per month of farm help during the summer, including board, averaged $63.63 for male and $34.31 for female help, as compared with $42.22 and $22.46 in 1916. For the year 1917, including board, the wages averaged $610.60 for males and $354 for females, as compared with $397 and $228 in 1916. The average value of board per month is returned as $19.45 for males and $14.79 for females, as compared with $17 for males and $13 for females in 1916. By provinces the average wages per month for males and females, respectively, in the summer season, including board, were as follows: Prince Edward Island, $39.64 and $22.63; Nova Scotia, $53.25 and $26.43; New Brunswick, $37.19 and $28.14; Quebec, $59.09 and $28.98; Ontario, $59 and $31.96; Manitoba, $67.97 and $40.28; Saskatchewan, $73.21 and $41.09; Alberta, $76.09 and $44.44; British Columbia, $78.12 and $48.20.

Average Values of Farm Live Stock and Wool

On the whole there is but little change reported in the value per head of horses; in some of the provinces the value has remained stationary or has even declined. For cattle, sheep and swine, however, values are substantially higher than last year and are higher than in any previous year for which records have been collected. For Canada, the average value of horses, three years old and over is $167 as compared with $160 in 1916, milch cows are $84 as against $70; cattle between one year old and three years average $52 against $43; sheep are $14.93 against $10.48 last year, and swine are $17.33 against $11.98 per cwt. The average value of wool 59c per lb. unwashed and 75c per lb. washed. Correspondents were requested to ascertain as nearly as possible the average value per head of each description of farm animal, and for calculation of total values these averages have been applied to the total number of farm animals as returned in June last. The results are as follows: Horses $429,123,000 as compared with $418,686,000 in 1916; milch cows $274,081,000 as against $198,896,000; other cattle $270,595,000 as against $204,477,000; sheep $35,576,000 as against $20,927,000, and swine $92,886,000 as against $60,700,00. The total value of farm live stock in Canada is estimated to be $1,102,251,000, as compared with $903,686,000, the estimate for 1916 as finally revised by the Census returns for the prairie provinces. In 1917, for the first time, the total value of farm live stock exceeds one billion dollars.

TO INSURE THE POTATO SUPPLY

A very practical sugestion has come from an experienced farmer, by which Canadian women may insure an almost unlimited potato crop for 1918 if they will begin work by the end of this month. The supply of any kind of seed potatoes is very low and the reliable seedman will not handle an inferior grade, so it behooves us to make our own arrangements. For every half bag of potatoes in our cellars or purchased during the following six weeks we may expect at least six to ten bags in the autumn if about one-half inch is sliced off the seed end of each potato, thus saving the cluster of "eyes" that are usually scraped out or sliced off. Either keep these in a very cool, dark place—just above freezing point—or if you have any doubts about it or are not planning a garden, pass them on to someone who will use them. If sprouts appear, place out evenly in clear, dry sand, and about the middle of April or May 1st water slightly and allow to grow for a week or two, taking care that the brittle sprouts are not broken. When the garden is ready plant in the open. The potato seed thus saved is really no self-denial, yet makes us quite independent of the supply two months hence. The crop may not take first prize at the National Exhibition, but who buys only prize potatoes?

BORN

BIRRELL—At Pinkerton, on March 21st, to Mr. and Mrs. Wm Birrell, a daughter.

SOMERVILLE — In Elderslie, on March 14th, to Mr. and Mrs. Geo. Somerville, a daughter.

Notice to Creditors

In the matter of the estate of Charlotte Malloch, late of the Village of Paisley, in the County of Bruce, widow, deceased.

NOTICE is hereby given pursuant to section 56 of chapter 121, R.S.O., 1914, and amending acts, that all creditors and others having claims or demands against the estate of the said Charlotte Malloch, who died on or about the 13th day of February, 1918, are required to send by post prepaid, or to deliver to the undersigned David Forrester, one of the executors of the last will and testament and codicil thereto of the said deceased, on or before the 1st day of May, 1918, their names and addresses and full particulars of their claims, duly verified, and the nature of the securities, if any, held by them.

And further take notice that after the said 1st day of May, 1918, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have received notice, and that they will not be liable for the said assets or any part thereof, to any person or persons of whose claims they will not then have received notice.

Dated at Paisley this 23rd day of March, 1918

—The reports from some districts of Ontario state that the outlook for the fall wheat is very poor indeed. The recent thaw has removed the light covering of snow, leaving the wheat exposed to the rigorous weather that has since followed. Last fall was an unsuitable season for this particular crop and it didn't develop much top. It may be that a large acreage will have to be plowed up and put into spring grain.

—Two thousand bank employes will be called up for military service, under a judgment rendered by Hon. Justice Duff, Central Appeal Judge. Of this number 834 were called up March 15. The remainder are to report for duty in three drafts, approximately equal, on May 15, July 15 and September 15.

SAVE FOOD

In a time needing food economy many people are not getting all the nourishment they might from their food. It is not how much you eat, but how much you assimilate, that does you good.

The addition of a small teaspoonful of Bovril to the diet as a peptogenic before meals leads to more thorough digestion and assimilation and thus saves food, for you need less.

In the Driftwood

Flooded River Brings Precious Gift to Reunite Husband and Wife.

By Margaret Cameron.

John Bascombe stood upon the bank of the whirling river, looking on the wreck of his home. His wife, Mary, stood at his side, but even in this extremely of affection her hand did not seek his, and there was no sign that their common disaster had united them.

Things had not gone well with them during the three years that had elapsed since their marriage. He had been a clerk in St. Louis, and Mary was a school teacher. It was a boy and girl flirtation, followed by a boy and girl marriage; then, spurred by necessity and aided by the inheritance of a few hundred dollars, John had purchased a few acres in the flat lowlands of the western part of the state. There they had struggled almost from the beginning. It was the desperate struggle of the soil-hungry, seeking to maintain their hold upon the precious earth.

Gradually, under the influence of the hard and remitting toil, they had drifted apart. If Mary had had a child it might have brought them together. But because this was not destined to be they had grown to be almost strangers. Mary found the hard struggle intolerable and longed for books, people, intellectual life, such as she had been accustomed to; and John, busy from dawn to dark in his battle with nature, hardly had any other life at all.

When they ceased to hope for a child it seemed as though they must drift apart for ever. In fact they had spoken of a separation, at first tentatively, then honefully, then eagerly, as something to be anticipated.

"You can have everything except the house and the land," John said to her.

"I want to be free, as you do. I'll send you—"

"I don't want your money, John," she flashed out at him. "There isn't anything of yours I want—now. There was only one thing—love—and I don't want that any more."

They were to have separated that very day, John remaining there, Mary returning to St. Louis, to take up her work in the public schools again.

And then, a week before, the river began to rise. And soon came stories of the floods up the country that were carrying all before them, bursting through levees, overwhelming towns, sweeping away houses and churches as though they were but driftwood floating upon the stream, and drowning thousands.

And hourly the river rose, and Mary, forgetting for the time her own plans, stayed at John's side and fought the floods with him. It was little she could do; but all along the banks men were building up the levees, hoping to dam back that roaring tide before it burst through into the fertile fields that they had won from the scrub-covered bottoms of the old water-channels. And Mary, with a corps of devoted women, ministered to the savage, wearied, toiling men.

Then the worst happened; the river burst its banks, and, when the crest of the flood had passed, the little settlement was as matchboxes. Not a house was left standing. Only logs, shingles, and foundations remained. And down the stream poured the debris from a half dozen states on its wild career toward the Gulf of Mexico.

They stood side by side upon a little knoll and looked at the dull yellow ponds that covered their land. The land was there still but all the fruits of their works had been carried away. They looked into the turbid river and then into each other's eyes.

"What are you going to do, John?" asked Mary.

"I'm going to move west," he answered. "And you?"

"I shall go back to St. Louis," she answered. "There is no use in my staying here now."

"No," he agreed.

Mary was to leave on the following morning. They were sheltered in the railroad depot nearby which accommodated the homeless sufferers and stood just beyond the highest reach of the flood. On the next morning John set off at dawn. He could not resist the temptation to look once again at the ruin of his house; but he had not the heart to awaken Mary. When he left the squalid, sordid enclosure it was with no intention of returning.

And Mary knew that. She had not slept that night. She had thought, all through the long, sleepless hours, of that other ruin, their common life. Had she not also been to blame for that? She recalled times when she might have been more to John; endearments which she had repelled; times when she had let pride master her inclinations toward reconcilliation. And John had not changed, only he had let material things creep up between their love like noisome weeds, and strangle it. Yet she could not bring herself to call him back. She watched his tall, bent figure pass out of the enclosure, and out of her life, as she thought.

Half an hour later he was back, his face aflame. She looked at him in amazement. He might have been another man—no, the old one, her boyish sweetheart who had so long been only a memory to her.

"Mary!" he called. "Come! No, put on your cloak and bring your grip; I will carry it for you. Come—I'll show you!"

She accomplished him outside the squalid buildings to where the receding floods had left a swampy stretch of earth. Here their farm had been, their house and growing crops, and now—

She started in amazement. A new house stood almost upon the spot of the old one. It might have been their house—the house they had planned in the first dreams of their married life. Firm and foursquare it stood, with its eight rooms, its neatly shuttered windows, its front door with the gleaming knocker. Mary turned to John.

"It's magic, John. What does it mean?" she asked.

John pointed to the receding river. "It is the river's gift to us," he answered.

Torn from its foundations, hundreds of miles away, in heaven only knew what county or state, even, it had been deposited there by the flood. It needed but two teams of oxen to place it upon the foundations of the old home. And it was theirs! For it could never be taken away; probably those who had once owned it had died in the cataclysm. It was theirs, this home. They crept up toward it, wading like children through the swampy places. And, looking in, Mary gasped with wonder. For it was furnished, neatly, cheaply, but tastefully. There was a parlor, with a table and chairs, a living room; even the curtains swayed upon their rods. The river had borne it upon its breast as gently as a child.

"I wonder if the upper floor is furnished, Mary," John suggested.

Suddenly she caught his hand in hers and motioned to him to remain silent. "Hush, John!" she whispered, listening intently. "Did you hear anything?" she added presently.

John had heard nothing except the sullen lapping of the waves upon the river banks. But Mary's eyes were alight with a strange fire and her cheeks flushed and the hand that he held in his was trembling.

"What is it, Mary?" he asked stupidly.

Suddenly she dashed wildly up the steps of the stranded house, while John looked after her, wondering at the feverish eagerness which had succeeded her customary apathy. She disappeared inside, and almost immediately afterward she reappeared. Her hair was tumbling all over her face, upon her lips there played a smile of tenderness that he had often imagined there but had never seen. In her arms she carried a bundle.

She came toward him, and, as she unwrapped it, the feeble cry of a child smote upon his ears.

"Look, John!" she whispered.

An infant of six months was lying in her arms. And even as John looked he saw the little arms go upward, seeking Mary's neck, and, having found it, they clasped themselves contentedly around it.

"You do love me, John!" said Mary, with a little laugh. "He hasn't even finished his bottle—although the milk is souring. You didn't hear him," she added, "but I did."

She stood there so proud, so happy in the sheltered motherhood that John's arm stole timidly around her waist and he drew her toward him.

"Mary, dear," he whispered, "I have often thought that if we had a child—like this—it would have drawn us together. We would not have drifted apart as we have done."

"So have I," she answered passionately. "I felt that you resented it, John, my—my childlessness, and——and so——"

"You hadn't grown tired of me?"

"No, John, indeed no. If I had thought you wanted me to stay——"

"But I did and do want you," he answered triumphantly. "Only, Mary——"

"John!"

"He stays with us."

"Of course," she answered, turning up the little face for her husband's kiss.

A NEW NIAGARA.

Project to Develop 2,000,000 Horse Power by a Dam in Niagara River.

There is a plan on foot to build a large dam in the Niagara River about four and a half miles below Niagara Falls that would create a waterfall one hundred feet high capable of developing two million horse power. According to an article by Mr. T. Kennard Thomson in the Engineering News-Record, there is a point known as Foster Flats, just beyond the narrow gorge that extends for some miles below Niagara Falls. The banks of the River are there comparatively low. Here more than half the dam could be built on dry land, and it would then be easy to divert the swift-running waters from the present channel before building the rest of the dam. The Niagara River drops one hundred and two feet in its course from the head of the old falls to Lewiston, seven miles away, where it flows at the rate of two hundred and twenty thousand cubic feet a second. Mr. Thomson believes that the total head and volume of water should be used as a unit through the instrumentality of one large dam. Otherwise the public would have to pay for a number of disconnected power plants that could not make anything like the full value of the river available, and that would result ultimately in the destruction of all the power plants below the falls by ice. The most economical way to utilize the river, says Mr. Thomson, is to use as much water at the falls as the governments will permit, and afterwards return the water to the river directly below the falls, so that it can be used over again at the proposed new falls.

Buying In Toronto

"You'll enjoy buying in Toronto. The big stores are so busy and attractive. And the range of merchandise is so extensive that it is certainly a great pleasure—buying in Toronto.

And this pleasure is the greater because you can stay at the most comfortable of home-like hotels, THE WALKER HOUSE (The House of Plenty) where every attention is given to ladies and children travelling without escort.

And your purchases may be delivered there for you and relieve you of all worry.

When you come be sure you stay at

About the House

Hot Lunches.

In our school section last year, says one of the mothers, one hot dish was served to forty boys and girls of all grades every school day from November until April. Each child brought a cup and spoon. These with cooking utensils and supplies, were kept in the lower shelves of a locker or cupboard built across the end of one of the clock rooms. The blue-flame oil stove was placed across the end of the other cloak room.

This district has a woman's club. The club became co-operative with the teacher in serving hot lunches to the school children. They bought a twelve-quart aluminum kettle and a soup ladle. The board of directors bought two large dish pans. The mothers sent tea towels and took turns in washing them at home. An old sand table was cleaned, lined and used for a serving table, the cups, spoons and kettle arranged on it by the girls for serving and for dishwashing.

The Trustees bought canned soups, rice and cocoa for use in an emergency. We drew on these when the mothers were unusually busy.

The secretary of the club made out a list of the twelve mothers with children in school. One mother declined to serve, and the other family lived near enough to the schoolhouse to go home except on stormy days so they furnished soap and salt and pepper for their share. Each of the ten served once in two weeks.

The mothers who provided the dish for the day, either sent the materials prepared for cooking or cooked the dish and sent it in ready for reheating. Some lunches, such as cocoa and potato soup were cooked entirely at school.

Sometimes the children carried the lunch to school in the morning or a father or older brother would bring it at noon ready for serving.

The children brought their usual lunches to school. At noon they were dismissed for a five minute recess while the hot lunch was brought made ready to serve with the help of the teacher. When the bell was tapped each child took his lunch basket to his seat where he was served with a cup of hot soup. They soon learned that no time for play was gained by hurrying through a meal as all who were ready were excused after a reasonable length of time.

Here is a list of some of the dishes we served: cream of tomato soup, beef and tomato soup, bean soups (several kinds), vegetable soup, split pea soup, creamed chicken, chicken and noodles, turkey soup, baked beans, chopped boiled beef and noodles, rice in several forms.

Scalloped potatoes were a favorite dish. One mother living near the schoolhouse made a specialty of them after she learned how well they were received. The mother did not figure the exact cost but agreed that it was cheaper to furnish hot lunch once every two weeks than to put extra food in the lunch boxes every day.

Diet for Child of Two Years.

Fresh fruits, stewed fruits, purees of vegetables and cereal foods are suited to the child's wants, and with milk and cream are capable of supplying all its nutritive needs. The best cereal preparations are wheat flakes, shredded wheat biscuit, oatmeal, cracked wheat and graham bread. Potatoes and other vegetable purees and purees of fresh or stewed fruit should also constitute a considerable part of the dietary.

Children should be taught to drink frequently. Three to four ounces of water should be given several times a day between meals.

Children should be taught from the first to masticate their food thoroughly. This is highly important, as the habit of mastication formed in childhood is likely to be maintained throughout life.

DRESSING FOR EASTER—INSIDE

By L. D. Stearn.

Beth Dillon was singing softly as she bent over the billowing waves of ribbon and silk, and lace:

"Behold, the Lord is risen,
Send wide the glad refrain;
For He has burst asunder
The bonds of death and pain."

Clearly and sweetly her voice grew in volume until it floated out into the night, a silvery thread of melody:

"Throw wide the portals of your soul,
And let the Saviour in;
The Saviour, who has conquered
The grave and death, and sin."

Her mother came wearily up the stairs, and paused by the open doorway. Then she stepped inside. "Have you tried it on, dearie?" she inquired, glancing at the snowy puff on the bed. "Is it all right?"

"Yes'm—to the last dot." She laughed happily. "It's the dearest love of a dress I ever saw. I'll feel like a queen to-morrow. I had no idea you could coax it out of father. How'd you manage?" Then, not waiting for an answer, "I knew, soon's I saw it in Carlton's the other day, it would fit to a tee."

Lifting the billowy mass she shook it out. "Isn't it sweet?" she asked ecstatically.

Mrs. Dillon looked critically at the dainty frock. "It is pretty, that's a fact," she agreed. "I'm downright glad you have it. You'll be young only once, and Easter's the time for daintiness and purity, if ever any time is."

Beth returned to her former query. "How'd you manage?" she repeated. "Was father very obdurate?"

A second her mother hesitated. "To tell the truth," she confessed at length, "I only asked him for ten dollars. The rest was some I had."

"I see." The girlish voice was a trifle indifferent. After all, what did it matter how she got it so long as it was really hers? Then the telephone rang. "I'll go," she chimed, and danced down the stairs.

Over the wire came a neighbor's voice. "I wish you'd ask your mother, Beth, to tuck that recipe for sponge cake into her Bible to-morrow, and bring it along to church. I want to get it bright and early Monday morning."

"All right," responded Beth. "I'll tell her."

Hanging up the receiver, she ran up-stairs and, entering her mother's room, found her beginning to undress. She delivered her message.

Mrs. Dillon slipped into her bathrobe. "I'll give it to her over the 'phone," she said. "I'm not going to church to-morrow."

"Why, Mother Dillon!" Beth's eyes were wide; her face showed incredulous bewilderment. "You always go! And to-morrow's going to be grand—the best music and the best decorations we've ever had!"

"I know," quietly. "Nevertheless, I am going to stay home and put in a day of rest."

The pretty brows of the girl standing by the door were drawn into a little frown. "Mamsie," she announced, pointing an accusing finger in her mother's direction, "you've always taught me it meant a lot to be loyal to one's church."

"Yes, daughter." Her mother's voice was patiently sweet; her eyes had a far away, wistful light that did not escape the sharp young eyes of her daughter. "So it does. But it is God, you know, the Church stands for; and there might, perhaps, be circumstances that would necessitate going to church in the 'holy place called life,' which one can always find in her own heart and home," and, gently putting her on one side, Mrs. Dillon went down the stairs.

Beth returned to her room. "I wonder," she mused, "just what mother meant by all that!" Then, forgetting lesser things, she returned to the inspection of the new gown. A moment later she was hurrying across the street. "I'll just run in," she exulted, "and tell Gladys I have it."

Pushing back the door of the opposite house she stepped into the hall. "Gladys!" she trilled. "Gladys!"

"That you, Beth? Come on up."

A girl's head appeared over the upper stair rail, and Beth bounded up the stairs. Seizing her chum about the waist, she gave her a hug. "I've got the dearest gown!" she cried. Girl-fashion, she gave a little spin and dropped dizzily a laughing, rosy heap, in the centre of the room. "Oh, Gladys! it's a perfect dear! What'd you decide on?"

A slow, dull red crept into Gladys' cheeks. "I don't believe," she said slowly, "I'll go. Father says he can't afford an unnecessary dollar, times are so hard with him just now. I can't wear my old suit, when everyone else will be having something new and sweet, so I'm just going to stay home."

Dismay and quick sympathy touched Beth's face. "Oh, but," she wailed, "whatever'll we do? We need your voice, Gladys. You must come! I don't believe I'd have had mine accepting that I'm to sing that selection alone, you know. And anyhow, dear, dress or no dress, you've got to be loyal to your church, you know."

Gladys gave a short laugh; but there was no semblance to mirth in it. "It's easy," she announced, a thin edge of sarcasm biting along the edge of her words, "to talk about being loyal to your church when it's Easter, and you have the prettiest frock in town, with everything to match."

There was a moment of uncomfortable silence. Then Beth arose. "Good-night," she said stiffly, and marched, with hurt dignity, down the stairs.

"Behold the Lord is risen!"—she hummed the line, and stopped. The music seemed to have left her soul. "I don't see what's got into mother," she complained petulantly. "Going to bed with the birds, and staying away from church on Easter, of all days; and when I'm to sing alone, into the bargain!" and turning in at the gate rather abruptly, without raising her eyes, she ran plump into her father's arms.

He laughed. "Quite an armful," said he, looking down into her face. Then: "Dreaming of the new dress, I suppose?"

She nodded. "You'll be proud of me, father, when you see I have on the prettiest frock in town."

"Maybe." His tone was brusque. "It takes quite a deal, though, my lass, to make a father really proud of his girl."

Something in his tone brought a quick lump into Beth's throat: "And you're not thinking you'll be proud of yours?" she faltered.

The eyes of father and daughter met. Hers, questioning—hurt; his, quiet, keen and grave. "Hardly," he replied. "I suppose, as your mother says, you're young, and it's Easter, and all the other girls are having something pretty nice. But your mother's been saving that money quite a spell for a new dress and hat. She was trying to patch her old one up this afternoon when the baby got hold of the ink bottle and emptied it into her lap. She's worn that dress for six years, so I guess it isn't a great loss. But it's the only thing she has, so I don't see but she'll have to stay home until I can squeeze out money for another. I'm thinking I'll stay with her." Opening the gate, he moved briskly down the street.

Draggingly Beth went up the walk to the house. At the steps she turned. It was chilly and, she pulled her coat a little closer. "So far as comfort goes," she observed morosely, "one wouldn't mind her winter dress."

Once inside she went straight to her room and, lifting the dainty frock once more, shook it out, passing her hands caressingly over its soft folds. "It's mine," she said slowly; "mine!"

"Throw wide the portals of your soul,
And let the Saviour in—"

Mechanically the words flitted through her brain. "But," she said sharply, "I've got to go to church to-morrow, for I've got to sing. And it's for my church."

Very softly her mother's words appeared to float back to her: "It's God the church stands for, you know."

Crossing to the window, she stood looking into the peaceful April sky. Little billows of cloud were piled here and there. As she watched, the moon sailed slowly out of sight behind one, then, a moment later, emerged on the other side. And to the watching girl the word GOD seemed blazoned in gleaming letters over sky, and moon, and cloud.

Turning slowly, she crossed to her closet and, taking down the simple brown she had worn all winter, carried it to the dresser and turned on the light. With great, undecided eyes she scanned it. Then it dropped to the floor, and a second later she was kneeling, head on folded arms, beside it. "God!" she whispered. "God!"

"Throw wide the portals of your soul,
And let the Saviour in—"

Clear and sweet the words echoed and re-echoed through the house as, with shining eyes, she folded the dainty gown [illegible]ked it in its box. As she tied it [illegible]ard her father's step in the hall [illegible]ow, and flying down, box in hand, ran, for the second time, plump into his arms. "Father," cried she breathlessly, "somehow this dress doesn't seem to fit. That is, not on the inside. Won't you come with me and take it back? And father"—how clear her voice, how glad, and sweet, and steady her eye—"I've been looking over my brown. It will do perfectly well. Do you suppose we could pick out something mother'd like? She's gone to bed."

"I know what she selected," came the quiet answer. But on her father's face shone a sudden light. "I was with her when she tried it on. You see, we were planning on a rather simple one for you. We'll get that, too, if you like, so you'll both be decked out new."

Beth shook her head. "I guess," she said brightly, "I'll wear the brown."

Crossing to the telephone, she gave a number, and a second later her voice went over the wire. "Whatever do you think!" cried she; "that beauty dress and I don't seem to fit. I'm going to wear my old brown, even if 'tis Easter, so we'll be a pair o' sixes. . . . What's that! . . . Yes," a touch of almost awe creeping into her voice, "we'll dress for Easter, inside, Gladys."

Rising, she joined her father at the door, and as they went down the walk she hummed softly once more—

"Throw wide the portals of your soul,"

and her father's voice, rich and full, took up the tune—

"And let the Saviour in—
The Saviour, who has conquered
The grave, and death, and sin."

Just as of Old.

He stood on the beach at the break of day,
And He beckoned to toiling men;
Famished and spent, they heard Him say,
In the old kind voice, in the kind old way,
(That voice to be heard again!)
"Boys, have ye aught to eat?" "'Tis No!"
Cried the weary fishers of Galilee.

To-day and forever the One who cared!
Still, as of old, the same;
Questioning kindly how they fared
(Though their souls to His loving gaze were bared),
Calling them each by name.
Dead? Their Master? The Crucified?
Nay! though a thousand deaths He died!

Roast fowl bones make excellent soup.

The Palm Tree's Song.

With eager hands they broke my boughs,
And o'er his pathway scattered them,
Crying, "Hosanna! David's Son
Rideth to thee, Jerusalem!"

Under the feet of his lowly ass,
Gray with the dust of Palestine,
Did I not serve the Master then,
Even as olive and fruitful vine?

The grape's blood filled the holy cup
Wherewith his covenant was made;
The pitying olives sheltered Him
In the dark garden where He prayed.

My branches, bruised underfoot,
Where eager hands had scattered them,
Made green the stony way He fared
In triumph to Jerusalem.

Must Have Help.

Sir William Goode, Secretary of the British Ministry of Food, says: "Few people have yet grasped the fundamental fact that Great Britain still relies on the United States and Canada for sixty-five per cent. of her essential foodstuffs. Unless we can get this food, or nearly all of it, we shall peter out."

RENNIE'S
War Time Production
Seeds

THERE must be no "slackers" this year, either among the seeds or the growers. Every man and woman with garden space, must produce to the limit of his or her ability. And that is why Rennie's seeds are so essential—live, vigorous seeds from tested stock, to ensure record crops.

FEED THE CROP, NOT THE SOIL

Some farmers believe in feeding the soil. This practice may be good. In these days of high prices for all farm crops we believe that it is much more profitable to feed the crop the necessary plant food (fertilizer) to produce maximum yields, and to resist disease.

Years of experimentation have shown just how much Ammonia (Nitrogen) Phosphoric Acid and Potash are required by all crops. With this information we have prepared a bulletin showing just what grade or analysis of fertilizer you should use in the raising of your particular crop on your type of soil.

This bulletin free for the asking.

If you have never used fertilizer you will find its use this year more profitable than ever before.

AN EASTER SERMON

"He is not here, but is risen!"—St. Luke, xxiv., 6.

It's Easter Day! Nature lifts her head in the newness of life: The soft, clear notes of cathedral chimes mingle sweetly on the crisp morning air with the deep-toned bells of far-away spires. In crowded city, in secluded hamlet, sleep-surfeit eyes open upon a world that has been touched as if by some magic wand. The ceaseless patter of innumerable feet, expressive of the buoyant hearts they bear, sounds in strange contrast with the slow, weary tread of bygone days. From our hearts, as if touched by some mystic charm, rises a matin song!

Easter Day is Here! The fast is broken! The passion has ended in praise! The memory of Gethsemene and Calvary are forgotten in the vision of an open tomb. "Dumfounded, yet gladly credulous, we listen to the story of the first Easter evangel: —"He is not here, but is risen!"

Easter Day is the day of the empty tomb; it proclaims the victory of right over wrong, of truth over falsehood, of justice over injustice.

Victory Over Wrong

If ever the principles for which man suffered were worthy of vindication, surely the principles for which Jesus suffered and died were worthy of that vindication. If Jesus Christ had gone down to permanent, ignominious defeat, then were there little hope for the noblest principles for which men's lives are spent. That Jesus rose from the tomb speaks in no uncertain terms of the victory of right over wrong, of justice over injustice. Easter Day brings timely reassurance to the champions of justice and right. However long the conflict, however discouraging the odds, the principles of right, of truth and of justice must ultimately rise glorious from the dust into which they have been trodden. No bastion walls, no armament of steel, no murderous curtain of fire, not even a rock hewn tomb shall forever smother and mock the principles which on this day Heaven has honored!

Easter Day proclaims the assurance of the eternal reality of the spiritual. "If Christ be not risen from the dead:" If death is the end of the road; if the self discipline, sacrifice and suffering that have entered as indispensable elements into the development of life have no other purpose than furnishing thought for beautiful epitaphs—But they have; they make character, and character is the dress of the soul, and the soul is the immortal life from God.

A Glorious Immortality

"Easter Day," some one said, "is something more than a mere festival of immortality. If it were not, if it contained nothing more than the promise of life's continuance after death, then there are thousands that are not interested in it."

Easter Day proclaims not only immortality, but a glorious immortality; not only a life of endless years, but endless years fraught with endless growth, endless good, endless joy.

Easter Day assures us of the final perfection of life through the risen Christ, "the first fruits of them that are asleep."

A little lad, tired and worn at the close of the day, after a long struggle with the solution of a problem, cried himself to sleep. While he slept the father with rapid strokes of the pen rewrote the problem, with its correct solution, on a clean tablet. Opening his eyes, a look of gladness brightened the little fellow's face as he saw the neatly worked out problem in the place of the dirty, tear stained paper over which he had fallen to sleep.

Easter Day contains the promise for us of the Master's perfect life, to which we shall awaken after we have closed our eyes to the human, imperfect, tear stained product of our own endeavors.—Rev. Stillman E. Leiss.

Eastertide, 1918.

For pagan or Christian the great spring festival stands for confidence in life in spite of death. It brings anew the eternal message annually reiterated. It says that:—

—manhood is the one immortal thing
Beneath Time's changeful sky—
That length of days is knowing when
to die.

Without confidence in that principle, how can people get along with war that gathers the young to its untimely reaping; with this war especially, which gathers all the ages with a pitiless voracity that shows, as yet, no sign of satiation? It must go hard indeed with anyone who does not feel that life is something to be spent; not hoarded, but given in purchase when the treasure that is worth the price of it comes to market.

In a day that cannot now be very far distant, this heroic period we live in will reach its further limit, and there will be peace again. But what kind of a world will follow, and who will make it, the living or the dead?

Be sure the dead who have died for it will make it in great measure for a generation to come. The coming world will come pledged to them; pledged to be worth the price they paid to save it, pledged to realize their costly hopes for it. It cannot be the world it was. They have paid to change it, and change it must. People who reckon that the future will be another instalment of the past reckon without the dead who have died to make it different.

Human life is receiving an enormous new consecration. Not in the time of anyone alive four years ago will this world be again what it was then. The living are trying, and with mighty efforts, to shape its course, but every day and week and month they deal more and more with a world held in mortmain, that proceeds not as they will, but as the dead decree.

The world that is coming will belong to those who paid the price of it. This is their Easter; theirs who have emulated the sacrifice whereof at this time Christians celebrate the glory. Not them shall we see come back to earth, but we shall see a resurrected world, and it will be theirs.—E.S.M.

Easter Eggs.

The "new clothes for Easter" custom is based upon a centuries-old superstition that if new clothes were not worn then, for that year good-fortune would depart. "At Easter let your clothes be new, Or else be sure you will it rue." But that was not written in war-time.

Another Easter belief, of which the Food Controller might take note, is that if anyone would abstain from meat on Easter Sunday they would be free of fever for a year. Another belief was that by eating radishes as the first food on Easter Day the quartan ague would be kept away for a year.

The Easter holiday is ecclesiastical in origin and very ancient. Rejoicings and festivities were held in every parish. Even archbishops and bishops relaxed their dignity and played handball with the inferior clergy.

The moon settles the date of Easter, the rule being that it shall be the first Sunday after the full moon, which happens upon or next after March 21st. And if the full moon happens on a Sunday, Easter is to be the Sunday after.

Easter eggs are not Christian in origin, having been used religiously by pagans before Christianity. The symbolism of the Easter egg is that, as it holds the germ of a future life, it is an emblem of resurrection and immortality.

It is always Easter on God's side of the grave.

The Christian religion is pitched on an ascending scale. It begins with an emancipation, and it ends with an ascension. The path of the just shines more and more to the perfect day: the day that is refulgent with the seen presence of the Son of Righteousness.

"The day breaketh; the morning cometh; the shadows flee away."

LOVAT

The people of this section put in a jovial night at the home of Mr. R. Teeple on Thursday, March 21st, the crowd making not only joy for themlesves but for others. Mr. Jas. Bezz was selected to fill the part of presiding officer, and the first item of the programme was the presentation of a wrist watch and pair of military brushes to a son of the household who has recently signed up with the flying corps and leaves for training in a few days. The following address was read by Miss Hazel Ritchie, the presentation being made by Miss Jennie Acton :

To Pte. John Teeple :

Never in the history of the world has there in these varied emotions we all share. We been such a universal mingling of pain and pleasure, of hope and fear, of trust and doubt have been accustomed to look upon war, and the greater issues involving the making of nations as afar off, as something which we might safely leave in other hands. Not so now. War has come near to us, hovering over and around all we hold most dear. We have given of our best and bravest to help turn the hand of the aggressor from nations equally brave and far more chivalrous, nations which stood between our beloved Canada and the enemies' sword point, and we are justly proud, and thankful too, to welcome home our wounded heroes. The best we have to offer them is none too good. We are also justly proud to meet in this home to-night to honor you, a soldier of our king. We are not insensible to the void your absence will leave in your home and in the community, but we feel that you are called to higher service. The chivalry of the British soldier is no longer a tradition to us, to be read of in books; it is a living power in the world to-day. And with all that is good and great in our good and great nation you are now identified. We are conscious of the fact that you may suffer many privations which we would brave were it possible; that you are leaving much behind which is worth while, but we congratulate you on being able to take with you the memory of a happy and an honorable home. We trust these gifts—a wrist watch and military brushes—which we offer you may remind you of our unfailing good will to you, and be assured that often from our hearts will arise a prayer for your safe return. "For the want of the nail the shoe was lost, for the want of the shoe the horse was lost, for the want of the horse the rider was lost, for the want of the rider the battle was lost," but never can it be said that for the want of teh boys from Bruce the Great War was lost.

Signed on behalf of your neighbors and friends, Howard McKeenan, J. G. McKay.

The soldier was not the only one honored by the gathering, esteemed yeomen also receiving marks of esteem from their fellowmen. Mr. and Mrs. John Metcalf and Mr. David Metcalf, who are removing from Lovat to the 14th con., were remembered very kindly on the eve of their departure. The young couple were presented with a dining room table, and the old gentleman with a gold watch chain as mementos of their residence here. The accompanying address was read by Mrs. Duncan McGillivray, and the presentation made by Mr. W. J. Ross.

The Address

To Mr. David Metcalf, Mr. and Mrs. John Metcalf and Family—

Having learned of your departure from our community, we your friends and neighbors have gathered together here to-night to spend a social evening with you, and above all to express our regret to you of your removal from our midst. We shall miss you all, as you were ever ready to lend a helping hand in time of need, and we assure you a hearty welcome any time you may return to us, and for the future we wish that Providence may be kind to you, and that you and your family may be blessed with health and prosperity. We kindly ask you, Mr. David Metcalf, to accept this chain and locket, and you, Mr. and Mrs. John Metcalf and family, this table, not for their monetary value, but to express to you all in a slight and tangible way our esteem towards you, and we trust that in years to come it may recall many pleasant memories of happy associations spent in your former community.

Signed on behalf of your friends and neighbors, W. J. Ross, Duncan McGillivray.

The presentations over, the chairman called upon those present for impromptu contributions to a programme of music, songs and speeches, and upon completion of this dainties were enjoyed for several hours. Mr. and Mrs. Teeple are ideal host and hostess, and everyone spent a very pleasant evening under their roof.

Mr. John McGillivray, of the 6th con., has bought property in Paisley, and we understand will move to town next fall.

Mr. Edgar Brownscombe recently underwent an operation for appendicitis at Walkerton hospital.

Mr. Jas. B. McKay intends building a new barn this year, and is preparing his material.

MAPLE SUGARING

By Mrs. A. Chipman, in the Halifax Mail

Ha! Ha! to live where maple trees sway in a brightening sugar breeze! Ravens cawing, snow is thawing; winter's going, sap is flowing. The maple sweet is now the treat. So come in haste and with us taste maple honey—cheap for money, at lowest price. So very nice! Friends are meeting, kindly greeting. Stir down the pot, now dip out, hot, a little pool on snow to cool, and there to taste. Be quick, make haste! You of city, how we pity! For our very air is sweetened; and each heart forgets its troubles, as we gather round the sugar bush where the maple nectar bubbles.

CARGILL

Mr. Wm. Cliff is away on a trip to Oshawa.

Mr. Floyd Fink, who has been visiting at Mr. Hunstein's, returned to his home in Mildmay on Monday.

Mr. P. B. Ross, who has been acting as manager of the Cargill, Ltd., has resigned and returned to his home in Detroit.

Mr. Saunders, of the Dominion Well Supply Co., has secured the agency of the Ford car in this district, and expects his first carload of "Lizzies" shortly. With this line added to the many other lines this firm handle, they should have a busy season.

Rev. Thos. Wilson, of Walkerton, occupied the St. Andrew's pulpit here last Sunday, preaching two excellent sermons. Rev. Mr. Gale took Mr. Wilson's work in Walkerton.

Born—On March 22nd, to Mr. and Mrs. K. Cliff, a son.

Real estate still continues to change hands in this vicinity. This time Mrs. John Hall, sr., has sold her farm to Mr. Geo. Bester.

Mrs. Wes. Brownscombe and children, of Stratford, are visiting at Mr. H. Brownscombe's.

Mr. Arthur Alexander met with a painful accident while at work in his father's bush above Pinkerton last week. He was chopping a small tree which flew back, striking him in the face and cutting it badly. He is staying at Mr. Wm. Reid's, where he is being treated by Dr. Bricker.

Mr. H. Brownscombe was in London the first of the week.

Miss McKinnon, of Walkerton, visited her sister, Mrs. M. Bester, last week.

Andy made several trips to Eden Grove with his car on Sunday.

We are sorry to report that our old friend, Mr. Geo. Keyes, had a weak spell last week and is not very well. Mr. Keyes passed his 91st milestone early this month.

GLAMIS

Mr. and Mrs. Madden, of Detroit, are guests of Mr. and Mrs. Groves.

Mr. McCleneg, who spent some time here with his son, returned last week to his home near St. Thomas.

Mr. Chas. McKinnon is moving this week to Ripley.

There will be no service in the Baptist church next Sunday night, as Mr. McCauley will spend the holidays with his mother in Tara.

Mrs. Jessie McDougall, who has been occupying the McKay house, got notice to leave as the place was sold.

Mr. Groves has been confined to the house for some time owing to a growth on his lip, but under the doctor's care he is doing nicely.

Mrs. McPherson and daughter and Miss Smythe, of the lower boundary, visited our burg on Sunday.

An accident that might have had a serious ending happened to Mr. Artie Alexander on Saturday. He was alone in the bush cutting wood, when a sapling flew up and struck him in the face. He was unconscious for some time, but was able when he came to to go to the doctor. He had to have some stitches in his lip. His face was badly cut in some places, but we trust he will soon be himself again.

UNDERWOOD

Winter visitors from the west are turning homewards again with the approach of spring. Mr. Wes Kaake left for Sanford Dene, Sask., on Saturday, Mr. Wallace Inkster for Raymore, Sask., on Tuesday.

On Tuesday evening, March 19th, a miscellaneous shower in honor of Mr. and Mrs. S. Tripp (nee Susie Begg) was given in the Tp. hall, by a number of her friends. A pleasant evening was spent. Mr. and Mrs. Tripp were home on their wedding trip.

The Underwood Patriotic Club held a very successful box social and entertainment on Friday evening, at which the proceeds amounted to $143. The big feature of the programme was the comedy, "That Rascal Pat," in which the characters were taken by Misses Sadie McKay and Lena Wittig, Messrs. C. Drummond, W. Thede and McLean Young. Addresses were also given by the chairman, Reeve Johnson, and Mr. A. P. Mewhinney. The former spoke of the great need of Red Cross work and the latter urged wheat production. Solos were rendered by Mrs. S. George and Mr. McLean Young, instrumental music by Messrs. W. McKay, T. Brown and W. Avis.

Children Cry
FOR FLETCHER'S
CASTORIA

GRESHAM

The managing board of the church here have greatly improved the windows by decorating the glass with an artistic design of vitrophane.

Quite a number in this vicinity are tapping their maples.

We understand that Mr. Duncan Morrison and family are going west shortly.

The W. M. Society met at the home of Mrs. Jas. A. Pace on the 14th inst. This was the last of the house meetings for the year. Next meeting will be held in the church.

Mrs. Jas. McKinnon has returned home after spending some time nursing her father, Mr. Jacob Fletcher, who, we are pleased to say, is recovering nicely.

We understand that Mr. Hood, who bought the Kaake farm lately, has sold it again for grazing purposes.

Miss Irene Leggett visited her aunt, Mrs. A. P. Mewhinney, lately.

It is reported that the house at the mill is to be removed shortly by the new proprietor. This will be another landmark gone.

Rev. Mr. MacNabb and Miss Isabel leave next week for Toronto. Rev. Mr. Sawers will supply during April for Mr. MacNabb, who preaches his farewell sermon in May.

KEEP YOUR HOLIDAY HEALTH

Make it your business to always look and feel as well as you do at the end of your vacation. Sunshine, fresh air and exercise are nature's great restorers and the health gained during a holiday should carry you well along to the next vacation.

It is most important that the blood be kept cleared of impurities. This is the business of the Kidneys. Once there's incapacity on the part of the Kidneys and the blood begins to get clogged with poisons which are carried to all parts of the body—giving rise to one or more of the following symptoms—

Rheumatism follows the crystallising of uric acid in the muscle tissues and joints. Uric acid poisons should be eliminated by the Kidneys.

Swollen joints and ankles indicate the immediate need for Gin Pills. Pains in the sides and back and through the groins, constant headaches, restless nights, derangements of the urinary system, stone and gravel, puffiness under the eyes and frequent chills—all these should be taken as warnings and a treatment with Gin Pills taken at once.

50c. a box or 6 boxes for $2.50, or a free sample will be sent upon request by National Drug & Chemical Co. of Canada, Limited, Toronto, or to the U.S. address, Na-Dru-Co Inc., 208 Main St., Buffalo, N.Y.

BRUCE TP. BOARD OF HEALTH

Underwood, March 12, 1918

Bruce Tp. Board of Health met on the evening of March 12th. After dealing with some routine business, the question of having schools, slaughter houses, &c., inspected by a member of the board or sanitary inspector was carefully considered, the concensus of opinion being that these annual inspections were having a beneficial effect. It was therefore decided that all schools and slaughter houses in the Tp. be inspected, the inspector being authorized to draw the trustees' or owner's attention to any alterations or improvements they might think necessary in the interest of the public health, also to report to a meeting of the Board, to be held in June, to receive inspectors, reports and to take any action that may be considered necessary or advisable. Board adjourned to meet at call of chairman.

J. G. MacKAY, Sec'y

—Notwithstanding the ravages of fire and the changes wrought in business, Eden Grove is to remain on the map. The G.T.R. is preparing to build a new station there this spring, some of the material having been unloaded this week.

—Bruce county towns and villages are well supplied with churches. Chesley has 7, Kincardine 8, Lion's Head 4, Lucknow 4, Mildmay 5, Paisley 4, Port Elgin 8, Ripley 3, Southampton 5, Tara 3, Teeswater 7, Tiverton 3, Wiarton 7, Walkerton 7.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

One of a family of fourteen pigs which was fittingly named Caesar Ribbicle's of Greenock last week showed a strange freak of nature. From its middle backwards this little porker had a double body, with a double set of hind legs and two tails. It was an odd looking monstrosity. The freak pig did not live but its thirteen young brothers and sisters who were favored with the ordinary number of hoofs and tails are thriving and very much alive.—Telescope.

The Ford Saves the Hay and Oats the Horses Eat

IT HAS been estimated that five acres of land are required to maintain one horse for a year, and that the same five acres would produce nearly enough food for two people. If 50,000 Canadian farmers each replaced one horse with a Ford, 250,000 acres would be added to the Nation's source of food supply and enough extra food made available to feed 100,000 people.

Just think what a great service this means to the country at the present time and the benefit to the farmers from the sale of food produced on this acreage.

A Ford car also saves the farmer a week or more of valuable time each year, which can be used for further productive work. The Ford travels three times as fast as a horse and rig—costs less to run and keep, and is far easier to take care of. With labor so scarce and high priced, time means money, so do not delay in getting your Ford.

Spring Wheat Seed for Ontario

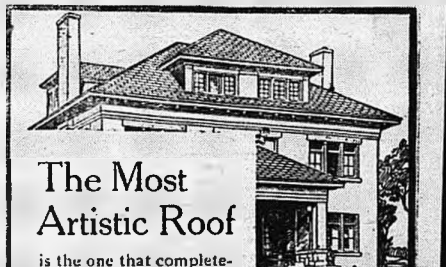
The world demand for wheat in 1918 justifies the greatest possible effort towards increased production. The small acreages of fall wheat put in last fall will mean increased acreage in Ontario available for spring wheat. The Ontario Government is co-operating with the farmers in order to provide seed. It has purchased 50,000 bushels of No. 1 Marquis Spring Wheat seed through the Seed Branch of the Federal Department of Agriculture. More will be purchased, if necessary, to fill needs.

Distribution—Seed is sold only in 2-bushel bags. Carloads will be placed at certain points in the province where less than carload orders can be filled, the purchaser paying local freight from such distributing point to his own station. Where Farmers' Clubs or other organizations bring in carload lots, the price at their local stations will be the same as at distributing points.

Where to Buy—Purchases may be made either in the warehouse at the distributing points, or orders may be placed with the nearest District Representative of the Provincial Department of Agriculture, or they may be sent direct by mail to the Markets Branch, Department of Agriculture, Parliament Buildings, Toronto.

Payment in Cash—Price is $2.74 per bushel at distributing points. In all cases, without exception, Cash must accompany order. Send remittance by marked check, postal note, postoffice or express money order made payable to Ontario Department of Agriculture, Markets Branch.

Order Early—In the event of the requirements of the province being underestimated, there may not be enough seed to go around. It is advisable in order to insure having their orders filled that purchasers should place orders as soon as possible. All orders are subject to confirmation and will be filled in the order received. As seed is delivered in 2-bushel bags, orders should be for even number of bushels, and no order for less than two bushels can be accepted.



Names of Distributors are as follows: Listowel, "Hay Brothers;" Durham, "Rob Roy Cereal Mills Company;" Orangeville, "E. C. Clark."

Farm for Sale

150 ACRE farm for sale. Soil good clay loam, excellent buildings, splendid water all year round at both houses and barn, on R. R. delivery and telephone line, situated on a much travelled road. For further information inquire at this office.

Yorkshire Hog

THE undersigned has for service on his farm, lot 1, con. 18, Greenock, a thoroughbred Yorkshire hog. HUGH AUTH St.

The Most Artistic Roof

is the one that completely harmonizes with the design and finishing of the house. For this reason there is a steadily increasing demand for Brantford Asphalt Slates for the modern style of homes.

Brantford Asphalt Slates have a surface of crushed slate embedded into our asphalt coating, the base of the roofing being felt saturated with asphalt. They are cut the size of shingles, and their beautiful soft colors of reddish brown and dark green give a roof a most artistic appearance. The colors are the natural shades of the slate as it comes out of the quarries. Brantford Asphalt Slates are, therefore, unfadeable—never require painting.

Brantford Asphalt Slates

are accurate in size and pliable, which makes them very easily handled and quickly laid, saving time and labor, and therefore costing less to buy.

Brantford Asphalt Slates make an artistic, durable and economical roof. Booklet describing them mailed on request.

For information call

WALLACE McGRAW

Bell Phone, Paisley Central.

—Mr. Hugh Watt has moved to the property on Goldie St. east, which he purchased from Mr. Jas. Hay.

—Mr. John Devine and son were over from Kincardine on Good Friday, visiting at the home of his sister, Mrs. D. Sutherland.

—Mr. Wm. Thompson, who had been visiting his parents, Mr. and Mrs. Ed Thompson, at Lockerby, recently returned to his home at Red Jacket, Sask.

—Mr. Barney Stanley, of the Vancouver hockey team, took a run up from Toronto on Friday, and spent a day with his parents at the Central Hotel

—Mr. Glover Lloyd, of Vancouver, B.C., was here on a visit at the home of his cousin, Mr. D. A. Lyon, during the past week. The visitor is a former Lockerby boy, who went west nearly thirty years ago. His parents, Mr. and Mrs. W. C. Lloyd, are living in Vancouver.

—Men of category B in class 1 are being called up for service in non-combatant units such as the railway construction, forestry and army medical corps.

—Mrs. Jas. Esplen, who has been under the care of doctor and nurse at Walkerton hospital during the winter months, returned to her home here on Monday.

—Mr. and Mrs. Wm. Little, of Calgary, have been visiting in Bruce county this winter, and were at the home of his cousin, Mrs. John Bryce, Paisley, for a few days. Mr. Little is a former reeve of Brant Tp.

—Mr. and Mrs. Robt. Brown have moved in from Bruce township to their home on Victoria St. south, lately occupied by Mr. P. B. More. The latter is now in the residence vacated by Mr. H. McKerracher.

—Misses Ina and Donalda Galbraith have gone to Caledonia to attend the funeral of their cousin, the late Flt.-Lieut. Geo. Parrish, son of Mr. and Mrs. A. W. Parrish, of Caledonia, who was accidentally killed while training in England in January. The remains were expected to arrive from overseas this week.

—Teachers home for vacation—Misses Mildred Johnston and Jennie McLennan, from Toronto; Miss Elizabeth McLennan, from Clifford; Miss Alice Rankin, from Eldorado, Ont.; Miss Prudence Kerr, from Dutton; Miss Ethel Kennedy, from Orillia; Miss Ethel Barnett, from Port Elgin; Mr. Wm. McBride, from Kenilworth; Miss Annie [illegible] man, from Port Willi[illegible]; Miss Annie Bergman, from Toronto.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpareil line for first insertion, 5c per line for each subsequent insertion.

Advertisements of Strayed, Farms for Sale or to Rent, and similar, $1 for first three weeks and 25c for each subsequent insertion.

Advertisements without specific directions will be inserted till forbidden and charged accordingly. Changes of advt. charged by the inch. Balance on application.

Advertisements of the local columns are charged 10c per line for first insertion, and 5c per line for each subsequent insertion. This includes announcements for church or school entertainments, garden parties &c. No notices less than 25c. Regular advertisers by the line, no adv. less than 1/4 inch in black-faced type, price and one-half.

—Marriage licenses issued and money to loan. T. H. George.

—For Sale—Lot 28, Con. 7, Bruce, 100 acres, all under grass. Apply to D. Forrester.

—Full line of fine engagement and wedding rings at A. Shoemaker's jewellery store.

—Highest prices paid for hides and sheepskins. W. E. McGregor, Butcher, Steele Block.

—25 pieces of Military Flannel for Red Cross purposes just received. Ballachey, Laidlaw & Co.

—For Sale—The residence of the late Mrs. Fleming, Queen St. north, Paisley. Apply to D. Forrester.

—Highest price for beef hides, horse hides, calfskins, sheepskins, tallow, &c. F. Oltsher, Paisley Meat Market.

—Congoleum Rugs, the sanitary and handsome floor covering, in stock in different sizes and patterns. Ballachey, Laidlaw & Co.

—Thoroughbred, bred to lay S. C. R. Island Reds. Cedarbrae Egg Farm Strain. $2 per 15 eggs. Fertility guaranteed. L. C. Spofford.

—E. Steventon's quick healing salve is the best made. We have a choice line of tobaccos and cigars, stationery and school supplies. Agent for daily papers and magazines. Give us a call.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent. interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D. Forrester, barrister.

—FLOUR, FEED, SEEDS, GRAIN—We keep a full stock of Five Roses and Stark's high grade flours, bran, shorts, Blatchford's molasses meal, poultry foods and tonics. Always in the market for coarse grains. W. STARK.

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles.

I. S. CRUICKSHANK, the Tailor

—Mr. John Little was in Toronto for Easter.

—Miss Kate McBeath is home from Guelph.

—Mr. Thos. Muir was in Toronto over Easter.

—Miss May Boyle is visiting friends in Hamilton.

—Miss Annie Stanley spent Easter in Southampton.

—Miss Jean McKerracher spent the holidays in Toronto.

—Miss Tess Thompson was home from Toronto for Easter.

—The Misses Cameron are back from Toronto for a short time.

—Mrs. S. Davison, of Greenock, was in Toronto for a few days.

—Miss Agnes Pearce was home from Owen Sound over Easter.

Miss Edith Keaney, of Mount Forest, is visiting at Mr. M. Leitch's.

—Mrs. Chaves went to Walkerton hospital on Saturday for a couple of weeks.

—Mr. Wm. Robson has bought Mr. Dan McLean's property, east of the station.

—The W.C.T.U. will meet in Putnam's hall on Friday, April 5th, at 3.30 p. m.

—Miss Viola Issard, of Wingham, is a guest at Mr. Wm. Sparrow's Goldie St.

—Mrs. H. B. Putnam visited her daughter, Mrs. Fleming, in Toronto, over Easter.

—Mr. T. F. Pearce and Abbie Stanley were in Toronto a few days last week.

—Mr. Jas. Ellis, who is employed in the aeroplane factory in Toronto, was home for Easter.

—Misses Kate McNeill and Margaret Sparrow visited friends in Walkerton on Monday.

—Mr. Wm. Minto has bought the west half of lot 34, con. 11, Bruce, from Mr. Mac McDonald.

—Miss Beulah Rudolph and Miss Edna Cumming are home from Stratford Normal for Easter.

—Mrs. Thornburn and daughter Edna, of Port Elgin, were Easter visitors at Mr. J. J. Jacques'.

—Mrs. Leggett and daughter Gertrude, of Hamilton, are visitors at Mr. Jacob Fletcher's, 10th Bruce.

—The Misses Miller are in Toronto this week, and will attend the Ontario Educational Association meetings.

—Mr. Alex Galbraith, who has been confined to his home since his sudden illness a few weeks ago, is again able to be out and around town.

—Mr. Robt. Burns, of Lockerby, who sold his farm and stock this spring, bought a home in Chesley, and this week removed with his family to that town.

—Ladies' Skirts at 98c. How about one? Ballachey, Laidlaw & Co.

—No government sugar can be got yet, but a regular supply is expected after April 15th. Paul Oltsher.

—All accounts not settled by April 15th will be placed in other hands for collection. F. S. MacLachlan.

—For Sale—Red clover seed and some clean timothy seed. D. J. Porter, Paisley, R. R. No. 4, Bell phone 83-2.

—SEED FOR SALE—A quantity of mixed timothy and alsike cleaned seed. Apply to Wm Pearce, Paisley, R R No 3. Bell phone

—For Sale—A dark roan Shorthorn bull calf, nine months old. A good individual, and choicely bred. John Scott, Port Elgin, R. R. No. 1, Bruce phone.

—Red clover and timothy seed for sale. Tested No. 1 for purity. Clover seed $22, timothy $5 per bushel. Stock kept in Ballachey, Laidlaw & Co's store. Don't fail to see it. Elves Bros.

—Auction sale of farm stock and implements, on lot 28 con. 14, Greenock, on Monday, April 8th. List includes 4 horses, 4 cows, 7 young cattle, 7 pigs, 70 hens. Mrs. Thos. McIntosh, prop.; R. C. Pearce, auct.

White Field Seed Beans

I have some for sale, guaranteed A1 quality at $9.00 per bushel delivered. H. Grice, Cargill.

Seeds! Seeds!

Get your seeds early this season, as the supply of some kinds is not equal to the demand. We have a full assortment of garden seeds, also clover, turnip, mangel, etc. See us for seed corn. Walter Stark.

Wall Paper

A DISCRIMINATING customer will find all they desire in variety of designs, novelty of colorings and general desirability of the goods we offer to suit their fancy. Our stock is full and complete. Eggs taken in exchange.

PAISLEY

The AUTOMOBILE

The Spring Overhauling—II.

The carburetion system follows. Care of this should include forcing air through the fuel carrying pipes, cleaning of the strainers, removal of the air block so that cold air is fed, but no adjustment should be changed until the car is taken on the road later. This is suggested because you cannot properly adjust for new conditions, not knowing what the present adjustment will do under these conditions.

Before leaving the engine there are two vital things necessary. These are a tightening of parts and lubrication of small bearings and joints. Every nut on the engine and its accessories and brackets should be tightened or an attempt made to do so. You may surprise yourself at learning that the radiator support bolts can be turned three times around. Oil the generator bearings, starting motor bearings, the linkage at the bottom of the steering post running to the carburetor, air choke, ignition unit and all the ignition unit bearings. Oil the fan bearings. If you take your instruction book and check off each oiling place as you go along you will do the job about right.

With the engine finished you can proceed to the clutch. If it runs to oil you can flush it out and use a slightly heavier lubricant. Dry clutch, either cone or disc, may need treatment dictated by usage. Cleaning of the friction surfaces usually suffices. But no matter what the type be sure to lubricate the thrust bearing, the throwout collar and the connections from the pedal to clutch. Clean the oil holes and cups before you fill with oil or grease.

Proceed to the transmission if that is next; remove the cover and the drain plug; after drainage clean out well with kerosene and refill with heavy oil or gear compound. Clean the universals with kerosene, dry and repack with grease. Treat the rear axle as you did the transmission.

Then you attend to the braking system. The brakes may need relining or merely adjusting. Oil every connection from the pedal to the bands so the brakes work freely. Take your adjustments at two places if you can and not all at one place. Equalize your brakes later on the road.

Then get at the springs, spreading the leaves apart and oiling them, repacking the shackle bolt cups and oiling or greasing any other moving parts such as oscillating holders on cantilever springs, etc.

Get the steering system next, disconnecting all joints, cleaning with kerosene and repacking. If you wish to do a good thing use joint covers for the steering.

Remove the steering knuckle pin cups, clean them well and refill. Next comes removal of all wheels and repacking of wheel bearings and a checking up of front wheel alignment, following which is a general going over the whole chassis for oiling and tightening. Tighten the spring clips if you can, repack every grease cup and turn down a few times. In other words make sure that everything that can be tightened is tightened and that can be lubricated is well supplied with grease or oil.

After that you can attend to the body, which probably needs a cleaning and polishing and the road test to find out if everything is running smoothly and for making the carburetor adjustment.

KILTIES TO FIGHT AS A UNIT.

War Office Making a Distinction Regarding Renowned Regiment.

The British War Office, which is not particular where its fighters come from so long as they do their trench job thoroughly, is satisfied with "The Ladies From Hell." So well do they like them, in fact, that the second battalion of the MacLean Kilties is going to be hurried to the first line trenches to tackle Fritz. Although it has been part of the general scheme to split the Canadian contingents into separate units and send them into No Man's Land along with more seasoned veterans, past performances of "The Ladies From Hell" have produced such profound respect for them inside the German lines that hereafter they will fight as a separate unit.

The War Office had before it a history of the past performances of the former men who, led by Col. Percy A. Guthrie, put the regiment on record as one of the most dashing and courageous of the overseas troops since the first battalion of the famous Princess Pats went into the great deadlock on the western front early in 1915.

In a letter from Col. Guthrie the interesting news regarding the distinction made on behalf of the Kilties by the War Office is announced. In describing the recent movements of the regiment Col. Guthrie writes:

"Recently the whole battalion went away at the same time for a ten day furlough, and each member was given free transportation and lodgings. All hands were eager for the trip, and when it terminated I do not think there was a shire in these tight little islands that was not visited by a Highlander garbed in the red tartan of the clan. The pipers took their pipes with them to Scotland, and the old valleys and glens resounded as in the days of old, when their fathers before them piped clansmen to strike a blow for Charlie.

"They were kissed and caressed by the lassies, and came home to camp well pleased with their short stay among the hills. Some of them may never see Scotland again, but many of them will no doubt take occasion after being wounded and through hospital to go back once more to the hills and renew their friendships."

The letter from Col. Guthrie came from England, and from those in a position to speak with authority it was learned that the Kilties will be in the full tide of the fighting in France by the early part of May.

Farm Fire Prevention.

The protection from fire of farm properties is a problem which has seldom been attempted in any practical way, aside from the exceptional use of fireproofing materials. In a small town in Ohio, Hollandsburg, the villagers and the farmers within a radius of five miles have combined forces. They have purchased a motor truck equipped with chemical extinguishers, ladders, etc., and arrangements have been made for answering fire calls anywhere in the district. If this experiment proves successful, a widespread adoption of the plan should follow.

Worth Thinking About.

Every little bite makes a muckle.

The second helping is getting to be bad form.

There's lots of money to go round but bacon, beef and wheat can't make the circuit.

Fish may not be a brain food but brainy men are eating more fish.

Waste and want are twin sisters and neither is beautiful.

Learn to control your own appetite before you try to control your neighbor's.

A good citizen is known by the food he eats.

A Picture.

Straightly drives the shining ploughshare, waking earth from winter's dream;
Straightly plods the faithful plowman crooning low his patient team;
Flock the white-winged gulls around him;
As a snowstorm all about him;
Wheeling, soaring, darting, hovering in the sunshine's golden gleam.

So Picture Won't Fall.

When hanging pictures always hang them with the face to the wall at first, then turn them without unhooking the wire. This leaves the wire twisted up at the hook and when hung this way the jarring of the house will have no effect on them.

Potatoes should be cooked unpared if you want to benefit by the goodness in them, as the mineral matter is near the skin.

Green herbs make a much better seasoning than dried ones, and should be used when it is possible to obtain them.

Use horse manure, not cow manure, on clay soils. Do not manure the seed bed where seedlings are to be grown.

WOMAN DOCTOR MARTYR TO SERBIA

HUMANE WORK OF SCOTTISH PHYSICIAN.

Elsie Inglis Gave Her Life to Rescuing Wounded and Starving in Stricken Land.

The world in these days is full of heroes and heroines. Already some proudly wear medals for bravery and work well done. But stories of many others are untold, and those who rendered distinguished services are undecorated and forgotten.

The war relief work of the Scottish Women's Hospitals in Serbia is too conspicuous to have escaped public notice. But few in Canada at least know that Dr. Elsie Inglis, head surgeon of that organization, was responsible for its tremendous accomplishment.

This is as Dr. Inglis would have had it. Though she is to receive public honors, those who knew her say that she would feel sufficiently compensated if she knew that she will always be remembered in the hearts of those Serbians for whom she gave her life.

She gave food and medical attention to starving and dying Serbia. This was after the political authorities of the Allies had decided that when a country was in the military occupation of the enemy, as Serbia was, the enemy should feed it, though the Austrians let it be known that if anybody went hungry it would be the Serbians.

Worse Than Belgium.

For, this reason it may be seen that the condition of Serbia was a thousand times worse than Belgium's ever was. And it is so considered by authorities. The relief fund, excepting the Scottish Women's Hospitals, has never exceeded $2,250,000.

All that Dr. Inglis did for the Serbians will perhaps never be known. No country to which war has been brought offered more difficulties than Serbia for war workers. Roads were frightful and hospital supplies almost as scarce as food.

This remarkable woman was well over 50 when she died at Newcastle, England, last November. I fancy that the Serbians loved her because she had a determination equal to their own. She was like some Greek hero, who wanted to see the "smoke go up from his native village and then die." For she died the next day after she landed.

With her hospital unit she made her last stand at Krushevatz. They were held three months prisoners in Austrian camps, but escaped to Russia with a party of valiant Serbians. Even then Dr. Inglis was mortally ill, but she would not come home until she had secured transportation for these men. They were with her on the ship coming home.

No Conveniences at Hand.

When Dr. Inglis arrived at the time of the typhus epidemic she found three or four wounded on the same mattress in a small building, once a schoolhouse, which the Serbian Government had given to the hospitals. At once she got six other small buildings, had them whitewashed and cleansed of vermin and moved the patients to comfortable quarters.

The Serbians, while eager to learn, had no notion of modern sanitation. Moreover there were almost no conveniences to be had. They did not dare use wagon from anywhere near the typhus camps and had to haul it from springs three or four miles away.

Dr. Inglis saw their condition and offered help to the women and children. This was accepted very cautiously at first. But in the end they would have as many as eighty bullock waggons outside the hospital tents with people waiting for medical attention.

When the Austrians finally took Serbia, after her brave people had made the gallant stand which all the world knows of and applauds, all but two units of the Scottish Women's Hospitals were ordered out of the country.

Of course Dr. Inglis stayed. With her medical contingent and thousands of refugees she set out for Krushevats. On the way all oxen and horses died because they had had little food. So the women hitched themselves to the carts and pulled the supply wagons into the village.

Confiscated Their Supplies.

There the Austrians descended upon them and took all the supplies which they had been at no great pains to take with them. Dr. Inglis was infuriated. She feared nothing in the world, but went boldly up to the big captain of the invading party. She was a very small woman and must have looked to the Hun like an angry wren.

It happened that the captain was a good enough man, and, unlike other Teutons, he listened to reason. Dr. Inglis told him what she thought of him and all his allies in German idioms which he understood and did not feel better for. Moreover, she informed him that, according to the Geneva Convention, he had no right to take their hospital supplies. He had no strength to dispute her, but said to go and get back what belonged to her. Which she did, adding some things which belonged undoubtedly to the German Red Cross.

As she explained later, it was all in a good cause. For she and her staff cared for 5,000 patients a week for a time, under fire. These were enemies and friends, it made no difference. Whoever needed help got it, as long as the supplies held out.

They also cared for thousands of women and children, refugees fleeing from their homes. And when they were prisoners they worked for three months in the German and Austrian cholera camps.

Immediately after this Dr. Inglis set to work to get transportation for her brave Serbians. She was in Russia, and they had escaped there also. And it was with them that she landed at Newcastle, the day before she died, last November.

Russians Are Grateful.

Not quite a year ago Dr. Inglis was writing from her hospital at Reni, Russia:

"It is very interesting to see how the attitude of our patients toward us has altered. Our Serbs, as always, were grateful and trusting. But the Russians could not at all understand the situation and why strangers could nurse them."

One reason why Dr. Inglis was so justly loved by all people among whom she worked was because she recognized the rights of all.

"We have bought," she was writing in March, 1917, "Ikons (sacred pictures) for the wards and the hospital has been blessed. The men sing their evening hymns with their faces toward the ikon in their ward. I hear them now as I write. I do hope," she added wistfully, "that the committee will approve of this. It means so much to the Russian soldiers. And I have been touched at the way the Russian officers have turned to us and said: 'Thank you.'"

Dr. Inglis's broad and humane work is being successfully carried on by her colleagues of the Hospitals Unit.

PREPARE FOR SPRING FLOODS.

Winter Conditions Point to Trouble When the Spring Break up Comes.

All this winter snow has fallen in unusually large quantities. There was no "January thaw" and no marked thaws in February. It has been a steady winter with the prospect of it remaining so until the spring breakup. Then the rains will descend and the winds will blow in the most Biblical manner and floods of unusual proportions will be the result. Already a small February thaw has caused much damage at points along the Thames and Grand rivers in Ontario. Ice jams forced the water over some of the artificial embankments and much loss and discomfort resulted. Are these instances merely a foretaste of what is coming? In any event, it is better to prepare for such a contingency with every means available. Engineers should be placed in charge and ice jams should be dynamited before they have had a chance to dam back the water. Weak places in embankments should be properly reinforced. Food kept in cellars in the low lands bordering streams should be removed to upper stories of houses, so as to prevent its destruction or damage in flooded cellars. Similarly fodder and grain in barns should be placed as high and dry as possible.

By adopting as many preventive methods as time and circumstances will permit, possible panic and serious loss may be averted to a very considerable extent when the rivers commence their great "spring drive."

"What bird is it," asked an inspector of a class of young children, "that is found in Africa, and, although it has wings, cannot fly?" After some hesitation little Emily put out her hand. "Well, my dear, what is it?" "Please, sir, a dead one!"

HUN'S NEW TREND TO THE EAST

What the Recently Signed Treaties Mean to Germany.

Several circumstances in the last few weeks point to a new orientation of Germany's policy, a possible attack on the British Empire at its weakest frontier, where no naval bulwark bars the way to the advance of the kaiser's legions. This new scheme, barely hinted at in recent treaties, more than ever calls for vigilance on the part of Great Britain and for direct action by her ally Japan. And if the United States wants to make the world safe for democracy she should contribute her aid before it is too late, says the editor of the New York Herald.

According to the treaty signed at Bucharest, the Rumanian government undertakes "to support with all its strength the transport of troops of the Central Powers through Moldavia and Bessarabia to Odessa." Why Odessa? Because it is the greatest port on the Black Sea, the natural outlet for the granary of Southern Russia and, what is more important in view of the Hun's dream of conquest, it will tap the great iron, copper and coal district of Krivoy Rog and will give a direct route to Batoum and the oil wells of Baku. Once established at Odessa, Germany can reach out to the shores of the Caspian.

The treaty with the Bolsheviki delegates provided that the political and economic independence and territorial integrity of "Persia and Afghanistan" must be respected. Why Afghanistan, here mentioned for the first time since the war began? Germany doubtless will see to it that Russia fulfils this clause while she herself treats it as a scrap of paper. From the shores of the Caspian the Huns could make short work of feeble Persia, and it would not take long to blaze a path through the discordant tribes of Afghanistan to the confines of India, where German intrigue has been at work for months to stir up revolt.

Foiled in her attacks on Egypt and the Suez Canal, foiled in her dream of an Oriental empire through the Berlin-Bagdad Railway, Germany is again reaching out to the East, and the power she has acquired there already and the potential power implied in the treaties just concluded surpass the wildest visions of the most imaginative Pan-German. How long will the Allies delude themselves with the idea that Germany is exhausted and content themselves with talking while she is acting?

CANNON TO KILL CANARY BIRD.

The Only Solution for a Desperate Situation.

In one of the most curious of recent happenings on the battle front in France a canary bird was the principal actor.

It was a French bird. Liberated by accident, it flew out into No Man's Land, between the opposing lines of trenches, perched on a tree and began to sing in the bright sunshine.

Whereupon the best of the French marksmen began to shoot at it. Why? Because they had to. It was a matter of utmost seriousness, possibly involving many human lives.

Canaries are commonly used to give warning of the presence of deadly gas in mines. They are more sensitive than human beings to such gas, and hence the practice nowadays of carrying them (in cages) into mines to test the air in the underground workings.

Mining operations for military purposes are conducted on a very extensive scale in present-day warfare in Europe. Tunnels of great length are dug to blow up the enemy's works. Such tunnels are tested for gas by the use of canary birds.

The bird that escaped into No Man's Land was being employed for this purpose in a tunnel dug to blow up the Germans. The success of the operation depended wholly upon secrecy. But if the Germans were to hear and catch sight of the canary they would at once suspect what was going on.

Hence the activity of the French sharpshooters. They must kill that canary at any cost. But a canary is a very small target; they could not hit it. The bird sang on. It was a desperate situation. A last resort remained. It was to use a big gun.

The gun was loaded with a high explosive shell of a calibre appropriate for attacking mighty fortifications. It was fired at the canary, or, more strictly speaking, at the tree on which the bird was perched. Both tree and canary vanished.

That is all there is to the story. But the blowing-up enterprise was a success.

DEGREES FROM KHAKI COLLEGE

TO BE RECOGNIZED THROUGHOUT BRITISH EMPIRE.

Study Courses Taken by Canadian Soldiers Will Comprise a Wide Range of Subjects.

Canada's Khaki University has been formally opened, says a Canadian correspondent writing from London in February. The inauguration took place in a large lecture-room of London University and four hundred Canadian soldiers were present. Dr. Tory, president of the organization, and head of Saskatchewan University, presided, giving an interesting address.

"Germany's combination of science and industry nearly conquered the world," quoth Dr. Tory, emphasizing the supreme importance of the technical work which the university was introducing among the older forms of study. Canada must specialize in such instruction if she were to hold her place in the world after this war. The principal subsequently stated that now Khaki University had the power to grant degrees which would be recognized anywhere in the British dominions, and that a term of study and credentials to show that a student had passed his examinations for that term would be recognized as time put in on any course for any degree in any Canadian university. The Canadian universities had offered to let Khaki College draw on their staffs for any instructors required during the war, and to pay these instructors.

Experienced Men Needed.

"What have you got to sell that Canada wants?" enquired Lieut.-Col. J. Obed Smith, assistant director of Emigration for Canada, as he rose to address the students in khaki. That is the question I often put to young men who seek my advice about going to Canada. I ask them if they have had some special training. Can they lay bricks? Have they served their time as printers? What practical experience have they had in farming? I impress upon them the fact that the trained man in whatever line it be, from blacksmithing to doctoring, is the man we want in Canada. He is the man who will get along. Men lacking some special qualification or without capital, or having no situation in view, are plainly told by me that they go taking their chances as ordinary laborers. Many of you when you return to Canada will be asked the question 'What can you do?' Training in the Khaki University will give you the power to answer that question satisfactorily."

Get Practical Instruction.

Khaki University, of which the University of Vimy Ridge is a battlefield offshoot, was organized by the Y.M.C.A. for training the troops, has establishments in every Canadian area in England, and has started at the front. The subjects range from the most elementary studies in arithmetic, English, etc., to university students' work. Vocational training is a big feature, men receiving theoretical and practical instruction in farming and various trades and occupations from experts specially qualified to teach the different branches. Germany has scored very heavily by special training schools in various trades.

Growing Large Onions.

To grow large onions the ground must be deeply trenched and well enriched some time before sowing and the sowing must be done early so the bulbs will have a long season of growth.

Select a well drained spot, manure and trench deeply, then give a surface dressing of wood ashes, lime and Scotch soot. Leave until sowing time, then stir up lightly with a garden fork, then rake down fine and level.

After sowing, if the weather is dry, sprinkle with a watering can several times daily. During showers give liquid fertilizer to the roots, not getting it on the bulbs. During dry weather water with a watering can or hose every evening. Give the bulbs ample space in which to develop.

By royal order, the celebration of Arbor Day has been made obligatory in every township and municipality in Spain, and tree-planting is to be carried on upon a more extensive scale than heretofore.

The Doings of the Duffs.

WEAK, ANAEMIC GIRLS

Can Regain Good Health Through Dr. Williams' Pink Pills.

Bloodlessness is the trouble of many girls who ought to be full of life and good spirits. Instead they are pale, their lips have no color, they have no appetites, their digestion is poor, and if they walk fast, either in the street or going up stairs they are so tired and out of breath that their hearts beat as if to burst. Almost always such girls are thin, flat-chested and sallow, with nothing attractive about them. If they do not get better they will have a cough in the winter and then, not unlikely, consumption, that most hopeless of all diseases will develop. No girl should be like this. She should be plump, rosy-cheeked and full of life, able to talk fast and to stand exertion without being breathless and palpitating. To be in this healthy, happy condition she must have plenty of good, rich, red blood, as it is only through the blood that the body can be healthy. And the only medicine that will keep the blood supply rich and red and pure is Dr. Williams' Pink Pills. Their effect upon the pale, weak girl who gives them a fair trial is wonderful. They improve the appetite, backaches and headaches disappear, the glow of health tinges the cheeks, the eyes sparkle, and the step becomes light and elastic. Thousands of girls throughout Canada owe their health and attractive appearance to Dr. Williams' Pink Pills and do not hesitate to say so. Miss Jennie Book, Beamsville, Ont., says:—"I suffered for over two years from anaemia, and gradually grew very ill. Previously I had been strong and robust, but grew pale and a mere shadow of my former self. I tried several medicines, and while some seemed to give me temporary relief, I soon grew worse again. As the months went by I began to despair of getting better, when my mother happened to read an advertisement of Dr. Williams' Pink Pills and suggested that I should try them. By the time the first box was finished I knew they were helping me, and I continued the pills for nearly three months, using in all nine boxes, when I was restored in every respect to my old time strength. This was several years ago, and as I have not since had any return of the trouble, I cannot speak too highly of Dr. Williams' Pink Pills as a permanent cure for this trouble, and I strongly recommend them to all anaemic girls."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Revolutionize the Fire Department.

Are we serious in our attempts to combat the fire waste? The records of 1917 hardly prove it. To the most superficial observer it is obvious that we are directing our energies along wrong lines. Despite first-class fire fighting equipment and firemen amongst the most expert in the world, our losses continue unabated. Our most efficient fire brigades are utterly discomfited by the raging conflagrations that, with increasing frequency, destroy buildings, devastate whole communities and wipe out human life. Canadian municipalities spend millions of dollars annually for the maintenance of fire departments and a few paltry dollars in fire prevention. Without deprecating the provision of adequate fire extinguishing facilities the short-sighted policy that neglects preventive measures must be condemned. The fire departments of the country should be revolutionized. For every dollar appropriated by municipalities for fire protection, fifty cents should be used for fire prevention.

Marion Bridge, C. B., May 30, '02.
I have handled MINARD'S LINIMENT during the past year. It is always the first Liniment asked for here, and unquestionably the best seller of all the different kinds of Liniment I handle.
NEIL FERGUSON.

For iron rust either on white or colored clothes wet the spot with lemon juice, then hold over steam of the tea kettle and the spots will disappear like magic. If the stain is old it may not come out with the first trial.

Gunns Shur-Gain Fertilizer

BOOKS ON GARDENING.

Accurate Knowledge Means Greater Production.

Home Vegetable Garden and a Patriotic Gardening Competition," by W. T. Macoun. Pamphlet No. 18, Central Experimental Farm. Deals with situation of the garden, preparation of the soil, planning the garden, and gives list of suitable varieties of vegetables.

Farm Garden Bulletin No. 5, Manitoba Agricultural College. Discusses size, location, arrangement, soil cultivation, seeds, thinning, transplanting, staving, and gives notes on the various garden crops and recommended varieties. Apply Manitoba Agricultural College, Winnipeg.

Production in the School Garden. Rural Education Monthly, published by Dept. of Education, Regina.

Vacant Lot Gardening," Pamphlet No. 6, Dept. of Agriculture, Ottawa.

Gardening for Schools. Ontario Dept. of Agriculture. Bulletin No. 152. Apply Dept. of Agriculture, Toronto.

Improvement of School Grounds, by the Ontario Dept. of Education, Toronto, Ont. Profusely illustrated. Discusses flower borders, perennials, vines, nursery stock, shrubs, making of lawns, and gives plans for laying out school grounds.

The Gardenette or City Backyard Gardening, by Benjamin F. Albaugh. Discusses vegetable gardening and flower gardening, dealing particularly with city small yard conditions. Price $1.25. Published by Stewart and Kidd Co., Cincinnati, Ohio.

May be obtained from Publications Branch, Dept. of Agriculture, Ottawa.

ONE-MAN PONTOONS.

"Water Wings" for Use of Soldiers in Crossing Streams Under Fire.

Building bridges under fire, the greatest ordeal that the army engineers of other campaigns were subjected to, bids fair to go out of fashion, in future a regiment going across a stream will, if a recent invention meets with approval, merely wade into the stream and drift across, meantime utilizing both hands to manipulate his rifle.

The new invention is a sort of glorified "water wings" arrangement and is adapted to the fording of deep streams without the necessity of bridge-building. The encircling buoy is blown up by the soldier. It holds him upright in the water with his shoulders and arms clear of the surface. In experiments recently conducted a man made several bull's-eyes on a target 300 yards away while floating across the stream.

THE ONLY MEDICINE FOR LITTLE ONES

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Their use teaches her they are absolutely safe; that they never fail to give relief and that the little ones do not dread taking them as they do castor oil and other harsh purgatives. Concerning the Tablets Mrs. John M. Weaver, Blissfield, N.B., says:—"I have used Baby's Own Tablets for the past ten years and have found them so good I always keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To grow good parsnips prepare the soil deeply, make it rich, deep and mellow. Three feet is the proper depth of soil for the very best carrots. Be careful not to bring the bottom soil to the surface.

Minard's Liniment Cures Dandruff.

LOSS OF FOOD BY LIGHTNING.

Every Means Should be Taken to Prevent Destruction of Foodstuffs.

In eastern Canada, April and May are the worst months for fires resulting from lightning. In Ontario, lightning fires during April and May, 1917, numbered 172, entailing a loss of $158,921, little over half of which was covered by insurance.

Many lightning-rod systems have been installed during the past few years, and these are gradually showing results. When properly installed, they give almost absolute protection, so much so that many of the farmers' mutual insurance companies report no losses by lightning on rodded buildings, while others will not insure a risk that is not rodded. Nearly all insurance companies charge a lower premium on insurance on buildings equipped with lightning-rods.

The rapid increase in the use of wire fences constitutes a serious lightning menace to live stock. Many hundreds are killed by getting close to wire fences during a thunder storm. When lightning strikes the wire fences, if there are no ground wires, or if iron fence posts are not used, the animals furnish the path of least resistance between the fence and the ground. Wire fences should have a ground wire sunk to moist earth every few rods, to carry off the current.

Lightning-rod installations should be inspected before April, in case any break in the continuity of the cables has been caused by the severe winter weather; the grounding of the cable should also be assured.

With the tremendous world shortage of food, and the great demands being made upon Canada to increase the supply, it is of the utmost importance that the great destruction of foodstuffs caused by lightning striking wire fences and destroying barns and their contents should be overcome.

Proved Once More In Southampton, Ont.

That Dodd's Kidney Pills Cure Rheumatism.

Harold D. Bertram Had Inflammatory Rheumatism and One Box of Dodd's Kidney Pills Cleared It Out of His System.

Southampton, Ont., March 25th—(Special)—That rheumatism is caused by disordered kidneys and that Dodd's Kidney Pills will cure it is again proved by the case of Harold D. Bertram, a young man well and favorably known here. He had inflammatory rheumatism for two months. Dodd's Kidney Pills cured him.

"The doctor said my trouble started with the grippe," Mr. Bertram states. "My hands and feet were badly swollen and the doctor did not seem to be doing me any good. My grandmother, Mrs. G. Grasser, advised me to take Dodd's Kidney Pills. I took one box of them and I haven't been bothered since. I am clear of the rheumatism."

That Mr. Bertram's trouble came from his kidneys is shown by his other symptoms. He had stiffness in the joints, was tired and nervous, and there were flashes of light before his eyes. He had a dragging sensation across the loins, was always dizzy and felt heavy and sleepy after meals.

Rheumatism is caused by uric acid in the blood. Cured kidneys strain the uric acid out of the blood. Dodd's Kidney Pills cure the kidneys.

A NOVEL WEAPON.

Trawler's Skipper Smashes Periscope With Coal Shovel.

When one's vessel is in danger from enemy submarines anything will do as a weapon of defence, as is shown by the story of a captain of a British trawler who used a coal shovel with good effect against a German U-boat. The trawler, according to the story told by one of the crew, was in the North Sea in a stiff breeze when the skipper saw a periscope crawl through the breaking surface of the sea about a hundred yards off. There was no gun aboard and the trawler's best speed was less than eight knots.

"It was a situation to dismay most men," said the seaman. "Our skipper, however, has a fighting spirit. A touch of the wheel sent the trawler's blunt bows pointing at the submarine's whaleback, and we wallowed menacingly toward the pirate.

"The U-boat swung round to avoid the impact and the sides of the trawler scraped along the sides of the submarine. The periscope still was well out of the water but was beginning to slip down as the submarine dived.

"The skipper bawled for a hammer, a crowbar, anything that would hurt. One of the crew thrust a coal shovel into his hand and he scrambled on the bulwarks and leaned over, two of the crew hanging to his coat so that he wouldn't fall overboard. Backward and forward he swung the heavy scoop at the fragile periscope, and the third blow reduced it to fragments.

"The submarine commander, hearing the noise and wondering what new and horrible device the enemy had invented, crept to his periscope to have a look, but all was black. He was blind, and the trawler got away in safety."

A Slight Mistake.

"Hawkins," said the officer to his Cockney servant, "I've left my mess boots out this morning. I want 'em soiled."

"Yessir!" said Hawkins.

But later in the day, when the officer returned, he could not find his boots.

"Hawkins—Hawkins, where are my boots?"

"What, sir! Those mess boots! Oh, 'ere you are, sir! One and sixpence! That's all I could get on 'em. I took 'em all around the camp, but the only man who'd buy 'em was a corporal, and he couldn't give more'n one and six, 'cos pay day wasn't till next Friday."

LEMON JUICE IS FRECKLE REMOVER

Girls! Make this cheap beauty lotion to clear and whiten the skin.

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless.

Irish Train Sets New Record.

A record for railroad travelling is reported from Ireland. A special train on the Great Northern Railroad made the trip from Belfast to Dublin, a distance of 115 miles, in 107 minutes and the return journey was accomplished in 109 minutes.

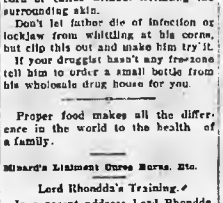
YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say—to the drug store man. "Give me a small bottle of freezone. This will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.

Don't let further die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.



If your druggist hasn't any freezone tell him to order a small bottle from his wholesale drug house for you.

Proper food makes all the difference in the world to the health of a family.

Minard's Liniment Cures Horse, Etc.

Lord Rhondda's Training.

In a recent address Lord Rhondda, the British Food Controller, explained his grasp on the food situation. He said that he was taken into his father's grocery store when 20 years of age and learned the business from the ground up.

NATURE'S CARE.

Wise Provision Made for Protection of Birds and Animals.

Nature provides for her children. The birds with their wonderfully varied plumage are so colored as to best protect and shield them from enemies, and in their natural homes their colors so blend with the surroundings that it requires sharp eyes to detect them. The coloring of many insects is wonderful, including the various colored bronzes; snakes are of many colors, and, setting aside the natural animosity we have for them, in studying their markings they will be found to be very beautiful, particularly the smaller and harmless snakes.

Animals are colored to protect and hide them. With flowers the case is exactly the opposite. They are colored to attract attention and scented to add to their attractiveness that insects may be drawn to help fertilize them and that animals may notice them and help scatter their seeds and thus aid in prolonging the existence of the race.

Cause of Early Old Age

The celebrated Dr. Michaelieff, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digests food properly it is absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Seigel's Syrup" after meals makes your digestion sound. 25

The world is short of horses. To get the most out of your team use

MICA AXLE GREASE

"Use half as much as any other"

The mica flakes fill the pores and crevices in the axle and the grease keeps them there. Mica Grease means fresher horses at the end of the day and longer life for your harness and wagons.

Dangerous Gas and Acids That Hurt The Stomach—Sour The Food Cause Dyspepsia, Indigestion

Recommends a Safe Way to Treat Stomach Trouble At Home

Many stomach sufferers who are always full of gas and whose stomachs burn with acid after nearly every meal think things are lost. REMEDY of indigestion when in reality it is just as foolish to give artificial digestants such as pepsin, etc., to a stomach full of gas and acid as it would be for a man who had sleeping sickness to rub liniment on his foot without removing the sock.

Some stomachs naturally do too much gas and acid. Gas distending the stomach walls, causing a full, bloated oppressive feeling while the acid irritates and inflames the lining of the stomach. Naturally the food ferments and sours, digestion is often delayed and stomach misery is the result. Artificial digestants will push this sour, fermenting mass into the intestines and relieve the stomach pain but the acid still remains in the stomach to irritate more and produce more trouble at the next meal.

If you are using digestive aids after meals drop them for a while and instead get a few 5-grain tablets of pure bisurated magnesia from any druggist and take two with each meal. Bisurated Magnesia does not digest food but will neutralize the excess acid in your stomach and keep the food sweet and will drive a regular blood flush-wash of pure body Magnesia is prepared in various forms but ask for Bisurated Magnesia for this purpose as it is not laxative and in this refined form will not injure the stomach in any way.

IN MISERY FOR YEARS

Mrs. Courtney Tells How She Was Cured by Lydia E. Pinkham's Vegetable Compound.

Oskaloosa, Iowa.—"For years I was simply in misery from a weakness and awful pains—and nothing seemed to do me any good. A friend advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and got relief right away. I can certainly recommend this valuable medicine to other women who suffer, for it has done wonders for me and I know it will help others if they will give it a fair trial."—Mrs. LIZZIE COURTNEY, 108 8th Ave., West, Oskaloosa, Iowa.

Why will women drag along from day to day, year in and year out, suffering such misery as did Mrs. Courtney, when such letters as this are continually being published. Every woman who suffers from displacements, irregularities, inflammation, ulceration, backache, nervousness, or who is passing through the Change of Life should give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. For special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its long experience is at your service.

The Paisley Advocate

PAISLEY, APRIL 3rd, 1918

—A great many farmers are immigrating from the United States to Western Canada this spring.

—Your king and country need you now—more than ever. Conscription is in force, but that does not prevent any young man voluntarily offering to enlist in the army.

—The Governments of Canada and the United States may decide to control the distribution of coal. Negotiations with that object in view are being considered at conferences between representatives of the two governments.

—Sharkskin is one of the new kinds of leather being brought into use for making footwear. Some of the fellows who lost in the big real estate campaign before the war are wondering if the sharks who sold them western horizon town lots are due to be skinned.

—German criminals have all been released from prison to go on the fighting line. In whatever class these men may have been placed as civil offenders, these jail birds will be second-raters compared with the criminals who are managing the Hun war campaign.

—John Brewer, who died in Toronto, left his entire estate of over $20,000 to the Protestant Orphans' Home. The deceased was only a brewer in name, but how appropriate that he should bequeath his life's earnings to assist children who, quite likely, were left destitute through the addiction of their parents to the use of the practical brewers' products.

—The daylight saving change of time has been adopted by the U. S. government and went into effect on Monday. Railway trains coming into Canada from the south are held an hour at the border points to conform to our time schedule. It is expected that the daylight saving measure will be adopted by Canada by April 15th or a little later.

—Many authorities believe that the use of cheap hydro electric power in making iron will eventually bring about a commercial revolution in the leading nations, and that all industries which consume large amounts of mechanical energy will be forced to emigrate to countries where water power is abundant. What a future there is for Canada when this comes about!

—This year's session of the Legislature just closed will rank as one of the shortest and most harmonious ever held in the Province of Ontario. It lasted from Feb. 5th till March 21st, and while the volume of business was less than in former years, many important questions were debated and made law, without undue contention. The members of both sides of the House started legislative operations under a truce. And they rigidly adhered to it, save at infrequent periods when some member allowed his enthusiasm to override his better judgment.

—"I intend putting in about forty to fifty acres of crop," said a young Elderslie farmer in speaking of the production campaign. There appears to be no particular reason why this man should be able to do more than the majority in raising grain, except that he appears to be in earnest about making the effort, having the conviction that it is his duty to do so, when the call for foodstuffs is so urgent. However sincerely we may all wish to see peace come this year, there is no immediate prospect of the war being ended in 1918, and the food soldier's work in Canada is as real as the fighting man's in France.

—The Canadian Government have decided to correct the balance of trade which has existed between Canada and the United States by prohibiting the importation from the United States of a number of lines of manufactured articles to the value of $150,000,000 a year. The Canadian War Board is to work out the details of the embargo. Among the articles the entrance of which to Canada it is proposed to prohibit are: Automobiles, tires, accessories, patent medicines, silverware, jewellery, musical instruments of all kinds, boots and shoes, ready-made clothing, and, in fact, every article which can be manufactured in Canada. To replace the loss in revenue caused by this cutting down of imports, it is proposed to impose a special tax of ten per cent on all articles made in Canada which are on the imports embargo list. Thus a man who buys a $1,500 automobile will pay $1,500 for the car and $150 extra tax.

LLOYD GEORGE CALLS FOR MORE CANADIANS WITH SMALLEST DELAY

Struggle Only in Opening Stages, and Last Man May Count

Ottawa, March 31st—The Duke of Devonshire, governor-general of Canada, has received the following cablegram from Premier Lloyd George:

"I have been inspired during the last week with the constant news of the dauntless courage with which the Dominion troops have withstood the desperate assaults of vastly more numerous German troops. This battle shows that the empire has reason to be proud of all her sons. Our armies cannot have too many of these splendid men. As already announced, we propose to ask Parliament to authorize immediate measures for raising fresh forces.

"I would also urge the Government of Canada to reinforce its heroic troops in the fullest possible manner and with the smallest possible delay. The struggle is only in its opening stages and it is our business to see that our armies get the [illegible] measure of support that [illegible] can give them. Let no one think what even the remotest of our [illegible] can now do can be too [illegible]. Before this campaign is finished the last man may count."

LOCAL AND DISTRICT NEWS

Has Peritonitis

Mr. Mac McArthur, of Church St., who has been in poor health for some time, was operated upon on Thursday last at his home, by Dr. Lucey, assisted by Drs. Houston and Laird. The trouble is peritonitis, and the patient is in a very critical condition at time of writing.

Building Operations

The contracts for erection of the new schoolhouse in No. 15, Bruce & Saugeen, have been let as follows: Brick work, &c., J. S. Dewar; carpentering, N. McAllister; painting, H. Glover. The same contractors will build a new brick house for Mr. Dan McGillivray, on whose farm the school is located.

Eating by Rule

All Canadians will shortly be obliged to take their meals by schedule laid down by the food control department. A radical change has been ordered for public eating places, by which further restrictions are made on the use of beef, veal, pork, wheat, bread, butter, oleomargarine, sugar, etc.

Would Join the Flying Corps

Mr. Dug Cottrill, of the Royal Bank staff, did not let his 20th birthday pass without volunteering to serve his country. He went to Toronto and applied to join the aviation corps as a pilot. He will not be looked over by the medical board for a couple of weeks, but there is no danger of him being put in the "Sl" class.

Mailing Newspapers Overseas

A new postoffice regulation now permits newspapers and periodicals to be mailed in bundles of not more than ten to England at the rate of 1c per 4 oz. or fraction thereof, and to France or other fronts in bundles of not more than ten at the rate of 1c per 2 oz. or fraction thereof, or in bundles at parcel post rates not to exceed 7 lbs.

Child Had Appendix Removed

Lydia, the four-year-old daughter of Mr. and Mrs. Victor Tanner, of Elderslie, had been ailing from what was thought to be worms, but when she became worse and the doctor was called, it was found to be an advanced case of appendicitis. She was taken to Walkerton hospital on Monday of last week, and there operated upon by Drs. Houston and Laird. She is recovering nicely from the ordeal, and was brought home this week.

Received His Discharge

Pte. Ross Woods, son of Mr. and Mrs. D. Woods of Lovat, who recently arrived home from overseas unfit for service after being wounded, has been honorably discharged from the army. He returned from London, Ont., last week, after being examined by the medical board. Pte. Woods has nobly done his share of service in defence of liberty, and his friends are glad to see him spared in fairly good health after suffering sorely from wounds.

Local Officers Have Initiative

Medical Health Officers of municipalities, police officers, attorneys and other parties having to do with the enforcement of the law, are now responsible for the enforcement of the law against waste of food which has just been passed by the Dominion Government on recommendation of the Canada Food Board. Where proceedings in any case in which a fine is imposed were taken by a municipal officer, the fine accrues to the municipality. Similarly in case of a provincial officer the fine accrues to the provincial treasurer.

Weld—Burrows

A pretty wedding was solemnized on Friday, March 22nd, at the home of Mrs. Burrows-Murchison, Viscount, Sask., when her younger daughter, Mary Edith Burrows, became the bride of Mr. Harold Falconer Weld, of Winnipeg son of Mr. and Mrs. Edgar Weld, of Delaware, Ont. Rev. R. McNaughton performed the ceremony. The bride, who was attended by her little nephew, Master Jim Love of Saskatoon, wore her travelling suit of sand colored gabardine with hat to match. Her corsage boquet was of pink rosebuds. After luncheon was served, Mr. and Mrs. Weld left for the coast on a short trip, and will reside in Winnipeg on their return.

Brings Home a Bride

Early this week Mr. J. R. Laidlaw arrived home after a ten days' absence, accompanied by his bride. The wedding took place quietly at the home of the bride's parents, Mr. and Mrs. Wm. Agnew, at Kilsyth, on March 20th, and they left on a trip to Toronto and Hamilton. Mrs. Laidlaw is a young lady who was held in very high esteem in her home community, and prior to her marriage was presented with a gold wrist watch by the ladies of the Presbyterian church, where she had been organist for a number of years. There is no more popular man in our town than Mr. Laidlaw, and our citizens join most heartily in wishing him and his new life partner all happiness and joy.

Stole from Employer

On returning to business after a couple of months' illness this week, Mr. S. A. Rife discovered that his head cutter had been taking advantage of his absence to engage in wholesale grafting. Suits for parties in Hanover were made and paid for without going through the books. In one case a bunch of overalls from the factory were sold to a customer from Ayton at a reduced rate and the cheque pocketed by the cutter. On Wednesday morning Mr. Rife swore out a warrant for the arrest of the man for stealing. He was arrested by Chief Ferguson, taken before Magistrate Tolton and remanded for a week. Afterwards a search was made of his house, and several bolts of tailoring cloths were found. The cutter had been in the employ of Mr. Rife since a year ago last August. He has a wife and family of three children, but has been receiving high wages.—Telescope.

WEEPING ECZEMA SOON RELIEVED

A Perfect Treatment For This Distressing Complaint

Warkwo, Ont.

"I had an attack of Weeping Eczema; so bad that my clothes would be wet through at times.

For four months, I suffered terribly. I could get no relief until I tried 'Fruit-a-tives' and 'Sootha Salva'. The first treatment gave me relief.

Altogether, I have used three boxes of 'Sootha Salva' and two of 'Fruit-a-tives', and am entirely well."

G. W. HALL.

Both these sterling remedies are sold by dealers at 50c. a box, 6 for $2.50, or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

"Fruit-a-tives" is also put up in a trial size which sells for 25c.

"Little Fellows" Won't Need to Fill Out Forms

Answering the query, "Do single men, whose incomes are $3,000 or less, have to make returns to the Dominion Government under the Income War Tax Act," the Toronto Star, replying in the negative, points out that only those liable to taxation are obliged to make returns. The government advertising was apparently not sufficiently clear on this point, for some people got the impression that no matter what their income, it was required that they should fill out and forward the forms. Persons liable to be taxed, under the act, who fail to fill out the forms, are taking a big risk, and liable themselves to a very heavy penalty.

Husband and Ten Children Bereaved

The home of Mr. Alexander Connor, 13th con. Elderslie, was very suddenly bereft of wife and mother on Sunday morning, when Mrs. Connor passed away only half an hour after being taken ill with an attack of heart trouble. The fatal illness came on at five o'clock, and a doctor was at once summoned, but she had become unconscious and slept away before his arrival. The deceased was the mother of ten children, four girls and six boys, between the ages of four and 21 years, who, with their father, have the deepest sympathy of all in their great affliction. The eldest daughter has been in Guelph hospital undergoing an operation, and was not home at the time of her mother's death. Mrs. Connor was born in Euphrasia Tp., and was married 25 years ago. They lived near Owen Sound for a time, but for the past 16 years have been in Elderslie. The funeral took place on Tuesday to Salem cemetery.

Salmon—Matheson

A very pretty wedding took place on Wednesday evening last, at the home of Mr. and Mrs. Jas. Matheson, 12th con. Bruce, when their eldest daughter, Mayme L. became the bride of Mr. Roy J. Salmon, son of Mr. and Mrs. Chas. Salmon, of Port Elgin. At six o'clock the bride entered the parlor and took her place beside the groom beneath an arch of evergreens decorated with roses, as the weding march was played by her cousin, Miss Margaret Bain, of Greenock. Rev. Dr. McDougall performed the ceremony. The bride was given away by her father. There were no attendants. The bride wore a gown of white duchess silk, with georgette overdress, and wore a wedding veil fastened with a spray of orange blossoms. She also wore the groom's gift, a necklace of pearls. The groom's gift to the organist was a cameo ring. After the ceremony and congratulations, the guests, about sixty in number, repaired to the dining room where they partook of a bountiful wedding repast. The evening was spent in social amusements and dancing. The happy couple left Paisley next morning on a trip to London, Stratford and other points. Upon their return they will reside on the farm recently purchased by the groom on 20th con. Greenock. The many and valuable wedding gifts received attested to the esteem in which they are held by their friends.

For Military Y. M. C. A.

The people of Canada are asked to raise a fund of $2,250,000 in support of the Y.M.C.A. work in connection with military training camps in the Dominion and overseas with our troops at the front. A general canvass is to be made on May 7th to 9th, for which thorough organization is being done. During the past week or ten days meetings have been held in Bruce county, one of which was in the town hall, Paisley, on Wednesday evening, March 27th. Addresses were delivered upon the work by Capt. Carey, a Y.M.C.A. secretary, who has seen two years' service in France, and Mr. Wilson, who is connected with the work at London, Ont., training camp. The meeting was well attended. Reeve Steele occupied the chair. The addresses could not fail to impress the audience with the vital importance of the operations of the Y.M.C.A. among our soldiers, and a generous sum will no doubt be raised in this county through the efforts of the local committees appointed. The work covered by the Canadian Y.M.C.A. does not interfere with or overlap that of any other similar organization, in fact is carried on closer to the fighting line than that of any other in the whole army, and is doing a great deal to maintain the morale of our men that would be left undone but for the presence of the open huts at the rest camp and the canteens that are in many cases planted so near the front line as to be actually under fire from German guns. In the huts there is always a supply of writing paper which the boys are free to use in writing home, and thousands of welcome letters from there are adorned with the red triangle sign of the Y.M.C.A. Concerts, plays and picture shows are given there as often as three times a day to entertain and keep the fighting men in good heart. Meetings and song services are also held, which are addressed by some of the best and brightest of Canada's ministers who have answered the call to work among the soldiers. Capt. Carey took his hearers on a trip overseas and right into the thick of the war operations, picturing vividly in words the scenes daily and nightly enacted in the camps and on the field where the Y.M.C.A. keeps in close touch with the life and heart of the boys who have left home and all that is dear to engage in the necessary but brutal business of fighting the dreadful Huns. The organization effected in Paisley is as follows: Executive Committee, to direct the campaign, select teams and arrange territory—H. B. Putnam (chairman), Thos. Muir (secretary-treasurer), Jas. H. Steele, I. Shoemaker, And. Cormack, G. L. Carter, F. S. MacLachlan, also chairman of each sub-committee. Finance Committee, to look after all finances during the campaign—H. McKerracher (chairman), J. Logie, S. Ballachey, I. S. Cruickshank, Geo. Craig. Publicity Committee, to advertise and arrange for all public and other meetings—D. McKenzie (chairman), P. B. More, S. F. Ballachey, Rev. L. W. Diehl, Rev. M. Neilson. List Committee, to prepare lists of prospective contributors—D. Forrester (chairman), P. C. Ryan, D. McArthur, Dr. Allen, Dr. Houston, Rev. G. C. Little, Dr. Gage, Rev. A. J. Crighton.

—Since the war started about 1,200 American newspapers have gone under, while over 300 others have amalgamated with contemporaries. Papers that were making half a million a year have admitted recently an annual deficit of a quarter of a million.

It matters not what your present or future needs in shoes may be, we guarantee you a good service.

Bring us your Butter and Eggs. Cash or Trade.

F. CARTER & SON

Building-up for the Spring Attack at the Front is a good deal like putting the body in condition for an invasion of the germs of grip, pneumonia or "Spring fever" here at home.

At this time of the year most people suffer from a condition often called Spring Fever. They feel tired, worn out, before the day is half thru. They may have frequent headaches and sometimes "pimply" or pale skin and white lips. The reason for this is that during the winter-time, shut up within doors, eating too much meat and too little green vegetables, one heaps food into the system which is not burned up and the drudgery remain to poison the system — a clogging up of the circulation — with inactive liver and kidneys. Time to put your house in order.

For an invigorating tonic which will clarify the blood, put new life to the body, sparkle to the eyes, and a wholesome skin, nothing does so well as a glycerie herb extract made from Golden Seal root, Blood and Stone root, Oregon grape root and Wild Cherry bark. This can be had in convenient, ready-to-use tablet form at all drug stores, fifty cents, and has been used for the past fifty years as Dr. Pierce's Golden Medical Discovery. By reason of the nerves feeding on the blood, when the blood is pure the nerves feel the effect, and neuralgia or other nerve pains disappear because such pain is the cry of the starved nerves for food. When suffering from headache, frequent or scanty urine, rheumatic pains here or there, or that constant tired feeling, the simple way to overcome these disorders is merely to obtain Dr. Pierce's Annic from your druggist. In tablets, fifty cents

COUNTY COUNCIL NOTICE

Kincardine, March 26th, 1918

To the members of the County Council of Bruce:

Gentlemen—Last week the Warden received a communication that the Government had requested a special meeting of each county council to urge and arrange for increased production this year, and asking that this meeting be held on the 23rd inst. This was impossible in Bruce as the date was too short. We then endeavored to find what other councils were doing, and found some were holding special meetings and others were taking it up with the members and asking them to get their local councils together and do anything that could be done in this line. After considering the matter and consulting as many reeves as we could get into touch with we considered the latter the better way in Bruce, owing to the time taken and the large expense in holding a special session, besides believing that any action on these lines must come through the local councils. We have therefore urged you to call your council together at as early a date as possible and lay the matter before them and get them to take such action as may seem best to in any way encourage increased production.

There is no getting away from the fact that the world faces a food famine. This cannot be too strongly stated or too fully understood. The day has gone by when it was simply a question of raising foodstuffs for profit—it is now a question of raising food to keep the world from starving.

Fortunately situated as we are in Canada we hardly realize this, but the appeal is made on behalf of less fortunate people—our friends, our allies and those dependant upon us —are such that we can surely overlook the purely monetary side and do some work for the benefit of suffering humanity.

Let the people of Canada, and especially the people of Bruce, realize the blessing they have enjoyed, and in this great world's crisis put forth every possible effort this year to meet the great and terrible want.

Nobly has this county responded to the war calls so far made upon it, and now we appeal to the people of the county to redouble their efforts this year to produce foodstuffs so that no matter what the result, no one can say the grand old County of Bruce failed in its allotted task—as one can say "We starve because the people of the County of Bruce did not do what they might have done."

Let everyone do his utmost—the crisis is real—the need cannot be too strongly emphasized. Let us respond with the utmost that is in us.

He that makes two blades of grass grow where one grew before is a benefactor of his country and is doing his bit.

Yours truly,
G. Kastner, P. A. Malcomson,
Warden. Clerk

HOW TO GROW POTATOES

When, three hundred and thirty-two years ago, Sir Walter Raleigh introduced the potato from this continent into Ireland, nobody could have foreseen or imagined the immense part that it would come to play in feeding the world. It was nearly eighty years before the Royal Society of England took up the cultivation of the potato as a cheap food in case of famine. In another eighty years famine in Scotland brought the potato into extensive notice as a cheap article of food. Another thirty years saw France taking notice of its value. Mr. A. T. Macoun, the Dominion Horticulturist, briefly explains all this in a hundred page bulletin recently issued by the Department of Agriculture, Ottawa, in which is also given complete and comprehensive information as to the cultivation of the potato. Mr. Macoun goes fully into his subject, dealing with the preparation of the soil, of the varieties of seedlings, of the manner and method of planting, of protection against insect pests and diseases, of the time to plant, of the districts best suited to the different varieties, of the care that should be taken during growth, and of gathering, storing and shipping. Particulars are also given of the results of experiments and tests made at the Experimental Farms and Stations throughout the Dominion. In short, pretty well everything in the shape of information that is of value to potato growers with many exact and interesting illustrations, is to be found in this bulletin that can be had free on addressing the Publications Branch, Department of Agriculture, Ottawa.

TO PLACE ALL ON EQUAL BASIS

Uniform Administration of Military Service Act Sought by Questionnaire Method

The great crisis through which the world is now passing has served to emphasize among a great many other things the axiom that responsibility is the price of liberty. Because equal privileges are enjoyed by all citizens of Canada, it is the duty of our Government to see, as far as it is able, that all are made to bear equal sacrifices. That the Dominion's War Government is not unmindful of its duty in this respect is evidenced from the care that is being taken to ensure the equitable administration of the Military Service Act. Questionnaires are about to be addressed to all exempted men so as to permit of a checking of the decisions in the case of each to the end that uniformity be established in the application of the legislation. These questionnaires must be returned promptly upon penalty of forfeiture of the exemption papers previously granted. Exempted men should notify the registrar of their district of any change of address, as non-receipt will be regarded as constituting failure to return questionnaire, properly filled in as required. The Government is determined that the Military Service Act shall be administered fairly, and in this determination they will have the active support of democratic ideals.

The Boy and the Farm

The Federal Minister of Agriculture recently stated that arrangements were being made to secure the services of 25,000 school boys upon the farms of the country during the ensuing summer. While this number is substantial, it should be possible to greatly increase it. Of boys between the ages of ten and twenty attending the schools of the country there is a total, according to the last census, of about 350,000. If one in three of these could be secured there would be over a hundred thousand workers. In the collegiate institutes and high schools of Ontario alone there is an attendance of about eighteen thousand boys, most of whom are old enough to render substantial assistance. There are about eight hundred thousand farms in the Dominion, and but relatively few are likely to be able to secure there full quota of experienced hands naturally follows that the need of supplementary labor during the next five or six months is going to be very great. Boys in the stage of adolescence are very susceptible to influence. Consequently, through a vigorous campaign under the leadership of those who understand boy life, it should be possible to secure a youthful army of enthusiastic recruits for service upon the farms of the country far in excess of the anticipated twenty-five thousand. A few months of farm life will be good for the boys as well as profitable for the country.

Children Cry
FOR FLETCHER'S
CASTORIA

Charges as Defaulters

Conrad and Peter Krohn, aged 32 and 28, of Brant Tp., were arrested because of their failure to register under the Military Service Act, and taken to London, where they were arraigned before the city police magistrate. The Krohn brothers are of German extraction, and admitted that they had failed to conform to the provisions of the Military Service Act. Ignorance of the requirements under the act because of their inability to understand properly what they read in the newspapers, was the reason advanced by them. Lieut. C. H. Atkinson, deputy inspector of Dominion police, stated that the Krohn brothers were working a 225-acre farm, and lived with their father and mother. Because of the father's age, Lieut. Atkinson expressed the opinion at the court that the Krohn brothers would have undoubtedly had a good claim for exemption had they taken the proper course. He further suggested that it would be satisfactory to have the prisoners over to the military authorities and have the leave of absence board deal with their case. Questioned by Magistrate Graydon both said they were born in Bruce county. "In the event of the issue of absence board granting you permission to return to your farm would you be willing to serve your country if called upon?" asked the magistrate. "I would rather work on the farm," said Peter Krohn, "but if we are forced to go we will have to go, and that's all there is to it." Both were handed over to the military authorities.

"THE HOAX"

Seated before her immense roll-top desk in "X" Department, War Office, the "tout ensemble" of a certain brisk young woman—Miss Alice Elliot—presented a quite charming picture.

Yet the feminine critics—and she had many—could not discover one single redeeming feature in her small and piquant face. True, her nose was neither of the Grecian or the Roman order. Herself, she admitted it was frankly "snub."

But such humility could not placate her rivals—particularly when a certain amorous young man of "Z" Department sent the lady in question a most flattering sketch of none other than herself, which pen-and-ink handiwork was duly inspected by the said rivals, and bearing beneath it, in straggling lettering, a charming Tennysonian reference to the little nose in question: "Tip-tilted like the petal of a rose."

"Impertinence, I call it!" sniffed the elderly Miss Jones, who had never received either a sonnet or a compliment in her life.

"The man's got a girl already!"

"He's only trying to make a fool of you!"

"I should send it back to him, and let him know I wasn't that kind of girl!"

Such were the disturbing comments of the aforementioned feminine co-workers.

But the joyous tilt of Miss Alice Elliot's most prominent feature was quite indicative of the lady's character. Not only was she an optimist, but one with decided views of her own. And the much-envied sketch, skewered by a couple of hairpins to the wall above her desk, proved a source of great consolation to herself, and of irritation to her rivals.

This morning, however, a cloud had fallen on her piquant face. For upon the immensely important roll-top desk way lying a large, square, typewritten envelope addressed to herself. And surely this missive could mean but one thing. She was "fired"—ignominiously given her congé!

"I know I've been a bit slack lately," she soliloquised in melancholy fashion. "And this is what comes of it!"

Tearing open the envelope and unfolding the document, a wave of color swept over her cheeks. Her dark eyes sparkled as they read the typewritten words.

"Dinner and the theatre! How kind of him! Oh, if the other girls only knew, how they would envy me!"

She opened a small drawer in the large, roll-top desk, and, with a gush of sheer happiness, began to pen a most gladsome acceptance.

Was it too gushing? She hoped not. But there was no time to make alterations. The other girls would be arriving in a moment.

Closing the scented envelope, she pressed the electric button below the desk and handed the note to a small and pert-looking office-minion who appeared at the door.

When the other girls of "X" Department trooped into the office, they found the all-too-attractive Miss Elliot in pensive mood, her chin reposing upon a hand that clasped a most unromantic-looking document in type, and her fine dark eyes fixed on the one patch of azure sky that was visible through a smutty window.

Scattering to their various lairs, niches and corners, and chattering like so many magpies, they began the day's work.

The first of April! There was surely romance in the very day. The beginning of spring! How intoxicating could an April morning be!

"I'll hurry home, put on the pink taffeta with the pale blue sash, then get a 'bus back to town!"

Thus ran the reflections of Miss Alice.

Yes, he would surely admire her in the pink taffeta! And that new, lacey hat! She wanted to look her prettiest.

No, she couldn't work properly this morning. The daffodils and violets on her desk smelt too intoxicating. Perhaps—her thoughts ran riot!—perhaps "he" had put them there!

She scribbled idly with her pen upon a scrap of paper. "Rufus Simpson," she wrote.

Then below, "Alice Elliot."

Carefully she blotted out each letter in the first name which corresponded with a similar letter in the second.

"Love, Friendship, Hatred, Courtship, Marriage," she counted. "Love, Friendship, Hatred, Courtship, Marriage."

She smiled triumphantly.

"A lucky omen!"

They had only met on rare occasions. His manner had been rather curt. Perhaps he was shy? Poor Rufus! Red-haired men were so often shy and sensitive!

Her reflections were interrupted by the appearance of a small office-boy at the door.

"Mr. Rufus Simpson wishes to see you at once!"

A knowing smile adorned the features of the messenger.

All in a flutter rose the lady and, patting her hair and only pausing for a second to powder the end of her dainty little nose, hurried into the Presence.

There at his desk sat the gallant Rufus, but not alone. He was deep in conversation with a khaki-clad figure, whom Alice recognised at once to be none other than the Chief—a very great man indeed!

What could the peremptory summons mean?

And the red-haired Mr. Simpson was staring at her in an almost annoyed fashion.

"You sent for me!" she began nervously.

A surprised and negative shake of the head was the only answer. And, covered with a confusion, she made a hasty exit.

Upon the very door-mat she collided with the office-boy.

"George, how could you invent such a story!"

"Twasn't my fault, miss!" blasted George. "'Twas that there Miss Pigtails in your room, with her first of April nonsense, as told me 'ow Mr. Simpson wanted you."

"X" Department was still in the throes of merriment on her return.

And then Miss Elliot noticed that her letter—the happy document from Rufus—was missing from her desk.

Flushing uncomfortably, she noticed the eye of that pert young flapper—familiarly known as PEGGY PIGTAILS—upon her. It was a green eye, too—the eye of jealously!

"Here's your old letter!" said that damsel tartly. "It was a good joke, wasn't it?"

"You—you haven't read it?"

"Read it? Why, I wrote it, silly!"

A dramatic pause ensued.

The green-eyed Peggy regarded her scornfully.

"Can't you take an April joke in good part? You aren't a real sport!"

So this was the end of the romance—an April hoax! And what on earth would the man think of her? Her gushing acceptance of an invitation he had never even penned, her bold entrance to his private room, her interruption of the conference with his Chief?

"I'm done with men, and still more done with women!" thought the lady acidly, as she jerked her desk up and began a belated morning's work.

That evening a disconsolate and incensed young man waited interminably at the appointed rendezvous for a lady who evidently did not think it worth her while to come, or even send a word of explanation.

And had it not been for an accidental meeting with Miss Peggy Pigtails—that attractive though somewhat caustic-tongued flapper, who, curiously enough, was loitering in the vicinity—the evening would have been a complete failure.

But the sight of that young cousin dining tete-a-tete—hair and pigtails almost touching—would have convinced the initiated of the truth of that old adage—that a heart "caught at the rebound" is the most inextricably ensnared of all.

Slowly the days passed, and spring set in in good earnest. The work grew heavier, and late evenings followed hard days.

And on a certain dark and moonless night the hands of the cheap little clock upon Alice's desk pointed to 10.15 before she laid her pen down, sighed her last sigh, and skewered her spring chapeau upon her fluffy head, preparatory to a belated departure.

* * * * *

The journey by 'bus to Hampstead is a long affair. And it was past 11 p.m. when Miss Elliot skipped nimbly from the vehicle and hurried into the long road leading to her home.

Hark, what was that? Someone was following her! And someone was calling after her. Could any situation be more terrifying? She could run—run hard!

The footsteps were coming nearer, nearer! No matter how hard she ran, they always gained. Quickly she darted into the nearest gateway, slammed it shut, and, with a grating noise, heard that it locked behind her. She was safe!

The voice of Rufus Simpson trickled breathlessly through the high railings.

"I—I hope I didn't frighten you?"

It was too much. The ignominy of the situation—of all the situations in which she and he had recently figured! Miss Alice took refuge in the one feminine consolation and solution—tears.

"You've locked yourself in, but crying's no use," said the prosaic Rufus. "I say, why didn't you turn up that night you said you'd dine with me?"

"My letter to you was just an April hoax!" came the muffled answer, as pride struggled with truthfulness—and won!

"It wasn't!"

Silence.

"I'll have to get you out, I suppose!" Rufus was scaling the rails. "Here, hold my hand, and you'll get up all right."

It was on the topmost railing that he left her, springing himself agilely to earth, and flashing on the tearful lady his small electric torch.

"Before I help you down, Miss Alice," said he, "you've got to tell me why you didn't meet me on April 1st?"

"Because that girl Peggy wrote the invitation as an April joke."

"She didn't!" shouted the indignant Rufus. "I wrote it myself!"

Dramatic pause.

"But Peggy told me—"

"The horrid little liar! I never did like flappers!"

(In view of recent consolatory evenings with the lady, this was scarcely accurate. But, in her ecstasy, Miss Alice Elliot let the mis-statement pass.)

"Then you wanted me—"

"Why, all the time, my dear! I want you still!"

"Then, Rufus, I'm coming!" murmured the lady, coyness vanished, tears evaporated.

And she leapt nimbly from the railings—into his outstretched arms.

Food Control Corner

People who wish to help in food conservation should consider potatoes as a partial substitute for wheat flour. Potatoes are the chief staple of the semi-perishable foods. Canadians do not eat their fair share of potatoes even in normal times. We have been largely a wheat, beef and pork consuming people. These staples are now required for overseas and it behooves us to substitute other foods for them whenever possible. We consume, perhaps, two and one-half bushels of potatoes per capita per year, or about one-third of a pound per day—equal to one fair-sized potato. In some European countries one pound per day per capita is consumed, and in some districts four pounds per day, and nearly twenty-five bushels per year.

Despite the increase in price since the war, potatoes are still among the cheapest of foods. One pound of roast beef costs ten times as much as a pound of potatoes, and twenty per cent. of beef is bone. Three and a third pounds of potatoes supply 1,000 calories of energy, at a cost of less than 10 cents, while about 2,500 calories are required for full grown persons working indoors. That is to say, if all foods were as cheap as potatoes we could live on 25 cents a day. Healthy men have lived and worked for months on a diet of nothing else than potatoes, oleomargarine and a little fruit. Potatoes contain protein of the very best kind. They also contain mineral salts which neutralize harmful acids in the body. The food material in potatoes is 98 per cent. digestible.

Canadians have large supplies of potatoes, carrots, onions and turnips and by consuming these vegetables freely, they can economize with bread.

More than 306 ways of cooking potatoes are known. They combine well with many flavors. They can be used to economical advantage with meat and fish, in stews, croquettes, hash, chowders, meat pies, etc. One half a cup of mashed potatoes and two cups of flour make a bread mixture that helps the flour go farther.

Good cooks know the ways of using potatoes are various—boiled, steamed, lyonnaised, baked, chipped, fried, hashed brown, creamed, escalloped, stuffed, au gratin, and scores of combinations.

Canada has plenty of potatoes and, although the price is high compared to normal times, it is not high in comparison with other foods in war time.

A glass of hot water with lemon juice is excellent for the complexion if taken just before going to bed.

A good way to treat an old mossback of a pasture is to run a stout harrow over it, scatter some seed, and go over it once more with a light spike-tooth harrow. If not too rough, the job may be nicely finished by putting the roller over the land after the last harrowing.

SUN LIFE OF CANADA IN STRONG POSITION

As will be seen from the essential features of its year's operations set forth elsewhere in this issue, Canada's largest life assurance company has just closed a highly satisfactory year. Total assurances in force on the books of the Sun Life of Canada have now crossed the $311,000,000 mark, assurances issued and paid for in cash during the year totalling over $47,800,000, the largest amount ever issued by a Canadian life company.

The Company's Head Office staff is now installed in the fine new Sun Life Building recently erected on Dominion square, Montreal, where the adoption of the most up-to-date office equipment should result in still greater efficiency in the administration of its large business.

Money in Maple Sugar.

Maple sugar and syrup is produced at the time of year when the farmer is least busy, and it costs him little, if any, more now than before the war.

By tapping 100 trees he can sell 500 pounds of sugar or 100 gallons of syrup, netting from $100 to $150 in three weeks.

This is more than the soldiers fighting in France gets in thrice the time and he offers in exchange his life.

Will you who have maple trees not offer so short a space of your time to help him and to put money in your pocket as well?

SUN LIFE KEEPS GROWING

THE results of operations for the year 1917 show a continuance of the notable expansion that has marked the career of the Sun Life Assurance Company of Canada. In Assets, Income, Surplus, New Business, and Total Business in Force substantial increases are recorded over the corresponding figures for previous years.

RESULTS FOR 1917

Assets at December 31st, 1917.	$90,180,176.00
Increase	7,311,178.00
Cash Income	10,293,907.00
Increase	780,896.00
New Assurances Issued and Paid for in Cash	47,811,567.00
Increase	3,289,370.00
Assurances in Force at December 31st, 1917.	311,870,946.00
Increase	24,151,748.00
Profits paid or allotted to Policyholders	1,560,580.00
Increase	468,168.00
Profits paid or allotted to Policyholders, in past five years.	5,221,963.93
Total Payments to Policyholders, 1917.	2,910,243.00
Payments to Policyholders since organization	$23,684,316
Assets held for Policyholders	20,166,174
	$43,850,490
Premiums received since organization	38,961,722
Payments to Policyholders and Assets held for them over the premiums received by:	$4,888,768
Undivided surplus at December 31st, 1917, over all liabilities including capital	$8,550,761.00

THE COMPANY'S GROWTH

YEAR	INCOME	ASSETS	LIFE ASSURANCES IN FORCE
1873	$ 48,810.73	$ 98,403.20	$ 1,264,250.00
1887	477,116.60	1,317,540.49	10,873,777.00
1897	1,244,886.74	4,342,277.11	44,365,756.79
1907	3,248,288.25	26,436,005.14	111,180,891.00
1917	10,293,907.00	90,180,176.34	311,870,946.71

The Company takes this opportunity of thanking its policyholders and the public generally for the continued confidence and goodwill of which the above figures give such strong evidence.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

H. J. S.:—I had a field of beans last year, which it be all right to put in beans this year again? Is fertilizer any good for growing beans? 2. What percentage should fertilizer have for growing tobacco? 3. Is there any way of finding out if the winter wheat has been killed before spring comes? Would it be advisable to sow spring wheat?

Answer:—1. The largest bean growers of the East, are large users of fertilizers. The bean crop is a rapid growing crop and thrives where there is a ready supply of available plantfood. Investigation of their methods show that many successful bean growers use from 200 to 500 pounds of fertilizer per acre, carrying 1 to 2 per cent. ammonia, 8 to 12 per cent. available phosphoric acid and 2 per cent. or over potash. In applying this fertilizer, on account of the tenderness of the crop, do not apply the fertilizer too near to the row. Many successful growers apply the fertilizer through the fertilizer attachment of the grain drill, 7 to 14 days before planting the beans, and never at planting time. If you do not have a drill, any broadcast distributor may be used, provided that you thoroughly harrow and disk the land after the fertilizer is spread. When the fertilizer is applied with the grain drill at planting time, it should be allowed to run in the hoe on either side of the one dropping beans, and not in the hoe dropping the seed. 2. A good tobacco fertilizer for medium loam soil, carries 3 to 4 per cent. ammonia, 4 to 8 per cent. available phosphoric acid and 2 per cent. or more potash. 3. There is no way of finding out whether or wheat has been killed or not, until there has been sufficient growing weather to allow for the germination of the crop. Do not be in too great a hurry to plow up your winter wheat field. In view of the shortage of food cereals, it is my opinion that Ontario farmers would do well to put in a conservative acreage of spring wheat.

F. C.:—I have 8 acres of wheat that was sown in good time but didn't get a very big top. Would it be advisable to top-dress with manure on the snow? Now, I am going to seed this field in the spring, and I thought of getting some kind of fertilizer, then seed with the disk drill, running the disks light, and sowing the fertilizer at the same time. If you think this would be all right, would you advise sowing the same way this wheat is sowed or go crossways?

Answer:—I believe you would do well to top-dress your spring wheat with manure or fertilizer. Indications from experimental tests are that you will get biggest return by applying the manure at the rate of about 5 tons to the acre. If you have a manure spreader, you will be able to distribute the manure evenly over the wheat. In view of the fact that you are going to seed this field to grass and clover, I would advise you to top-dress it with a fertilizer carrying 3 to 4 per cent. ammonia and 8 to 10 per cent. available phosphoric acid. The method you have in mind of applying the fertilizer is all right. I would by all means advise sowing the same way that the wheat was drilled.

C. F. H.:—Please advise me if the culture for inoculating alfalfa sold in bottles is a success? What kind of alfalfa seed should I sow, Grimm or common alfalfa? I have a fairly good ground, sandy in character. Is it all right to sow with oats in the spring?

Answer:— Well prepared inoculated cultures for alfalfa, sold in bottles, have proven very successful. I believe the Bacteriological Department of Ontario Agricultural College is putting out such cultures. Best results are obtained by sowing Grimm seed. Common alfalfa seed does not tend to be as strong in germinating quality. The oat crop, I am afraid, will provide a little too much shade for a good catch of alfalfa. I would rather recommend about a bushel and a peck of barley seed per acre instead of oats. I know a successful alfalfa grower in Wisconsin who never attempts to get a good catch of alfalfa without applying 250 pounds of fertilizer per acre. This available plantfood gives the young crop a strong, vigorous start. The fertilizer for this purpose should analyze 2 to 3 per cent. ammonia, 8 to 10 per cent. available phosphoric acid, and possibly 1 per cent. potash. It can be applied with the fertilizer drapper on the grain drill at the time the alfalfa is sown, or broadcasted like lime and then harrowed into the soil just before the seed is sown.

Greater Crop Yields
In 1918

If you cannot increase the area of your fields in crop you can increase the yields by means of proper fertilization.

An increase of 8 bushels per acre in wheat yields in Ontario this spring would mean 8½ millions of bushels more food grain.

This increase was reported in 1917 by the Ontario Agricultural College as a result of top dressing wheat in the spring with suitable fertilizer.

The Canadian Fertilizer Association announces the establishment of its Soil and Crop Improvement Bureau, under the direction of Henry G. Bell, (a native of Ontario, and graduate of Ontario Agricultural College), formerly Professor of Agronomy at the University of Maine.

The purpose of the Bureau is to collect and disseminate practical information regarding soil tillage, fertility management and crop production.

The Bureau co-operates with all organizations working for the betterment of Canadian Farming.

Rickets.

X. Y. Z.—Please writs an article on Rickets. My baby eleven months old cannot sit up, and seems to have no power in her back. What kind of food is suitable and how long does the disease last?

Perhaps your child is not affected with rickets, but with some other disease. Rickets, or rhachitis, is the result of bad nutrition, affects all the tissues of the body, and chiefly leaves its mark on the bones—which it softens and then deforms.

It usually occurs before the third year, but the bones deform ties appear later.

It is caused by food which is not assimilated, but also by neglect of the skin, bad air, insufficient sleep, etc.

The child of the poor have it, but so do those of the rich.

In the great European cities one sees it everywhere. The urine of rhachitic children contains phosphates in abundance and the bones, being deficient in lime, bend and break easily.

Rhachitic children have soft spots in the bones of the skull; and the membranous portions of the skull, where you notice throbbing and pulsation in an infant, and which ought to harden during the first few months of life, remain soft.

All the bones of the skull, instead of being firmly united, are loose and easily moved.

The face of a rhachitic baby is small, and the head seems disproportionately large.

The liver, spleen and lymphatic glands are enlarged, the muscles soft, and the ligaments weak.

The child's appetite may be good, he may even seem voraciously hungry, but his food doesn't appear to nourish him, he becomes fretful, gets diarrhoea and this alternates with constipation.

He is sensitive, cries when touched, his diarrhoea is offensive, the appearance of his teeth is delayed, and when they break out, they are irregular and of poor quality.

When he begins to walk, the weakness of the bones of the legs becomes apparent and they bend or break easily; the joints are weak and he falls frequently.

When he tries to move himself with his arms, the arm bones bend or break and there may be an outward hump on the spine.

On the ends of the ribs there are knobs or bead-like structures, the breast bone projects and the child becomes pigeon breasted.

The pelvis may become deformed and, in females, this has a very important bearing upon the successful delivery of offspring, if impregnation should ever occur.

Rhachitic children are frequently bow-legged, knock-kneed or flat-footed; they are also sensitive to bronchitis and croup, and die from these diseases more frequently than children who have better physical development.

If they reach maturity, they are short and poorly formed and their limbs often reveal the marks of early disease.

Rhachitic children should be taken to the mountains or sea-shore, if possible, and should have abundance of good plain food which they can assimilate—which will be indicated by the change in their stools and in their general nutrition.

Fats in the form of cod-liver oil, or olive oil, should be given them; also as much of eggs, milk, and cereals as they can dispose of. Treatment with mechanical apparatus is important to prevent deformities, and they should have all possible benefit from public parks, sea baths, sleep, fresh air, and life in the country when this can be provided.

QUESTIONS AND ANSWERS.

X. 1—Can water on the brain be cured? The patient in question is a child two years and nine months.

2—Do you advise an X-ray examination?

Answer—It is sometimes possible to tap the skull and draw off some fluid in this condition—which is known as "Hydrocephalus." But unless skillfully done, this is likely to do harm—and even when skilfully done, it is by no means always successful. The condition is usually a hopeless one.

2—There would be no harm in having an X-ray examination.

MOTHER-WISDOM.

Forward With the Teaching of Practical Health Habits!

By Helen Johnson Keyes

Why should the elementary schools teach children the laws of health, that study which goes by the name of hygiene? The purpose is that they may live in a way which will make them healthy.

This seems like a very simple answer but when one watches the way in which hygiene is often taught to little children, one sees that the reason for the teaching is often entirely forgotten. Tots are made to repeat sentences out of books which they can not possibly understand, statements about the way the body does its work and why germs are a danger, and yet, in the meantime, they may drink coffee every morning and come to school with dirty nails and unbrushed teeth.

This kind of instruction puts the cart before the horse.

Children younger than eleven years old are not at all interested in reasons. On the other hand, those are the golden years for teaching them habits. All lessons then given children should be of the kind on which they can act, put into practice. Never again will they learn habits so easily, thoroughly and permanently. It is an age when they must be shown what to do, not why.

The first lesson is hygiene must be a clean schoolhouse. No lesson regarding germs will have the effect on character which a room kept clean all the time, will have. The teacher should be spotless herself, both as to person and clothing. In this way there will take root in the children a standard of cleanliness.

Slowly and kindly, the teacher should start a personal inspection two or three times a week, of all her children. Hands, nails, teeth, hair, head, neck, ears should be looked at, not to criticise those who are dirty so much as to praise those who are clean.

Soon a pride will develop and clean water, individual soap, individual wash cloths and individual towels can be supplied for the use of those who are not up to the standard. This inspection may be made almost like a game and should be kept thoroughly good-natured so as not to hurt the pride of the pupils or of their families. A badge, such as a piece of brightly colored ribbon, may be given as a prize each week to the class having the best record for cleanness.

By tactful questions, the teacher can find out what foods the children eat. When she is supplied with this knowledge she can draw some day on the blackboard a picture of a sheep and another of a goat. Under the sheep, she may write down the foods which are good for children and under the goat those which are hurtful. This will give a note of merriment to the instruction which will not be there if she merely writes, "nourishing," "not nourishing." The children will laugh when they are asked if pickles are sheep or goats—and laughter of this kind is excellent, even in a schoolroom.

This will lead toward useful instruction on the choice of food and the value of chewing. Wholesome combinations of food can be written on the blackboard for the children to copy and take home. In their turn, the children can bring a list of the foods which they have eaten for the past week, the child who has eaten most wisely receiving a brass button on a tiny ribbon bow. In these lessons the terms calories, proteins, carbohydrates and so forth should not appear. They would take the fun out of it for any child under twelve. At the elementary school age a child should be taught what to do but not the science behind it.

Clothing is a matter of importance and it is difficult to deal with in communities where some of the children are in poor circumstances. However, the investigation of these cases very often shows that neglect and ignorance, not poverty, are the causes of poor clothing.

When this is so, the importance of clean laundering and neat mending should be spoken of freely. Other matters of importance are well-shaped shoes of the correct size, dresses which are hung properly so that they do not pull on the tips of the shoulders, twisting the muscles of the back into deformities; coats, shirts and shirtwaists with collars which are not so high that they run the neck forward and produce "pigeon-chest,"—as a hollow chest with forward-thrust shoulders is called, and suspenders which do not cut in at the hollow of the shoulders in front, producing wing shoulder blades, by which is meant a protrusion and lump on each side of the shoulder at the back at the base of the arms.

Ventilating the schoolroom is a good, practical way of showing that fresh air is necessary to health. It will lead naturally to the subject of supplying home, too, with constant fresh air and of sleeping with open windows.

When the necessity of fresh air during sleep is mentioned, the amount of sleep required by children will naturally come up for discussion and the matter of clean, well-aired night clothes, well-aired and neatly made beds and the personal toilet.

By the time children are eleven or twelve years old, practical lessons in domestic science should begin, including the boys. The care of foods, water and milk, sanitary ways of cleaning and the care of clothes may all be taught by "doing." When there is no second room in the schoolhouse where such work may be performed, mothers are often willing to take turns in allowing the demonstrations to be held in their kitchens.

Very little scientific knowledge of hygiene and physiology is necessary to most people. The laws according to which bacteria develop, how the body does its work and how ventilation is accomplished are of intgrest only to special kinds of minds and may be saved for special and advanced kinds of education. To know and to follow the rules of health, however, is necessary to the well-being of every one.

Away with textbooks, then, and forward with talks, inspections, contests and practices in teaching our children hygiene!

Horse Sense

Dry Stables, Sound Feet.

Every practical horseman knows that the disease known as thrush is caused by allowing the horse to stand with his feet constantly in wet and filth; but few, comparatively, understand that canker of the frog and sole is caused in the same way, says a veterinary surgeon.

Thrush is characterized by inflammation of the fine skin between the toes in cattle; pus forms and tends to undermin the horny wall of the foot. In horses the frog is the part affected, and its cleft, normally shallow, becomes deep and exudes a thin, foul-smelling liquid. Gradually the frog becomes rotten and loose and the disease may spread to the surrounding parts; lameness is rare.

Canker of the frog, and sole, differs from thrush in that the horn of the sole becomes soft or spongy and readily bleeds when cut. In canker, the sensitive tissue (pododerm) of the sole, which ordinarily is covered with solid horny tissue, seems to have taken the place of the solid material. The sole is made up of spreading fungous tissue and is extremely sensitive and vascular. If it be cut away it may grow again in a single night and the entire affected part is covered with a stinking fluid.

Prevention is all important in these diseases. Stable management should be such that no horse is allowed to stand for any length of time in wet and filth. In horse stables where the manure is removed "now and then," the "nows" and the "thens" sometimes coming months apart, so that the horse has to jump into bed over a high barrier of manure, it is little wonder that the animal contracts thrush or canker.

Treatment of thrush consists in removing the cause, cleansing the affected foot thoroughly, then cutting away all loose, rotten and underrun horn of the frog and on each side of it, and packing the cleft of the frog full of calomel, or a mixture of calomel, powdered wood charcoal, subnitrate of bismuth and slaked lime. This is to be covered with oakum, upon which pine tar has been spread, and the dressing is to be renewed at intervals of three or four days. The stall floor should be kept clean, sprinkled with slaked lime or gypsum (land-plaster) and bedded with sawdust or planing-mill shavings.

Canker is best treated by the trained and experienced veterinarian, but there is no specific remedy. Before succeeding with a bad case it usually is necessary to alternate remedies and try a great number. The first step in all cases should be to cut down the sprouting growth level with the walls of the foot; then it is usual to cauterize the sole with a red hot iron or with some strong caustic. We usually employ terchloride of antimony, or full strength formaldehyde to start with, and if that does not suffice change to chromic acid, or strong nitric acid. After applying the caustic, oakum saturated with tincture of iron, or a solution of two ounces of sulphate of copper (bluestone) to the pint of hot water, is bound upon the sole in such a way as to cause firm pressure, for pressure is absolutely necessary. The dressing is changed or renewed every twenty-four hours. Dry dressing powders also are useful, such as a mixture of equal quantities of calomel, subnitrate of bismuth and tannic acid or burnt alum, or a cheaper mixture of slaked lime, alum, sulphur and charcoal. Naphthalin sometimes is added.

The Centre of Hospitality.

The centre of hospitality in the home is that point about which the family itself gathers most often. This point is in most homes the fire-place. Hence its location and construction are of vast importance in building a home.

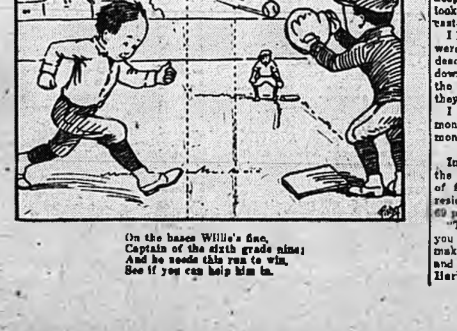
The fireplace, if there is only one, should be in the living-room, for there the family and friends can enjoy it most. It should be located in the centre of a wall space, either on one side or at one end of the room. Select the space which will permit the greatest number of people to sit around it.

In the construction of the fireplace you must not forget that its chief purpose is for a fire. The more simple the lines of construction, the better taste is displayed, and the more room the open fire receives.

There is a great variety of materials suitable for a fireplace, and your individuality and taste can be well expressed in this important factor of the home. Brick, tile, wood, and many tile substitutes may be used. These offer great possibilities both for good color and design, and lend themselves to any style of architecture.

Gunns Shur-Gain Fertilizer

Lloyd George recently declared that the British have 2,000,000 horses engaged in this war. It is estimated that on the whole Western front the number of horses and mules in service is close upon 5,000,000.



Sewing Hint.

When sewing on hooks and eyes, pin a tape measure where the hooks are to go and sew on hooks an inch apart, then pin the tape measure on opposite sides and sew on the eyes. This is much simpler than measuring for each one separately.

You are not saying smart things when you say things that make other people smart.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

On the bases Willie's fine,
Captain of the sixth grade nine;
And he needs this run to win,
See if you can help him in.

Sheep Notes

Raising Lambs by Hand.

When raising lambs by hand the only caution is: Do not feed too much. A baby lamb should receive only a few spoonfuls of fresh cow's milk. When a couple of days old give one-fourth pint, which should gradually increase to one-half pint when the lambs commence to eat grass. When two months old they may have a pint of milk.

So much for quantity; now for feeding times. The first three weeks, feed regularly every three hours during the day; after this feed every four hours. When they begin to eat grass, feed morning, noon and night, and finally drop the noon feeding.

I always use bottle and nipple to feed with until the lambs learn to drink. Where one has a large number, feeding from a pan is more tedious, as each lamb must have a separate pan, and milk must be measured, for some drink faster than others.

Feeding too much will produce scours. Lessen the quantity of milk and give a dose of castor-oil (one teaspoonful) followed by ten drops of ginger extract. In severe cases increase the dose and give browned flour gruel. To liven weak, chilled lambs give a little milk, and keep them in a warm room. If lambs look droopy and walk stiffly, give taster-oil.

I have had lambs brought me which were wet and chilled, and appeared dead. I pour a spoonful of milk down their throats and lay them on the furnace register. In a few hours they get up and walk.

I feed the lambs for about three months; skim-milk the last two months.

In Canadian cities 28 per cent. of the buildings in business districts are of frame or brick veneer, whilst in residential districts the proportion is 69 per cent.

"The world is always romantic if you have the three gifts needful to make it so—faith and sense of beauty and the sense of humor."—Henry Harland.

Poultry

Our meat supply is short and more poultry will help solve the problem. More poultry means more eggs and more eggs and poultry meat means a greater food supply. Poultry can be raised at lower cost and brought to maturity quicker than any other kind of live stock.

Never allow the mother hen to range with the young chicks until they are at least two weeks old.

Enormous numbers of young chicks are lost each year by allowing them to run in the wet grass during their early life.

Eliminate the male bird at end of hatching season. Many million dollars are lost each year by allowing the rooster to run with the hens during the summer months. Produce the infertile egg. Dispose of the male bird not later than June 1. Market a better quality of eggs.

Green feed is excellent for poultry and can be substituted for a considerable amount of the grain ration. Grow oats, vetch, and rape for summer use; cabbage and mangel beets for winter. Store cabbage and beets in a dry room or bury in a pit and cover with straw and earth.

Save eggs during April and May for winter use by preserving in waterglass. Mix nine quarts of water, boiled and cooled, with one quart of waterglass. Will preserve fifteen dozen eggs.

Place the solution in a five gallon jar. Store in cool place for winter use.

Poultry meat can be raised quicker than any other kind of meat and could be made a most important source of supply for the nation. If breeding is started in March the surplus roosters may be dressed for meat in July at fancy prices and egg laying will begin in September.

FERTILIZER PAYS

ONTARIO FERTILIZERS, LIMITED
WEST TORONTO - CANADA

PINKERTON

Mr. Clare Donnelly, of Toronto, is spending the holidays at the home of his father, Senator Donnelly.

Mrs. (Rev.) W. Richardson and son, who have been visiting her parents at the manse, returned to Arthur on Tuesday.

Mr. Hugh Currie, of Collingwood, is visiting at the home of his niece, Mrs. A. Pinkerton.

Mr. Jas. Gale, of Toronto University, returned home on Saturday.

Mrs. Sam Garland and son Tom leave this week for the west.

Mr. John Johnston and daughter, of Parkhead, are visiting at Mrs. N. Garland's.

Mr. Wm. Knox, of Guelph, is visiting his brother, Mr. Adam Knox.

Following is a letter of condolence to Mrs. Albert Pinkerton from the Greenock Agricultural Society:

Dear Mrs. Pinkerton—In behalf of the Greenock Agricultural Society, we the undersigned desire to express our very deep sympathy for you in the loss you have sustained through the untimely death of your husband, the late Mr. Albert Pinkerton. This expression comes from us, not out of any desire to follow form or custom, but out of a deep, heartfelt feeling of the great loss which has befallen the community and the various organizations in our midst, as well as the place in your home. It affords us a great sense of satisfaction, however, that even in the event of so great a loss we have left to us a memory of one which can never be effaced from our past associations, one who ever and always was ready to render not only honest and capable service in every position and work which he took in hand, but rendered it in a spirit of [illegible] self-sacrifice—qualities which we shall ever treasure and with which we are loath to part. His presence will be greatly missed in our society, in the home and elsewhere, but we can only accept the kind disposal of an all-wise Providence, and humbly say "Thy will be done."

Yours very sincerely,
John Clancy
Stanley Garland
R. M. Gale

CARGILL

Mrs. F. L. Martin spent the holidays with friends in Guelph.

Messrs. James Alexander, Karl Cliff, and James Clancy, of the McLaughlin motor works, spent over Sunday at their homes here.

Miss Frankie Newman spent the end of the week with her sister in Toronto.

Miss J. Allen, teacher in the primary dept. of the public school here, spent the holidays at her home in Wroxeter.

Mr. Fred Balsdon has moved his family and household effects into the house that Mr. Brownscombe recently purchased from Mr. Bester.

Mr. Fred Grice, of Toronto, spent over Sunday with his family here.

Miss E. Adair and friend, of Preston, visited at Mr. Ben Neil's over the holidays.

Master Charlie Anderson, of Brantford, is visiting his grandmother here.

Master Milner Matheson, of Toronto, visited at Mr. Wm. Matthew's last week.

Mr. C. Spence, of Milverton, spent the Easter holidays at Mr. John Cowing's.

Mr. E. A. Ruttle and wife left last week for their new home in Dundalk. We wish them all kinds of success. Mr. Matheson, the new principal, who takes Mr. Ruttle's place, will take charge of the school this week.

Mr. and Mrs. Grainger spent the week end with friends in Owen Sound.

Mr. Wm. Wells Sundayed with his brother in Port Elgin.

Mr. Jas. Napper visited friends in Fergus last week.

Mrs. Adair, of Preston, visited her daughter, Mrs. Ben Neil, over Sunday.

A large crowd attended Mrs. Hall's sale last Monday. She has sold her farm to Mr. Geo. Bester, and leaves shortly to live with her daughter, Mrs. A. Burrows, in Walkerton.

The C. O. F. ball on Monday night was well attended.

Miss Rose Ellinhausen, of Walkerton, visited at Mr. C. Schnitzler's the first of the week.

GRESHAM

Our teacher, Miss Hanna, is spending the holidays in Guelph.

The neighbors and friends of Mr. and Mrs. Duncan Morrison gathered at their home and presented them with a purse and an address previous to their departure for the west.

The Rev. Mr Sawers, formerly of North Bruce, will occupy the pulpit here and in Underwood during the present month.

Miss Edith Rose, of Guelph, is visiting at her home here.

The crows, snipes, robins and wild geese that have been here for some time, have left to visit more backward places.

Mr. E. Greaves, our mail carrier, leaves this week, and Mr. Stoddart of Parkland, Man., will come.

Mr. Charles McKenzie and children are visiting at Mrs. McKenzie's, 11th con.

John C. Brown and Wesley Nelson are spending the holidays at their homes here.

Mr. L. McPhail, 10th con., was visiting in this neighborhood last week.

LOVAT

Mr. John McKay and sons are taking a cut of logs at the sawmill this month.

Colwell brothers sold their valuable team to Mr. Geo. Craig.

Miss Edith Rose was home from Guelph for Easter.

Mr. Edgar Brownscombe is able to be out again after his operation for appendicitis.

Quite a number of Oddfellows attended the lodge of instruction at Underwood on Good Friday.

We welcome Mr. and Mrs. Roy Elliott to our neighborhood.

Mr. John McKay, of Paisley, spent Sunday at Mr. Wm. Rose's.

CHESLEY

Our townsman, Wm. Cassels, official weighmaster for 23 years, has been compelled on account of sickness this winter to drop the position, and James Kirkwood has been taking his place until someone is appointed by the council. There is no place at the coal sheds to get warmed, nearer than the station, and this cold winter Mr. Cassels was almost frozen on several occasions when weighing coal, and the chill took bitterly cold day sent him to bed where he remained for a couple of weeks. He is able to be out again, but will not tackle the weighing business again. The town is losing the services of an honest and obliging official who has never lost a day in the whole 13 years he worked for this corporation.

After being together for two years the members of Chesley platoon of the 160th Battalion have been sent to France in different drafts. Sergeants Eason, Grant and Marsh reverted to the ranks in order to get over to France. According to a letter sent by Rollie Brown to his brother, the reeve of this town, the boys from Chesley and locality are divided up as follows: First draft, first division—Ptes. Irwin Eason, Grant, Bobt. Gray, John Wood, Louis Beattie, Percy Wood, Geo. James, Norman Walker, Jack Cass, Peter Robinson, Jas. Agnew, Clifford Campbell, Walter George, Pearlous Sherk, with Herman Becker as waiting man. To the second draft, first division the following have been sent: Rollie Brown, Jas. McDonald, Geo. Maher, Chas. Phillips, Roy Maxwell, Stewart Gernaz, Jas. Bull, Norman Bell, Frank Dobson, Sam Hepburn, Thos. Wright, Geo. Marsh, with Dave McDonald and Bert Lamont as waiting men to fill possible gaps. These have been drafted to the Second Pioneer Battalion—Ben Biebighauser and Hugh Parker, with W. Rundle as waiting man. These have gone to Bramshott for the Fourth Reserve—Ptes. Wm. Small, Frank Laurence, Reuben Bell, Wm. Nelson, Dawson Cole, Arthur Lloge, Ernest Hunter, Herb Whitman, John Walks, Trueman Brueggmann, Ed Smith, Wilfred Armstrong, W. Hammond, Dan Cocklin, Harold Hammond, Stewart McDonald, Jas. Kincaid, W. McCombe, Ernest Wright and Tony Nebbling.

Richard Quigley, of township Sullivan and Elderslie, nearly lost his team of horses last Thursday on his way home from Chesley. When near Grace church the water was so high beside the road that a culvert he had to cross was teetering. The horses got their front feet on terra firma, but the hind feet pushed the plank out of position and down went the horses' hind legs into five feet of water. Richard yelled lustily and Frank McLellan came to his assistance, walked into the water up to waist and liberated the horses while Richard in the sleigh hung onto the lines. The horses trotted off home and Richard wondered what his wife would say when she saw the team without their driver. This made Frank wish he had a wife too, so that somebody would have more than the ordinary interest in him. The road is still impassable at this point and it is necessary for teamsters to go through the field.

An adjourned meeting of Presbytery was held in Geneva Church, Chesley, on the 10th inst. The special business of the court was to dispose of a call to Rev. J. Alex Hills, from Davenport Road Church, Toronto. Mr. Hills expressed his desire to accept the call, and the Presbytery granted his wish. Geneva Church has now the largest membership of any congregation in Bruce Presbytery. During the present pastorate of four and a half years, 305 members have been received into full communion. Mr. Hills closes his labors as pastor of Geneva Church on the seventh of April. He leaves the congregation free of debt and all departments of the church in good working order. He will be missed not only in his own church, but in the town at large. He was deeply interested in work of a patriotic nature.—Enterprise.

WILLOW CREEK

At the annual meeting of the Evangelical church on March 23rd, the trustees gave a good account of the congregation's work. The financial report presented by the recording steward shows a better standing than for years. When the arrears come in all debts will be paid and a balance on hand, notwithstanding a raise in the minister's salary. Mr. C. Hellwig was elected a trustee in place of Mr. W. Berndt, who resigned. Mr. H. Giesz was appointed recording secretary. The trustees were authorized to engage an organist for the year, also to get a caretaker for the church and have necessary work done at the cemetery. The Sunday School in connection with this church is about the only one that hasn't the bear hide of sleeping all winter. Mr. Kopas, the superintendent, is always at his post. The attendance averages between 70 and 80.

Snowbanks are the only obstacles to prevent running cars now.

We will need warm weather these nights if the fall wheat and young grass are to have a chance to start this season. The present outlook is not at all favorable.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

—South Grey Fish and Game Protective Association has been organized at Durham, for the object of protecting and replenishing of the stock of fish in the streams and lakes this spring. The association have been offered black bass and speckled trout fry from the Government, which will be placed in the small streams in that section.

SUCCEEDED

Where Travel and Change of Climate Failed to Restore Health

Hamilton, Ont., Apr. 20th, 1917.

"About four years ago I wrote you of my condition from Montreal and Toronto my kidneys were affected, pains and backache, efforts through travel and change of climate to rid myself of these troublesome ailments, and how I only found relief in Gin Pills after spending a lot of time and money in foreign lands.

"Since then Gin Pills have been my chief medicine. I find in advancing years a tendency for the kidneys to get out of order more easily than formerly, but a course of Gin Pills puts them right and wards off other and more serious troubles. Then I remember what I endured through Kidney Trouble and Rheumatism and how Gin Pills relieved me, which I now enjoy. I feel it not my duty, but a pleasure, to recommend Gin Pills for Kidney Trouble and Rheumatism, and I am sending a friend Private Stonehill, Canada to whom I am well known as a commercial traveller of over forty years' active service."

(Signed) W. G. REID.

Gin Pills cost for this 6 box $2.50 at dealers or sent direct on receipt of price. Booklet free. National Drug & Chemical Co. of Canada, Limited, Toronto; or in United States at Nyal Co., Inc., 202 Main St., Buffalo, N.Y.

GLAMIS

Mr. Kirkstown, who has been in Markdale for the last month, returned on Thursday.

Miss Edith Howson is spending this week with friends in Clifford.

Quite a number of our Oddfellows visited Underwood Lodge on Friday evening.

Miss Laura Cunningham was Miss Symon's guest on Sunday.

Miss Mary Webb, of Chippewa, is spending the holidays at her home.

Mr. Arthur Cronin left last week for Toronto, where he expects to join the navy.

Mr. McCauley went to Tara on Thursday. He expects to return this week in company with his mother. They will occupy the parsonage.

Miss Mary McLeod has been on the sick list for a few days, but is better again.

Mr. Artie Alexander, who was under the doctor's care in Cargill, returned home on Saturday.

Mr. Chas. McKinnon, of Wallaceburg, is home for the Easter holidays.

The Ferris brothers are busily engaged in the wood cutting business.

Mr. Roy Kennedy, who had his tonsils and adenoids removed, is progressing nicely.

The Red Cross packed 60 pairs of socks at their last meeting.

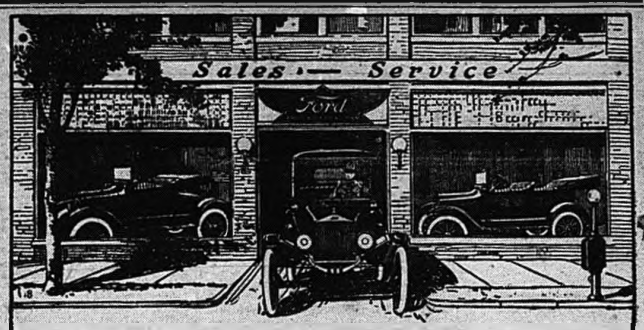
Mrs. Parker is nursing Mrs. McClung.

TURNER'S

Mr. and Mrs. Little, of Calgary, and Mrs. Little, of Walkerton, spent a few days with Mr. and Mrs. J. T. Wallace.

Miss M. Clark, of Toronto, is spending Easter holidays with her father here.

Mr. Earl Hyde is visiting with his uncle, Mr. A. Pollock.



Mr. Wm. Karcher shipped a car load of hay from here last week.

The many friends of Miss Annie Cairns are sorry to hear of her being in poor health.

The Late Andrew Morran

The death occurred in Grandview, Manitoba, on March 10th, of Andrew Morran, a former well known and respected resident of the Tp. of Arran. Mr. Morran was in his 83rd year, and he had been in ill health for quite a long time and his death was not unexpected. Deceased was born in Donegal, Ireland, in October, 1835, where the family resided until 1841, when they moved to Glasgow, Scotland. Here they resided for eight years and in 1849 emigrated to Canada. Mr. Morran was the youngest of four boys, who had to turn to the new world for a livelihood in order to support the mother, an invalid father and two sisters. Arriving in Canada the family settled in Clarke township where they resided for a number of years, later moving to Arran township. Here in 1860 he married Ann Morrow, and set in to clear the dense forest from off his homestead. Later he engaged in the saw mill business and supplied the settlers with the necessary building material. Leaving Arran in 1890 he set out with his wife and family for Manitoba and settled at Glenboro, where they resided for one year and then moved to Grandview, Man., where he built and operated a boarding house until 1896, when he homesteaded in the Morranville district, Grandview, on the farm now owned and operated by his son George. Sixteen years ago deceased decided to move into Grandview and erected a home for himself and wife on Railway Ave., where they have since resided. The late Andrew Morran was a member and an active worker in the Church of England, a staunch supporter of Conservative principles and a member of the Orange order for over sixty-two years. Deceased is survived by a widow of seventy-nine years, and a family of seven children—Mrs. A. McMullen, of Islay, Alberta; Mrs. David Caswel, at present in Vancouver; Mrs. George Cawl, of Tara, Sask.; John, at present in Vancouver; Andrew E., Robert and George, of Grandview.—Leader.

—According to information available, the G.T.R. will resume the two trains a day service on this line after April 26th.

Complete Service to Ford Owners Everywhere

COURTEOUS attention to your needs wherever you may travel is something you appreciate, and being a Ford owner you can get it. You are always "among friends".

There are more than 700 Ford Dealer Service Stations throughout Canada. These are always within easy reach of Ford owners—for gasoline, oil, tires, repairs, accessories, expert advice or motor adjustments.

The cost of Ford Service is as remarkably low as the cost of the car itself. Nineteen of the most called for parts cost only $5.40. Just compare this with the cost of spare parts for other cars and you will realize the advantage of owning a Ford.

BRUCE TP.

On Wednesday evening, March 27th, a large number of the friends and neighbors of Mr. and Mrs. D. N. Morrison gathered at their residence to spend a social evening with them before their departure. A short programme of songs, speeches and recitations was gone through with, Mr. Peter Dobson, deputy-reeve, in the chair. The following address was read, and Mr. and Mrs. Morrison presented with a purse containing a goodly lining as a slight token of respect:

To Mr. and Mrs. Morrison and family:

Dear Friends—We, your friends and neighbors, learning that you are about to leave this neighborhood, have assembled here to spend at least one more evening with you before your departure. We have found you both efficient and courteous neighbors, ever ready and willing to lend a helping hand. While you, Mr. Morrison, have spent the greater part of your life here, Mrs. Morrison has only spent a few years in this vicinity, you have won for yourselves and family the respect and good will of the community. As a slight token of good wishes we ask you to accept this purse in the spirit in which it is given, and should it be your lot, through the ruling of an all-wise Providence, to again take up your residence in this fair township of Bruce, be assured you will receive a hearty welcome. May health and prosperity be yours wherever you may decide to locate. Signed on behalf of friends and neighbors, Arthur Cameron, Hilker Brown.

The rest of the evening was spent in games and dancing.

The I.O.O.F. lodge of instruction for Bervie district was held in the lodge room, Underwood, on Good Friday. The work was exemplified in the initiatory by Underwood, first and third degrees by Kincardine, second by Tiverton. After the work trained the brethren to a supper at was finished Underwood lodge enter- McLean's hotel.

BORN

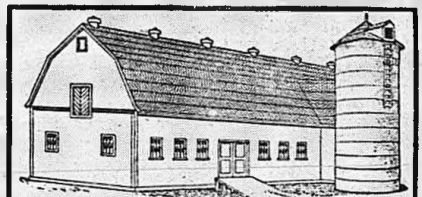
Walpole—In Elderslie, on March 31st, to Mr. and Mrs. Herb Walpole, a daughter.

McClung—At Glamis, on March 29th, to Rev. and Mrs. McClung, a son.

Sinclair—In Arran, on March 27th, to Mr. and Mrs. J.W. Sinclair, a son.

MARRIED

Laidlaw—Agnew—At the home of Mr. and Mrs. Wm. Agnew, Kilsyth, on March 20th, by Rev. E. F. Chandler, Pauline, second daughter of Mr. and Mrs. Wm. Agnew, to Mr. J. R. Laidlaw, of Paisley.



DIED

Pfeffer—At Owen Sound, on March 21st, Jacob Pfeffer, formerly of Tara, aged 59 years.

Connor—In Elderslie, on Mar. 31st, Mary Cassar, beloved wife of Alexander Connor, 13th con., aged 45 years.

No Answer

The following was handed in by an Advocate reader in the U. S.: Some people were made to be soldiers, but the Irish were made to be money and money was made for the cops. Sauerkraut was made for the Jews. Everything was made for Germans, and spaghetti was made something—most everything but a for the wops. Fish were made to miser. Somebody made Wilson our drink water, and hams were made to president, but who in—you know—

Barn and Silo Roofed with Brantford Asphalt Roofing.

Resists Fire, Sheds Water, Wears Long

Flying sparks and embers from a burning building often cause roofs near by to catch fire, especially in a dry, hot season. Under like conditions, roofs covered with

Brantford Asphalt Roofing

are in no danger from flying embers, because any that fall on Brantford Asphalt Roofing die out harmlessly. Build a bonfire on a roof of Brantford Asphalt Roofing and the fire will not spread and the boards underneath the roofing will be protected in a surprising manner.

If a fire starts in the interior of a building Brantford Asphalt Roofing acts as a retardant and keeps the fire from spreading. Fire chiefs and insurance companies endorse its use in the most congested cities.

Brantford Asphalt Roofing does not absorb water, but sheds the heaviest rain with ease. Acid proof and alkali proof. Reliable, durable, economical. Three weights—60 lb., 70 lb., 80 lb. per square.

Brantford Rubber Roofing

is the same quality as Brantford Asphalt, but has a smooth, rubbery surface instead of the sand. It is particularly suitable for verandah decks and floor coverings. Three weights—50 lb., 60 lb., and 60 lb. per square.

Standard Mohawk Roofing

is made of the same materials as Brantford Asphalt Roofing, but is lighter in weight. A thoroughly reliable roofing at a low price. Tested for years and has given entire satisfaction. Sanded on one side. One weight—40 lbs. per square.

Mohawk Rubber Roofing

The same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunk-houses, camp sites, even dugouts in the trenches. 35 lb., 45 lb., and 55 lb. weights.

Leatheroid Roofing

Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb., and 55 lb. weights.

Samples of any of these roofings and prices will be furnished on request.

The People's Popular Store

Rugs! Rugs! Rugs!

SERVICE, Design and Coloring are the three essential features when choosing a rug, and one important point about our rugs is that they were ordered eighteen months ago direct from the British manufacturers. These rugs came to hand just recently. As they were delayed in the manufacturing, and transportation is so hard to obtain we were compelled to wait the arrival of these goods. If we were to order them to-day from the same manufacturer they would cost us 75 per cent of an advance on the price we bought them at, but we marked them on the percentage basis of what they cost us, not on to-day's price. So you can be assured of a serviceable rug at a low price. These rugs are seamless, made with the best of dyes, and are some of the finest specimens woven on a machine. Different sizes to fit different rooms, different prices to fit different pocket books. Let us have the pleasure of showing you these goods.

Our stock of

Shoes

for the spring is complete, and as in other departments you will always find the best quality, the correct style and the right price. Let us fit you with a pair. These will give you satisfaction. In Ladies', Girls' or Misses', Men's, Boys' or Youths', a full line to choose from.

Do not forget

Our Grocery Department

We can supply your wants. Telephone us your order. We will see you get the goods. We are giving

11 lbs. Granulated Sugar for $1.00 Cash

Why should we want to store up sugar by the 100-lb. sack when our boys in Flanders and France are on rations? There is plenty of sugar cane and when transportation becomes normal we will have plenty of sugar and at a cheaper price.

We Want Your Produce. Highest Market Prices Paid.

DISSOLUTION OF PARTNERSHIP

NOTICE is hereby given that the partnership heretofore existing between Joshua Bell and Robert Bell as bricklayers and manufacturers, under the firm name of Bell Bros., has been dissolved, and the business will hereafter be carried on by Robert Bell & Son.

All accounts due the firm of Bell Bros. must be settled by cash or note by May 1st, 1918.

Dated at Paisley, April 8th, 1918.

Trustee and Grader for Bruce Co.

The County Highways Committee, consisting of Sept. D. J. Izzard, Port Elgin; Chairman C. E. Whitcher, of Lion's Head; Reeves Case of Teeswater and D. A. McDonald of Kinloss, met at Walkerton and purchased a tractor and road grader for the County at a total cost of $2,000, preparatory to commencing the season's programme for improving the highways.

For Sale

NEW two-storied stucco house, Bath, for modern; good spring well, in good location. Will be sold at cost. Apply to T. H. GEORGE.

—Mr. Wm. Bruce is over from Kincardine for a couple of weeks.

—Mrs. John Sparrow, of Willscroft, is visiting her daughter, Mrs. Jas. Izzard, at Wingham.

—Miss Mary McLeod, of Queen Hill, visited with her friend, Mrs. Hepburn, recently prior to leaving for Owen Sound business college.

—Mr. S. Ballachey was in Brantford last week attending the funeral of his sister-in-law, the late Miss Goode.

—Mrs. Hogg arrived home on Thursday from Long Beach, Cal., where she spent the winter very pleasantly, without experiencing a day that was as cold as we are having here this month.

—Two men from the 160th Bruce Battalion have met their deaths since being sent to France in drafts—Pte. Norman Farquharson of Teeswater, and Pte. Ernest Royle of Southampton. The former was killed on the battle grounds, and the latter died of wounds.

—Mr. Jas. B. McBride has sold his farm to Mr. Josh Bell, who takes possession shortly, and will move there from the brick yards. This real estate deal marks a change of an original homestead upon which the same family has lived since it was taken up very nearly 65 years ago. Mr. McBride will have a sale of his stock, &c., on April 16th. He has not yet decided where he will locate again.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpariel line for first insertion, 5c per line for each subsequent insertion.

Advertisements of Strayed, Farms for Sale or to Rent, and similar ads. $1 for first three weeks and 25c for each subsequent insertion.

Advertisements without specific directions will be inserted till forbidden and charged accordingly. Transient display ads. charged by the inch. Rates on application.

Advertisements in the local columns are charged 5c per line for first insertion, and 3c per line for each subsequent insertion. This includes announcements for church or school entertainments, garden parties, &c. No notice less than 25c. Regular advertisers 3c per line, and 2c, less than 25c. Set in black-faced type and one half.

—Marriage licenses issued and money to loan. T. H. George.

—New shoes in good range of prices and styles. Ballachey, Laidlaw & Co.

—For Sale—Lot 28, con. 7, Bruce, 100 acres, all under grass. Apply to D. Forrester.

—Full line of fine engagement and wedding rings at L. Shoemaker's jewellery store.

—Simmers' Seeds in packages for 25c. All the standard varieties. Ballachey, Laidlaw & Co.

—Highest prices paid for hides and sheepskins. W. E. McGregor, Butcher, Shoals Block.

—For Sale—The residence of the late Mrs. Fleming, Queen St. north, Paisley. Apply to D. Forrester.

—Highest price for beef hides, horse hides, calfskins, sheepskins, tallow, &c. P. Oltsher, Paisley Meat Market.

—Thoroughbred, bred to lay S. C. R. Island Reds. Celebration Egg Farm Strain. $2 per 15 eggs. Fertility guaranteed. H. C. Spofford.

—For Sale—Good, comfortable frame house with nice garden lot attached. Hard and soft water. Victoria St. north. Apply to Jos. Heath.

—L. Stevenson's quick healing salve is the best made. We have a choice line of tobaccos and cigars, stationery and school supplies. Agent for daily papers and magazines. Give us a call.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent. interest, payable half-yearly, authorized by law for the investment of trust funds. Apply to D. Forrester, barrister.

—Flour, Feed, Seeds, Grain—We keep a full stock of Five Roses and Stark's high grade flours, bran, shorts, Blatchford's molasses meal, poultry foods and tonics. Always in the market for course grains. W. Stark.

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles.

I. S. CRUICKSHANK, the Tailor

—Don't forget the benefit Friday afternoon and evening.

—Mr. F. C. Ryan was in Toronto for a few days lately.

—Miss Meta Allen was home from Toronto for a few days of the vacation.

—Miss Lottie McGregor has returned from an extended visit at Park Falls, Wis.

—Miss M. L. Rogers, continuation school assistant, spent the holidays at her home near St. Mary's.

—Mrs. John Shaw, her daughter Jean, and granddaughter Lily Mink, were in Toronto for a few days during the past week.

—Miss Edna Motley, of Detroit, has been visiting her aunts, Mrs. T. Yule of Paisley, and Mrs. Wm. Bluhm of Ellengowan.

—Mr. Henry McCallum, of Winnipeg, last week made a short visit to his mother, Mrs. Roberts, of Paisley, while on a business trip as far east as Montreal.

—Corp. Wilfrid Yack, a Walkerton soldier recently returned from the front, spent a few days in Paisley last week, at Dr. Allen's. Corp. Yack was wounded at Passchendale Ridge.

—We were misinformed last week as to the doctors who performed the operation upon Mr. Mac McArthur. The surgeon's knife was wielded by Dr. Houston, assisted by Drs. Gage and Laird.

—Young horse for sale. Enquire at this office.

—For Sale—Good Red Clover Seed, $20 per bush. T. Irwin, Paisley, R. R. No. 3.

—For Sale—A quantity of alsike clover seed. Apply to Geo. Jackson, Bell phone, Paisley.

—For Sale—A quantity of seed peas and timothy seed. H. Rudolph, R.R. No. 3, Paisley.

—No government fish can be got yet, but a regular supply is expected after April 15th. Paul Oltsher.

—All accounts not settled by April 15th will be placed in other hands for collection. F. S. MacLachlan.

—A few ladies' Boots at $3.98. Excellent cloth and well made, but not the latest style. Ballachey, Laidlaw & Co.

—For Sale—Red clover seed and some clean timothy seed. D. J. Porter, Paisley, R. R. No. 4, Bell phone 83-2.

—SEED FOR SALE.—A quantity of mixed timothy and alsike clover seed. Apply to Wm. Pearce, Paisley, R. R. No. 3. Bell phone.

—For Sale—A dark roan Shorthorn bull calf, nine months old. A good individual, and choicely bred. John Scott, Port Elgin, R. R. No. 1, Bruce phone.

—Anyone requiring Marquis Seed Wheat can obtain same at Cargill Flour Mills, as we have just unloaded a car of this variety. We have also received a car of feed corn.

—Lost—Gold-framed rimless eyeglasses, in case, on Exeter Sunday, between English church and pork factory. Finder please leave at Advocate office. Suitable reward.

—Red clover and timothy seed for sale. Tested No. 1 for purity. Clover seed $22, timothy $5 per bushel. Stock kept in Ballachey, Laidlaw & Co's store. Don't fail to see it. Elgie Bros.

White Field Seed Beans

I have some for sale, guaranteed All quality at $10.00 per bushel, delivered. H. Grice, Cargill.

Seeds! Seeds!

Get your seeds early this season, as the supply of some kinds is not equal to the demand. We have a full assortment of garden seeds, also clover, turnip, mangel, etc. See us for seed corn. Walter Stark.

Mystic Tea at Pinkerton

The Red Cross ladies of Pinkerton will hold a Mystic Tea in the Forester's Hall, on Monday evening, April 15th. The Glenelg council will make a presentation to Pte. Woods during the evening. Admission 15c.

Red Cross Benefit

At "The Maples" Mr. and Mrs. S. Ballachey will give a Red Cross benefit, in the form of a social afternoon and evening, this Friday, April 12th. Refreshments served afternoon and evening. Hot vegetable dinner or cold tea served from 6 to 8. All welcome. Come and help those who are fighting for us.

law & Co.

ITALY SPURNS AUSTRIAN LIES

PROPAGANDA AGAINST THE UNITED STATES.

"Wilson's Pockets Bulge With English Gold," Germans' Apes Tell Italians.

The Austrians, who imitate the Germans in everything, have started anti-American propaganda among the troops on the Italian front, says an Italian correspondent. Their propaganda is intended to serve as a "moral preparation" to persuade the Italians that it is useless to continue the war. For some time this propaganda has been essentially anti-British, but evidently its results were not successful, possibly because the Italians could not be deceived in believing that Great Britain was not helping their country when British troops were fighting on the Italian front. Recently Austrian propaganda has become anti-American, and although its failure is certain still no pains are spared to have it admirably organized regardless of expense.

Moral preparation consists in a bombardment of words. Placards, pamphlets, notices, manifestoes and even newspapers are dropped from aeroplanes on the Italian lines, hurled by trench mortars or scattered in visible heaps on No Man's Land at night in the hope that they will be picked up by the Italian soldiers. Notices are set up inviting the Italians to go and get them "without any fear of danger." One of these notices reads as follows: "Come and get our news. Everything we tell you is always very interesting. Your censor suppresses everything of interest from your newspapers, which never tell you the real truth about the war and withhold political and economic information. We tell you everything and never hide the truth."

What They Say of the United States.

The "truth" about America, according to the Austrian version, is more or less as follows: "You rely on America's help," the Italian soldiers are told after having been misinformed that a prominent Italian statesman recently declared in Parliament that Italy's case is hopeless as the army must be strengthened by 500,000 men within two months, while hardly 250,000 men can be raised before two years, "without realizing that such help represents a great peril both to France and to Italy." The Americans aim at economic supremacy in Europe. They wage war in order to make money. Wilson's pockets are already bulging with "English gold."

A General of the Entente, whose name the Austrians have evidently forgotten as they omit it, although they quote his significant warning, is reported to have said that America aims at weakening France and Italy as England has weakened Portugal. Besides, American help will cost too much and will arrive too late. The German offensive in France is imminent and will America help France in time? "And are you prepared to spend another year in the trenches, O, Italian soldiers, instead of imitating the 'wise' example of Russian democracy?"

Later and still more interesting news communicated by the Austrians confirms the truth of former reports that American help will prove useless. A "most official" Reuter message from Washington is in fact made known to the Italian soldiers. "The American Government," runs the message, "proposed to the Entente to choose between troops and wheat, as owing to the scarcity of ships it is absolutely impossible to comply with both demands of sending troops and wheat." The conclusion is, of course, obvious. America will send wheat to Europe instead of soldiers and Wilson's pockets will bulge with still more English gold, as the wheat will have to be paid for.

Message "Made in Austria."

Strangely enough the faked Reuter message from Washington "made in Austria" coincided with a genuine message to the effect that half a million troops would soon be in line on the western front, and there is every reason to believe that the Austrians hastened to give their version of this message to the Italian soldiers for fear that the Italian censor would suppress it and as usual hide the truth.

The Austrian "moral preparation" on the Italian front is useless and absolutely no counter propaganda is needed to neutralize its effects and prevent the Italian soldiers from being deceived. The anti-American propaganda is destined to failure like that against England, even if no attempt is made to convince the Italians that the Austrians are liars. In fact the proof that all the information communicated by the Austrians is utterly false has been afforded by the Austrians themselves.

When the Italians retired on the Piave they saw the red glare of the houses burned by the enemy and they heard the shrieks of the women and children outraged and massacred by the Austrian soldiers. Since then the Austrians have been trying to persuade the Italians that the inhabitants of the invaded regions are being well treated and respected, but no amount of persuasion will make the Italians forget the shrieks of the women they heard or diminish the feeling of revenge that rankles in their breasts. If they hated the Austrians before the war they hate them more bitterly now and they do not believe their lies against England and America just as they did not believe those about the good treatment and respect to the inhabitants of the invaded regions.

CONCERNING PARROTS.

The African Gray Is the Best For Talking Purposes.

The best parrot to buy, though not the easiest to get, is an African gray. As a conversationalist it is fully equal to the famous double-yellow-head (from Mexico), and its speech is much more humanlike. It is rated a more intelligent bird and is a better imitator in a general way.

Gray African parrots come mostly from Liberia, where they are "farmed" after a fashion. At the breeding season the natives make a business of robbing their nests, which are holes highup in the forest trees.

At that time of the year the native blacks—men, women and children—search the woods for parrot nests. They carry home the fledgling birds in baskets and feed them until they are able to take care of themselves. Taken so young, they are perfectly tame.

Skippers of coasting vessels buy them by the hundred, paying for them with shotguns and ammunition, calico, rum or other merchandise. Later on they are sold at ports where steamships in the African trade stop for cargoes and so find their way to Europe or some of them eventually to the United States.

The voyage by steamship is very hard on the parrots, which are stored in the hold, commonly in close proximity to the engine room. Consequently they are apt to reach their final destination in a sickly condition. One should be careful to make sure in buying an African parrot that it is a healthy bird.

There are hundreds of species of parrots and the most beautiful of them all are the cockatoos, native exclusively to Australasia. The giants of the tribe are the American macaws. Neither the macaw nor the cockatoo is ordinarily much of a talker, but occasionally specimens are very clever at conversation.

Parrots in the wild state do not seem to be vocally imitative to any observable extent. It is only when domesticated that they develop the faculty. In their native forests they make a lot of noise, and in the Mexican State of Tamaulipas great flocks of them cause the welkin to resound with their raucous cries.

It is from Tamaulipas that most of the double-yellowheads come. They are taken from the nests by peons, who, incidentally to their capture, suffer frightfully from attacks by armies of poisonous ants that infest every forest tree.

THE RECORDING EYE.

The Development and Printing of Military Aerial Photographs.

Somewhere in England there is a school for photographers where men are trained in the intricate work of developing and printing and interpreting the military aerial photographs on which depend so many of the problems that determine the activities of the troops at the front. The negatives obtained by the army airmen are different from all others. Their delicate traceries are so lacking in contrasts that in the developing bath the plate seems to contain nothing at all. But what there is on it—hair-like lines, microscopic dots, clear, transparent areas and faint patches like breath on a mirror—must be coaxed forth and yet not overdeveloped. Nor is printing the plates easy. Bromide enlargements have to be made very rapidly, for all of them, labelled and numbered, must be ready at the front within an hour after the plates are exposed over the enemy's lines. The general staff must know how the other side of No Man's Land looks all the time, for the comparison of to-day's photographs with yesterday's may reveal vital secrets. In any case the photographs must be perfect. The students must learn how to read views made perhaps when the camera is ten thousand feet above the ground. A road looks white; canals, rivers, lakes are black; upstanding objects—trees, telegraph poles, towers—look flat, but their shadows betray them; they cannot be camouflaged. Trodden ground—a path, for example—appears lighter than its surroundings. Every little detail means something that only the accustomed or experienced eye can determine.

A Good Retort.

General Pershing is fond of telling this story. It happened when he was on the Mexican border. A regiment was marching by when it met a small, towheaded ragged Irish boy clinging to a moth-eaten, dilapidated donkey he had been riding, and which had become restless owing to the noise of the band. It was all the boy could do to hold the beast. A joker in the ranks yelled out to the boy as he swung past. "Say, kid. What are you holding your little brother so tight for?" "Because," came the reply from the Irish kid, "he sees you guys and I'm afraid he might enlist."

Hand made, fancy bread in Canada went off the market on March 15 under the Canada Food Boards new regulations. Standard war flour, about two per cent. coarser than ordinary, may only be used for bread from henceforth.

HORROR OF HUN NIGHT ATTACK

PICTURED BY A TUSCANIA SURVIVOR.

Sergeant Tells of Hour When Last Hundred Aboard Waited Hopelessly for Aid.

A New York girl, Miss Vivian Johannes, is in receipt of a letter from her friend, Sergeant Glen Gustin, of Company C, 107th supply train, Thirty-second division, who was one of the last young men to reach the shores of Ireland after the sinking of the Tuscania.

Although he goes into detail as to the actual events leading to and following the fatal crash of the German torpedo into the hull of the steamship, perhaps no part of his narrative is so striking as that in which he declares that through the ordeal the American soldiers, unanimously, remained cool and composed, even when the black waters of the Atlantic seemed threatening to gulp them up each moment.

His letter follows—

"Dear Vivian—You probably have read full accounts of the torpedoing of the Tuscania in the American newspapers, but I'll try to tell you a little of my own experiences that night which may interest you.

"We have gained some distinction already, being the first American troops to be torpedoed, but I guess we would be willing to pass up the distinction in another case. There was some Fourth of July celebration that night, I'll tell you. There were torpedoes, rockets yelling in every direction from the 'welcoming Germans,' and most every noise imaginable. The only trouble, their torpedo went off in the wrong direction, blew a hole in our ship, and then came the rockets and the rest of the celebration, which lasted for two hours for about five hundred of us.

But to get down to details. The voyage had been quiet enough. Of course, a lot of us got seasick—'your truly' included, and I can't say I enjoyed the first few days at sea. But after I got better I began to like the ocean—its vastness, strength and ever changing color. Yet we all were glad we sighted land on both sides of us about three o'clock in the afternoon of the 5th, and then I guess we became too confident of our safety. We forgot that the Hun might want to donate a little fireworks.

"Boom!" and Out Went Lights.

"We had supper at five o'clock, as usual, and afterward went to our quarters to make our packs and rolls preparatory to landing in the morning. Curly and I were working together on our rolls, and I was just climbing into my bunk after some articles when "boom!" and the lights went out.

"Well, we knew what had happened, all right, and didn't lose any time starting for the deck. I succeeded in getting my overcoat and life preserver in the dark. The fellows all grabbed something, and there was a rush for the stairs. Curly and I got together, but we couldn't see the others in the dark. The fellows went up on deck fine, there was no jamming where we were and we soon gained our boat station, where we found most of the company, and more soon arrived.

"Then our company found that the shock of the explosion had smashed two of our lifeboats, and also the davits for lowering the others. The torpedo had struck us almost directly under our station, and by leaning over the rail we could see the water rushing into the hole. Well, it isn't exactly a pleasant sensation to find yourself on a sinking ship without any lifeboats.

"But our fellows stuck to their formation and never murmured. I tell you, the American soldier showed what he was made of that night. The fellows held their heads and nerve fine. Luckily for us, the ship wasn't struck in a very vulnerable spot and sank slowly.

Many Get Off in Boats.

Many of the men got off in lifeboats. Nine of our company went in the last boat that was lowered. When the boats were all gone there still were between five hundred and six hundred of us on deck. Then came the cry that there was a friendly destroyer on the other side. We went around and got there just in time to see it pulling away. It had a load of men. Then things did look rather dark.

"Suddenly we spied a dark form creeping in. We watched it around the stern of the Tuscania. We went around again to our old side and found another destroyer pulling alongside to take off the rest of us. I tell you that little destroyer looked like a mountain to us then.

"It was so dark you could scarcely tell the man next to you, but Curly and I managed to stay together through it all. We were among the last hundred men off the ship. Curly went down the rope first, landed safely, then swung the rope back to me and I went down. Curly grabbed me by the leg and hauled me aboard the destroyer, then we both helped the other fellows to get on board until an officer chased us down to the engine room.

Praises Destroyer's Crew.

"I want to say here that the officers and crew of that destroyer showed a lot of courage in coming alongside and standing until the last man was off the ship. We were shot at, but the torpedo missed. Then came a five hour ride to an Irish port and with it all was the anxiety for the other fellows. We found some of our fellows down below and on landing found that fifty-five of us had boarded the destroyer.

"We found food and beds waiting for us on landing and Ireland surely was "heaven" that night. We were treated royally by the Irish and British soldiers while there and came to England a few days ago."

SODA WATER IN DESERT.

British and Hindu Regiments in Asia Minor Supplied With This Beverage.

"Jerusalem was captured with soda water," say the Tommies who took the city. Behind this facetious remark is a world of truth, for the morale and heart of the British and Hindu fighting men in that parching struggle across the desert was held up in the main by the plentiful supply of soda water which enabled the men to withstand the terrible heat and which was found to be infinitely more useful than plain water in quenching thirst.

Every regiment in Mesopotamia carries its soda water making machine and a daily ration of two bottles per man is dealt out. It is regarded as indispensable, and in one instance when a Turkish attack threatened to take a cannon and a soda water machine the Hindu gave the former no thought and risked life and limb to haul the latter to safety.

It was found wise to equip the troops with this form of liquid refreshment owing to the poisoning of the wells by the Turks, whose natural savagery has been amplified by German kultur. The machines will never be dropped from tropical military units now, say British officers, so firmly have they been established in the affections of the men.

EASTERN FERRY BOATS.

Arabian Goofas Are Improved and Put to Good Use by Soldiers.

Over on the River Tigris, in Mesopotamia (Eastern Arabia), English soldiers are having unusual experiences in adapting ancient utilities to modern use. One of the first institutions to receive their attention has been the venerable "goofas," or ferryboats, which natives have used unchanged for thousands of years.

The English soldiers have put paddle wheels on the "goofas."

"Goofas" are perfectly round in shape and made of willow limbs and twigs, just like a large basket. The outsides are covered with skins.

Navigating a goofa in its improved form must be akin to floating around on a magnified butter chip. When ordinary paddles are used as a motive power the goofa has a disconcerting habit of going off in any direction but that desired. Since it has no keel, or other directing device, it is difficult to keep it on a given course.

But with paddlewheels the goofa crosses the river with unprecedented directness.

Simple cranks and sturdy arms of the soldiers furnish the motive power.

The fleet of goofas has been duly numbered for identification and is doing yeoman service in the Far East for moving supplies.

INTERIOR OF LABRADOR.

New Lakes and Rivers Discovered by Exploring Party.

Chains of lakes hitherto unmapped and rivers equally unknown were traversed in the interior of Labrador by the exploring parties of representatives of the National Geographic Society and the Carnegie Museum, Pittsburg, which arrived at St. John's, Nfld., recently.

The journey covered about 750 miles over a route never before traveled by white men and was made more difficult by the fact that the five Indians who were taken along as guides proved to be unfamiliar with the country.

The party included F. B. C. Todd, curator of ornithology in the Carnegie Museum; O. J. Murie, orator of mammals in the same institution, and Alfred Marshall, of Chicago.

They left Seven Islands Bay on the north side of the Gulf of St. Lawrence, about the end of May and traveled north by canoe, and portages reaching Fort Chimo, near Ungava Bay, August 22nd. In addition to mapping the country, they studied the natural history.

Mr. Todd said the existing maps of a large district were found to be very inaccurate, and altogether misleading, having been made by guesswork from information supplied by Indians.

In Proof of His Point.

Withering ipdeed was the retort of the old gentleman who, having dealt for some years with the same grocer, detected him in some shady practices. Going to his shop, he gave the delinquent a piece of his mind, and stamped out, exclaiming:

"You're a swindler, and I'll never enter your door again!"

The next day, however, he came back and bought five pounds of sugar.

"Dear me," said the grocer, smiling in a forgiving way, "I thought you were never going to enter my shop again."

"Well, I didn't mean to," said the customer coldly, "but yours is the only shop in the place where I can get what I want. You see, I am going to put some plants and I need sand."

WAR STORY OF A BRITISH PRIVATE

LIFE AT THE FRONT AND ON SHIPBOARD.

Torpedoed by a German Submarine Worse Than Two Years in the Trenches."

When the war broke out Frederick Dixon joined the army service corps as a private in the Eighth King's Liverpool Regiment. His command was one of the early ones hastened to Flanders. He dug trenches and afterward fought in them.

For more than a year he took his turn in the water-filled gullies, occasionally making a dash over the top. At the battle of Mons he was in the thick of it.

"I saw thousands of men falling—shot. They were going down so fast and so close to me that I kept saying to myself, it will be your turn next."

But while the British lost heavily, Dixon came out of the fight without so much as a tear in his clothing.

"I couldn't make it out. I don't know how I escaped," he mused.

"I could see great solid shot, so big four men could scarcely lift them, hurtling by. Some exploded. Others fell to the ground and lay there dead. I went into a shell hole with a party and an officer and we saw a solid mass of steel with a long conical point. It stood about four feet high and was more than a foot in diameter. I tried to lift it, but it was as much as four of us could do to do that.

"The air was filled with these terrible things. Yet I escaped.

"I was in several other engagements, but they did not amount to much. Then last spring, at the battle of Loos, it all came at once. As a result of my two minutes' exposure I spent more than nine months in a hospital and then was discharged as medically unfit.

The Battle of Loos.

"When a big battle is on the sky looks as red as blood. It did at Loos. It was at night. The guns had been roaring for hours. Then came the order to get over the top. The sky was red for miles. Every time a big gun was fired it added more of the intense red light.

"I jumped up and started off over the parapet. I had not gone twenty yards when I was struck in the left shoulder by a shell. It tore out my arm, and as I was falling to the ground I was struck by a bullet over my right eye. I lay unconscious for four days. When I revived I was in a base hospital.

"But while I had lain on the ground a piece of shrapnel had struck me in the mouth and torn out nearly all my teeth and the gums on the right side. My torn gums were lying in my mouth. I had also been shot in the back of the head by another bullet.

"Two years in the trenches without a scratch, and then in two minutes to be torn in four places almost at once!

"For four months I was in a base hospital in France, then I was carried to Woolwich, in London, and was in the hospital there for five months more.

"My left arm was black; there was a lump of muscle on the back of my shoulders. I could scarcely see out of my right eye, and I had such awful pains in my head. I had to wear an ice cap on my head for six months. I thought I was pretty badly cut up, but it was almost nothing. Why the man who lay on the cot next to mine had eleven bullets in him. I had only two in the head. The doctor said to me, 'It makes a little hole going in, but we have to make it bigger to take it out.'

Marvellous Surgical Work.

"I was worried about my arm, 'Will I be able to use it again, doctor?' I asked, and he said he would try to fix me up. And he did it. I never could have done it myself. But every day they took my arm and raised it a little and slowly worked the fingers. It caused me great pain, but I could see that it was getting better. I could raise it myself, after a time, by taking the left arm by my right hand and gently raising it. Finally I had nearly the full power restored. Of course, it is not as good as before. But, you see, I can use it pretty well."

As he spoke the soldier gave a demonstration and made me marvel at the good surgery. Unless he had told me of his plight I could not have guessed it. His eyesight, too, is daily improving. But his teeth are gone and his head still causes him some inconvenience.

"The doctor told me," he says, "that I must not run and I must not worry or it will hurt my head."

"I made one voyage," he went on, "and then signed papers for another on the ship Commodore.

Torpedoed by a U-boat.

"We had not been long out when we sighted a German submarine at work. We saw four ships torpedoed, and the captain said, 'We will be next.' And we were. The ship was making a zigzag course at the time, but we saw a torpedo coming. We could trace it through the water for almost two miles.

"On the torpedo came. The engineer ran to the bow of the boat, expecting the thing would strike us astern.

"It was the most dreadful sight I ever witnessed. To see scores of men blown up by a torpedo is the most awful thing in the world.

"I jumped into the water, which was icy cold. I was able to swim for about half an hour when a raft floated near me. I was almost too stiff with the cold to grasp it. I managed to do so and crawl on board. We floated around and afterward others came up to the raft, and with those already aboard we were able to drag them out of the water. They were too weak to haul themselves up.

"For a whole day and a night we floated in the cold Atlantic, and then we were picked up by a Spanish ship and brought to Philadelphia.

"No," he explained, "I won't ship again until after the war."

The harrowing sights of two years in the trenches and in dashes over the top he regards as nothing to being torpedoed by a submarine.

GREATER FOOD PRODUCTION.

Canada Does Not Yet Realize the Gravity of the Situation.

The average Canadian household today has been little affected by the war so far as food supplies are concerned, and for this reason too many of us do not fully appreciate the seriousness of the situation at home—as well as overseas. Meatless days and such other regulations already passed may remind us of the necessity of being economical, but a fuller understanding is necessary if we are to not only save at home but also economize sufficiently to permit of the export of the necessary foodstuffs with which to help fill the already greatly depleted larders of our Allies.

The principal factor, if the effort at greater production is to be successful, is to have sufficient farm labor for seeding and the harvest. The land is waiting—but we must have farm help to work it.

Greater food production is only possible through augumented labor facilities and with the drain on our manpower through the call for fighting men; the call of the munition plants and other war time industries, the farmer finds himself so short of laboring help that even to bring his crop productions up to ordinary standards will be a hard task. But ordinary standards will not suffice. Not only must we feed Canadians at home, but we must feed our Canadian boys overseas and also help feed the peoples fighting side by side with our men. With this end in view and with a full understanding of all the conditions prevailing, the Canada Food Board is calling upon the older boys of the Dominion.

A Promising New Wheat.

By bringing out Marquis wheat the Dominion Department of Agriculture did a service to Canada and to the Empire that it would be difficult to over-estimate. On account of its vigorous habits of growth, excellent yield and superb milling qualities this variety from Western Canada has carried off premier honors at the International Soil Products Exhibition in the United States, has largely supplanted the old standard Red Fife that also gained for Canadian wheat an enviable reputation in the flour markets of the world.

A service rendered by the introduction of Prelude a few years later was also of great importance, inasmuch as it extended the wheat-growing area of this country by millions of acres. To these two very valuable accessions to the hard wheats of Canada is to be added a new sort that comes midway between Marquis and Prelude in the matter of yield and ripening. This new sort has been produced at the Central Experimental Farm, Ottawa, by Dr. Chas. E. Saunders, the Dominion Cerealist, who gives the following account of the new wheat in the March number of The Agricultural Gazette, the official organ of the Federal Department of Agriculture:

"The new wheat, which has been named Ruby, Ottawa 623, possesses characteristics in ripening and other qualities midway between Marquis and Prelude. It is beardless, possesses hard, red kernels, gives a fair yield, and makes flour of the highest quality in regard to color and strength. Bread made from it ranks in the first class. This wheat is the result of a cross between Down Riga and Red Fife. Downy Riga was produced from two early sorts, Gehun, an Indian variety, and Onega from Northern Russia. Ruby is recommended for trial where Marquis does not ripen satisfactorily. A very limited distribution of five-pound samples is being made to farmers requiring an early sort. A sufficient crop will be grown this year on the Experimental Farms to provide for a generous distribution next Spring."

Inquirer (at railway station)—Where does this train go? Brakeman—This train goes to New York in ten minutes.

Dark Pudding.—One-half cup sugar, ½ cup molasses, 1 cup sweet milk, ½ cup shortening, 1 level teaspoon soda, 2 cups flour. Add raisins if one likes. Steam three hours.

In a test carried out by Prof. Zavitz of the O.A.C. without fertilizers the average yield of potatoes amounted to 122.4 bushels per acre. With 320 pounds of fertilizer per acre the yield was raised to 141.3 bushels. With 320 pounds of fertilizer plus 10 tons of manure the yield was increased to 154.5 bushels per acre.

AutoStrop SAFETY RAZOR

True Shaving Comfort

The man who uses the AutoStrop enjoys a clean, comfortable shave—his face does not unpleasantly remind him of his morning shave by smarting for hours afterwards.

The removal of a spoil-and—a freshly stropped blade is the easiest to shave with.

The AutoStrop is the only razor that sharpens its own blades automatically—thus always keeping them free from rust and in perfect condition. Guaranteed to Satisfy.

LION HUNTING.

The Modern Rifle Has Effectually Subdued the King of Beasts.

It is small wonder that the lion and the tiger, largest and most powerful of the cats and except for the leopard the most savage of all the larger carnivora, have made a vast impression, sometimes erroneously, on not only the native men of the regions that they inhabit, but also on visiting sportsmen, observers and writers of large intelligence.

The lion, for instance, though better known than the tiger, has been pictured as devoid of fear, as stronger than an ox, as swifter than a horse, as the king of beasts, when in reality it possesses not one of these characteristics. Yet its great size and trength and its killing, often man-eating, propensities have made it truly a creature to be feared and seriously reckoned with by those who live within its habitat.

In the old days of clubs, spears, battle-axes, crossbows, etc., one wonders how the lion that once inhabited the south of Europe, all of Africa and south-western Asia was successfully combated by man and eventually driven out or exterminated. Undoubtedly this was accomplished by taking advantage of the fact that lions rarely go in large numbers and that small armies, fitted out with various devices and contraptions for taking the big cats at a disadvantage, were sent to kill and to capture them, just as the native spearmen now do in Central Africa. And undoubtedly also the hunted creature took human toll in these encounters, for such is mentioned in history. The modern sportsman, with his high-powered repeating rifle, runs little risk unless, as some have done, he grows careless, especially at night.

When the gun was still a primitive thing, uncertain of discharge and unsure of aim, being little more deadly than the brown spear or the powerful crossbow, the lion had generally the better of an encounter with a single huntsman; therefore, it was then also the custom to go in numbers after or against him. Arabs, with their long-barreled, muzzle-loading flintlocks, could trust hardly less than a dozen men to defeat a single lion that threatened their flocks and herds and caravans. In such cages they approached the beast with caution, forming a line easily within range, though seeking not to force it to charge and then, upon a signal, all commenced firing, hoping that some bullets would find a vital spot. Frequently the big cat, wounded only, would charge and scatter the line, often knocking a man or two over, when others, reloading as rapidly as possible, would advance and at close range give the animal a bullet that pierced heart or brain.

In some cases, also, the lion, no doubt filled then with a certain contempt for its human enemies, would charge before the firing began, when a number of wildly aimed shots would greet it, the unusual noise thereof often frightening the beast so that, without doing harm, it would veer off and afford away to effect its retreat. Or a bolder lion might continue its aggressiveness until it mauled several men, perhaps killing one or more, all depending, of course, upon the bravery, pluck and successful shooting of the hunters.

But the modern, high-powered rifle has changed all this, and now the so-called king of beasts has learned, as most other creatures have, that mankind is something to be greatly feared. At more than a hundred yards, with sure aim and terrible force, a soft lead bullet finds and tears a hole through a vital part and the great-maned, noble-looking animal, before so vital with energy and action, is quickly converted into carrion.

GIRLS! WHITEN SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

FROM DARMSTADT TO PARIS.

Escape of French Boy From German Prison Camp.

A night escape from the German prison camp at Darmstadt, being shot at repeatedly as he ran; a dangerous trip through a hostile country until he reached the banks of the Rhine, an icy swim for an hour against a strong tide, finally reaching the Swiss shore near Schaffhausen, were some of the experiences that Maurice Muller had to undergo before he arrived in Paris and applied to the American Red Cross for assistance.

Emile Desroches, a friend who was with him when he slipped out of the prison camp and dived into the Rhine, began singing the "Marseillaise" in defiance, as with powerful strokes he made for Switzerland and liberty. A German patrol fired in the direction whence the sound of the singing was coming. Whether struck by the German bullets or carried away by the treacherous tide, Desroches has not been seen since.

In November, 1914, Maurice, who was then fifteen years old, and his brother Georges, twelve, were bundled into a train that was leaving Ostend for Germany and taken to Darmstadt, just up the river across from Schaffhausen, where they were put to work at hard labor. Insufficient nourishment soon made the younger boy physically unfit and last October he was in such an emaciated condition that it aroused the pity of even the Germans and he was sent on to France.

Last evening as Muller sat in front of a substantial meal supplied by the Red Cross, he said to his younger brother, who has been in Paris for some time:

"This beats the dog meat, potatoes and rutabagas they used to serve us at Darmstadt."

A Red Cross representative is helping to find work for them.

Lord Rhondda, British Food Controller, says the food situation for the Allies will be most difficult during the next two months.

If Youre Fond Tea or Coffee but know it harms you, as it does many others, you will find

A cheering hot drink for people of every age.

Quinn's Shur-Gain Fertilizer

Walnut Scarce for Guns.

Black walnut, which has always been the favorite wood for gun stocks on account of its failure to splinter badly when struck by a bullet or bit of shell, is extremely scarce at present. Birch and maple are being tried out by producers of hardwood lumber for this purpose.

YES! LIFT A CORN OFF WITHOUT PAIN

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug-store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.

The Foresighted Cook.

There is a certain Brooklyn man who takes a great interest in his household. The other day, just before he left his office, he telephoned to his wife to ask whether she wanted him to bring anything home.

"Yes," said the wife. "I wish you would stop and get some tea. And you might as well, while you're about it, get a set of china, too."

"China?" gasped the husband.

"Yes. Of course, we've got some, but the cook says there's not enough to last the week out."

Minard's Liniment for sale everywhere.

Turn a barrel over a plant or two of rhubarb and force the stems for early use.

The colts that are already spending some time nearly every day in the harness are the ones which will be able to do the most work this spring.

Soldiers crippled in the war are being trained in England to tend electric machines and as assistants in power stations.

Little Fruit Buds.

Close up little fruit buds
Don't come out just yet,
Or before the springtime
You'll a dipping get.
Wait a little longer
Till the winter's gone
Then you can, with safety,
Put your spring garbs on:

But just now there may be
Snow to come along,
Then you would be feeling
All the world was wrong.
Sleep a little later
In your cosy bed,
So the chilling breezes
Will not strike your head.

'Tis not best to hurry
Quit too soon for spring,
Or, perhaps some sorrow
It, to you, will bring.
Take another nap, then,
Till bright April smiles,
And with tears and sunshine,
She, your heart beguiles.

Lime is not a plant food or fertilizer, but it performs a function that is very important for all crops. Indeed a service that is essential for clovers by sweetening sour soils.

Minard's Liniment Cures Dandruff.

Fowls of the heavier breeds cease to produce a profitable number of eggs at the end of their second laying year. This holds true with the lighter breeds at the end of their third laying year.

Railroad Men

These men know from experience that Sloan's Liniment will take the stiffness out of joints and the soreness out of muscles—And it's so convenient! No rubbing required. It quickly penetrates and brings relief. Easy to apply and cleaner than musty plasters or ointments.

Always have a bottle in the house for rheumatic aches, lame back, sprains and strains.

THE ORIGIN AND DANGER OF

CATARRH

—IF YOU SUFFER FROM—

Catarrh, Catarrhal Deafness, Head Noises, Catarrh of the Stomach, (which is often mistaken for Indigestion), Catarrh of the Bowels, Asthma, Bronchitis, Loss of Smell, Phlegm dropping in the back part of the Throat, or if you have a Cough

YOU SHOULD NOT FAIL TO READ EVERY WORD OF THIS ARTICLE

What Parmint, the Wonderful English Formula, Has Done for Others, It Will Do For You

CATARRH, A LOATHSOME AND INSIDIOUS DISEASE

Catarrh is a very common name for a very common disease, so common that most people do not realize how fearful, dangerous and loathsome it really is. Catarrh is the disease which causes sneezing, spitting, blowing of the nose, phlegm drumming in the throat—and, in chilliness of mind, dullness of thought—this is the way it starts.

And where does it end? Frequently in Catarrh of the Stomach, Catarrh of the Bowels, Bronchitis, and often silent or fatal deafness results.

HOW CATARRH STARTS

Catarrh usually begins with a cold in the head.

The Catarrh germs breathed in through the mouth or nostrils have settled upon the inflamed and delicate mucous membrane that lines the nose and throat. These germs are thrown off by healthy tissues, but when they lodge upon an irritated surface it means a more serious and diseased condition of the membranes. They thus produce more irritation, more inflammation, and in time even ulceration. The sufferer from catarrh often finds his throat and bronchial tubes, also, to be from an almost constant dull ache over the eyes and across the forehead. This becomes dull when the membranes of these cavities are in a discharging condition.

It is the pus and decaying matter coming from these areas that causes the offensive breath so common to victims of catarrh. They may not realize it, however. You probably do not. But your friends do (though they are too careful of your feelings to tell you so).

NASAL CATARRH

This form of Catarrh is, to say the least, sickening and disgusting, besides being most common and highly dangerous. The changes of weather irritate the delicate mucous membranes in the nose and throat, very susceptible to inflammation, and thus encourage the birth and growth of catarrhal germs.

The nose and throat are what might be called the highway of life.

The throat itself is divided into two main passages: one the Oesophagus, or gullet, going to the stomach, the other the respiratory tract, or Trachea, going to the bronchial tubes and lungs. Through the lungs the blood passes with every heart beat, and there comes in contact with the air. If the air breathed in is pure, and if nose, throat and lungs are sound, the dark blood is at once purified and passes out of the lungs in a bright, red stream, carrying life and strength to all the body. If, however, the air breathed in is bad, or if the nose, throat or lungs are diseased in any way, then the blood, instead of being purified by its passage through the lungs is, on the contrary, still further poisoned and goes on its way carrying the disease to all parts of the system.

That nasal catarrh is a nauseating disease many sufferers who have had to sit close to, or talk face to face with a person reeking with purulent catarrh, know. You ever had to endure in sickening silence the hawking and gagging of a catarrh victim, or had to sit close to such a person and experience a disgusting, repulsive, foetid odor, which you could not explain, and did not know what it was? That is catarrh, and there are many people who have it and don't know it.

CATARRH OF THE STOMACH

(Often mistaken for Dyspepsia or Indigestion)

Many cases of indigestion and dyspepsia are simply the result of catarrh of the stomach. Many victims of nasal catarrh are in a bad humour; you wonder what ails them. You have catarrh of the stomach, and your whole system is poisoned and in reeking with the disease germ and bacterial filth. The food and the delicate membrane is coated with a vile stinking mucus. The mucus refuses to be digested and pitiful gasses come out of the stomach with bad breath. Little by little, the mucus with the catarrh germs which it has carried collect on the mucous membrane which lines the stomach.

Real dyspepsia and indigestion are caused by a lack of digestive juice. But here we have a condition where the membrane is able and ready to do its work, but it is prevented by foreign matter—which has dropped down from the head and coated it over—from doing so. Treatment for indigestion be of short duration. Since catarrh is the cause of the trouble, it is the catarrh that must be treated. If you have catarrh of the stomach we believe that if taken faithfully for a reasonable length of time Parmint will bring you an amount of relief that will fully compensate you for the cost and time expended.

CAUSE OF DEAFNESS

A cause which is responsible for a great many cases of deafness is catarrh. The whole trouble generally begins in a simple cold in the head. During such a cold almost every person experiences that feeling of stuffiness which tells of inflammation extending into the nasal space where the openings of the Eustachian Tubes are located, and which is accompanied by catarrhal secretions collected in the post-nasal space, where it is difficult to blow it out of the nose or hawk it up. When such conditions have become chronic, as in catarrh, the danger is grave.

The mucus, carrying the germs down into the throat. The germ-like nauseating mass sticks for a time to the sides of the throat. The germs are quick to take advantage of the opportunity. They invade the Eustachian Tubes. Their presence and irritation of cause a profuse mucus and more mucus. Gradually this fills up the ear tube so that sounds are only heard through with difficulty. The patient finds his hearing slowly going. When the tubes are completely filled total deafness may result.

In deafness from nasal catarrh, which affects the middle ear, it often happens that crackling sounds are present which distress and confuse the patient. These are due to the fact that the mucus which fills the upper nose and back of the throat is covering the opening of the Eustachian Tubes and the bursting of bubbles or the movement of mucus causes the sounds, which come from the altered resonance of the ear. A loud crackling report the head may seem clearer and the hearing better for a time. Later on in the day there may be crackling sounds when swallowing, which come from the efforts of the inflamed muscle to open the tubes which yield with a jerk.

The above explanation of a most common cause of deafness should make it clear to our readers why the use of Parmint is to attempt to overcome such deafness by carrying on a course of treatment.

Let it be understood, however, that Parmint is not for ear troubles other than those caused by catarrh. If your trouble is caused by scarlet fever or any disease apart from catarrh, or if caused by an injury, Parmint is not for you, and you should consult your own family physician regarding your case.

DON'T NEGLECT A COUGH

If you have a cold and it has left you with a cough, no matter how slight—you ought not to neglect it.

A cough is generally an indication that there is inflammation in a dangerous place, and prompt treatment should be secured at once. Delaying treatment may mean a deep-seated cough, may develop and stay. Even the slightest cough indicates a danger and should receive prompt attention. Unless your cough has become extremely deep seated or has hung on to you for a long time, we believe that you will find a quick relief from your troubles by the use of Parmint.

WHAT IS PARMINT?

Parmint is an English formula put on the market in England about 15 years ago. It is a combination of ingredients having values in the treatment of catarrhal conditions. Concentrated medicinal compounded from the best grade of material it is possible to obtain. Parmint is put up in sanitone bottles in concentrated form which are inhaled "Parmint—Double Strength." These sanitone bottles can be obtained of a small cost and the one bottle is sufficient to make a full two months' supply. Ready to take when mixed as directed in each package.

The Paisley Advocate

PAISLEY, APRIL 10th, 1918

—Co-operative farmers' clubs are taking hold in rural communities of Bruce. The "club" idea seems to have been largely developed in the west. Apropos of the subject we reproduce the following short magazine item: "If you asked the folks who live around Oak Mound, Minn., if they find farming hard and farm life dull, they would laugh at you. That community has learned the secret of co-operative social life, with the schoolhouse—a big, modern, well-equipped brick building—as a community centre. The Oak Mound Farmers' Club is responsible for the building of the schoolhouse, and also for the continuous series of educational programmes presented there. They conduct an open forum for discussion of the problems vital to the vicinity; they invite competent speakers to come before them and discuss topics of world-wide interest; their young people give plays, and they have a singing society with more than forty members, which at intervals gives cantatas and concerts. Other co-operative ventures which have to do more with the business interests of the community are a farmers' telephone line and a farmers' elevator at Kraquea, the nearest railroad station. The success of the OakMound community is mainly due to the fact that all work together, everyone helps, from the pastor of the church, who, by the way, organized the singing society, to the school children of the first grades. The result is a farming community which has most of the pleasures and none of the drawbacks of the city—and this, we believe, makes a state of existence which is very close to the ideal."

—The keeping up of "show" in connection with the post of lieutenant-governor of a province in this democratic dominion is beginning to get on the nerves of Canadians. At the Toronto big house over nine hundred tons of coal was required to keep the place warm, and we understand the lieutenant-governor and his family make a groupe of only three people. "Why such an extravagant use of fuel for that number of persons?" is the question that comes out of the mouths of members of the Legislature when the matter came up there. And now some of the citizens of Toronto are working up an agitation in favor of converting government house into a soldier's hospital, which would certainly be a sensible thing to do at present. A few rooms might be reserved for the lieutenant-governor, too, perhaps. At Winnipeg there is a growing sentiment against the tinsel glare of the ceremony in connection with the opening of the Legislature. The occasion would be quite as dignified and efficacious were the lieutenant-governor to appear in a neat Sunday-go-to-meeting suit, such as he wears usually, instead of a highly colored outfit with cocked hat and knee breeches. The retention of the "show" is only another instance of the public being somewhat unwilling to upset old customs and dispensations—the drinking customs, for instance, and party politics, party patronage, denominational churches, &c., &c. But these are days of bigger things than ever before, and many changes are being brought about. Even international boundaries will be wiped out after this war. Instead of each little nation being left to carry at its own little plans, many nations will be bound together for the mutual interests of all, and boundary lines will be forgotten.

CAPT. (REV.) JOHN MacNEILL RETURNED FROM OVERSEAS

Preached Sunday Sermon After Boxing Bout

Montreal, April 7—That Christianity was performing its mission through the Y.M.C.A. and many other organizations in the fighting line, but that a new Christianity would be needed by the end of the war, and was already in the making, was the message brought back this evening by Capt. (Rev.) John MacNeill of the Y.M.C.A., and delivered in St. Andrew's Presbyterian church, Westmount.

Sermon Between Boxing Bouts

That there is a new adaptation of Christianity developing at the front was shown by one story Capt. MacNeill told, with a previous humorous remark that it must not be repeated to his good friends of Walmer Road Baptist Church at Toronto. This was one occasion when he gave a sermon on a Sunday evening to several thousand men who were gathered in a tent close behind the front for a boxing competition.

It was thought by the Officer Commanding too good an opportunity to be lost, so Capt. MacNeill was invited to give an address, which he did.

"And," he remarked, "I think it was probably one of the few occasions on which a Baptist minister has made a sermon to a large congregation with a bouing bout before the sermon and another immediately after it, while a very lively bout preceded the benediction."

Yet while this did not seem to coincide with ordinary Sabbath ideas or the customs of religious services, Capt. MacNeill said that his sermon proved decidedly effective, and many of the earnest soldiers who had enjoyed both the boxing and the sermons, had come to him later on and talked to him on religious matters, with evident appreciation of the practical manner in which the Y.M.C.A. was bringing religious thought to the men.

Capt. MacNeill, in Erskine church, told how the Y.M.C.A. had during the past year distributed more than $1,000,000 worth of chocolate, biscuits, hot tea and other dainties to men in the very front trenches. In all his experiences he had not come across an avowed atheist, or even an agnostic, among the Canadian soldiers. The men had learned how little of real life depended upon luxuries and self- indulgence.

LOCAL AND DISTRICT NEWS

Bruce Tp. Boy Dangerously Wounded

Mr. Chas. McDonald, 10th Bruce, received an official message on Tuesday advising him that his son, Pte. Jas. McDonald, had been dangerously wounded, and was at the Fih Casualty Station in France. The message was dated April 3rd.

New Garage Firm

Mr. Geo. E. Miller, from Toronto, arrived here last week and went into partnership with Mr. Wm. McKinnon in the Paisley Garage. Both are experienced automobile men, having been in city garages, and are prepared to give a first-class service in all lines of their work. See their ad. in this issue. Mr. and Mrs. Miller are living in the apartments over the pool room for the present.

Home from China

Mrs. (Dr.) Struthers (nee Miss Margaret Walks), of Honan, China, arrived a few days ago on furlough, which she will spend at the home of her parents, Mr. and Mrs. D. Walks, 2nd of Elderslie. Dr. Struthers is still in France, where he was sent about a year ago, as medical officer in charge of a corps of Chinese war helpers. Mrs. Struthers will give an address at the meeting of Knox church W.M.S. on Thursday afternoon.

Stricken with Paralysis

Miss Jean Miller, who has not been in good health for some time, took a paralytic stroke while in Toronto on Saturday. The stroke is quite severe, rendering her speechless. Her sister, Miss E. Miller, had also been in Toronto, but came home on Friday. She returned to the city on Monday, motoring to Walkerton to catch the C.P.R. morning train from there. The many friends of Miss Miller hope that she may recover.

Woman Exhausted Grant

We are informed by the county treasurer that the applications for the county grant to Red Cross and other women's societies making up materials for soldiers' comforts, have been so numerous that the amount set aside ($12,000) for this purpose is exhausted. As there are no more funds at present for this purpose, societies must withhold making further application until the county council makes another grant.—Herald and Times.

Partnership Dissolved

Bell Bros., who came to Paisley 26 years ago and have since successfully operated the Paisley brick and tile yards, dissolved partnership a few days ago. The business will now be carried on by Mr. Robt. Bell and his son, Mr. Reg Bell, who has been employed as bookkeeper in a munition factory at Ottawa during the past two years, and prior to that had been with the Royal Bank at Paisley and other branches. Mr. Josh Bell, as mentioned elsewhere, is going to farm on the McBride property, which he has bought.

A Fair Run of Maple Sap

With the snow all gone, the harvest of maple products is about over for the season. Everybody who had the trees, the time and an outfit of any kind were on the syrup line this year. Hardly a tree standing in town but had a glistening pail hanging from a spile and was cheerfully dripping its sweetness at the bidding of man. Many a potful was patiently watched and carefully converted into syrup or sugar that is intended to be despatched by parcel post to boys overseas, which will be mightily welcomed when it reaches them, and many a dollar's worth will be bought for the same purpose. Mr. Wm. Hagedorn, of Elderslie, seems to have the most extensive plant in operation. He has from 700 to 750 trees tapped.

Valuation of Elderslie Nearly Two Million

Assessor Walks has completed his assessment of the township of Elderslie for 1918 and handed his roll in to the clerk on Monday. The total assessment of the township is $1,952,678, which is about $22,000 more than last year. This will give the council several hundred dollars more to spend than in 1917 and still have the same rate of taxation. The population is 1700, which is slightly lower than last year. There are churches, cemeteries and schools which are non-taxable, which brings the ratable property down to $1,925,278. The value of the property changing hands this year is $145,000. Between 21 and 60 there are 419 males, between 5 and 21 there are 507, between 5 and 16, 372, and between 8 and 14, 229. The number of dogs is 242, which at the new tax of $2 each will bring in $484, not counting the tax for an additional dog owned by any farmer, which may be fixed as high as the council sees fit. Assessor Walks says he never found the health of the township better.—Enterprise.

Creamery Opens Soon

Last season the Paisley Creamery had such a wide circle of patrons that sometimes it was with great difficulty the whole amount of cream offered could be gathered fresh. This year Manager Logie is preparing to meet this difficulty by providing extra facilities for handling the routes. A new auto truck is being fitted up which will carry a big load, and make much better time on the road than teams with wagons. The small truck used last year will also be on service. With this improvement in the cream drawing outfit, it will be possible to take on even more than the 700 patrons who sent their surplus to this creamery in 1917. As the storage room had also become inadequate for the increased make, Mr. Logie has rented the pork factory building and put a stock of ice in, so that the large and excellent cold storage plant there will be used to maintain the output and hold it for shipment in carload lots, which will be a decided advantage to the selling end of the business. The proprietors of the Paisley Creamery are certainly doing everything they can to facilitate production of one important line of food article, and tightening the work of the farmers for war time.

Fisher's Mills Sold

An important deal that has been on the tapis for some time was closed up a few days ago, by which A. Fisher & Son's flour and saw mills change hands. The purchaser is Mr. Armbrust, of Cobalt, who will be here shortly with his family to take up residence. In the meantime Mr. R. Skinner is in charge of the business. These mills have been in the possession of the Fisher family since 1869, and the removal of the name from connection therewith makes a notable change in the business annals of the village.

Commissioner on the Job

Mr. D. J. Izzard, County Commissioner of Good Roads, was in town on Saturday, in the course of a preliminary survey of the roads of the county system which he is making by driving over with a horse and buggy. By this means Mr. Izzard hopes to become acquainted with every hill and hollow, turn and stretch, and be in a position to plan for improvements. He informed Reeve Steele that this year the greater part of the work to be done will consist of putting in new culverts and widening others, making all 25 feet wide, with wings and retaining walls to keep the road from washing out at such points. The cutting out of all sharp turns is contemplated, so that drivers of all kinds of vehicles can have a clear view of the road for a distance ahead that will make travel much safer at many places than it is at present.

VILLAGE COUNCIL

Council met at 8 p.m., April 4th, all the members present. Minutes of last regular and subsequent meetings read and confirmed.

Communications read: From various organizations, emphasizing the necessity of increased food production during the year, covering the cultivation of vacant lots, &c.; from Fuel Controller, Ottawa, with regulations regarding the importation, sale and delivery of coal; from Morton, Collard & Co., re nitrogen gas filled lamps; from Paisley Electric Light Co., with estimate of cost for rewiring the town hall; from the Dominion Radiator Co., Ltd., Toronto, re heating plant, offering plans, &c., free; from H. B. Putnam, requesting payment for sidewalk built by him in 1916 opposite his dwelling.

Logie—Forrester—That an extra street lamp be placed at the station entrance.—Carried.

Forrester—Logie—That the names of Alex. Fraser, Thos. Sparrow and Jas. Leitch be submitted as county constables for Paisley.—Carried.

Logie—Skinner—That the tender of the Paisley Electric Light Co. re lighting the town hall be laid over until the company makes improvements to power plant and street wiring.—Carried.

Logie—Pearce—That the citizens of Paisley be granted the privilege of cultivating unused streets for the purpose of growing vegetables, sufficient ground to be left for right of way.—Carried.

Forrester—Skinner—That the corporation's share of the cost of construction of the sidewalk in front of H. B. Putnam's property be paid. Carried.

Forrester—Pearce—That the clerk be instructed to write the Dominion Radiator Co., inviting its representative to call on the council and give estimate of installing a heating system as per their offer dated 18th ult. —Carried.

Pearce—Forrester—That the auditors' report be adopted and that the clerk be instructed to have an abstract of the same printed.—Carried.

Skinner—Logie—That the offer of W. Purdy for use of showground for horse pasture at $20 for the season be accepted.—Carried.

By-law No. 675, providing for sale of rents for town hall, and By-law No. 676, providing for the licensing and regulating the sale of cigarettes, were read a first time, and on motion read a second and third time, passed and executed.

Payments as follows were authorized: M. Lietch $48, Weighmaster $13.97, Paisley Elect. Light Co. $49, D. McKenzie $4.50, T. F. Pearce $2, W. Sparrow $2.75, D. Thomson $4, D. Eaton 75c, Clarence Flood 75c, Can. Consol. Rubber Co. $33.20, D. A. Lyon $111.66, H. B. Putnam $8, M. Leitch $4.50, H. B. Putnam $39.60.

A CRIPPLE FOR THREE YEARS

Helpless In Bed With Rheumatism Until He Took "FRUIT-A-TIVES".

MR. ALEXANDER MUNRO

R.R. No. 1, Lorne, Ont.

"For over three years, I was confined to bed with *Rheumatism*. During that time, I had treatment from a number of doctors, and tried nearly everything I saw advertised to cure Rheumatism, without receiving any benefit.

Finally, I decided to try 'Fruit-a-tives'. Before I had used half a box, I noticed an improvement; the pain was not so severe, and the swelling started to go down.

I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place".

ALEXANDER MUNRO.

50c. a box, 6 for $2.50, trial size 25c, at all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Children Cry
FOR FLETCHER'S
CASTORIA

TOUGHENED BY TROUBLE

Adversity is not necessarily a disadvantage, for it may be made to contribute to the upbuilding of a stalwart and splendid character. In the construction of the large wooden ships now building in Atlantic shipyards many woods are utilized. Some of these woods are soft fibred stuffs, grown inland in sheltered nooks, and therefore unsuitable to withstand the extra stresses of the ship's massive frame though they may do for a cabin sky-light. The wood preferred by the ship-builders is a black spruce that grows on rocky islets off the coast, and which, wrestling long years with the chill and vicious blasts, standing up against the north-east winds, is toughened in fibre and able to stand a tremendous strain.

It is just so with human characters. Abundant and unbroken prosperity tends to soften the moral texture, while trouble toughens the will of the man who patiently bears it into a spirit of indomitable resolution which makes him a power in the world, and a pillar of strength to all his associates.

The greatest question of life after all is the question of character—what it is good for, what purposes it may be used. There is altogether too much fashionable in the moral make-up of "average church members"—we might wish that that expression had never been invented—and too little of standing up for principle in an evil world.

A great many people buy shoes here

Who are of the come again and again kind.

Now, that wouldn't be so if our shoes didn't make it so, would it?

All this talk of ours is only intended to get you to be a tryer of our shoes. That's all.

After that it's up to the shoes to hold you as a steady customer.

They generally do it, but if they shouldn't do it in your case, we want you to tell us about it, because there is a mistake somewhere.

It matters not what your present or future needs in shoes may be, we guarantee you a good service.

Bring us your Butter and Eggs. Cash or Trade.

F. CARTER & SON

ON GUARD

At this time of the year people feel weak, tired, listless, their blood is thin, they have lived indoors and perhaps expended all their mental and bodily energy and they want to know how to renew their energy and stamina, overcome headaches and backaches, have clear eyes, a smooth, ruddy skin, and feel the exhilaration of real good health dingling thru their body. Good, pure, rich, red blood is the best insurance against ills of all kinds. Almost all diseases come from impure and impoverished blood. It is to be noticed in the pale or pimply face, the tired, haggard appearance or the listless manner.

Drink hot water a half hour before meals, and for a vegetable tonic there is nothing better than Dr. Pierce's Golden Medical Discovery, the old-fashioned herbal remedy, which has had such a fine reputation for fifty years. It contains no alcohol or narcotics. It is made from Golden Seal root, Blood-root, Oregon grape root, Queen's root, Black Cherry bark, extracted with glycerine and made into tablets and liquid. Tablets fifty cents, at most drug stores.

In order to insure pure blood and to build up the system try this tonic known as Dr. Pierce's Golden Medical Discovery. Get it now!

NOTES FROM THE EDUCATIONAL ASSOCIATION

Education is the zone of the world, and every civilized nation endeavors to provide the best facilities possible for the teaching of the young generations. Ontario has at times been in the first place in the educational plane, but just at the present time there are other countries which have a system much better adapted to the needs of the hour, except possibly in the line of training up teachers. In fact, this is the shortcoming of our system. It affords excellent courses leading to the teaching and other professions, but does not provide the avenues leading to other callings. Our educationalists are endeavoring to work out systems that will be of a great advantage to the agricultural and artisan classes, but as yet these are in the experimental stage.

We note by the reports published that trustees will be called upon to each send a delegate to the annual association meeting. What might prove a better plan to inform the public as to the progress of educational ideas would be to have condensed but comprehensive reports of the proceedings published in every newspaper in the province. The cost would not be as great, and the advantage would be that everybody could get the information almost first hand, and would certainly be of greater value than one individual from each school section hearing parts of the proceedings and never imparting his newly acquired knowledge to more than a handful of his fellows. We take the following excerpts from the published reports of the Ontario Educational Association, held in Toronto last week:

Why Pupils Leave School

Two reasons for the pupil leaving school at an early age were given before the trustees' section, the first being the unattractiveness of school surroundings, and the second the anxiety of the parents for the child to become a wage-earner at an early date. It was thought that a remedy for many would be to have each class-room a combination of studio, playroom and workshop. The trustees themselves also came under comment when it was pointed out that though there were approximately 16,000 in the province, the attendance at conventions did not exceed 100. It was suggested that steps be taken to induce a better representative from every board to attend.

New Science of Agriculture

Dr. Foght declared that a new science of agriculture was coming to all of North America. Out of the evolution that is taking place the teacher must understand the evolution itself in order to give the right kind of remedy for wrong directions. In North America we are no longer pioneer farmers, said the speaker. The people were striving to become scientific farmers, but they were trying to get along with pioneer schools. The schools must be adapted to the needs of country life.

The position of agriculture in the schools was outlined by J. B. Dandeno, in the rural teachers' conference, when he told of the 990 public and separate schools and 22 high schools which were teaching agriculture. Last year 560 schools had gardens and 430 had home gardens. This year there would in all probability be 1500 schools doing the work. Last year there were 302 school fairs in the province embracing 2825 rural schools, taking in 68,862 pupils, who conducted 69,329 plots.

Schools of Denmark

Mr. Foght, in his address, stated that Denmark had at the present time the finest rural school system that was known anywhere. It had been brought about through perseverance and a strong national spirit. After many years of war and conquest, Denmark was in such condition that she was unable to find a standing, as a political sense, on the continent. But her philosophers, poets and religious leaders stepped into the breach and established the rural school system, which lifted the people from a lethargy of despair. Not only did they re-make dead land, but they produced crops which injured the soil least. Denmark had solved the problem of the middleman, for he came from among the farmers themselves. Its history and beautiful literature were well taught and taught with an application to the land. Boys and girls learned to know their friends, the birds and the trees, and became proficient in natural subjects.

Study of German

Addressing the Modern Language section, Mr. W. C. Ferguson said he was convinced that as a result of the war more attention would be given to the study of modern languages and less to the so-called dead ones. Moreover, the study of the living languages would trend more and more toward the study of literature of the present day and the acquirement of a mastery of the spoken language as a means of social and business intercourse. It would be more necessary than ever to train people in the spoken and literary language of the ruthless enemies in order to understand, combat and defeat the spread of Germanic ideas. It was by means of their mastery of English, French, Spanish and other languages that the Germans were able to carry out their nefarious schemes in the many countries in which they operated.

"We will have to compete with them, and a knowledge of their language and their literature will help us to do it," said Prof. J. MacGillivray, who also felt that German would be more necessary than ever after the war.

Spelling Reform

"On educational reforms generally, including that of spelling, the war has had two opposite effects," said Mr. John Dearness, speaking on spelling reform before the Public School section in the morning. "It has withdrawn the attention of the general public and intensified that of the specialists. There is, however, a prevailing feeling in the English-speaking world that a potent factor of the efficiency of our chief enemy has been the efficiency of its educational system and that ours needs overhauling. This seems to be the best explanation of the readiness of prominent men in all walks of life to consider whether or not there is a good deal in the spelling book and some other text books which should be scrapped.

"Dr. Reginald Mason, of Oxford, sends us his greetings, and authorizes me to quote his convictions that our English spelling is a convention without rules or reason; a burden on the memory; a constant recurrence to the dictionary; a waste of time and energy which might be very much better employed. Its chaos is unscientific and inartistic; it defeats the attempts of foreigners to learn English, and bars perhaps the universal employment of the English language in the spiritual and commercial intercourse of mankind.

"Every competent English scholar, be he teacher or student, manufacturer or merchant, is in favor of reform. Few will deny that for a time spelling at once the simplest and most scientific some increase of the alphabet is necessary, but the B. S. Society's scheme is the meantime comes near the ideal of 'one slight, one sound.'" It gets rid of most of the anomalies, it is fairly self-consistent, it is rational, economical and easily learned; it can be adapted to whole or in part, and it is proving a success in teaching. It saves time and money and toil. It appeals to common sense."

Referring to experiments in England, Mr. Dearness stated that reports were to the effect that simplified spelling would prove a great time saver, would help the training and use of the ear and speech organs, and would permit language teaching to be conducted in accordance with the laws of mind growth to a degree absolutely impossible with the present spelling.

Mr. Dearness said the adoption of simplified spelling in Ontario would effect a money saving alone of more than $1,500,000 a year, plus one-eighth the study time of public school pupils.

Waste Educational Reform

Dr. J. B. Waugh, of Stratford, President of the trustees' section, impressed upon those present the fact that they have charge of the largest spending department of the Province, and that their work is not completed when they merely see that the regulations are carried out. "We have settled down to the comfortable assurance that the educational system of Ontario is the best in the world, and we have failed to keep pace with educational advances," he said. Mr. Waugh admitted there was need of some strong central authority and more freedom of action for local authorities, declaring that the school work needs vitalizing.

Fighting Disease

That there were less contagious diseases in the British army than in a similar number of civilians was the statement of Colonel George C. Nasmith, C.M.G., director of Toronto Municipal Laboratories, before the Natural Science section. Colonel Nasmith has performed splendid service among the Canadian and Imperial soldiers at the front, so his address on how to maintain the health of the British soldiers was followed with rapt attention. He said that in the South African war typhoid fever killed 8,000, as against 7,700 killed by the enemy; whereas to-day the disease might be said to be non-existent in the British army in Europe. In considering the problem of controlling disease it should be remembered that they were spread normally in Europe from man to man mainly in three ways. One group was through the excretions containing disease germs, being conveyed directly to uninfected people, another group by infected intestinal excretions gaining access to uninfected people through contaminated water, milk or food; and a third group through insects which had been infected by biting those already diseased, biting uninfected people. Examples of diseases of each of these groups would be measles, typhoid fever and malaria.

The manner in which diseases were met were early diagnosis and elimination of suspected cases of epidemic disease, inoculation to control typhoid and paratyphoid fever, sanitary precautions, chlorination and filtration of water, disinfection of excreta, control of insects and breeding places of flies, and protection of food.

Children Cry FOR FLETCHER'S CASTORIA

ELDERSLIE COUNCIL

Gillies Hill, April 1st, 1918

All members were present at meeting on above date.

Messrs. Wm. McDonald, M.P.P., and S. R. Davey, of Chesley, addressed the council in the interests of the Y.M.C.A. overseas, and invited the co-operation of the Tp. of Elderslie with the town of Chesley, in this branch of patriotic work. The council will discuss this matter at a future meeting.

Oswald—Fraser—That the clerk correspond with Engineer McDowell in reference to work connected with Elderslie swamp drain.—Carried.

Allen—Oswald—That orders be issued for the following accounts.—Carried.

Mrs. Harold Cormack, grant to Patriotic League, Elora road south, $15; Mrs. J. Calhoun, grant to Dobbinton Patriotic Society, $25; Mrs. Jas. A. Lewis, grant to Salem Patriotic Society, $25; D. McKenzie, part payment printing contract, $25; Frank Quigley, repairing Snake Creek bridge, con. B, $3; D. Walks, salary as assessor, $75.

Fraser—Clement—That this board do now adjourn to meet again on Monday, May 6th, at 1 o'clock p.m. for general business.—Carried.

R. C. PEARCE, Clerk

WONDERFUL EXPLOIT OF LT. HANNA, V.C.

"He is the real hero of the Western Canadian army," says the London correspondent of the New York Herald in reference to Lieut. Robert Hanna, V.C., and while it is a difficult, not to say impossible, task to pick out the real heroes in an army where they are so numerous, no words of praise seem extravagant when applied to the wonderful gallantry and intelligence displayed by Lieut. Hanna in winning the Victoria Cross. His exploit, in the Herald's correspondent's opinion was "one of the most thrilling of the entire war, if not all the time." The words of the official record are almost as enthusiastic, for after describing the incident they say, "His most courageous action displayed courage and personal bravery of the highest order at this most critical order of attack, and was responsible for the capture of a most important objective, and but for his daring action and determined handling of a desperate situation, the attack would not have succeeded. His outstanding gallantry, personal courage and determined leading of his company is deserving of the highest possible reward."

Out to Kill Germans

Hanna's feat was performed at Vimy Ridge, August 21, 1917. He was at the time sergeant-major of the 28th (Vancouver) Battalion. He had enlisted as a private and had won his way to be chief non com by steady bravery. He had fought at the Somme and St. Eloi. All told he had been "over the top" 21 times before this eventful day, and it is said that he had no notion that he would ever come out of the war alive. Yet his Irish lineage kept him from taking too gloomy a view of the position, and his one determination was to get as many Germans as possible before they got him. Near Hill 70 was a stub or trench in the enemy line, hardly visible, but known to be a nasty point, and the 28th were told to take it. So the battalion crowded out on No Man's land and lay there for two hours while the artillery got in its work. Unknown to them the Germans in the opposite trench had also crawled out on a similar errand, and when the opposing barrages lifted there was a sudden conflict in the open.

The Germans quickly had enough of it and backed up to the trench stub, which was powerfully defended by barbed wire and a terrible machine gun on the parapet decimated the Canadian ranks. Of the 65 men who went over the precipice perhaps two-thirds reached the entanglements in front of the trench stub, but many fell there, the gun playing upon them like a hose. Hanna, however, plunged ahead, wormed his way through the entanglements and hurled a bomb at the gun. Luckily it struck and the gun was shattered and the crew killed or injured. Hanna was alone. All his comrades seemed killed or wounded. Every officer was down. The rest of the battalion had swept on. Hanna jumped down into the trench, and in a second saw a number of Prussian Guards advancing. They rushed him, but as the first one was five yards away he shot him, using his last bullet, and then attacked the others with his bayonet. He killed two, and then, as another appeared apparently from the sky, he dashed his brains out with his butt.

Alone in German Trenches

He continued to advance down the trench. Presently he heard voices and saw the mouth of a dugout. He was without ammunitions and had no bombs, but he spied a German bomb and this he hurled into the dugout, killing or wounding every German there. He moved along a few feet further and saw another dugout. He hunted around in the trench and got hold of a couple more bombs, which he threw into the dugout. He remarks, "There was no more noise in this dugout." Soon afterwards Hanna caught sight of a number of Canadian soldiers from another company, and as there were no officers anywhere near he took charge of them and led them through the entire trench in a "mopping-up" expedition and the position remained in the hands of the Canadians, thanks to Bob Hanna, a couple of years before a lumberjack.

Saved Many Lives

Hanna had accomplished something more than the slaughter of a score or two of Germans. He had saved one battalion, perhaps two. The Germans who were killed in the dugouts had been left there to operate the machine gun on the flank and in the rear of the Canadian battalions as they swept by. The impetuosity of the Canadians had carried those who had gone past the objective, namely, the little hidden stub trench—where Hanna alone had halted—too far, and had it not been for him they would have been destroyed by the enfilading guns. Had he gone on with the others, maybe none of them would ever have got back, so that the number of lives he saved by his pluck and quick wittedness might be estimated by the hundreds. Lieut. Hanna weighs only 140 pounds, and he must have seemed a mere boy to the stalwart Prussian Guards of the Fifty-fifth Regiment, when he met him in the trench. But his toughness and quickness of hand and eye made them easy victims. Lieut. Hanna, at the order of the government, has sat for his portrait, which will be hung in the National Gallery. As the Herald says, "It will remain for a new race to roll up a single record to overshadow that of Hanna."

TORONTO LIVE STOCK MARKET

Toronto, April 4, 1918

USE FOR EVERYBODY

In these anxious and frugal days the conscientious producers, who have pretty generally pushed out the conscientious objectors, are asking themselves what more can they do forward winning the war—not just for the sake of victory, but for the sake of the free life of the world, the fair chance for humanity, the survival of high spiritual concepts, the triumph of the right.

Some of us consider ourselves valueless, or nearly so. We are inclined to settle down into a dull, blind rut of listlessness, feeling that we do not count. We have no rich gifts to put upon the altar. We have no rare talents to direct any sort of crusade "under spread ensigns marching." We leave to the mighty intellects the control and the supervision. We leave to the physically robust the active exercises of obedience to orders. In short, in the conviction of our impotency, we let the rest do our fighting for us, to make the world safe for us while we hug the stove and choose the cosy, comfortable nook. In the shadow of the wall we sit, and the tumult and the strain, the dust and the noise in the hot glare of brawling daylight go by on the other side.

But all the man-power, woman-power and child-power of the world are needed now. There are few perfect citizens. The business of the earth depends on those who are inconspicuous, and the load should outrun their bodies, or those whose reach exceeds their grasp, or those who would like to do more than the call of necessity imposes, or be always to the strong. It is likely to go to the combined forces of those who are faithful unto the end in the few things they are able to do.

The country in which it pets depends on the last and the least among us. It expects its hall-men to do their duty. It needs the services of the maimed and the halt. It needs those who have only one or two of their wits at work. It needs us as long as we can stir a finger or wink an eye. If you cannot run a mile, you can walk two. If you cannot lift a hundredweight, you can raise a pound. Some work with a steam hammer, some ply a needle, some drive sheep and cows, and some run locomotives; some are sick in bed and can do naught but pray; all are serving. It is not a country in which a crowd stands and waits in silence for the return of Britain battle; it is a country in which all to the limits of their abilities are intensely striving with a common aim. When in doubt give all you have and do all you can, and you will not err. While the duty of the citizens of any other land is unfulfilled the heavier burden rests on us. When millions, deserting the cause of human freedom, bow their necks beneath the yoke it is for us to prove our ardent love of liberty by fighting the battle they refused to wage.

We are "all in it." We cannot escape our present manifest duty—though we may safely commit our ultimate destiny to the Power that has thus far led our nation and present us as a people unto this enormous and unprecedented hour. —Philadelphia Public Ledger.

Jack Wilkes Dead

The celebrated stallion Jack Wilkes sired by Oliver Wilkes, raised by Mr. Clark, Cargill, and purchased many years ago by Mr. Wm. Stewart of Armow, died on Friday last, at the age of 27 years. Jack Wilkes was a snappy little driver, and though his stock as a rule were not large they had the power of endurance that many of the larger horses did not possess. The show ring is where Jack Wilkes and his family were at their best, and more prizes have been carried away in this section in the driving class by the Wilkes stock than all others put together. Mr. Stewart will feel the loss of so valuable an animal which is not only a loss to himself but the community generally.—Kincardine Review.

Exhaust Gas Deadly

An unfortunate affair that might have been attended by more serious results happened on the farm of Mr. John Hamilton, of near Cromarty. Mr. Hamilton started the gasoline engine running allowing the exhaust to escape in the barn. After some time he was taken with a sick and dizzy spell and started for the house. He also noticed that some of the cattle were down. Neighbors were immediately telephoned for, and when they arrived at the farm Mr. Hamilton was in an unconscious condition, as were also some of the cattle. The animals were hauled from the barn to the fresh air where they afterwards revived, but four pigs that were in the building at the time succumbed to the fumes.

F. PURDY

THE LUSTRE BOWL

By Marie A. Moore.

Back from the road stood a weather-beaten cottage, covered with luxuriant vines and shaded by a friendly apple tree.

Each of the couple living quietly and happily there on forbidden time, had passed the "three-score and ten." As the years passed, sorrow and grief as well as joy had been their guests. Perhaps their happiest hours were spent under the apple tree. It had grown old with them. Every limb was familiar and every cluster of blossoms was precious.

To-day the old man sat alone under the tree. With the impatience of a man who has all day before him, he called in a quavering voice, which had more than a touch of tenderness in it, "Sally! Sally!"

A pleasant old face appeared at the window looking toward the apple tree. "Yes, Father, I'll be there in a minute."

Presently Sally came daintily across the grass. She was a tiny specimen of womanhood but she carried her small self with dignity. Her hair, still abundant, was snowy white, a delicate pink lingered in her sweet face and her eyes were keen and bright. She went directly to her husband and patting his shoulder said: "Aren't you ashamed, 'Miah, thinking you must have me close to you every minute?"

"You're not much to brag on for size—but somehow the place in my old heart isn't any too big for you and you've always filled it. I've been sitting here thinking and thinking and my mind went back, fifty years or more, and I saw you and me coming in that gate, arm in arm, our hearts pretty near bursting with love and happiness. I remember too how nice you looked in your white wedding gown and your bonnet trimmed with apple blossoms."

"Why, 'Miah, they weren't apple blossoms! They were roses!"

"Well, anyhow, they were pink, weren't they? That happiness of yours and mine hasn't ever left us, has it, Sally?"

"No, 'Miah, and the good Lord has spared us to each other and we're likely to go down the hill together. And 'Miah, husband, we've got another thing to be thankful for and that's the bit of money we've pinched here and there to save through all these years. It isn't much but it will keep us off the town I guess."

"Sure it's safe, Sally, wife? I haven't looked to-day."

"I have, 'Miah, and it's all right."

At least once a day they looked to see if their treasure was safe. No one knew the thousand and one sacrifices that had gone into the saving of the small sum of three hundred dollars. Only by the utmost self-denial had they amassed their little sum. Their sturdy independence and integrity feared more than anything else, perhaps, being dependent on the town. They had been possessed with the idea that their treasure must be always near at hand where they could get it at once if necessary. Wicked men robbed banks; and sometimes banks, and the money in them, burned down.

'Miah and Sally owned an heirloom, a lustre sugar bowl, their only treasure of the kind. It was of unusual size and beauty; its cover fitted well into it and it stood on a high shelf in a corner cupboard with glass doors. Within the bowl, wrapped in a piece of newspaper, was concealed the money. It was Nehemiah's plan and he took great pride in it.

"I'm glad I thought of such a safe place for hiding it, Sally. I know you argued against it but you'll find I'm right. You're all right, Sally, wife, but of course women are less careful than men about money matters."

Sally's sweet nature was untroubled by her husband's display of wisdom. She simply said, "Perhaps that's so, 'Miah."

The cottage was on a quiet lane, a little off from the main-traveled road, but Nehemiah and Sally were so dearly loved that scarcely a day passed without bringing one or more of the neighbors. To-day no one had "dropped in."

"It seems dreadful quiet round here to-day, Sally. Anything going on to take the folks away? Seems as if there had been, we ought to have known it."

"No, 'Miah. Someone will come along about sundown when it gets cooler."

Just then the gate gave a familiar click. A well-dressed stranger came toward them. We was carrying in his hand a badly worn leather valise.

"Well, well!" he exclaimed. "This is a fine comfortable old place. If you don't mind, I'll sit awhile and cool off. It's a pretty warm day to be tramping about the country."

The old man's answer was cordial: "Sit as long as you want to. Been walking far?" With the kindly curiosity of old age, he glanced at the bag lying on the grass. Traveling salesmen were not numerous and mild excitement always attended their coming.

"Well, yes," the stranger replied, "a person in my line of business has to do a lot of walking to do any trading—especially with my kind of goods. It takes quite a while here in the country to impress the folks with the value of the article I am selling."

Uncle Nehemiah's curiosity was stirred. The salesman went on in a businesslike air. "It's just the thing that will appeal to people of your intelligence. It saves lots of washing, saves your clothes, always looks clean and is little soap and water, now and then, makes it look fast like new. Best thing on the market to-day. Selling like hot cakes. Can't half supply the demand."

"Let's see it," suggested 'Miah.

The stranger took from his valise a small apron, made from enameled cloth, white, streaked with black; to the apron were attached black strings. "There's more than one use to which it can be put," he said. "Of course you old folks—no offense intended—sit out here a good deal and sometimes it must be damp. Now you can wear this apron just as well back-to as front." He turned to Sally. "And it will keep the wrinkles out of your skirt and make it wear longer. Then being black and white it will do for mourning or half mourning or no mourning at all."

"Not an air of being able to purchase dozens if he chose, Uncle 'Miah noted. "What do they cost?"

"I've only got two left," replied the stranger, "so I'll call these 'markdowns' and you can have the two for fifty cents apiece—cost me a dollar, honor bright! Don't hurry. Think it over but just remember you're getting a bargain."

He fanned himself with his hat. "Country people always have a pail of good spring water, standing in a cool place, and a dipper handy," he said. "Can I get a drink?"

Uncle Nehemiah began to rise from his chair to pay his entertaining guest the courtesy of a glass of water but the salesman stopped him. "I'm younger than you are," he said. "Let me help myself. I'd just like to do it."

Sally's only wish had been for his departure; however, she saw no reason for objecting, so conquering her fear she told him that by going in the nearest door, he would find the pail of water near the sink. He walked without haste and disappeared in the doorway of the cottage.

As soon as he was out of sight and hearing, a broad grin spread over Uncle Nehemiah's pleasant old face. "Sally," he said, "I sit out here in the damp about as much as you do. One of us isn't here much of the time without the other. What do you say? Think one of these ridiculous contrivations would keep the wrinkles out of my old pants?"

Aunt Sally did not laugh as usual at her husband's homely wit. She watched with anxiety the door through which the man had passed.

"'Miah, seems to me he's a long time just getting a drink of water."

"Perhaps he was terrible thirsty. He won't often find spring water like ours. He'll be out in a minute. Don't you fret. Just like a woman—always being anxious when there isn't any need!"

The gate was at a little distance from where they were sitting. In a moment they were startled by the sound of the sharp quick noise it always made in closing. Turning, they saw a figure rapidly disappearing down the road, leading away from the village.

One glance was enough. Uncle Nehemiah sprang up as quickly as his old bones would let him and started for the house. Sally put her hand to her heart and weakly followed him. As she passed from kitchen to dining room, she came upon the bowed form of her husband, with the empty sugar bowl beside him on the table, over which he had fallen, overcome with grief at the loss that had befallen them for—the treasured sugar bowl was empty.

A vision of the penniless and helpless future had prostrated the old man.

"O Father, Father!" cried Sally. It was a name she seldom used; it was too keen a reminder. "Listen to me—oh, listen—"

"It's all my fault, Mother," he moaned, "thinking I knew best. If I'd listened to you before, it wouldn't have happened. If I could only die right here and now!" The old man's sobs were heart-rending.

"'Miah, husband, if you were to do that, you can't take me with you as you said, for I'm not going yet. Look at me, now," she demanded. "He didn't get anything. The money wasn't there. I—it was only another wad of paper I put there, to deceive you, 'Miah. Somehow I couldn't bear to leave all that money, all we had in the world, in that bowl—not even to please you 'Miah. It seemed too risky. Wait."

She quickly left the room. In a moment or two she returned and placed in 'Miah's trembling hands, the real wad of newspaper, with the real money inside.

The old man, hardly yet believing in his good fortune and the tears not yet dry on his wrinkled cheeks, slowly rose and as he clasped Sally in his embrace, they bowed their heads in thankfulness and prayer.

Uncle Nehemiah never knew where Aunt Sally hid the money for, wise little woman that she was, she never told!

No Gentleman.

It was their honeymoon trip, and the first time they had ever been out of their own county.

As they waited on the platform at their destination for the guard to bundle their boxes out of the van, the young bride and bridegroom were manifestly embarrassed.

Then a porter came up and asked: "Can I look after yer baggage for yer, mister?"

The red blood mounted to the young bride's cheeks, and, turning to her hubby, she demanded:

"Well, well, well! If ye' ain't agoin' to thrash him for refusin' to me like that, ye're no man, George!"

The kitchen stove will be clean and bright if it is wiped off each morning with a cloth moistened with kerosene.

BRITISH RECRUITING MISSION.

To Secure 20,000 Men From U. S. in Three Months.

For the week ending March 2nd the British and Canadian Recruiting Mission dispatched to Canada 1,019 volunteers for the British and Canadian armies. During the absence of Brigadier-General W. A. White, C.M.G., Colonel J. S. Dennis of the Canadian Expeditionary Force is in command of the recruiting program in the United States. Brigadier-General White is making a tour through the South in an effort to stimulate interest in recruiting.

The pictures accompanying this article illustrate the campaign that is being carried on in New York by the Mission. Brigadier-General White and Colonel Dennis have started a whirlwind campaign for recruiting Britishers and Canadians in the United States covering the next two months. Their ambition is to secure 20,000 men from the United States, if possible, before the terms of the draft convention between the United States and Great Britain become effective. During the eight months the Mission has been at work in the United States it has secured 22,000 volunteers for the British and Canadian armies, and has examined about 16,000 more.

Brigadier-General White has made the point that if a Britisher or Canadian desires to aid the Allies he can do so by promptly volunteering, because the machinery of the British and Canadian armies for training men has been so well developed by three and a half years of experience that it can train a man, put him in the firing line, and have him invalided home in six months. This has actually been done in quite a number of cases. On the other hand, the United States Government, starting much later, has had its hands full in training the first contingent of the draft numbering about 700,000 men, and the second draft will follow close upon the heels of the first.

Food Control Corner

Those who are crying to the Government to provide food for hogs, and bitterly criticising officials for failure to supply sufficient bran and shorts, should take a look at the facts. Canada does not produce sufficient bran and shorts to feed hogs in normal times and recourse to other feeds has always been necessary. In the effort, however, to aid farmers, an export embargo was placed on mill offal and the price of bran and shorts was fixed in fair proportion to the price of wheat and several dollars a ton lower than in the United States. This, of course, was satisfactory as far as it went but the trouble was that it could not possibly go far enough. Not enough bran and shorts are produced in Canada to go around. Canadian mills from September 1st, 1915 to February 1st, 1916, ground at the rate of 18,000,000 bushels of wheat a month, which was a very high proportion as compared to normal. From this amount of wheat, however, under the new standard flour regulations, about two per cent. more of the wheat berry is retained in the flour. Only 120,000,000 bushels of feed can be produced in a month, or 21,000,000 pounds a day. There are 17,322,000 odd horses, milch cows, cattle, sheep and swine in Canada, not taking poultry into consideration at all. The bran and shorts produced in Canada would thus give each animal one meal in two or three weeks. A cow would consume five pounds a day; a hog, according to its age, from one-half pound to three pounds—though little shorts, of course, is fed to the more mature hogs. There were, approximately, 3,619,528 hogs in Canada last year, so that out of every five or six hogs, only one would be able to get a full three-pound ration of shorts per day or, if the shorts was divided equally among all the hogs; less than two-thirds of a pound would be the maximum allowance.

Nor is this all there is to the problem. The question of distributing this feed to the farmers throughout Canada arises. It has been suggested that farmers be allowed car-load lots. There are 714,646 farms in Canada. Giving each one its share would mean that each farm would get a car-load once in twenty-four years. A car-load contains twenty-five tons and there are about eighty-four car-loads of bran and shorts produced in Canada per day. It takes a 100 barrel mill about fourteen days to produce a car-load of feed. Sixty per cent. of Canadian mills have no greater capacity than 100 barrels a day or less, and could ship a car-load no oftener than once a fortnight.

Nevertheless, despite this difficulty and all difficulties, Canada will have to produce more hogs. The European situation depends on it. The difficulties will have to be overcome. Farmers will have to grow the coarser grains and depend less upon mill offal. American corn will be coming more freely into Canada as the Age weather develops and transportation difficulties lessen. Every farmer should realise that we are at war, that Allied Europe is hard pressed, and determine to do the best he can, under his own circumstances.

FERTILIZER

ONTARIO FERTILIZERS, LIMITED
WEST TORONTO CANADA

TO MAKE A MAGIC BOAT.

An Interesting Experiment for the Small Boy to Make.

The surface of all water is covered by a film of the water itself, which in its action is not unlike that of a thin sheet of india rubber. To comprehend this one must imagine the rubber to be transparent. The surface of the water itself is so elastic and under tension, so that a needle, though heavier than the water, may be floated on the surface.

Several interesting experiments may be made with the elasticity of this film. One of the best is to place two slender splinters of wood side by side on the water. Now drop a little alcohol between the splinters. This alcohol will immediately break the surface film between the splinters, and the pulling force of the remaining film, since there is nothing between to hold them, will cause the splinters instantly to fly apart.

Another interesting experiment is to whittle a thin, slender splinter, pointed at one end somewhat like a boat. Place a tiny bit of gum camphor on the rear of this splinter and the gum will destroy the surface film so that there will be no pull in the rear. As there is a pull in the front not balanced by one in the rear, the tiny boat will run forward as rapidly as the camphor can dissolve the film in the rear.

Some interesting little "magic tricks might be developed from these experiments which would surprise and instruct friends.

Manure should be thoroughly incorporated with the fine ploughed section of the soil. The more porous and better drained the soil the deeper manure can be ploughed under.

Save Food

In a time needing food economy many people are not getting all the nourishment they might from their food.

It is not how much you eat, but how much you assimilate, that does you good.

The addition of a small teaspoonful of Bovril to the diet as a peptogenic before meals leads to more thorough digestion and assimilation and thus saves food, for you need less.

War Limits German Frocks.

More silk dresses are being worn by the women of Germany than during the first two years of the war. This is not because of growing prosperity, but results from the fact that no more wool or cotton can be obtained for women's clothes.

Silk also is becoming exceedingly scarce, as it is being extensively used in making airplanes and observation balloons. Italian smugglers who take the risk of being shot in getting past the frontier are earning enormous rewards by bringing silk into Germany.

Shopping in a Big City

Scarcely anything pleases a woman more than to come to the city to shop. There are so many big stores with such endless variety and choice of everything.

Still there is just that little drawback about where to stay. The Walker House solves that problem. It is a home for you while in the city, and you can have all your purchases sent direct there, where there are special facilities for looking after your parcels.

Come to the city to shop and stay at

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Pasture For Hogs.

The feed situation confronting the swine-grower during the coming summer is not altogether a bright one. Standard hog-feeds are not likely to be plentiful, with high prices ruling. Shorts and middlings, while fixed as to price show no likelihood of a surplus. Corn, for some months practically unprocurable and in any case too high in price to be considered, may be available, but whether in reliably constant quantities remains to be seen. Barley will be high priced also and difficulty available in many localities. Oats, under ruling and probable future prices, should be used only for the milking sow and for weaned and growing pigs. Only in small quantities should this feed enter into the fattening ration. It has been shown that with breeding stock, whether during winter or summer maintenance, cheap home grown feeds may be largely utilized as an economy and that from such feeding practice best results may be obtained in health and production. It has been, further, clearly demonstrated that home-grown feeds for summer feeding may economically replace a considerable percentage of meal even at pre-war prices.

At the Experimental Farm, Brandon, it was shown by experiment during the summer of 1916 that oats, barley and wheat all stood pasturing well. These were sown on May 17 and pastured from July 6th until early in August. Rape which was slightly injured by pasturing too early, supplied much needed pasturage when the cereal seedings had been eaten off. Vetches although slow of growth were readily eaten and stood pasturing well. Sweet clover, was also late in maturing and eaten only when no other feed was available.

It might be stated that beyond a comparison of these crops from the standpoint of palatability, recuperative power, and ability to withstand trampling and pasturing generally, no data was available to show the cost of production one crop against the other.

With these pastures crops a self-feeder was used to supply a supplemental grain ration. Such practice indicated that no more than where hand feeding was employed and that economical gains were made at a cost of 5 cents per pound for grain and pasture, employing feed prices then current. The method in general reduced the labor of feeding to the minimum.

At the Experimental Station, Lacombe, where swine feeding enters largely into live stock operations, rape and alfalfa have proven most desirable crops. As a result of the average of three tests, rape has shown a slight superiority over alfalfa requiring 3.3 pounds meal fed supplementally as against 3.83 pounds in the case of alfalfa. Rape carried 17361 pounds of pork per acre as against 15118.8 pounds with alfalfa.

The findings at Lacombe would warrant the recommendation of alfalfa for early pasture with a block of rape to supply green food for hogs when they attain considerable size. Where alfalfa may be successfully grown, the swine grower would be well advised in watching a small block for swine feeding purposes. Failing alfalfa, clover will give almost equally good results. With neither of the legumes available, results at Lacombe indicate that a cereal pasture second only to the legumes, is to be obtained by the use of a heavy seeding (3 bushels per acre) of oats and barley, or wheat, oats and barley.

Any one of the pastures above mentioned should be followed by rape seeded early in June, preferably in drills 27 inches apart.

At Lacombe the results of the use of self-feeders versus hand-feeding on pasture, while not sufficiently verified by repeated experiment, would indicate that where hogs are fed to a finish the self-feeding method shows most economical gains. It has been proven where corn is the principal grain used, self-feeding is more economical than hand feeding. That this is also the case where mixed grains, wheat by-products and feeding concentrates are used, is indicated by the results at Ottawa, Lacombe, Brandon and elsewhere on the Experimental Farms System.

At the Experimental Station at Lethbridge excellent results have been obtained from alfalfa and peas, the hogs being allowed access to both crops at the same time. Here of course alfalfa is one of the most dependable crops grown, conditions being in all respects suited to its culture.

While much evidence is, therefore, at hand, to show that alfalfa possibly holds first place as a hog-pasture, it must be remembered that in many sections of Canada this crop cannot be grown at all, in many others that it is unreliable in the extreme, and that even under more or less favorable soil and climatic conditions for one reason or another it cannot always be relied upon. For reliability and wide cultural possibilities and from the standpoint of palatability, producing power and resistance to pasturing, red clover should receive emphasis equal to, if not greater than, that given alfalfa.

In conclusion, high priced grain and meal for hogs must be replaced, as far as possible, during the coming summer. Pastures, as discussed, form a home-grown, palatable, easily available food, that is harvested without labor. The self-feeder combines well with pasturing, and for growing and finishing hogs is peculiarly worthy of attention during present labor scarcity.—Experimental Farms Note.

Poultry

Good Yards Save Losses.

Near many farm buildings where poultry range unchecked the newly seeded grain fields show bare spaces of an acre or more which have been scratched up and eaten off by the farm flock. The average acre thus eaten frequently means a lessening of the crop by from 20 to 40 bushels, while the feeding value to the flock secured from this acre would not amount to more than that furnished by one or two bushels of grain. This is an expensive and unnecessary plan of feeding. To remedy this I aim to have every chicken house or set of chicken houses provided with a chicken-proof yard so that at critical times during the year all of the chickens may be confined.

We make these poultry fences of woven wire, using strong fence posts which we set substantially in the ground. A six-inch fencing board is placed around the bottom of the fence and one on the top just above the wire. This makes a good brace for the posts. Above this top board is stretched a strand of barbed wire. This makes a fence six feet high. If an occasional venturesome biddy scales this fence, we clip a few feathers from one wing.

In addition to the advantage mentioned there are several other reasons why it is important to have a place to confine farm flocks. In the spring of the year especially, there are a number of days that it is an advantage to keep a flock confined in order to keep the egg machinery steadily working. On stormy days we open up the doors and let the birds out into the yard to sample the storm for themselves. They soon decide it is better to stay in and go back, and are contented. But give them free range and they'll be huddled up in groups in various places about the farmyard, quite miserable, and perhaps roost out all night. Then down goes the egg yield. On such days we go into the poultry houses occasionally with a little variety—potato or apple peelings, a bunch of clover or alfalfa hay, silage, etc. These things, of course, in addition to their regular ration when running at large. If not possible to have a yard with a tree or two, we plant a few plums or damsons and it's surprising how soon they make some outdoor shade, and it is not long until there is fruit for ourselves, and chicken too.

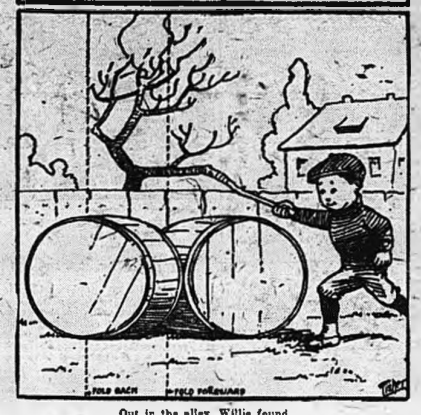
An Omen.



From a land physically remote, but ever spiritually near, has come an omen. Jerusalem, the Holy City, in which grew up the belief in a Kingdom of God, has passed again into the keeping of those to whom that kingdom means justice, and mercy, and truth. Let the victory be our Easter token that those qualities shall triumph and shall be no more overcome.

Celery is, more digestible when cooked.

Turn a plate upside down in the bottom of any vessel in which you are cooking any food a long time. The plate will prevent any possible scorching.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Out in the alley Willie found
Two barrels lying on the ground;
The hoops were loose and a stick you see,
He broke from a branch of the apple tree.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Chronic Catarrh.

There is no diseased condition in moist climates so common as this. Children are born with it, and many people carry it with them to the very limit of extreme age.

We generally mean, by the term, chronic nasal catarrh or chronic rhinitis.

Consider the anatomical facts for a moment. There are two nostrils or spaces, narrow in front, much wider and more capacious at the back, and terminating in the pharynx or throat.

They are separated in front by a partition which is cartilage below and bone above.

On either side, outwardly, are three small bones, one above another like shelves, giving rise to three spaces or passages; and there are communicating cavities above, behind, and at the sides lined with mucous membrane containing many bloodvessels and becoming more or less swollen when the bloodvessels, for any reason, have an extra supply of blood.

The nasal passages also communicate with the eyes, ears, and mouth, and in the operation of breathing, the air normally passes through the anterior and posterior nasal passages on its way to the lungs.

In this way the air is filtered, and impurities it may contain are often retained on the nasal mucous membrane.

If these structures of the nose are faultily put together (from natural defect or as the result of accident), or if there are diseased tonsils or new growths, like adenoids, in the posterior nasal passages, breathing becomes difficult, the mucous membrane becomes inflamed and thickened, and there is an increase in the secretion of the mucous membrane, be it mucous or pus; this constitutes catarrhal discharge.

Sometimes the irritated and congested mucous membrane throws out masses of soft tissue which take the form of tumors, or polypi and these may entirely block up the nasal passages and compel mouth breathing continually.

Sometimes the inflammation extends to the accessory cavities referred to, which may complicate matters seriously; but this is far less common than the minor disorders.

Then the mucous membrane may be irritated and swollen by strong vapors or gases, like ammonia or chlorine; by impressions and emotions; by dust from one's work, or the dust of the street, or the pollen of plants; or by draughts of air.

Bacteria may be inhaled and cause cold in the head, influenza and other nasal troubles, and there is the ever present irritation of a moist atmosphere at the sea coast and in all humid climates. The more mucous membrane in the extensive nasal area that is involved, the more extensive will be the catarrhal disease and the catarrhal discharge, and in chronic catarrh this continues night and day, sometimes thick, purulent and offensive.

The general health may be disturbed by this disease, and there may be insomnia, dizziness, dulness, headachs, poor memory, impairment of smell, sight and hearing, and constant discomfort in the throat and larynx.

Alcohol and tobacco make the disease worse, and so do concurrent disease of the heart, lungs, liver or kidneys.

Much surgical work is done to relieve nasal catarrh—much boring and gouging and cauterizing which often does more harm than good.

Obvious mechanical obstructions must, of course, be removed. You who suffer with this disease, live simply; get an abundance of good food and sleep; exercise out of doors; and seek the guidance of a wise and conservative physician.

Go to a dry climate, if you can, for this will do more to produce a permanent cure than any amount of medication.

QUESTIONS AND ANSWERS.

J. A .M.—1. What causes a flow of saliva from the mouth during the sleep? 2. How can it be stopped? 3. If the saliva is yellowish in color, is it an indication of indigestion?

Answer—1. It is due to the relaxed condition of the tissues—which always occurs during sleep. 2. I do not know of any way to stop it. 3. It does not necessarily indicate indigestion.

CANADA MUSTERS HER MANHOOD

FOR the war against hunger as well as for the war against the Hun. For every Canadian fighting overseas, at least two on farms at home are serving none the less effectively because they wear neither uniforms nor marks of rank or valour.

Long and strenuous days are theirs, without leave or furlough! a steady drive through the daylight hours to keep the work abreast of the season, and save the crops so sorely needed to feed our fighting men.

Only those who spend such days can realize how good it feels to have a "wash-up" and a clean Gillette shave at night—or how it fits a man to enjoy the evening's rest or pleasure of the trip to town.

The busier you are going to be this summer, the more you'll need a Gillette Safety Razor, with its clean, comfortable, five-minute shave. And the better you know and like good tools, the more you'll appreciate the simple mechanical perfection that gives the Gillette such a lead over every other razor.

The Gillette Safety Razor is made in several different styles, civilian and military. Choose one of the former for yourself and delight some soldier friend with a new Military Set. Your dealer can supply you at $5.00 up.

GLAMIS

Mr. Madden left last week for Detroit, leaving Mrs. Madden here for an extended visit.

We are pleased to report the progress of Mr. Groves, who has been confined to the house for some time. He expects to be able to resume his duties in a short time.

Mr. Neil McDougald, of Saskatchewan, and now in training in Toronto with the Flying Corps, called on friends in our burg last week.

Mr. Dan Montgomery, of Detroit, is at his home on the 2nd of Bruce.

Master Murray Kinleyside, of Port Elgin, spent a few days among his old schoolmates around our village.

Mr. Clyde McKeeman left last week for the far west.

We are sorry to report the illness of Mrs. J. K. McLennan, but trust she will soon be around again.

Mrs. McIntosh, on the 14th of Greenock, held a sale-on Monday of her farm stock and implements. She has rented the farm for a year to Mr. Thos. Gamble.

The ladies of St. Paul's congregation held their monthly meeting on Wednesday last at the home of Mrs. H. Campbell.

Mrs. McClung and young son (John Wesley) are doing nicely.

Mrs. Parker and Miss Gibb, who were in attendance, returned home on Sunday.

Mr. Geo. Groves' driver met with an accident on Saturday. While driving it to the stable on the old Keaton place it got frightened at his shadow in the window, kicked through the glass and inflicted several wounds.

Mrs. Peter Gilchrist met with the loss of her cow.

CARGILL

Mrs. H. P. Somerville and children visited at Mr. Wm. Matthews' last week, prior to leaving for their home in Halkirk, Sask.

Mrs. C. Kyle spent a few days with friends in Toronto last week.

Messrs. John Allardyce and John Keyes of Greenock, and D. George of Walkerton, purchased new Ford touring cars here recently. Dr. Bricker also bought a Ford runabout.

Mr. Hupstein has purchased a touring car.

Mr. Zeigler, late manager at the feed mills here, but now filling a similar position for the Blyth Milling Co., motored with his wife and babe over from Blyth and spent Sunday at Mr. J. H. Brown's.

Mr. Mather's, the new principal, arrived on Saturday, and commenced his duties in the public school here on Monday. We welcome him and trust he may be most successful in his work here.

Rev. Storey visited in Toronto last week.

Mr. W. D. Cargill made an auto trip from London on Saturday.

Miss Allen, teacher in the primary department of the school, spent the holidays at her home in Worcester.

Mr. A. Cargill, of Nassagaweya, visited his brother, Mr. Sam Cargill, here last week.

Mr. Wm. White, who has been working in a munition factory at Guelph, is home.

Miss F. Newman is back from a visit to her sister in Toronto.

Mrs. John Hall, who sold her farm to Mr. Geo. Bester, has gone to live with her daughter, Mrs. Burrows, in Walkerton. We trust she may like her new home.

CASTORIA

SECOND CON. ELDERSLIE

Miss Maude Dawson, of Stratford Normal, spent the Easter vacation at her home here.

Minto Jackson has leased a part of Mr. Henderson's farm for the coming season.

Miss Mary Bell visited last week at the home of her sister, Mrs. D. Allen.

Smith Thompson has been engaged for the coming year with Thos. Patterson, townline Eld. and Grant.

Mrs. A. Dawson is at present under the doctor's care, suffering from heart trouble.

John A. McDonald left on Tuesday for Edmonton, Alta.

Mrs. D. Allen has been laid up for the last few weeks with rheumatism in her knee.

Miss Jessie Young has been awarded second prize on the "Victory War Loan" essay, from the pupils of Chesley high school. Congratulations.

Some of the late home comers on Sunday evening week got caught in the thunder storm. Owing to the intense darkness they could not see the roadway and one of the rigs was upset in the ditch and badly shattered. Fortunately no one was seriously hurt, but it should be a warning to them to come home earlier on Sunday evenings.

At a special meeting of the South Elderslie Telephone Co., the new residents of this con. were all admitted on to line No. 7, namely Messrs. Vogelo, Schmidt and Fritz.

At a meeting of the trustees of S. S. No. 12 it was decided to drill an artesian well on the school grounds during the school vacation.

Miss Stewart spent the Easter vacation at her home in Bluevale.

Mr. and Mrs. Geo. Hope were made the recipients of a silver tea service from friends and neighbors here, prior to their removal to their new home in Chesley.

Mrs. (Dr.) Stembers and little son, of Honan, China, arrived here last week on an extended visit to Mrs. Struthers' parents, Mr. and Mrs. D. Walks.

Everett, Sask., where they will spend the summer.

Mr. Len Schell has moved from the Morrison farm on the 6th to his own lot on the 8th.

FINKERTON

Miss Ruby Gregg went to Wingham on Monday to attend business college. We wish her every success.

Miss Aileen Pinkerton returned to Stratford Normal on Monday.

Rev. Mr. Gale is in Toronto this week attending Convocation, where his son James will receive his degree.

Prayer meeting will be held on Friday evening at Mr. Thos. Birrell's.

Mrs. H. Currie, who has been visiting at Mrs. A. Pinkerton's, returned to Collingwood last week.

Miss Gretta Gregg, of Paisley, visited her cousin, Miss Ruby Gregg, last week.

SIXTH CON. BRUCE

Mr. Everett Westman has purchased a new Ford car.

Our teacher, Miss Simpson, has returned from Listowel, after spending the Easter holidays at her home there.

Pte. T. R. Foster, of the 160th Batt., has received his honorable discharge.

Mr. and Mrs. Geo. Snowdon Sundayed at the home of Mr. Wm. Barrie, Lovat.

Mr. John A. McKay has hired with Mr. R. N. McKay for the summer.

Mr. Alex Mewhinney's little daughter, Paulette Jean, had her arm broken last Saturday.

Mr. R. McGregor, of the 4th con., has been sawing wood on this line.

Mr. Joe Foster has purchased a new team.

WALKERTON

Irwin Bros. received two thoroughbred Belgian horses from Indiana on Saturday, and expect another splendid Percherons to arrive Monday. In the shipment are five stallions.

Becoming curious as to what cider drunk felt like, two of Walkerton's most dressy young men persuaded a comrade who lived in the country, to bring them in some highly ripened apple juice. Searching his father's cellar the chum landed on the vinegar barrel, and after drawing off a gallon set out for the county town, where in the upstairs of one of our blocks the imbibing took place. Thinking that the vinegar was merely cider with a high kick to it they fell to with a persistency worthy of a better cause. Before Cup No. 1 was finished their eyes had moistened, No. 2 brought out real tears, while No. 3 they went into a cold sweat and wept copiously over their glasses. Their stomachs turning, they would almost have welcomed death in their agony as they tossed about in a true lover's knot. The spree proved the biggest frost ever, and it wasn't until the vinegar was got off their systems that they decided that life, after all was worth living.

Mr. William Taylor cut down a maple tree in front of his place on Good Friday that as a young man he planted there forty-one years ago. Those who sow in tears, it is said, shall reap in gladness, and while there is nothing authentic to show that William was crying when he planted it, yet the fact that he got 1½ cords of first-class wood from it is ample proof of the secret joy he must have felt at the harvest. Although with it there was a long spell between the sowing and the reaping, yet good things come slowly, and at the price of wood nowadays William feels that he sure got his reward.

License Inspector White was around on Monday morning, the first day of the dry period, notifying the merchants to take the names of any parties buying extract of lemon, etc., in order, it seems, that a tab may be kept on them, as it is claimed that the extract on being placed in local option beer puts "a kick" into the latter that makes it a highly intoxicating beverage. As there is an extraordinarily heavy fine for anyone found manufacturing intoxicants in Ontario now, the mixing of the extracts with the harmless two per cent will, it is maintained, be construed as "manufacturing" booze, and will leave the participants liable to the penalty.

The cutter in S. A. Rife & Co's tailoring establishment here, who took advantage of Mr. Rife's recent illness to steal and graft off his employer, and who was arrested by Chief Ferguson at his home here last week, appeared before Magistrate Telton yesterday morning at 10 o'clock, and after pleading guilty to the theft of about $155 worth of cloth, which was recovered by the authorities at his home, together with the making on the side of suits, overcoats, etc., amounting to upwards of $150, and pocketing the cash, was sent by the court for trial. Being escorted immediately before Judge Greig at the Court House here, he advanced no excuse for his crime, but as he had, since being arrested, settled with Rife for what he had stolen, by turning in $140 in cash and giving his note for $35, which, together with the fact that the goods recovered as his house went back to the firm's shelves again, caused the judge to use leniency in dealing with the prisoner, hence a sentence of but one month in the Waterloo Jail was imposed by the court.—Herald and Times.

UNDERWOOD

Mr. Menno Musselman has moved into the house at the mill.

Miss Gretta Leggett is attending business college at Wingham.

Rev. Mr. Sawers, of Watford (formerly of Queen Hill), preached in the Presbyterian church here on Sunday morning. His eloquent address on "Prayer" was much enjoyed by all present. He will conduct the morning services here for this month in the absence of the pastor, Rev. Mr. MacNabb. The evening service is discontinued for the present.

The butter factory has started operations for the season again. We understand Mr. A. Coleman, of the Alsfeldt creamery, is going to run the Tiverton factory this season. Good luck to Ab.

Mr. and Mrs. Alf Bradley took a trip down through Huron last week.

Mr. J. B. Knapp and Mr. Wm. Skipper left on Tuesday for Swift

CHESLEY

The total assessment of Chesley for 1918 is $860,458, an increase of $89,000 over last year.

Geneva church congregation presented Rev. Mr. Hilts with a cut glass bowl and gold headed cane before he left Chesley to take up his new pastorate in Toronto. Mrs. Hilts was presented with a life membership in the W.M.S., and their son with a junior life membership certificate.

The messenger of death came suddenly to Mrs. Peter McLaggan of this town on Monday about noon, when she was found dead in a chair in her bedroom by her daughter, Mrs. Gray, apparently having passed away without a struggle from heart failure. The maiden name of deceased was Jane Elliot. She was born near Smith's Falls in Lanark County, moved with her parents to Perth, afterwards to Williamsford, and then came with her father, the late A. S. Elliot, to Chesley, and was a pioneer of this place. Before her marriage to Mr. Peter McLaggan she was housekeeper for her brother, the late J. H. Elliot. After her marriage she lived on lot 31, con. 3, Elderslie, and after her husband's death 13 years ago, she made her home with her daughter, Mrs. Walter Gray.—Deceased was a kind and loving mother, of sweet disposition, and had been a member of the Associate Presbyterian church for a great many years. Besides her daughter she leaves one son, Peter of 12th con. Sullivan. Four sisters, Mrs. Thos. Ramage of California, Mrs. Jas. Ramage, Mrs. Wallace and Mrs. John Thomson, and one brother, Wm. Elliot, all of Chesley, survive her.—Enterprise.

BREAKING UP OF THE 160TH

The following is part of a letter received by Mrs. Jas. Whitehead, of Walkerton, from her son, Capt. R. B. Whitehead, prior to leaving for France, and which tells of the breaking up of the 5th Division. The 160th was one of the first units to be called on to supply drafts.

Witley Camp, Feb'y 27th, 1918

As you doubtless already know, the glorious 5th Division is an organization of the past. A group of highly trained Canadian battalions that existed away back in the year 1916-1917, but was broken up and cast to the four winds of heaven on February 22nd, 1918, to supply reinforcements to battalions in France already depleted in numbers. The 160th was one of the units to be broken first. On Saturday last practically half of the Battalion (that has stuck together as a unit for the past two years) was sent into the 4th Reserve, Bramshott, to be absorbed by that unit as reinforcement. The remainder of the Battalion is sending drafts to France very shortly. Luckily all our men are going to Western Ontario battalions now in France, and other Western Canadian battalions as pioneers.

There are seven officers going to France, these being the captains (including myself). We get the privilege of going over holding our rank, instead of reverting to rank of lieutenants. I myself am going to the 8th Battalion from Winnipeg. We do not know definitely just when we will go, but expect it will be very soon. Texas Cameron went across on Monday last to the 2nd Pioneers. Mack MacKay reverted to lieutenant and went across at the same time to the 1st Battalion. If ever there is a conscientious officer Mack is the one, and if there is ever a call for a nasty job, Mack will be one of the first to volunteer. He is just the kind to stir up all the men, to see that his men are well cared for.

This surely has been a wonderful battalion. Recruited all in Bruce County, made up principally of farmer boys with very little idea of military discipline, they have surely acquitted themselves like real soldiers. Their splendid record of discipline has been truly marvellous. During the past year there was not one district Court Martial case in the battalion, while in every one of the other battalions in the Division there have been not less than five and in some cases as high as 23 cases in the year 1917. That truly is an enviable record. Every man in our battalion was placed on his honor, and punishments meted out were never very heavy. There really was never any necessity for severity except in isolated instances. The battalion during the past year has made a name for itself in many different branches. The Brigade Officer told me personally that they had less trouble with our orderly room than any other in the brigade. We won the Canadian Military Championship; we put on the best guard in the brigade, and taken from all sides I really don't think there was another battalion in the 5th Division that could turn out a guard to equal ours. Officers from other battalions in the Division have told me on different occasions that our battalion was by all odds the best marching battalion in the Division. Forgive me, mother, for tooting this horn so loudly, but the 160th Battalion, although now a thing of the past, must never be forgotten. There must be a permanent place in the Canadian Archives for the history of the men from Bruce, who came to England in October, 1916, to fight in the great war. This time next month there will be many men of the 160th who will be doing their bit in the front line, and I know that wherever the men go they will acquit themselves just as creditably as the seasoned veterans.

TECHNICAL TRAINING FOR BOYS AND GIRLS

Proper Development of Resources Will Require Skilled Labor

Probably 100,000 boys and girls from 14 or 16 years of age annually leave school in Canada to engage in some occupation connected with manufacturing, agriculture, mining or transportation. The present general plan of education does not provide sufficiently for these young people. They are stepping out into the world to find their way, with an almost entirely literary education. The apprentice system in our industries is almost a thing of the past, and the youth in our factories and other business organizations is left to pick up a smattering of his future occupation as best he may. Notwithstanding this, every manufacturer will agree that properly trained help is the best investment. Germany, in the past few years has amply demonstrated the value of technical training.

Canada has very important natural resources requiring capacity to develop them. What are we doing to produce this capacity? How many of our farmers' children know the qualities of soil and the proper fertilizers to use for best results? Mgr. Choquette has told us of the Belgian farmer's knowledge of his land and his scientific use of it. Can we hope to meet him on even terms? How many metal workers know the composition and working qualities of their raw materials? Do our carpenters, textile workers, employees in our ceramic and other industries know why they perform certain operations and why they secure the results they do?

We are not doing justice to the rising generation. At the close of the war Canada will no doubt see an influx of immigrants from the European countries. Their system of industrial training has put them in a position to understand the theoretical as well as the practical side of their means of livelihood. Canada will have to meet these European countries in competition for trade, and, to do so successfully, her manufacturing and other lines of activity must utilize all trained help available; to secure this result it will be necessary to give the most important positions to our foreign-born residents. We may then realize, too late that we have been unfair to our own children. Industrial training schools with night classes should be a part, and an important part, of all educational work, and attendance of pupils, up to at least 18 years of age, should be compulsory.—Conservation.

LOVAT

—Miss Viola Issard, principal of Gorrie continuation school, and Miss Innis Sparrow of Willisecraft, were visitors at Mr. Ed. Dudgeon's, Lovat.

Mearle Hepburn, of Paisley, spent the Easter holidays with the Misses Acton.

AUCTION SALE

—OF—

Farm Stock and Implements

The undersigned has received instructions from Mr. Jos. B. McBride, lot 7, con. A, Elderslie Tp., 3 east south of Paisley, to offer for sale by public auction on his premises, on

Tuesday, April 16

At 1 o'Clock p m the following:

HORSES—Span of matched geldings 4 yrs old, 1 driving mare 11 yrs old, CATTLE—1 fresh cow 5 years old, 1 calf, 1 cow supposed to calve April 20th, 1 cow supposed to calve in May 1st, 2 heifers giving a year old, 1 heifer 1 year old, 1 bull PIGS—9 sows or shipping, 1 boar 1 year old, 1 sow supposed to be in pig, 1 sow 1 year old, 3 pigs 3 months old. IMPLEMENTS—1 set bob sleighs, 1 Massey mower, 1 hay rake, 1 general purpose plow, 1 disc, 1 set harrows, 1 set iron harrows, 1 waggon, 1 buggy, 1 set sleighs, 1 cutter, 1 steam separator, chains, neckyokes, whiffletrees, and all articles necessary to mention. HARNESS—1 set team harness, 1 set single harness. HOUSEHOLD EFFECTS—A quantity of articles used. HOUSEHOLD EFFECTS—A quantity of household furniture.

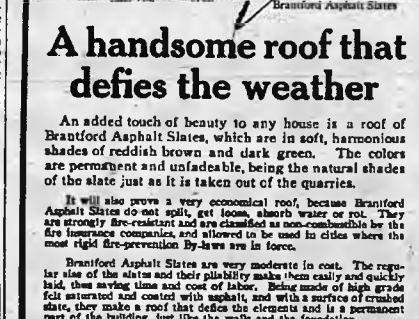
Terms—All sums of $5 and under cash, on sums over that amount 8 months' credit will be given on furnishing approved joint notes, bearing interest at 6 per cent. per annum. All will be sold without reserve, as the proprietor is leaving the farm.

R. C. PEARCE, Auct.

Pure Bred Clydesdale Stallion "Fascmator"

Will be put on the same route as last year A.D. 1918. Fascmator is a first-class stock horse and it will be to the advantage of breeders to hold their mares for him this season.

W. J. WILSON, Prop., 12th Greenock.



Take Care of Your Telephone!

MANY repairs to telephones are made necessary by careless handling.

¶ A telephone instrument has more than a hundred parts and is built like a watch. Rough usage impairs its efficiency.

¶ Help us to conserve the supply of telephone material and skilled labor *by always handling your telephone carefully to avoid costly breakages and repairs.*

The Bell Telephone Co. of Canada

Home in Halifax roofed with Brantford Asphalt Slates

A handsome roof that defies the weather

An added touch of beauty to any house is a roof of Brantford Asphalt Slates, which are in soft, harmonious shades of reddish brown and dark green. The colors are permanent and unfadeable, being the natural shades of the slate just as it is taken out of the quarries.

It will also prove a very economical roof, because Brantford Asphalt Slates do not split, get loose, absorb water or rot. They are strongly fire-resistant and are classified as non-combustible by the fire insurance companies, and allowed to be used in cities where the most rigid fire-prevention By-laws are in force.

Brantford Asphalt Slates are very moderate in cost. The regular use of the slates and their pliability makes them easily and quickly laid, thus saving time and cost of labor. Being made of high grade felt saturated and coated with asphalt, and with a surface of crushed slate, they make a roof that defies the elements and is a permanent part of the building, just like the walls and the foundation.

Brantford Asphalt Slates

are being used more extensively every year for city, country and summer homes, churches, golf clubs, stores, garages, and wherever an artistic effect is desired on a pitch roof.

If you are going to do any building this year, or have an old roof that needs replacing, it will be to your advantage to investigate Brantford Asphalt Slates.

The People's Popular Store

Rugs! Rugs! Rugs!

SERVICE, Design and Coloring are the three essential features when choosing a rug, and one important point about our rugs is that they were ordered eighteen months ago direct from the British manufacturers. These rugs came to hand just recently. As they were delayed in the manufacturing, and transportation is so hard to obtain we were compelled to wait the arrival of these goods. If we were to order them to-day from the same manufacturer they would cost us 75 per cent of an advance on the price we bought them at, but we marked them on the percentage basis of what they cost us, not on to-day's price. So you can be assured of a serviceable rug at a low price. These rugs are seamless, made with the best of dyes, and are some of the finest specimens woven on a machine. Different sizes to fit different rooms, different prices to fit different pocket books. Let us have the pleasure of showing you these goods.

Our stock of

Shoes

for the spring is complete, and as in other departments you will always find the best quality, the correct style and the right price. Let us fit you with a pair. These will give you satisfaction. In Ladies', Girls' or Misses', Men's, Boys' or Youths', a full line to choose from.

Do not forget

Our Grocery Department

We can supply your wants. Telephone us your order. We will see you get the goods. We are giving

11 lbs. Granulated Sugar for $1.00 Cash

Why should we want to store up sugar by the 100-lb. sack when our boys in Flanders and France are on rations? There is plenty of sugar cane and when transportation becomes normal we will have plenty of sugar and at a cheaper price.

We Want Your Produce. Highest Market Prices Paid.

THE PAISLEY MERCANTILE CO.

THE CITY BAKERY

Bread Down to 10c a Loaf

TO help reduce the cost of living for our patrons we have decided to sell Bread at 10c per loaf at the shop, and take the delivery rig off the road. You will therefore understand that our rig will not call at houses in town as we have been doing for years. We invite your hearty co-operation in making our new plan to reduce cost a success.

Fresh Bread and Buns Every Day. A good assortment of Cakes, Pies and Cookies.

Groceries and Fruits in Season

D. H. COOPER

—How do you like saving daylight?

—Mrs. Alex McRae went to Shallow Lake on Saturday to attend the funeral of a niece.

—Cadet H. Barnett is home from Toronto on ten days' leave after being in hospital with the measles.

—Mr. H. Brigham, of Hanover, was in town on Tuesday, accompanied by Mrs. McMahon, guests at Mr. N. Mc. Mahon's.

—Mr. J. B. McBride's flock of 26 Oxford sheep fetched good prices at his auction sale on Tuesday, realizing about $50 each.

—Mr. Thos. Rankin, the veteran teacher of Port Elgin, who has been retired for some time, is in charge of Walkerton public school for this term.

—This has been a very dry month, but the past week or ten days was very favorable for spring seeding operations, especially on light land. Showers would be welcome now.

—Many boys born in Paisley, but removed with their parents to the United States, are now enrolled with the army of our latest ally. Earl Peters, son of Mr. and Mrs. Alex Peters, now of North Yakima, Wash., is in France, a corporal in the scout corps.

—The remains of the late Mrs. Jane Mitchell, of Saugeen, who died at London on Friday last, were brought home for burial in Queen Hill cemetery. The funeral took place on Monday afternoon from the home of her son, Mr. James Mitchell.

—Mr. J. B. McBride has bought Mr. Jos. Heath's house on Victoria St., north, and will move to town shortly.

—Lt. Wallace McKinnon, home on leave from overseas after being seriously wounded, is visiting relatives and friends in this vicinity. He is a son of Rev. N. D. McKinnon, of Caledonia, formerly of Underwood. While in Paisley he was a guest at Mrs. D. Galbraith's.

—Mr. Jas. Starkell having the north grain storehouse at the station torn down and removed from the yard. Although not officially announced as yet, this is understood to be a preliminary step towards the erection of a new station building, which is to occupy the site of the storehouse.

—About $75 was realized for Red Cross work at the afternoon and evening social given by Mr. and Mrs. S. Bauschey at "The Maples" on Friday last. The house was thronged with patrons, in the evening especially, who enjoyed the time spent there as well as the excellent dinner or lunch partaken of. Mr. and Mrs. Ballachey are most energetic and successful in their efforts to add to the Red Cross fund.

—Prof. J. A. Barnes, of Cedar Falls, Iowa, was here a couple of days last week, visiting his parents and friends prior to going overseas with a section of the U. S. army. He is a son of Mr. and Mrs. Eli Barnes, 12th Bruce. For a number of years he has been professor of English and public speaking at the Iowa State teachers' college, but now gives up that position to go as a Y. M. C. A. worker with the men of the army in France.

Advertisements without specific directions will be inserted till forbidden and charged accordingly. Transient orders charged by the inch. Rates on application.

Advertisements in the local columns are charged 10c per line for first insertion, and 5c per line for each subsequent insertion. This includes announcements for church or school entertainments, garden parties &c. No notice less than 25c. Display or advertisements 5c per line. No ads. less than 15. Set in black-faced type, price and one-half.

—Marriage licenses issued and money to loan. T. H. George.

—New shoes in good range of prices and styles. Ballachey, Laidlaw & Co.

—For Sale—Lot 28, con. 7, Bruce, 100 acres, all under grass. Apply to D. Forrester.

—Full line of fine engagement and wedding rings at I. Shoemaker's jewellery store.

—Simmers' Seeds—8 packages for 25c. All the standard varieties. Ballachey, Laidlaw & Co.

—Highest prices paid for hides and sheepskins. H. E. McGregor, Butcher, Steele Block.

—For Sale—48 young pigs. Apply to M. Maurer, lot 8, con. 7, Elderslie, Paisley P. O., R. R. No. 3.

—For Sale—The residence of the late Mrs. Fleming, Queen St. north, Paisley. Apply to D. Forrester.

—Highest price for beef hides, horse hides, calfskins, sheepskins, tallow, &c. P. Oltsher, Paisley Meat Market.

—Thoroughbred, bred to lay S. C. R. Island Reds. **Connestoga Egg Farm Strain.** $2 per 15 eggs. Fertility guaranteed. L. C. Spofford.

—E. Stevenson's quick healing salve is the best made. We have a choice line of tobaccos and cigars, stationery and school supplies. Agent for daily papers and magazines. Give us a call.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to **D. Forrester**, barrister.

—Flour, Feed, Seeds, Grain—We keep a full stock of Five Roses and Stark's high grade flours, bran, shorts, Blatchford's molasses meal, poultry foods and tonics. Always in the market for coarse grains. **W. Stark.**

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles.

I. S. CRUICKSHANK, the Tailor

Latest War Bulletin

Received Wednesday Morning

London, April 17—Despatch from Field Marshal Haig late last night says: At dawn enemy renewed attacks in strength in neighborhood of Wytchaete and Spanbrouck, supported by heavy bombardment. Germans approached British positions under cover of mist and after prolonged struggle gained possession of both localities.

At Meteren enemy also gained footing in village, where fighting is continuing.

Enemy has opened heavy attacks on British positions opposite Boyelles, south of Arras, and fighting still in progress.

Despatch from British Headquarters reports greater part of Messines Ridge now in hands of enemy, but British still hold slopes.

Fresh enemy troops are battling hard at British lines front of Bailleul in continued effort to recapture Hazebrouck.

—Young horse for sale. Inquire at this office.

—Wilkinson plows and repairs at **F. Carter & Son's.**

—For Sale—A quantity of alsike clover seed. Apply to **Geo. Jackson,** Bell phone, Paisley.

—For Sale—A span of good working mares, one due to foal last of May. **J. Trafford,** Paisley.

—Attend the Minstrel Show at Cargill on April 19th, in aid of Red Cross. Admission 35c and 25c.

—A few ladies' suits at $3.98. Excellent cloth and well made, but not the latest style. Ballachey, Laidlaw & Co.

—Auction sale of choice cows and grass cattle at the Central Hotel yards, Paisley, on Saturday, April 20, at 2 p.m. Six months' credit. Jas. E. Ferguson, prop.; R. C. Pearce, auct.

—For Sale—A dark roan Shorthorn bull calf, nine months old. A good individual, and choicely bred. **John Scott,** Port Elgin, R. R. No. 1, Bruce phone.

—Anyone requiring **Marquis Seed Wheat** can obtain same at **Cargill Flour Mills,** as we have just unloaded a car of this variety. We have also received a car of feed corn.

—Red clover and timothy seed for sale. Tested No. 1 for purity. Clover seed 22c, timothy 8c per bushel. Stock kept in Ballachey, Laidlaw & Co's store. Don't fail to see it. **Elves Bros.**

—The Women's Patriotic League will be held in Putnam's hall on Friday at 3.30 p. m. A full attendance is requested to discuss the proposed formation of a Chapter of the Daughters of the Empire.

White Field Seed Beans

I have some for sale, guaranteed A1 quality at $10.00 per bushel, delivered. H. Grice, Cargill.

Seeds! Seeds!

Get your seeds early this season, as the supply of some kinds is not equal to the demand. We have a full assortment of garden seed, alsike clover, turnip, mangel, etc. See us for seed corn. **Walter Stark.**

—Lost—A pocketbook containing about $50 in money, a traveller's certificate No. 4626, and several business cards, lost between 20th Greenock and Paisley, or between Paisley and Walkerton, on April 11th. Suitable reward upon leaving at Advocate office.

—With the mangels we planted six rows without Basic Slag and gathered 10,000 lbs. With Basic Slag we got 15,400 lbs. With turnips, on the same number of rows, without Slag we had 5,500 lbs., with Slag 6,600 lbs. We applied 400 lbs. to the acre. The Wm. Weld Co., proprietors Farmer's Advocate." For sale by A. L. McKinnon, and at Davison's hardware, Paisley.

—Auction sale of household effects, on market square, Paisley, on Saturday, April 20th, at 1.30 p.m.: Cook stove, wood heater, parlor suit of 5 pieces, parlor tables, extension table, sideboard, six dining room chairs, rocker, 4 kitchen chairs, high chair, kitchen table, washing machine and wringer, 2 bedroom suits, 3 bedsteads, mattresses and springs, lawn mower, wheel barrow, all kinds of kitchen utensils. Jos. A. Heath, prop., R. C. Pearce, auct.

Wall Paper

A DISCRIMINATING customer will find all they desire in variety of designs, novelty of colorings and general desirability of the goods we offer to suit their fancy. Our stock is full and complete. Eggs taken in exchange.

Another Business Change

A new face appears in Paisley business circles this week, Mr. A. Ball having bought out the stock and trade of Mr. L. C. Spofford, general merchant. Mr. Ball is a man of wide experience in the mercantile line, and proposes to make the store an attractive place for the purchasing public of this town and locality. His first announcement will appear in next issue of The Advocate.

About Bank Hours

The banks in this part of the country, including Paisley, Chesley, Port Elgin, Walkerton, Cargill, Tiverton, etc., are about to return to the former system of keeping open for stated uniform hours daily, finding this necessary because of the growing shortage of experienced help, and the congestion of business on certain days. Closing at one o'clock p. m. on Saturday is one feature of the change, which will come into effect the first week in May.

W. M. S. Meeting

There was a large attendance at the regular meeting of Knox church W. M. S. on Thursday afternoon, to welcome Mrs. A. Struthers, missionary in Honan, formerly Miss Margaret Walks. Mrs. N. Scott, in the absence of the president, Miss Miller, presided. In a brief address Miss S. McCallum welcomed the missionary. A very enjoyable talk on Honan and people was given by Mrs. Struthers. Solos were rendered by Misses Mabel Stanley and Emily McInnes. Tea was served by the members of the auxiliary.

Tucker—Huton

Capt. Robert Jas. Tucker, of the Canadian Army Medical Corps, and Miss Viola Letitia Blanche Huton were married in Kingston on April 10th, and came up to spend a few days at the home of his sister, Mrs. I. Cruickshank, leaving again on Monday. Capt. Tucker, who spent a year on service in Egypt with the Queen's University hospital corps, expects to go overseas again very shortly. Mrs. Tucker was a nurse in the Queen's Military hospital at Kingston, where her husband has been on duty for the past few months since graduating. She also was about to depart for overseas work, but cupid changed the plans. It will be quite proper to say that each has conquered in an enterprise sweet by remote from the horrors of war. Paisley friends join in the congratulations.

Four Wittman Boys in Khaki, Two Wounded

Mrs. Jas. Harris, of Penoka, Alta. (nee Miss Annie Wittman, daughter of the late And. Wittman of Paisley), writes telling of her four soldier brothers, who were all born in Paisley: "I thought you would like to know how Reuben is getting on, he having been at one time on The Advocate staff. He has seen hard fighting for months, and spent both Christmas and New Year's in the trenches. I had a wire from Ottawa a few days ago saying that he was admitted to Sixth Casualty Clearing Station on March 24th, with gunshot wound in right hand. Reuben enlisted in the 200th Batt., Winnipeg. Oscar B., my youngest brother, after eight months in the trenches, was wounded at the battle of Vimy Ridge. He was a machine gunner, and has just now gone back to the trenches. He was the youngest boy to enlist from this town, just over 16 years of age. He enlisted with the 181st Batt., Edmonton. Karl is in the Royal Flying Corps, and Herb is in the 160th Bruce Batt.

—Mr. W. Schnittker, of Bruce, was in Toronto for a couple of weeks.

—Mrs. Knox, of Toronto, is visiting her daughter, Mrs Chas. Brigham.

—Miss Ethel Campbell, of Toronto, is the guest of her cousin, Mrs A. B. J. Simons.

—Mrs. R. B. Fleming has returned from a visit to her son, Mr. J. B. Fleming, in Toronto.

—Mrs. Povey, of Elora, is visiting at the home of her brothers, Messrs. Dan and R. C. Pearce, at Lockerby.

—Walkerton merchants and business men are moving for a weekly half-holiday every Thursday during the summer.

—Miss Alecia L. Winch left for Montreal on Friday last, where she entered the Royal Victoria Hospital as nurse in training.

—Mr. John Collins returned a few days ago from Trenton, where he had been employed at the butchering for a couple of months.

—Miss Mary Adams, of Queen St. north, is in a helpless condition with paralysis, having taken a severe stroke a few days ago.

—Reeve Douglass, of Hepworth, and Mrs. Douglass, spent the week end at the home of Mr. and Mrs. S. Watson, Victoria St., and were accompanied home by Miss S. Watson for a visit.

—Mr. and Mrs. John Coulter, of Port Elgin, who have recently arrived home from spending the winter in Vancouver, were visitors at the home of the latter's sister, Mrs. Wm. Walker.

Monkeyed with the War Bulletin

On Saturday night a report gained circulation in town that the Germans had broken through the Allied lines and were within a mile of Paris. It was stated that this news came by wire. There was considerable local excitement until it was found that the story was unfounded. It beats the Dutch how any person could deliberately, or ignorantly, circulate such alarming stuff at a time when the best news is serious enough. There is one good purpose the story should have served, however. That is, to wake some of the few who at still dead to the seriousness of the war situation.

Veteran Gets a Farm

Mr. Sam Fleming arrived home on Saturday from Monteith, Ont. where he has been nearly all winter, employed at the returned soldiers' training farm, prior to going on to his veteran grant farm in O'Brien Tp. The soldiers' training farm consists of one thousand acres, and is being rapidly put into shape for giving returned men a course in practical work on the land. O'Brien Tp., where 400 of those desiring to take up farming after receiving discharge from the army are to be located, is a splendid tract of areable land covered with a fine growth of tall spruce suitable for lumber and pulpwood, for both of which good prices are now paid. The railway is near and a large pulp mill is being started on the river along which the land lies. The prospect seems a mighty good one to an experienced Bruce farmer like Mr. Fleming. He is preparing to move his family and effects up there by 1st May. Everybody wishes Mr. and Mrs. Fleming and their bright little family all prosperity and happiness in their new home.

—Life is monotonous only to the monotonous.

A Tie For Life

By Ada Melville Shaw.

It had been snowing for twenty-four hours—the whitest, softest snow that had ever tucked Peach Petal Farm under a winter blanket.

Just as the edge of the sun peered over the distant fields, Esther Reynolds was awakened by the aroma of coffee.

"Mother!" she called from the stairs, "I'll do double stunts all day to pay! I lay awake last night thinking about Claire coming so I overslept. You stole the alarm clock out of my room—or was it Andrew did that?"

Andrew, brother of Esther, answered for himself. "I took it. I know how you'll have to slave when your city girl gets here—carrying hot bricks for her."

"Stop teasing, Andrew. You'd better be out in the barn hitching up Moll and Doll to th.. old sleigh."

"She'll be disgraced if we do not meet her with a car and—"

Esther laughingly plunged her face into the washbasin and heard no more of Andrew's tirade. Ten minutes later she was pouring coffee and trying to sing out her canary who greeted the brilliant sunshine with his repertoire sung in joyful crescendo.

"I hope Andrew will forget his teasing while Claire is here," said Mother Reynolds as she peered through the frosted panes to see if Father was on the way to the house.

"I know one thing, Mother," answered Esther, "every one in this house except me is going to have a surprise about Claire. She's a city girl and she's rich and she's beautiful and she's educated but—she's more. She's —" Esther paused for the right word. The canary, watching for his morning bite of apple, suggested:

"Sweet?"

"No, Perky, that isn't it. She's better than sweet. Well, I'll just let them all find out for themselves."

The girl danced back to the breakfast table and then whirled to give morning greeting to Father who stamped into the kitchen bringing with him the crisp life of the winter morning.

"So your chum's coming this morning, Essie? That's good. How long is she going to stay? Long enough to find out that farm beats city life?"

"O Father—you too?"

"What have I done now? She is a city girl, isn't she?"

"She was born in a city and she has her home in one but that isn't all there is to her."

"Well, we shall find out before she has been here twenty-four hours," Andrew spoke from behind the kitchen range.

He took his place at the breakfast table, managing in the course of a few minutes to lead the conversation around to the question of roads and Moll and Doll, the sleigh and the fact that it was a lovely morning for a sleighride through the drifts and if Esther wanted to meet her friend, he could fasten the woodsled behind the sleigh which was too small for all three of them and any number of suit cases.

The train was late. A long wait in the cold had put ginger into the usually sober heels of Moll and Doll. Andrew could not leave them and so the two girls had their meeting to themselves. When they joined Andrew they were laughing as if all the world were just a laughing chorus and theirs the leading parts.

"Andrew this is Claire. She wants to ride on the sled."

Andrew looked into the blue eyes between the lines of fur cap and collar. They surveyed him with a straight, direct glance. "That will be fine," he said. "Will you drive Esther?"

"The Arabians?" pointing to the fat sides of the well-matched work team. "Never! I'll hold down the sled with Claire."

It was cold and the horses had hard work before them. There was not much opportunity for head-turning and, bundled up as he was, the only share Andrew had in the fun going on behind him was the laughter that reached his ears. Being something of a philosopher he divided his attention between the reins and his thoughts and found enough to do.

He knew that he had been ready if Claire had chosen to sit in the sleigh, to say that she felt herself "above" the frolic of the sled and if she had chosen the sled, to charge her with entering into the sport because it was the "thing to do." He knew too that he had seen a spirit shining through the blue eyes that had compelled him to accept her choice on its face value.

What was the matter with him? What did he care one way or another? "Gildap!" Forgetting Moll's temper, he gave a slap to the reins and the next instant they were all out in the snow, three miles from home, on drifted roads and the shaft was broken!

"And you mean to tell me, Andrew Reynolds, that you did not bring even a hitching strap?"

"Wait a minute! I have something. We'll be all right."

Claire went burrowing for her suit case and brought a pair of pliers from a wooden box. "Now let's find a bit of wire. We can get some from that fence. Will Moll stand for us or will you get it?" she said to Andrew.

Andrew Reynolds hated the combination of events. To let the girls hold the nervous horse while he went to cut wire with a city girl's tool, or to stand by while they went through the snow to cut the wire, was a pill he did not like to swallow.

"As we need Moll in our business perhaps you had better keep her," Claire suggested. "Come on, Essie."

They were soon back with a length of wire and as Moll was hysterical at the approach of womankind, Andrew was forced to stand by while the two girls mended the broken shaft.

"I believe it is stronger than it was before," said Esther.

They gathered up the scattered robes and set out for the farm.

The right kind of farm home in winter is the best place in the world to be and the right kind of visitor in the home is the best antidote for shut-in-ness.

For two days, while the drifts lasted, the girls sang and read, played record music and piano music. Claire wore a Red Cross button and knitted industriously on her fifteenth pair of army socks. She visited every teachable spot on the farm and helped Mother Reynolds splint a hen's broken leg, saying, "You can't be put in the pot for you're a liberty lady and you must work for Hoover."

Hoover! Andrew sniffed. What did city people care about Hoover?

"Claire, where is your ring—the sapphire one?" asked Esther as Claire stroked Liberty Lady's ruffled feathers.

"I—I gave it to the Belgian babies." "Of course you did! I sold my cameo pin too. You remember it?"

The visit extended itself into six weeks. Claire found she could be of use. If there was someone to help Esther with her work, Mother Reynolds could be free to take the heavy end of the neighborhood work for making Red Cross surgical dressings.

"I gather that she plans to train for special government service," Andrew's father told him. "She is waiting for something to open up. I heard her tell Mother that as long as she is here where workers are few perhaps she could spend the waiting time better here than elsewhere. I guess workers are pretty well organized in the city."

"Special government service! She wouldn't last two months."

"You seem to forget, son, that your grandparents on both sides were city people. It is character that counts. I wish that girl nothing better than to marry a farmer and I should congratulate the farmer."

Before the six weeks were over, three members of the Reynolds family knew what was the matter with the fourth member. Andrew was hopelessly in love and did not know it. What the guest knew she kept to herself.

The days were drawing toward spring. The hens were busily busy in the clean straw of their scratching pens and the birds were shyly experimenting with spring songs. There had been another fall of snow but the sun was warm and the eaves were dripping and the secret was out—winter's reign was closing.

"Let's snowball, Esther," said Claire. "The snow is just right."

"Can you wait till afternoon? I have sixteen jobs to finish this morning."

"Will you try me?" asked Andrew.

"Try you? I'll beat you in ten minutes and drive you to your mother for shelter!"

"I take you!"

Claire led the way from the range of the house windows and then the battle began. The general had her enemy with the sun in his eyes. She kept him there. She could make a ball, aim and discharge while he was getting himself into action. He did not mean, at first, really to hit her but her balls went home one after the other. He had, for sport's sake, to forget she was a girl. At the end of fifteen minutes she was close upon him with a handful of wet snow slated for the grim line into which his lips had set themselves.

This was more than snowball play. The boy's heart was a man's heart, and love and conviction were fighting to overcome in him a foolish prejudice.

"Enough!" she tantalised, took one step closer and—lost, for recovering himself he caught her wrists and held her while eye met eye. Without a spoken word they told each other the story that is older than farms and cities, and sweeter than the song of birds.

"Who beat?" asked Esther, meeting them at the door. She looked from one to the other. "I guess it's a tie!"

"—for life!" said Andrew.

About the House

SOUPS MINUS MEATS.

Soups made with milk furnish a wholesome nutrient food rich in food value since they contain all the nutritive value of the milk in addition to the vegetables and other ingredients used. The food is in easily digested form and when served with bread and butter furnishes all the necessary food elements for a balanced meal.

There is no better way to utilize the left overs of the dinner, the tough parts of vegetables, the water in which vegetables are cooked, and they provide a food of such high value at so low a cost.

Soups made from split peas, green peas, beans, lentils or fish are richer than those made from celery, carrots, turnips, potatoes or asparagus, and a chowder makes a good substantial meal. Either canned or salt fish may be used in fish chowder when fresh fish is not available.

The housewife whose shelves are supplied with cold-pack vegetables has first-class material for nourishing, delicious and inexpensive soups.

The proportions for cream soups or soups made without meat are: About one-half as much vegetable pulp as milk or white sauce with the addition of seasoning. If the vegetables used contain a large amount of starch, milk may be used without thickening and where there is water in which the vegetables were cooked an equal amount of vegetable water and pulp is used with the same amount of white sauce.

The general directions for making cream soups are:

Cook the vegetables in water until they are soft, then press through a coarse strainer and add the water in which they are cooked to the pulp that comes through the strainer.

Make the white sauce just before serving time and combine the vegetable pulp with the white sauce after the sauce has cooked up. Do not let the soup stand long before serving as it is likely to thicken too much. Serve very hot with crackers or bread cut in half-inch cubes and toasted a delicate brown. To make a richer soup an egg, slightly beaten, or a few teaspoonfuls of whipped cream may be added to the soup just before serving.

To make the white sauce use two tablespoonfuls of fat, one tablespoonful of flour to each cup of milk and season to taste. Mix the flour with an equal quantity of cold water or milk and stir until smooth, then add enough more milk to make it pour easily. Heat the rest of the milk in a double boiler (never boil the milk) and when hot all through add the flour mixture gradually and stir constantly as the mixture thickens. Add the butter and seasoning and let cook ten or fifteen minutes.

Cream of Pea Soup.—1 pint can peas, 1 pint cold water, 1 teaspoonful sugar, 1 quart thin white sauce. Method same as stated above.

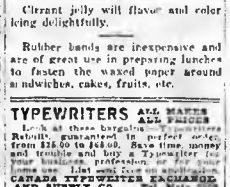
Cream of Corn Soup.—1 pint can of corn, 1 pint cold water, 1 small slice onion, 1 quart thin white sauce. Method same as stated above.

Cream of celery, turnip, potato, bean soups all made same as above.

Corn Chowder.—1 can corn, 2-inch cube fat salt pork, 1 slice onion, 4 potatoes, 1 quart milk, 8 crackers, salt to taste, pepper. Try out the fat or use drippings in place of the salt pork fat. Add the onion to the melted fat and cook until brown. Strain the fat into a large saucepan, add the potatoes cut into half-inch cubes and the boiling water. Cook until the potatoes are soft, then add the milk and corn. Heat to the boiling point, season, moisten the crackers with cold milk and serve them on the top of the chowder.

Fish Chowder.—2 cupfuls flaked codfish or soaked salt codfish, 8 potatoes, 1 pint boiling water, 1 slice onion, 2-inch square fat salt pork, 1 tablespoonful salt, 1 quart milk, dash pepper, 8 crackers. Try out the fat or use drippings in its place, add the onion and brown. Turn the fat into the saucepan, add potatoes, boiling water and cook ten minutes. Add the fish and simmer ten minutes, then add the milk, seasoning and heat to the boiling point. Serve with the crackers moistened in cold milk on the top of the chowder.

Vegetable Soup (without Meat).—½ small onion, 1-3 cupful turnips, 1-3 cupful carrots, ½ cupful celery, salt, 1 quart water, 4 tablespoonfuls drippings, 1½ cupful potato, ½ tablespoonful minced parsley, dash pepper. Wash, scrape or pare and cut the vegetables into slices and prepare them before measuring. Mix the vegetables together omitting the potatoes. Melt the drippings in a stew pan, add the vegetables and cook about ten minutes stirring constantly so that all brown evenly. Add the potatoes and cook five minutes more, then add the water and simmer slowly two hours, covered. Season with salt and pepper, add the minced parsley and serve very hot. The vegetables may be mashed finer with a fork or chopped very fine.



Currant jelly will flavor and color icing delightfully.

Rubber bands are inexpensive and are of great use in preparing lunches to fasten the waxed paper around sandwiches, cakes, fruits, etc.

If there was just one WALKER HOUSE in each town where I go,
My troubles then would be at last like that Proverbial ball of snow.
Of which I have no doubt at all
But you have oft' heard tell.
I mean the one which people say
Was located down in—well,

It doesn't matter 'bout that snow ball,
Which could never last,
What interests you and me is
Having comforts to us passed.
And I know PEACE and JOY and HAPPINESS
To me would flow,
If there was just one WALKER HOUSE
In each town where I go.

Food Control Corner

In the great army camp in Mississippi, the officer in charge of the school for cooks and bakers inaugurated the "Cut It Thin" campaign. He had the bread knives sharpened, had the bread sliced carefully and cut down the bread consumption in that camp for two weeks, during which careful check was kept, by 61,266 pounds, making an average daily saving of 4,085 pounds of bread. It not only saved the Government $3,600 in those two weeks but it meant a savings of 240 pounds of flour for the Allies. Needless to say, the bread knives have been kept in the best of condition ever since down there.

The latest cable received by the Canada Food Board from the British Ministry of Food relative to the situation overseas states that compulsory rationing of meat, butter and fats came into force on February 25 throughout London and the home counties. It adds: "Fourteen million people are now restricted to about 1¼ lbs. of meat, 4 oz. of butter or margarine and ½ lb. of sugar per week. By March 25 compulsory rationing of these food stuffs will be universal in the United Kingdom. The congestion on the railways in the United States continues to aggravate the already serious situation. Every carload of wheat or flour and bacon or frozen meat that Canada can get to the sea-board is badly wanted.

"The Italian Government Commission states that the food situation there is unchanged but all the Allied countries are naturally affected by the decreased imports reaching them from American ports."

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

PEAS—THE STOCKMAN'S CROP.

The high price at which peas have sold on the market for the last two years has given a decided impetus to their production. Canadian production in 1917 exceeded the previous year by nearly a million bushels. This is as it should be. The production of peas is lower than that of any of the cereals. Insect pests, diseases and the low price decreased the production of this important legume previous to the war, but since then, due to the rapidly rising price of the last three years, the acreage has been greatly increased, especially in the provinces of Quebec, Saskatchewan and Alberta. When we consider the numerous ways in which one can utilize this crop either in the seed or on the vine it is surprising that pea growing has not received an even greater impetus than it did last season.

Split peas and whole peas especially in Canada occupy a prominent place in human diet in that delectable food, pea soup. Pea meal is a very proteinaceous food excellent for use in a balanced ration for stock-feeding purposes, furnishing as it does a low priced concentrate. Considering the high price of concentrates, the farmer who has a crop of peas, that he can convert into pea meal, is doing much to free himself from danger of exploitation at the hands of feed dealers. Unthreshed peas are of great value for sheep feeding purposes, being an ideal winter roughage for breeding ewes while they are likewise an excellent feed for young cattle. They can also be successfully grown with oats and ensiled, furnishing where corn cannot be grown one of the most valuable silage foods, or again the same mixture can be cured as hay and fed with profit throughout the winter. As a summer pasture for hogs, they return profitable gains, an acre of peas forming a most valuable adjunct to the summer ration coming in at a time when young shoats are able to make the best use of this kind of feed.

The successful culture of peas is largely a matter of climate. Being a legume instead of a cereal, they are classed among those crops known as soil improvers. While they do not do their best on light soils particularly during a period of dry weather, yet almost any heavy well drained soil that has not been robbed of its virgin fertility will produce a good crop. The best results are obtained by putting them on sod land which has been ploughed the previous autumn and thoroughly top-worked before seeding.

Peas cannot be sown as early as wheat or oats, owing to the tenderness of the young vines which a late spring frost is apt to damage seriously, also the cold and dampness of the seed bed may cause a rotting of the seed. It is impossible to give an exact date when it is desirable to start pea seeding, but this is a general rule that may be followed: If you have sown your wheat on the earliest date possible, the seeding of peas may be commenced from ten to fourteen days afterwards. This rule might be modified in certain localities, depending entirely on the local weather conditions.

We would recommend farmers who are in extreme northern districts, and who are desirous of trying out peas, to start in a small way. As peas are subject to severe injury from frost both in the late spring and early autumn, it would be poor advice to recommend any farmer who is situated north of the 50th parallel in the eastern provinces, and north of the 53rd parallel in the prairie provinces, to sow a large acreage until he is certain that they will escape late spring and early fall frosts.

The many ways in which one can utilize a few acres of peas with profit, should tend to make this one of our most popular crops instead of occupying, as it does, a lower place than any of the Canadian cereals. There are no cultural difficulties to discourage the farmer while the chief insect pest, the weevil, can always be successfully controlled by the sulphide treatment.

There is a large place for peas in our farming and stockfeeding practices, much larger than has been thought by most of our practical agriculturists.—Experimental Farms Note.

Hogs

Ten days previous to farrowing, the sow should be removed from other hogs and placed in her farrowing quarters. This familiarizes the sow with her new home, and prevents the danger of injury which might result in the loss of her litter. The quarters should not be too large, especially in cold weather. A pen nine by six feet is amply large for farrowing. A guard rail around the edge of the pen is a necessary precaution. The guard rail is nothing more than a shelf extending around the sides and ends of the pen. This shelf should be about six inches from the floor and should be from six to eight inches in width. Such an arrangement prevents heavy sows from crushing their litters.

The bedding in the farrowing pen should not be too abundant. With too much bedding the sow makes a pit to farrow in, which brings about the crushing of the pigs.

For three or four days previous to farrowing the rations of the sow should be reduced in quantity and be of a laxative nature. A ration too heavy or rich may stimulate an abnormal milk flow, and result in sours and death among pigs.

Uses of Salt.

A smoky or dull fire can be made clear by throwing a handful of salt over it.

Lemon juice and salt will clean copper and brass.

To brighten carpets, wring a cloth out of salt water and rub the carpets well.

Ink stains that are freshly made can be removed from carpets by successive applications of dry salt.

Handfuls of salt will clean saucepans and take away the unpleasant smell of onions if they have been cooked in them.

Nearly every kind of basket work, matting or china can be cleaned by washing with salt and water.

Salt in water will take insects from vegetables.

Before adding vinegar to mint for sauce always add a pinch of salt. This prevents the mint from going brown and greatly improves the flavor.

Tiles will look bright and clean if scrubbed with salt.

Tea Economy.

A great secret of tea economy is to add only a small quantity of boiling water at first and allow it to "draw" before adding the rest. Tea so made is much better and stronger than when all the water is added at once.

CARE OF HATCHING EGGS

By James B. Watson.

To insure eggs being produced next winter the pullets must be hatched early this spring. One difficulty often times experienced in hatching early chicks is to get eggs that are fertile. However, if vigorous males are with healthy females and not too many females with one male, little trouble from this source may be encountered.

The eggs to be placed in incubation must have careful handling. The eggs ought to be gathered daily and then not subjected to extreme or sudden changes of temperature. After the eggs are gathered they should be placed in a location not subject to variations of temperature and for this reason a dry cellar is possibly the best place to store the eggs until they are ready to be placed in incubation. It is important to hunt the eggs several times per day if they are to be placed in incubation because if they are not the different hens using the same nest will sit on these eggs and in the course of a day the eggs are brought up to incubating heat several times a day and this is detrimental to the germ of the egg.

Use Care in Handling Eggs

This year while we are trying to conserve on every hand and trying to produce the largest amount of foods ever produced it is important that we use every means possible to gain this end and consequently we can not exercise too much care in handling the eggs.

The hands should be clean in handling the hatching eggs. It is well to wash the hands before gathering the eggs. Any oily substances on the hands may be rubbed on the egg and thus close up the minute pore in the shell through which the unborn chick breathes. Some also assert that diseases of various kinds may be transmitted to the egg through dirty hands.

There has also been more or less trouble encountered with deformed and crippled incubator chicks. In fact, we don't believe we have ever taken off a hatch from the incubator but what there were several deformed chicks, while on the other hand, we don't think we ever removed a clutch of chicks from a hen and found a single deformed chick among the lot and this is the case after thirty years' experience with chickens. Much experimenting has been carried on with the hope of finding the cause of this trouble, but nothing has been found that will absolutely overcome the difficulty.

The subject of white diarrhoea of young chicks has been given scientific study but as yet no absolute cure or preventative has been discovered and about the only thing to do is to use precautionary measures as the proper handling of the hatching eggs.

Keeping The Eggs

Eggs that are intended for hatching should be gathered several times per day and taken to some location where the temperature will not vary to any great extent. For this reason the dry cellar is probably the best place. Although should the cellar be quite damp the eggs held therein may not hatch well because the film of moisture that will collect on them will affect their hatchability materially.

The small end of the egg should be placed down, to protect the air space in the large end of the egg, and then eggs should be gently turned daily. Eggs intended for hatching should not be held over two weeks or ten days, although we have held them for three weeks and had excellent hatches, but to hold eggs for such long periods is not to be encouraged.

Rough handling of eggs may break or loosen the egg germ from its location. The egg germ is the little white disk-like spot noticed on the yolk when the egg is broken open. In receiving hatching eggs from a distance the shipper usually advises the receiver to allow the eggs to sit for twenty-four hours before placing them in incubation, this is done to allow the germ in the egg to right itself. Also to allow the egg to settle and the air space to become normal.

It sometimes happens that the eggs in the nest that are wanted for incubation become badly soiled and if they are not cleaned the hatch may be interferred with. Soiled eggs should be washed in lukewarm water to clean them of the dirt. Although experiments have been shown that a hatch of 62.5 per cent. has been secured of unwashed eggs and forty per cent. of washed eggs. However, the statement is not clear whether the eggs were washed with a solution of alcohol or creolin to overcome white diarrhoea or merely in clear water to clean them of dirt and filth. The trouble from dirty eggs may be overcome if the fowls are not permitted to forage in dirty and filthy quarters and if clean litter and plenty of nesting material is supplied.

In the above some suggestions have been made upon the care of the hatching eggs seem small within themselves but will do much toward insuring success and are applicable whether the eggs are to be placed under hens or in incubators.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

What May be Done for a Crying Baby?

S. R.—My little girl, two and a half years old, refuses to sleep during the day and at night cries and screams terribly unless I remain in the room with her. Do you think it is proper to let her scream until she falls asleep, or should she be punished, and if so what sort of punishment? Do you think I ought to give in to her?

The subject is a large and important one and appeals to almost every mother who looks after her children herself, as every mother ought to do, if she can. Upon the way this subject is treated, much depends as to the future welfare of each individual baby.

There are many things which must first be excluded before one decides how a crying baby is to be treated in any given case, and in all cases patience and love and avoidance of anger must be practised to the very limit of your endurance, and then some more.

Exclude, first of all, as a cause for crying, pain—for babies have feelings and are subject to painful impressions, just like other folks, whether from safety pins, tight clothing, or stomachache.

Of course you must find out whether the crying is due to these, or to any other removable cause.

Then there is the matter of disposition; a baby whose mother was fretful and hysterical during her pregnancy, or suffered with grief or worry or great disappointment or a brutal husband, will almost certainly be a crying baby.

It is born so, it can't help it, and the only thing a mother can do is to be patient and pitiful.

But a child may also inherit a bad temper from one or both parents, and cry and cry from sheer ugliness.

With a little study and discrimination it becomes very easy to differentiate a wilful, angry cry from a cry of pain.

Even then, don't get angry if you can help it, neither allow your sympathy and love to overcome your judgment.

Sometimes a judicious, remember judicious, use of the hand, or slipper, will be a real benefit an' kindness; and it may be surprising how quickly, under such treatment, the baby will learn and appreciate who is master or mistress of the household.

Babies often have more intelligence than they are given credit for, and quickly learn to put two and two together.

If you can stand the annoyance, and it is not too much of an imposition on your neighbors, it would be better for the baby to keep on crying until she is tired out and then goes to sleep, than to give in to her.

You won't have to go through the experience many times, and if you give up to her you may have to do it for an indefinite period.

Now don't say I am cruel and don't know what I am talking about, for I have seen and handled many babies during many years of professional life, and more than that, I am very fond of them.

But it often happens that you can best show your love for a baby, not by yielding to his will, but by endeavoring to have him submit to yours.

QUESTIONS AND ANSWERS

W. K. H.—Have been called, examined and passed for the draft, but am troubled with constipation, aching at the end of the spine and dryness of the face and ears. I would like to get in good condition before being called.

Answer—I entirely sympathize with you in your desire to get yourself into good condition so that you may serve the country. I would suggest that you drink at least two quarts of milk a day and that you take a dose of castor oil each night before going to bed. It would also be desirable for you to get eight or nine hours sleep, if possible, every night and take as much exercise out of doors as you can. I hope this will put you in first class condition for service.

The Soil Builder.

It should be our first ambition to win the war, but while our burning desires are leading us to make a supreme effort just now, let us remember that there may be just as loud and earnest calls for grains and meats for a few years to come; and while we work hard to do our best let us consider it our duty to so manage that the possibilities of the production of grains and meats will be as great at the end of the period of the war, be it long or short, as they are to-day.

Those who are soil robbers and follow the plan of special crop farming for their own selfish gains alone, have a narrow vision of life and its meaning and live in a narrow sphere. But the man who lives and strives for the best interests of humanity, whether in high life or among the teeming masses has a large and noble soul; and is capable of enjoying many benefits which flow from the fountains of love and true happiness, while he leaves influences behind which will lighten the burdens of life which would otherwise bear heavily on the deserving and innocent members of future generations.

Bees Worthy of Much Care.

Every colony of bees should be managed so that it will produce as much honey as possible during the coming summer. Since the sugar supply is limited on account of the demand abroad there is no danger of over-production of honey for some time to come. Prices offered for extracted honey to-day are three times what they were a little more than a years ago. Bees are worth giving the best of care, and c[illegible]ew in inadequate hives should [illegible]ferred to modern ones at fruit[illegible]soming time, be given plenty of room for brood rearing, and be provided with a storage of honey. Bees are the only agents capable of recovering the tons and tons of nectar that will be available from all sorts of flowers during the growing season. Without bees all this is wasted.

To Escape Moths.

An old English method of keeping moths from blankets during the summer is to wash them thoroughly and pack them away with slices of yellow soap and folded newspaper between. Moths dislike the smell of soap or printers' ink.

Easy Fig Pudding.—One-half pound cooking figs, one and one-half cups cold water, two tablespoons brown sugar, one cup boiling water, two tablespoons corn starch (dissolved), one-inch stick cinnamon, nuts, lemon juice. Cut up figs, let soak in cold water for half an hour. Boil till soft. Add sugar, boiling water, cornstarch dissolved in cold water, cinnamon and a few nuts cut up. Boil till clear. Just before removing from stove add a little lemon juice. Let cool. Serve with top milk or whipped cream. This recipe serves six people.

BIRDS SAVE CROPS

The protection of birds and the problem of food production bear a close relationship, according to E. H. Forbush, an ornithologist of Massachusetts, in a talk recently given at the State College of Agriculture at Cornell.

So valuable are the birds in protecting crops from insect pests, that without them, the grass crop, which is the biggest of all crops the world over, would hardly be possible. The birds feed on the pests which kill the grass, especially those which eat the roots.

Dr. Forbush gives the birds a practically complete alibi as enemies of the farmer. He backs his statements by as many specific instances in which birds have saved crops that those who heed his words will protect those feathered friends. Protection of the birds is not merely a matter of sentiment, but has a fundamental economic basis.

Parent birds work incessantly to keep their young sufficiently fed. A young bird is about the biggest eater in the world. Audubon, the great naturalist declared a woodcock would eat its weight in worms in a night. It has since been shown that it will do better than this; and it will eat twice its weight in twenty-four hours. In proportion to his size, if a man needed as much food as a young robin it would mean he would have to eat a bologna sausage 67 feet long and 9 inches in circumference each day.

A farmer who thought the robins were pulling up his young cabbages learned from a student of bird life that the birds were pulling up only those plants which were dead; and this was to get at the wire worms at the root, which had caused the plants to die, and which would destroy other cabbages if left alone. In another case a group of farmers thought the meadow larks were destroying their crops. An ornithologist persuaded one farmer to spare the larks on his place. The other farmers shot them. The result was that the man who spared the larks was the only one for miles around who had an oat crop. The birds killed the insects which destroyed the other crops.

A Massachusetts cranberry grower suffered heavy loss from a worm which ate the berries. He encouraged the birds to build in his bog and in a few seasons he found he was bothered not at all by the worms.

Birds may be encouraged to build in orchards by having suitable nesting boxes provided and by being protected from their enemies. Their presence will favorably affect fruit production. They also help save the trees, because there are various birds which protect different parts of the tree; some feed on the insects which work at the roots; some on those which bore into the bark, and still others on those which eat the leaves.

Poultry

The first sign of a hen being broody (wanting to set) is that she stays longer on the nest when laying, and on being approached will quite likely remain and make a clucking noise, ruffle her feathers and peck at the intruder. When it is noted that a hen sets on a nest from two to three nights in succession and that the feathers are disappearing from her breast, which should feel hot to the hand, she is ready to be transferred for setting to a nest which has previously been prepared. The normal temperature of a hen is from 106 to 107 degrees F., which varies slightly during incubation.

The nest should be in some quiet, out of the way place, where the setting hen will not be disturbed. Move her from the regular laying nest at night and handle her carefully in doing so. Put a china egg or two in the nest where she is to set and place a board over the opening so that she cannot get off.

Toward the evening of the second day quietly go in where she is setting, leave some feed and water, remove the board from the front or top of the nest and let the hen come off when she is ready. Should she return to the nest after feeding remove the china egg or eggs and put under those that are to be incubated. If the nests are slightly darkened the hens are less likely to become restless.

At hatching time they should be confined and not be disturbed until the hatch is completed, unless they become restless, when it may be best to remove the chicks that are hatched first. In cool weather it is best not to put more than ten eggs under a hen, while later in the spring one can put twelve to fifteen, according to the size of the hen.

Dust the hen thoroughly with insect powder, and in applying the powder hold the hen by the feet, head down, working the powder well into the feathers, giving special attention to regions around the vent and under the wings. The powder should also be sprinkled in the nest.

The Strawberry Bed.

A poor stand of strawberry plants is often the result of late planting. Order the plants and have them on hand early in the spring so that they may be set out at the earliest opportunity. Have the bed well prepared as for a garden crop. Mark the rows off three and one-half or four feet apart and set the plants every one and one-half or two feet in the row. Place the plants so that the crowns are just above the ground, and firm the earth well about the roots.

Before planting, if the roots are too long, they should be shortened in as it is no advantage to have them longer than four or five inches. It is a well-known fact that plants absorb water by means of their roots and give water up to the air through their leaves. In a newly set plant, which has not yet become established in the soil, the absorption of water is very slow, but the loss of water through the leaves continues. In a dry season, therefore, we should reduce this loss to a minimum, by removing all leaves which have opened when we transplant; ordinarily two leaves are left. Do not expose the plants unnecessarily to the drying effects of the wind and sun, but keep them shaded and moist while planting.

Uncover asparagus beds and rhubarb plants. Fork over the beds lightly. Set out asparagus and rhubarb as soon as the ground can be made ready.

CUT OUT AND FOLD ON DOTTED LINES

Now, puppy, you must hold a ball
Upon your nose; don't let it fall.
And then to make a better trick,
I'll balance something on this stick.

The Paisley Advocate

PAISLEY, APRIL 17th, 1918

—Premier Borden and the Union Government have a live problem before them in the Quebec situation, and the success with which it is handled will very much influence public opinion for or against the administration. Bourassa and Lavergne cannot be allowed to oppose the will of the sovreign people without being brought to book as other treasonable offenders.

—A reader asks why Canadian publications cannot be sent to our boys at the front by merely attaching a stamp as is being done in the United States. We have asked the same question of the Post Office Department. The reply is a quotation of red tape regulations. Real executive ability in the department and appreciation of the fact that war makes new conditions would mean some attempt to change such regulations.—Financial Post.

—Idleness among men in Canada is to be more than merely frowned upon. It is to be suppressed by law. An order-in-council has been adopted by the Government providing that every male person shall be regularly engaged in some useful occupation, with the exception of persons under sixteen years of age and over sixty, or physically unfit, or a student, or temporarily unemployed. Violation of the provisions renders liability to a penalty not exceeding one hundred dollars or in default to imprisonment with hard labor not exceeding six months.

—There will be no more title tags hung on the names of Canadian citizens, if the motion introduced in the House of Commons by Mr. Nickle, the member from Kingston, goes through. Of those upon whom the honor of knighthood has been conferred, there are at least two—Sir Wilfrid Laurier and Sir Wm. McKenzie—who are to-day willing to have the titular appendix removed and resume life as plain Mr. Evidently they have found the honor to be as empty as it looks to others. The wife of a Sir also states that it costs a lot of money to wear the title, as they are soaked for big prices on everything they buy particularly while travelling, and are appealed to for big donations towards all manner of schemes. According to this, if we had a poor enemy to whom we wished the worst, it would be a good trick to get him a knighthood.

—Two dollars and forty cents was the price paid for a bag of potatoes by a Kingston lady, according to a recent press report. One of the potatoes had a card attached signed by the farmer who grew them, which said: "I sold at $1.00; what did you pay?" Here again we are faced with the ubiquitous middleman, concerning whose elimination much ink has been shed. Now there are middlemen and middlemen, which is to say that some middlemen are necessary and some are not, and the best way to find out whether a given middleman is necessary or not is to try to get along without him. A man interested in the subject suggests that the farmers advertise in the condensed adv. columns of the newspapers what they have to sell, and the consumers also advertise for what they want to buy. The cost would be small, and it should bring the buyer and seller together without requiring any middleman. The plan should work out in any community, large or small, with a saving of time and worry to both parties.

—Quebecers appear to have the idea that the Military Service Act is not being put into effect in other places in the same vigorous way as in the ancient capital of old Lower Canada. This is the excuse that they have down there for bursting into riotousness when the Dominion police collared some of the young fellows who looked well enough to go to trenchdom in France. But the fact is that in Ontario cities and larger towns the police and military have been very busy rounding up defaulters by exactly the same methods as were being tried in Quebec. We haven't seen much of the enforcement process in villages, but a healthy young man is not safe to go to Toronto without his exemption papers or marriage certificate, as he is pretty certain to be asked why he is not in khaki, and must show reason satisfactory to the officer or go to the military headquarters and be enrolled as a soldier. The time has come when slackers cannot longer be tolerated in Quebec or any other province in this Dominion. Military service for the defence of his country, and for the still wider ideal of humanity, is the privilege of every able-bodied young man. If he fails to appreciate his duty and his opportunity, in the economy of a true democracy, it is but just that he should be schooled in it and brought to service.

—In the past it has been the habit of many people to complain bitterly about lack of regulations in regard to waste, and to lay responsibility upon the Dominion Government. The constant remark was, "Why does not the Government do something!" The cold storage in some far off city like Winnipeg would develop some imperfection and some thousands of pounds of food would be spoiled. Then immediately would arise the question, "Why doesn't the Government do something!" The fact that local initiative might "do something" was slow to occur to many good people. The new order against waste makes it abundantly clear that the Government has "done something." It has, in fact, done all it could without creating special and expensive machinery to do more. It has followed the principle of local enforcement and the decentralization of authority. It has provided stiff fines for those who break the law against waste of food, and it has provided that prosecutions be undertaken by local officers. Thus, if the municipal health inspector or any municipal officer discovers waste in a local cold storage warehouse, store, restaurant or hotel, he lays the charge before a police magistrate or two justices of the peace and, securing a conviction, secures onehalf the fine for his municipality. Similarly, in the case of a provincial officer securing a conviction. The penalties are fairly stiff ones, the fines being limited to amounts between $100 and $1000, with the alternative of imprisonment up to three months. If circumstances warrant it, and wastefulness by neglect be flagrant, both fine and imprisonment may be imposed. Further, if local authorities learn that food is being held when it should be sold for fear of spoiling, they have only to notify the Canada Food Board. The Board is, in its turn, authorized to notify the offender that the goods must be immediately sold, and in default of obedience, the Board itself may step in and seize the goods and sell them. Most people in this country realize that there is a great war raging and that people on whom the world depends are in danger of starvation. Some few apparently do not. This new law will do much to teach them.

—Toronto Saturday Night thus alludes to a little piece of business at Ottawa which, it seems, it is up to the members of the austere senatorial body to explain: Evidence is at hand of the active entrance of women into the political arena. Members of the Canadian Senate have purchased at Government expense, of courses, one hundred ladies' handbags at $8 each, and forty ladies' purses at $5.50 each. Auditor-General Fraser, who voiced a protest before Parliament in respect to spending Government money in this manner, is set to inform us on whom these gew-gaws were bestowed. We have heard of buying a colored gentleman's vote with a ham, but a woman's support purchased with an $8 handbag or a $5.50 purse is a new note in politics. As Government waste goes at Ottawa, this is, of course, a mere flea bite, but when our staid old senators slide down the hill of virtue to the extent of grafting fairy trifles for their sisters, their cousins and their aunts, and then have the nerve to declaim on public platforms on the necessity of more production, plainer living, cutting out the luxuries, and all that sort of thing, it inclines the average citizen to get hot under the collar. And, by the way, who got those bags and purses? The Senate contains roughly ninety members, so there are sufficient eight-dollar handbags to go around one to the family, with the goodly margin of ten over. Add the forty purses and it would seem that the Hon. Senators' female relations are fairly well taken care of."

—We recall an old bit of information to the effect that in China the doctors are paid for keeping people well, not for treating them when they are sick. The Chinese way has for long impressed us as a more rational one than prevails in our medical service. In the Canadian Courier we find an article by "A Medical Man," in which reasons are advanced why the competitive system in the practice of medicine should be advocated in favor of a public utility scheme. The writer would have the doctors paid a salary as a civil servant and assigned a definite district to serve, salary to be provided by the state and raised by local taxation. Thus the public health would be looked after in the same way as public education. "A Medical Man" reasons it out as follows: "Education has become compulsory. Therefore the teaching profession are appointed and paid by the state. Public health is even more important than education. The state enforces certain restrictions to safeguard health generally, but leaves the vast extent of personal health to be cared for by individual choice, at personal expense. It is safe to say that the sum paid for medicines and treatment, exclusive of all sums for proprietory remedies and doubtful forms of treatment which always come high, would greatly exceed the sum total necessary for a state-paid medical profession and free dispensaries; for necessarily the professional chemist would be included in the general reform. Five dollars per capita would hardly cover the present medical bill for Ontario annually, but it would be amply sufficient to employ all the doctors necessary to serve any province in Canada and give a more efficient service in the conservation of pubic health. There would be far less sickness than now. There would be prompt measures to treat cases which perish by delay of diagnosis and treatment. There would be no incentive to say that "the doctor keeps people sick". His chief aim would be to keep them well. As a civil servant he would be available to everybody, and obliged to do his best for their needs."

Where Is the Vocation that Will Compare with Farming?

(The Toronto Globe)

That the new experience in farm life which several thousand boys and young men from the high schools, colleges and universities will obtain during the coming summer months will induce not a few of them to select agriculture as a permanent vocation there can scarcely be any doubt. If there is a vocation in life more natural to man than any other it is farming. It does not afford the same opportunities for amassing a fortune as certain branches of trade and industry. But for the insuring of an ample competence there is no other vocation which affords better average opportunities. A good farmer with a good farm is certain of a comfortable existence from the financial standpoint, which is more than can be said of many other occupations apparently of greater attraction. But, after all, the idea that happiness is determined by the extent of one's wealth is camouflage of the mind. A moderate competence with a healthy body is better than great wealth and poor health, and it needs no mathematical demonstration or philosophical treatise to prove the advantage of agricultural pursuits if the most desirable things in life are to be attained.

—Lack of success is not caused by a dearth of opportunities, but through failure to harvest the crop.

INTESTINAL PARALYSIS

"Fruit-a-tives" Quickly Relieved This Chronic Trouble

589 Cadorath Street, Montreal.

"In my opinion, no other medicine is so curative for Constipation and Indigestion as 'Fruit-a-tives'.

I was a sufferer from these complaints for five years, and my sedentary occupation, Music, brought about a kind of *Intestinal Paralysis; with nasty Headaches*, belching gas, drowsiness after eating, and pain in the back.

I was induced to try 'Fruit-a-tives' and now for six months I have been entirely well". A. ROSENBURG.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

THE RELIGION OF MEN IN WAR

Hamilton Herald

Read the testimony of the Rev. McLean Watt, the "piping parson" of the Gordon Highlanders, in a recent address in New York. He said:

"There is no bigotry in martial religion. I slept with a Jesuit priest. We ate together, talked together, and worked together. His Jesuitry did not taint my Presbyterianism, nor did my Presbyterianism poison his Jesuitry. We buried all side by side, and let God sort them out. And right here let me say that you people who are always quarrelling and fussing over religion will find that you must change that kind of religion when those boys come home."

So be it. The war will not have been fought in vain if out of its hell of hatred and agony there emerge in large measure the graces of forbearance and brotherly kindness and charity among those of different creeds.

Stratford Herald

Set your houses in order before the boys come back, is the virtual command of a Scotch clergyman, Rev. Lauchlan McLean Watt, of St. Stephen's church, Edinburgh. He was chaplain of the Black Watch and the Gordon Highlanders divisions, and went through some of the most terrible battles in France with these battalions and saw both commands virtually cut to pieces. At a supper of the Canadian Club in New York the press report him as saying:

"What are you religious men going to do when the boys come home—those boys who have missed death, but who have come so close to the eternal mystery? Those boys and we chaplains are sick of your squabbles in the name of Jesus Christ. We are not going to tolerate longer the old divisions between men and the old fights between churches which have divided communities. In death and facing death there is no difference as to religion. We leave it to God to sort them out as they fall battling for those liberties which He gave to all men."

The type of religious man at the front is not one of home-brew either, according to this reporter:

"I want to say to you that in the trenches and camp you will not find any plaster saints. Thank God for that. Sloppy religion is all dropped into the Channel as the boys are crossing. You will find true, straight, fearless men, tender and ready to live earnestly, or to die without a grudge even against their enemies. Thank the Lord that's the kind of men the Allies have in France."

TO FACILITATE VOLUNTARY ENLISTMENT

For the purpose of giving increased facilities for the voluntary enlistment of men in the Canadian Expeditionary Force, who are not called under the military service act, medical examiners have been appointed in the various cities, towns and villages in Military District No. 1.

Men not called out under the military service act, who are desirous of volunteering for service in the C. E. F., may apply to these medical examiners, who will examine them, and if they are found "fit" will supply them with transportation to the mobilization centre at the armories, London, Ontario, where they will be examined by a medical board, and if found "fit" they will be at once taken on the strength of a C. E. F. unit.

They will be given a choice to select any available unit, provided they be in the necessary qualifications.

If found "unfit" these men will be supplied with lodging and meals until a return train is available, and will be given return transportation and receive pay for lost time in going to London.

Dr. Houston is the medical examiner at Paisley.

—The April issue of Rod and Gun is replete with interesting stories and articles for the out of doors man. Among the stories appearing in this month's issue are "Following the Fur Bearers," by Bonnycastle Dale; "The Mysterious Wolf Pack," by A. W. Peck; "The Job," by Marvin Leslie Hayward; "Just Fishing," by Mark G. McElhinney; "A Soldier Fisherman," by Helen Guthrie; "A Trip Down Peace River," by Harry W. Laughy; "The Way of the Mighty," by H. C. Haddon; Rivers of the North," by Mabel Burkholder, etc., etc. The regular departments are well maintained, those devoted to fishing, guns and ammunition, kennel etc., being of special interest to sportsmen featuring these particular branches of sport and outdoor life. This representative Canadian sportsman's magazine is published by W. J. Taylor, Limited, Woodstock, Ont.

—It is a great thing to make a fortune. There is one thing greater, and that is to keep it when made.

—The dangers of hermit life were shown lately by a death in Puslinch township. Alex Thompson, a farmer, died alone, and the mail courier, noting that his mail box was filling up, and that he hadn't been seen for two weeks, started an investigation. In the stable they found four cattle dead from starvation, and other cattle, five horses, and forty-two pigs in a bad way. Breaking into the house they found the man stiff in bed, and from his appearance had been dead two weeks. He had never been known to invite anyone to his house.

MARCH TO VICTORY

Courage is a matter of the blood. Without good red blood a man has a weak heart and poor nerves.

In the spring is the best time to take stock of one's condition. If the blood is thin and watery, face pale or pimply, generally weak, tired and listless, one should take a spring tonic. One that will do the spring house-cleaning, an old-fashioned herbal remedy that was used by everybody nearly 60 years ago is still safe and sane because it contains no alcohol or narcotic. It is made up of Blood root, Golden Seal root, Oregon Grape root, Queen's root, Stone root, Black Cherry bark—extracted with glycerine and made into liquid or tablets. This blood tonic was first put out by Dr. Pierce in ready-to-use form and since then has been sold by million bottles as Dr. Pierce's Golden Medical Discovery. If druggists do not keep this in tablet form, send 50 cents for a vial to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., or branch in Bridgeburg, Ont.

CENTRAL BUTTE, SASK.—"I have used Dr. Pierce's Golden Medical Discovery for a number of years and am pleased to recommend it as a blood purifier. I know it has no equal, as I used it for my boy. My neighbors and friends were surprised with the results: in fact, I do not think he would be alive to-day had it not been for the 'Medical Discovery.' I also keep it on hand for coughs as it differs so from other medicines, instead of upsetting the stomach as cough syrups do it is good for the stomach. I only wish I had known about Dr. Pierce's medicines sooner."—MRS. PERCY WOOD.

DO YOU EAT TOO MUCH?

Hon. Everett Colby is reported to have jarred the foundations of Toronto in his addresses on the food question on Wednesday last. It is perhaps the most tragical fact of the war that Americans and Canadians are eating their way to defeat. We have not been told the facts about food on this side of the Atlantic with the same frankness that the premier of Britain has stated the military situation. The Allies required 400,000,000 bushels of wheat, and we ate so much more last year, instead of less, that the Allies in Europe only got 200,000,000 bushels. Lord Rhondda was frightfully shocked when he heard this, as Mr. Colby reports, having been with him when the British food controller heard the news.

Mr. Colby explained that the munition workers and others had made so much money out of the war they spent it on food instead of saving. The result is starvation for the people of Europe. The failure to fix prices allowed everything to soar to incredible heights. Wages followed, and with this plethora of money we have had a carnival.

"Selfishness, thoughtlessness and ignorance, these are the causes of the loss of food," says Mr. Colby. As long as these remain, and as long as no stringent regulations exist to correct the results of such evils, little improvement is to be expected.

Mr. Colby supplies a schedule for families to follow. Every householder can judge for himself how great a sinner he is against the cause of civilization and humanity.

"Don't let anyone in your household," he says, "exceed 1½ lbs. flour per week, 2½ lbs. meat, 7 ounces butter, 7 ounces fat, 7 ounces flour for use as a binder. Live up to these rations, and you are doing your share."

CANADIANS PUT UP A JOKE

One of the latest war stories from the Somme was told by Will Irwin with apologies to Bertrand Russell and Sir Charles Ramsey, pacifists, who are charged in England with serving unintentionally the ends of the German government. Things were quiet on a little stretch of the western front one day when some Canadians got hold of two top hats, which put an idea into their minds. A big sign was hoisted over the Canadian trenches, reading: "Asquith and Lloyd George will be in this part of the line tomorrow morning." The next morning the two high silk hats were plainly visible above the Canadian trenches to German observers. As the hats went bobbing along, a furious bombardment was begun by the Germans. The hats disappeared, and as soon as the German guns were silenced another sign appeared over the Canadian trenches: "You have killed Berty Russell and Charlie Ramsay."—Youths' Companion.

FOR FREE IMPLEMENTS

(Winnipeg Tribune)

Just as surely as people refuse to buy eggs or meat at high prices, so the effect of high prices for farm machinery is to block the purchase of implements necessary for the development of the soil. If soil production is one of the great essentials to make Canada more effective and helpful in the war, then the cheapening of farm implements is necessary. The director of food production in Canada, Hon. Charles A. Dunning, advises the Ottawa Government that the import duties on farm machinery militate against increase in production. He advises that the import tax be removed as a war measure. There is no gainsaying the truth of what Mr. Dunning says. Every farmer in the three western provinces, producing food for ourselves and for our allies, demands that the farm implement duties be removed. Mr. Dunning's representations to the Government must be seriously considered by the cabinet in a few days.

A BLIND PIG

J. E. Stone, license inspector for South Essex, discovered a blind pig at Tenasse Meloche's farm at Armstrong, Ont., and received one of the surprises of his life. Acting on some hint, he and a couple of detectives blew into Meloche's place, knocked at the door and walked in, telling the surprised man that they understood he was running a blind pig. Mr. Meloche pleaded guilty to having one, but not running it, and leading the officials out the back door he escorted them to the barn, where he called the pigs up and readily pointed out the animal which was blind as a bat. There being no evidence of any wrong-doing in this respect the inspector and detectives gave him a clear bill and departed.

—Wm. Barry, whose parents live at Dunkeld, had his leg broken while working on the C.N.R. in Northern Ontario, and has been brought to his home. The injured man is a returned soldier, who had his other leg shattered at the battle of Ypres in April, 1915, and was also gassed.

—Judge Greig reserved decision in an action brought by Mr. Thos. Inglis and his son Scott, against Mr. John Darling and his son William, in the Division Court here on Tuesday to recover $50 damages for the cutting down and destroying of a large shade tree near the plaintiff's farm in Carrick. As the Carrick council had sold the tree, which is on the roadside, for $2, and authorized him to cut it down, the township is implicated in the case.—Herald and Times.

"Here, boy," called an English commercial to a newsboy in the Joint station, Aberdeen. "Run and get me a sandwich, and bring it along to the Deeside train as fast as you can." The lad got two pence and was about to start off when the commercial added—"Better have one for yourself while you are at it," and giving him another couple of coppers. The train was just moving out of the station when the canny little fellow jumped on to the carriage munching a sandwich. Handing the commercial two pence, he remarked: "Here maister, here's your tuppence; they only had one."

SUPPLYING FRESH MEAT TO ARMY IN THE FIELD

Technical Problem Which Has Confronted Leading Armies Since the Beginning of Wars and Which Helps to Determine Victory or Defeat

It is a trite reflection that modern science has revolutionized methods of warfare. But the more obvious instance which such reflection calls to mind—gas tanks, liquid fire, and so forth—have, by reason of their sensational character, obscured many more significant developments which have taken place unnoticed and passed without comment.

Take, for instance, the problem of supplying fresh meat to an army in the field. Here is a technical problem which has confronted army leaders since the beginning of wars—a problem the solution of which might have given Napoleon victory instead of defeat in 1812. To-day the British army rationing scale allows one pound of meat daily to the troops in the trenches and three-quarters of a pound to those at home; and, further it requires each soldier at the front to carry one pound of meat in his kit. It is worth considering, briefly the measures by which an army equal to one-fifth of the male population of the United Kingdom before the war has been supplied with meat on this scale, for they amount to something like a revolution in the methods of army supply.

The introduction of frozen meat has opened a new chapter in the history of provisioning of armies. It was supplied to the British army for the first time during the South African campaign, and the success of the operation was undoubted. The popularity of frozen meat on the civil markets has, moreover, grown rapidly during the past few years, and before the war 40 per cent. of the meat consumed in Great Britian was brought from abroad in this way.

At the very outset of the war it was decided to renew the South African experiment, and the board of trade at once entered into negotiations with firms importing meat from the Argentine for a monthly supply of 15,000 tons of frozen meat for the army and navy. Later a meat committee of the board of trade was set up and entrusted with the work of importing meat, not only for the use of the British army, but also for the French and Italian Governments, and for the British civil population. The principal source of supply is the Argentine, where running contracts have been entered into with the River Plate meat companies, which practically cover the whole of the export trade of South America. The patriotic action of the British dominions has also opened a very valuable source of supply. Australia and New Zealand have reserved the entire surplus supply of meat for the use of the Imperial Government and over £40,000,000 worth of beef, mutton and lamb have been brought from these countries.

To carry these enormous quantities of meat to the troops the board of trade have found it necessary to requisition the whole of the insulated space of the shipping engaged in the frozen meat traffic. Some of the meat is brought to England, but the greater part of that required for the armies at the various fronts is carried directly to the base ports, where it is discharged to the cold stores erected for the purpose of storing meat until it is required for consumption. This method has obviated the necessity of holding up shipping unnecessarily, 30,000 tons of meat per month being supplied by these methods to the army, and 25,000 tons to the armies of British Allies. The cost up to the beginning of 1916 was about 12½ cents per pound, but it has since risen to about 16½ cents. The whole of the fresh meat issued to the army is thus entirely brought from abroad in a frozen state. Requisitioning in France is insignificant, and the herds of cattle which followed the troops in previous campaigns, and were slaughtered, have quite disappeared.

Frozen meat constitutes 60 per cent of the total meat issued to the British troops abroad. The remainder is made up of preserved meat of several varieties. The ration scale allows nine ounces of preserved meat per man per day to be issued if fresh or frozen meat is not available, and each soldier is also required to carry in his kit one nominal pound of preserved meat as part of his emergency ration. The most familiar form of preserved meat ration is "bully beef," which consists of corned beef packed in small oblong, hermetically sealed tins, containing twelve ounces. This is the form which is issued for the emergency ration, since, whilst the tin remains unbroken, the meat is imperishable. Some units cook their "bully beef," others prefer it raw. But in whatever way it is eaten it is a healthy and, when taken in moderation, by no means unpleasant form of food, and comprised the principal article of diet of the British army on the Gallipoli Peninsula.

Another form of preserved ration is a combination of about nine ounces of meat and half pound of potatoes and other vegetables, cooked, and packed in a small round tin. This is warmed up, either by heating in the tin or by boiling the contents in a camp kettle, when it forms a stew which has achieved no small degree of popularity among the troops. This ration, which is known as "Meat and Vegetable Ration," is manufactured in England by about 30 firms, working under the inspection of the local government board. Another form of preserved rations is pork and beans, familiar to all Canadians. Pork and beans are obtained through the Canadian Pacific Railway Co., and were introduced on an experimental scale in March, 1916. Two months later pork and beans were established as part of the normal ration, and many hundred thousand tins are now sent out weekly.

Purchases of preserved meat rations have been made by the British war office on a scale which it is not easy to realize. Three and a half million tins of preserved meat and vegetable rations are sent out weekly to the troops in France, and since the outbreak of war the army contracts department has bought some 400,000,000 tins of preserved meat. In other words, taking each tin to weigh one pound, the British army has been supplied with over 178,500 tons of preserved meat, a weight roughly equivalent to that of six super-dreadnoughts.

"Women Arguing"

Two Scottish women were arguing as to which was the thriftier. First woman—"Do you see that purse? Weel, that's my first ane, an' it's a guid as the day I got it. Ye canna beat that, noo, can ye?" Second woman—"Michty me! What a silly boast. Ye ken Dugal, my husband?" "Oh, ay, what aboot him?" "Weel, he's my first man, an' noo you've yer third. Sae dina preach thrift tae me again."

HOW THE TROUBLE STARTS

If more people knew how Rheumatism and kindred ills started there would be infinitely less suffering.

It should be a matter of popular knowledge that the blood stream completes the circulation of the body in approximately three minutes, gathering up waste matters. It is the function of the Kidneys to remove these impurities or poisons from the blood and eliminate them from the body. Should there be any derangement of the Kidney action the poisons are not eliminated but are carried around again in the blood stream, to accumulate slowly and cause sickness and distress. Then follow pains in the back, in the region of the Kidneys, Rheumatism, constant headaches, and the many complaints arising from derangements of the Kidneys or Bladder. First, the Kidneys must be put in order and until these organs are toned and regulated no real health is possible. Gin Pills contain the medicinal and tonic properties that the Kidneys require.

You can get Gin Pills at all dealers—50c a box or 6 boxes for $2.50, or a sample will be sent free upon request to the National Drug & Chemical Co. of Canada, Limited, Toronto, or to the U.S. address, 202 Main St., Buffalo, N.Y. 124

DISSOLUTION OF PARTNERSHIP

NOTICE is hereby given that the partnership heretofore existing between Joshua Bell and Robert Bell as brick and tile manufacturers, under the firm name of Bell Bros., has been dissolved, and the business will hereafter be carried on by Robert Bell & Son.

All accounts due the firm of Bell Bros. must be settled by cash or note by May 1st, 1918.

Dated at Paisley, April 8th, 1918.

GREAT MEMORIAL OF STONE

IN COMMEMORATION OF VIMY RIDGE HEROES.

Cross-Crowned Column, Girdled by Spent German Shells, Lasting Tribute to Canadians.

When France smashed forward against the Loretto Ridge, the little Souchez literally ran red with blood. Now the river is clean again, but runs through a wilderness, and Souchez church is a tumbled mass of ruins. Under its shadow are the nameless graves of France, says a correspondent on March 16th. The shrine of Our Lady of Lorette upon the ridge no longer knows the worship of the people of little villages, for what were villages are mounds of broken stone and waste. Tradition says that when the church came first under heavy bombardment the French poilus, toiling in their trenches, made another, an earthly shrine, for Our Lady under their own parapet—and so worshipped until they died in their thousands to win a ridge. That ridge is won, but under its protection lie many cemeteries. In one, row follows upon row of little earthen mounds—upon each mound a cross—over each cross the rosette of the Republic—upon each cross only the words "Un Inconnu" (an unknown). The men of Canada—coming from overseas and speaking a foreign tongue—have helped in building that cemetery to the glorious unknown dead of the Republic.

Vimy Ridge Memorial.

All over this area from Lorette Ridge and on to Arras are French and British and Canadian cemeteries. Canadian soldiers lie side by side with the dead of Britain and France. Here is a little cross of stone. Its writing tells that it was erected by one of the sons of the Dominion by "his chums from St. Catherines, Ont." Standing out upon the Vimy Ridge is a memorial of stone, enclosed with German armor piercing shells and crowned with a great cross. Only a few days ago the commander of the Canadian Corps and General Byng, another well beloved leader, and many men of Canada and the Empire, stood here while Canon Scott read a simple service, and the flag of the Dominion draping the memorial was lifted that men might read what was written on the bronze tablet underneath.

Erected in Memory of
Officers, Non-commissioned Officers and Men of the Canadian Corps Artillery,
Who Fell During the Vimy Operations April, 1917.
Canadian Field Artillery
Royal Field Artillery,
Canadian Garrison Artillery,
Royal Garrison Artillery,
South African Field Artillery.

The whole land tells of death and heroism and stern endurance to the great end that freedom may triumph and civilization endure. There are graves besides the guns and near the guns, gunners are tilling the land for vegetable gardens, and farmers have ploughed the soil for the crop that the fall will bring. The guns are growling louder every day for the spirit of the living is not less than of the dead, and it is in the minds of those who fight that whenever the end be written, it will not come until victory is won. Three and a half years of war find France strong of heart. Britain, head of empire, leads it yet. Canada, stronger on the battlefront than ever before, gives the enemy little rest. On the other side of Vimy, in Lens and Avion and along a white line that cannot be defined, the captains and the subalterns and the men under veteran leaders keep worrying the enemy night and day. It is routine trench warfare. There is little to report that stands out amidst the commonplaces of the period. But night after night, under cloudless skies and bright moonlight, or in blinding storms and darkness, our reconnoitring and battle patrols are out in No Man's Land. Flares lighten the landscape for a moment and go out, adding night to night. Snipers' bullets whine through the darkness. Machine guns chatter across the unclaimed spaces. An enemy raiding party attacks, is held up by one of our posts, is repulsed. The raid has fallen before reaching our wire, but two men of the post are wounded and the third will not return. A party of pioneers is working in a certain part of the line. An enemy barrage sweeps that trench with shell. The daily report gives it as an incident. The pioneers know the cost.

The Progress of War.

The cry of "gas" disturbs the night and the faces of men are hidden under protecting helmets that turn those who line the trench into grotesque figures of some mediaeval horror. Men go "over the top" with bullets whining around them, overwhelm an enemy post and stealing through opposing wire are into hostile trenches with knobkerrys and revolvers, rifles and bombs and grenades for ten minutes of hell. Then they come back with their prisoners and "no casualties"—or with their prisoners they bring back their own wounded and their dead. A patrol goes out and returns with prisoners—or it may not return. A battery position—shelled intermittently all day—is shelled again at night. The daily communique tells little to the uninitiated. The war is too big for incidents.

So the days and nights pass. Behind the ridge are the graves of France and Empire. Beyond the ridge the men of Canada fight with that sure gallantry which countless gentlemen have made the tradition of the Dominion. The heart of France beats high. America moves mightily to the firing line. The guns as they mutter and growl have that in their tone which tells of inquiry as if they were asking what the year would bring forth, but the undertone is one of confidence. For here in the battle line men anticipate victory. Their message to those behind them is one of hope. They will do their work. It will be done well. They ask that those at home should fight with them; be of their spirit; share their courage; back them up.

DOCTOR'S VISIT COSTS DIME.

The Ordinary Charge of Medical Men in China.

The cost of a doctor's visit in China ranges from 5 to 10 cents. One would think that, inasmuch as they are so cheap, nobody would be without doctor's visits in China, but, as a fact, the Chinese get along with as few of them as possible. The reason is said to be that the Mongolian doctors use such abominable medicines. Extracts of all sorts of creeping things enter into the Chinese drug list, and people are averse to taking them, except in case of extreme necessity.

It is possible that doctors have purposely provided themselves with these offensive remedies as a means of self-protection. It would be very wearying to be a popular physician at 5 cents a visit; he might run his legs off and get no sleep. He accordingly makes himself unpopular through the medium of medicines decocted of beetles and grasshoppers and such things. He prefers simple poverty to poverty complicated with running about.

A Song of Faith.

I planted my seed in my garden today,
And I turned my face to the sun,
With a steadfast hope that a rose would repay
The work my faith had begun.

I buried my love in a grave one day
And I hid my face from the sun,
And I shrouded myself in mourning grey,
And felt that all joy was gone.

O soul, that can plant, with faith, a seed,
And trust it will grow and bloom,
Why mourn in despair, that God had need
Of thy love? Why hide in gloom?

If the seed thou hast sown will bring a rose,
With fragrance and beauty so rare,
Will the Risen Lord, who thy heart-need knows,
Care less for thy love laid there?

Ground cloves are excellent in cupboards where ants are found. The insects will not cross a circle of cloves.

ATTITUDE OF THE GERMAN PRESS

CRIES "ONWARD" IF OUTLOOK IS BRIGHT.

Whines When Outlook Blackens—Many Still Pin Hopes of Victory On the U-Boats.

The German newspapers vacillate in their attitude toward the war they are waging against civilization. A study of them reveals no heroic but somewhat unsuccessful determination to demonstrate to their readers that Germany is fighting against an outraged world. Some of the newspapers maintain persistently that all the tigers in the universe have decided to prowl in the peaceful and godlike valleys of Germany, but others make reluctant acknowledgment that it is difficult to satisfy one's self all the rest of the world can be wrong and only Germany right.

Many of the newspapers fluctuate with the news from the fronts. When things go badly there are guarded outbursts against annexations and indemnities; when the war god seems to smile on the Central Empires there are vigorous demands that the "war of defence" be prosecuted till England and her allies have been crushed.

Scant mention was made of the offensive which was the live topic of discussion in the newspapers in allied countries. Occasional references to it were based on the belief the nation could not afford another drenching of blood, and that the fate of Germany should be intrusted to Von Tirpitz and the submarine.

"Dastardly Attacks."

Angry protests appeared in most of the newspapers against the bombing of German cities by the French and English. Bombardments of railway stations and barracks, which have been the only targets of the allied airmen, were branded as dastardly attacks upon the civil population.

With the utter collapse of Russia and the seizure by Germany of Russian territory the press gathered new hope and optimism. The newspapers, to one who reads them carefully, are a true mirror of the German temperament as it is understood by the average citizen. When the outlook is bright the German says "Onward." When the outlook blackens he whines. Nowhere is there to be found among the editorial comments anything which smacks of the altruism shown by the labor of the civilized world for the people of the Central Empires. An epitome of the entire German press, as read and studied by the officials of Great Britain, and by civilians as well, is, "Continue the war as long as there is hope of crushing England and the other Allies."

The newspapers show clearly also that the business people of Germany are growing concerned about the commercial future of Germany, particularly in view of the hatred engendered in the United States and Great Britain. Articles published about shipyards and factories indicate the Germans expect an end of the war before a great while and are figuring on an immediate resumption of world trading. They will, to judge from the reports, have more ships than they intend to leave for the rest of the world and count on steaming out upon the seven seas with the finest merchant fleet afloat the moment the banner of peace is unfurled.

"Glorious" Work of U-Boat.

The U-boat campaign is the chief reliance of the Germans. An article on this topic recently appeared in the Hanover Kurier. It reads:

"We are entirely at a loss to understand the mentality of so many Germans who are still unconvinced regarding the decisive efficacy of the U-boat war.

"These unreasoning people forget that the very fact that it is the Central Powers which have now become the aggressors, while the Entente forces have been pushed back on the defensive, is in no small measure due to the U-boats.

"More than that, however, the submarine campaign has greatly weakened our chief enemy in view of the coming decisive land battles, and there can be no question that he will be still further weakened. In these circumstances, not even the intervention of America can avert England's spectacular defeat if our U-boats continue their activities as hitherto.

"This is the tremendous and glorious work that the U-boat is accomplishing. We trust that the fact may now be thoroughly grasped by the doubters. If they fail to see it they are likely candidates for the madhouse or the idiot asylum."

In the Frankische Tagespost, of Mannheim (one of the cities bombed by the Allies), appears this somewhat different sentiment:

"The people are rousing themselves. For nearly four years they have been the mute sufferers, they have sacrificed blood and treasure, they have been subjected to privations untold, they have been all but famished; and now they have had enough of suffering. They demand in a voice of command—no longer of entreaty—peace, freedom, bread!

"Away with all official subterfuge! The speeches of the government's men ring with phrases concerning the right of self-determination of the peoples. Well, then, the German people are ready to show what they understand by these words.

"If in the high places the voice of the people is heeded all will be well; if not, machines will be stopped, workshops and factories will be deserted once again, and the hum of labor shall not be heard until the people's long overdue rights to peace, to freedom and to bread be conceded."

"RATS" OF VARIOUS DEGREES.

System of Promotion in Vogue in Germany.

One of the most successful ways of disciplining the German people, says former United States Ambassador Gerard in My Four Years in Germany, is by the Rat system. Rat means councillor, and is a title of honor given to anyone who has attained a certain measure of success or standing in his chosen business or profession. For example, a business man is made a commerce Rat; a lawyer, a justice Rat; a doctor, a sanitary Rat; an architect or builder, a building Rat; a keeper of the archives, an archive Rat; and so on. They are created in this way: first, a man becomes a plain Rat; later, he becomes a secret Rat, a privy councillor; still later, a secret court Rat, and later still, a wirklicher, or really and truly a secret court Rat, to which may be added the title of "excellency," which puts the man at the head of the Rat ladder.

The system works insidiously. By German custom, the woman always carries the husband's title. The wife of a successful builder is known as Mrs. Really-Truly-Secret-Court-Building Rat, and her social precedence over the other women depends entirely upon her husband's position in the Rat class. Titles of nobility alone do not count when they come in contact with a high government position. Now, if a lawyer gets to be about forty years old and is not some sort of Rat, his wife begins to nag him, and his friends and relatives look at him with suspicion. There must be something in his life that prevents his obtaining the coveted distinction; and if there is anything in a man's past, if he has shown at any time any spirit of opposition to the government, as disclosed by the police registers, which are kept written up-to-date about every German citizen, then he has no chance of obtaining any of the distinctions that make up so much of the social life of Germany. It is a means by which the government keeps a far tighter hold on the intellectual part of the population than it could if it used threats of torture and the stake.

The Social Democrats who of course have declared themselves against the existing system of government and in favor of a republic, can receive no distinctions from the government, because they dared to lift their voices and pens in criticism of the existing order. For them there is the fear of the law. Convictions of the crime of lese majesty are of almost daily occurrence. At the opening of the war an amnesty was granted in many of these cases, the ministry of war withdrawing many prosecutions against citizens who were waiting their trial in jail because they had dared to speak disrespectfully of the army.

The AUTOMOBILE

The Cost of Speed.

The driver who persists in operating his motor car at high speeds may elude constables and police, but he cannot escape from the penalties which natural mechanical laws levy upon his car. Here are ten reasons why it is expensive, dangerous, and inconsiderate of others to speed.

Tires last about twice as long on a car that is driven at 16 miles an hour as upon cars driven at 30 miles an hour. Speeding generates heat, which is an enemy to rubber.

Driving a car around a sharp corner at 25 miles an hour does more damage to the tires than 20 miles of straight road work. Excessive side pressure on tires may pinch the tubes, and it always strains the side walls of the casings.

High speeds are likely to cause skidding and breakage of springs and steering gear, any of which are dangerous when speeding.

In proportion to the mileage obtained, high speeds require more gasoline and oil than a moderate rate of traveling.

Driving a car at excessive speed, especially over rough roads, subjects the bearings to enormous strains, causing them to wear much more rapidly than if the same mileage had been covered at moderate speed.

High speed may cause crystallization of rapidly moving metal parts that are subject to strain, and these may break at any time without warning.

A high rate of travel over earth, gravel, or macadam roads results in excessive dust and in injuries to the road.

High speed interfere with the accuracy of steering, as is shown by the number of reckless driver who have gone over banks and into ditches, especially on curves.

It is a strain on the eyes and the nerves of the driver and also of other passengers in the car.

Finally it is a menace to the pleasure and safety of others who used the road.

The majority of modern motor cars develop their maximum efficiency with lowest expense at speeds ranging from 15 to 25 miles an hour, depending on the make of car and condition of the road. Within this range of speed any accident that may occur is not likely to be serious; it is fast enough not to be "poky," and the car will give good service over a long period of time.

Gasoline Economy.

Since the high cost of living has begun seriously to include the price of gasoline, I have been seeking to devise ways and means by which a greater mileage can be obtained. A few of my experiments have proved so successful that I will give them for the benefit of other motorists.

If one will remember to leave the cut-out open when coasting along undulating country roads the engine may be cut off completely without fear of bursting the muffler. The slight exertion of energy to throw the switch off and on will, in a day's running, save a considerable amount of fuel.

Driving on pavement and city streets one can also be economical by shutting off the engine half a block or more before the stopping place is reached. It is quite unnecessary, and harmful as well, to tax the motor with gas, only to jam on the brakes at the curb a moment later. The natural impetus of the car will carry it much further than one realizes.

A strong spark may be employ to strengthen the motive power of the gasoline. Inexperienced drivers too often leave their spark lever below its point of highest efficiency, thereby overheating the motor and reducing the speed value of the open throttle.

Through these and similar simple devices I am getting an average of 16 miles to the gallon from my "Big Six."—A B.

INTRODUCING TOMMY ATKINS.

Some of His Characteristics Described by Famous Writer, Ian Hay.

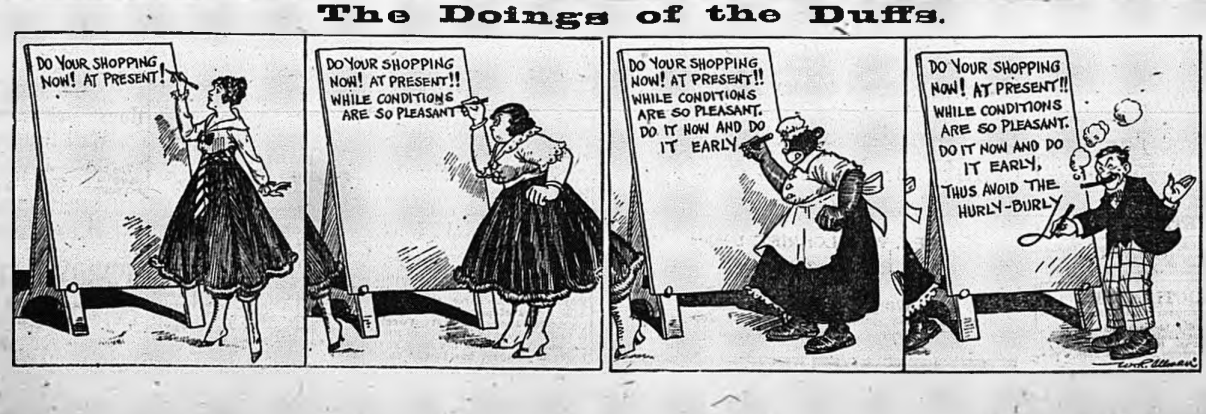
At the present moment we are right back at rest once more, and are being treated with a consideration amounting almost to indulgence, which convinces us that we are being "fattened up"—to employ the gruesome but expressive phraseology of the moment—for some particularly strenuous enterprise in the near future, writes Ian Hay from France before the great drive.

Well, we are ready. And, above all, victory is in the air. We are going into our next fight with new-born confidence in the powers behind us; and it is this very faculty—philosophic trust, coupled with absolute lack of imagination—which makes the British soldier the most invincible person in the world. The Frenchman is inspired to glorious deeds by his great spirit and passionate love of his own sacred soil. The German fights, as he thinks, like a machine. But the British Tommy wins through owing to his entire indifference to the pros and cons of the tactical situation.

Put the average Tommy into a Trench under fire. How does he comport himself? Does he begin by striking an attitude and hurling defiance at the foe? No. He begins by inquiring, in no uncertain voice, where his —— dinner is? He then examines his new quarters. Before him stands a parapet, buttressed mayhap with hurdles or bulks of timber, the whole being designed to preserved his life from hostile projectiles. How does he treat this bulwark? Unless closely watched, he will begin to chop it up for firewood.

His next proceeding is to construct for himself a place of shelter. This sounds a sensible proceeding, but here again it is a case of "safety second." A British Tommy regards himself as completely protected from the assaults of his enemies if he can lay a sheet of corrugated iron roofing across his bit of trench and sit underneath it. At any rate, it keeps the rain off, and that is all that his instincts demand of him. An ounce of comfort is worth a pound of security.

He looks about him. The parapet here requires fresh sandbags; there the trench needs pumping out. Does he fill sandbags or pump of his own volition? Not at all. Unless removely supervised, he will devote the rest of the morning to inventing and chalking up a title for his new dugout—"Jock's Lodge," or "Burns' Cottage," or "Cyclists' Rest"—supplemented by a cautionary notice, such as—"No admittance. This Means you."



Thereafter, with shells whistling over his head, he will decorate the parapet in his immediate vicinity with picture-postcards and cigarette photographs. Then he leans back with a happy sigh. His work is done. His home from home is furnished. He is now at leisure to think about "they Gairmans" again. That may sound like an exaggeration, but "comfort first" is the motto of that lovable but imprudent grasshopper, Thomas Atkins, all the time.

Cabbage and cauliflower plants should be set out as early as possible and onion sets planted. Tomatoes, egg plants and peppers are not to be set out until the ground and weather are warm.

"We stood in a circle around the adventurous dead. I have rarely attended so moving a scene—this brave comrade, so beloved by all, one of the first to go, a sacrifice to this experiment of bombardment by night."

Give me the man who can hold on when others let go, who pushes ahead when others turn back, who stiffens up when others weaken, who knows no such word as "can't" or "give up"; and I will show you a man who will win in the end, no matter what obstacles confront him.—Marden.

The Doings of the Duffs.

Springtime Fashions

This is a very good suit for the small boy. McCall Pattern No. 7808, Boy's Suit. In 4 sizes, 2 to 8 years. Price, 15 cents.

A simple dress, requiring very little material indeed! McCall Pattern No. 8227, Ladies' One-Piece Dress. In 6 sizes, 34 to 44 bust. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

Why He Was Solicitous.

Canon Curcton was to preach at the Abbey on a certain saint's day when the boys of Westminster School attended service and afterwards had the rest of the day as a holiday. Mr. Curcton was looking over his sermon when his son asked anxiously, "Father, is your sermon long?" "No, Jimmy, not very." "But how long?" "Well, about twenty minutes, I should say. But why?" "Because the boys said they would thrash me if you are more than half an hour."

Devise schemes to make the sow take exercise. Keep the sow growing thriftily, but do not fatten.

PARIS SHELLED BY HUN GUNS.

Church, Dating From Middle Ages, Struck on Good Friday.

There was from the first a mystery regarding the purpose, the military necessity, of the big gun which the Germans have been firing on Paris, the gun which has added "a new page to the fame and history of Krupp," and which was "an achievement of German science and labor," for which the Kaiser has expressed his imperial thanks.

From its position in the forest of St. Gobain, it had intermittently dropped shells into the French capital. But Paris was depopulated of soldiers except the wounded and the invalid after the beginning of the offensive on the western front. The shells had not fallen upon the defences of the city; they had wrecked small buildings in the outskirts or dug holes in the pavements, causing less damage than the usual aerial bombardments.

Persistence and practice that could profit from failure improved the marksmanship of the gunners. Good Friday one of their shells was dropped on a Paris church, demolishing the building, killing seventy-five persons and wounding ninety.

"The shell struck the north side of the church, bringing down part of the roof and opening a breach twelve feet high and twenty feet wide. Nearly all the debris fell inward upon the heads of the worshippers sixty feet below.

"The edifice is now a heartrending sight. The enormous mass of stone, crumbled into all shapes and sizes, lies in the middle of the nave and piled to about the same height as the high altar, which was not damaged. The side aisles are littered with less cumbersome wreckage and the pavement is covered with gray dust. All the stained glass windows, some of which were of historical interest, are shattered. The church, although begun in the Middle Ages, was remodelled in the epoch of the Renaissance. The beauty of its musical services, which were sung unaccompanied, attracted many music lovers."

Another victory that will have a place in the catalogue of Kultur's achievements with the aerial raids on London, the burning of the university and library of Louvain, the bombardment of the Venetian churches and art treasures, the wrecking of Il Sarte of Padua, the destruction of the Rheims Cathedral and the sinking of the Lusitania!

FAMOUS MEN WHO LOVED CATS.

And Declared That Their Company Was Conducive to Work.

Had you any idea that some of our greatest men liked to have cats about them, and even declared that they could work better in their company.

Very often George Washington is said to have met visitors with a kitten perched upon his shoulder, and Daniel Webster adopted every stray cat he met.

Old Dr. Johnson rescued half-drowned kittens and took them home to his study, where they were stuffed with good things till they looked like little barrels.

Sir Walter Scott had a warlike cat called Hinse, who lorded it over both dogs and cats. One day she made the author's great staghound weep aloud because she would not let him go up the stairs to his master's study. With her back up she dared him to come on and be scratched.

Dean Swift is the man who had two holes cut in his study door, so that the cats might go in and out as they pleased. He said that the large hole was for the big cats and the small hole for the kittens.

The story is told of Mohammed that being constantly followed by cats, which were attached to him, he one day cut away the sleeve of a handsome robe so that he might not disturb a sleeping cat that had taken refuge there.

BOMB OWN LEGATION.

Germans Ask France to Pay for Damage to Paris Buildings.

During the recent German aerial attack on Paris one of the enemy aviators dropped a bomb which struck and damaged the embassy building of one of the Central Powers. Two days later the caretaker of the building requested the legation of the neutral Power representing the enemy country to present a bill to the French Government for damages done to the building.

France is asked to pay $900 for destruction by the enemy of his own property.

Silver-Plating Fake.

The street faker finds ready sale for bottles of so-called "liquid silverplate." To show how beautifully it works he takes a spoon or fork, much worn or perhaps of base metal, and dips it into the solution. Then, taking it out, he wipes it with a rag and lo! it is bright and silvery.

Such solutions are sometimes advertised for "restoring silverware" in the home. Housewives buy them and the first results are pleasing.

Unfortunately, however, the brightness quickly disappears and the "plating" wears off. The stuff is not silver at all, but mercury salts.

Prune and tie up the roses and syringe with tobacco to prevent insect attacks later.

PAINT NOT A BIT!
LIFT YOUR CORNS OR CALLUSES OFF

No humbug! Apply a few drops then just lift them away with fingers.

This new drug is an ether compound discovered by a Cincinnati chemist. It is called freezone, and can now be obtained in tiny bottles as here shown at very little cost from any drug store. Just ask for freezone. Apply a drop or two directly upon a tender corn or callus and instantly the soreness disappears. Shortly you will find the corn or callus so loose that you can lift it off, root and all, with the fingers.

Not a twinge of pain, soreness or irritation; not even the slightest smarting, either when applying freezone or afterwards.

This drug doesn't eat up the corn or callus, but shrivels them so they loosen and come right out. It is no humbug! It works like a charm. For a few cents you can get rid of every hard corn, soft corn or corn between the toes, as well as painful calluses on bottom of your feet. It never disappoints and never burns, bites or inflames. If your druggist hasn't any freezone yet, tell him to get a little bottle for you from his wholesale house.

HEROES OF THE ROAD

In order to give some recognition to men who have done so much to build up its fine record of efficiency, the Canadian Pacific has decided on a new policy which should attract wide interest. Hitherto on this continent railway locomotives have been identified by numbers only—a practice which has prevailed elsewhere except on certain English railways. For the future it has been decided to name certain of the Canadian Pacific locomotives after the engineers, who by meritorious conduct or by acts of special bravery have, in the opinion of the management, earned the right to special distinction.

Some of these names may even be taken from the 92 engineers who are on the pension list, whose names breathe of long, meritorious, faithful and in some cases markedly distinguished service.

Over two thousand locomotives run in the Canadian Pacific service, with over two thousand engineers. It is not the intention to name every locomotive at once, but only those in passenger service, and to keep each name as a privilege and a reward. The idea is one which should appeal to every man who knows the value of personality in good railroading. It appeals to the C.P.R. because it will make for efficiency and encourage that esprit de corps which is the keynote of the whole Canadian Pacific System. The engineer does not think of his locomotive merely as a machine. It is something almost human to him. "She's a good engine," you hear one call to a passing conductor, "but full of hard luck." It takes an engineer months to master the peculiarities of a new locomotive, and for that reason he is not much in love with any pooling system, preferring to have one engine at any rate "assigned" to him—an engine that he can almost call his own. Were he to know that his favorite engine would eventually bear his own name, surely he would take greater pride than ever in work well done.

Very Slow.

For two years the most decorous courtship of Sandy and Lisbeth has slowly progressed. One Sabbath night, after a silence of an hour, Lisbeth murmured:—

"A penny for your thochts, Sandy."

"Weel," replied Sandy, with boldness, "I was jist thinkin' how fine it wad be if ye were tae gie me a wee bit kissie."

Lisbeth kissed him. Then twenty-seven minutes of silence.

"An' what are ye thinkin' about the noo, Sandy—anither?"

"Nae, nae, lassie; it's mair serious the noo."

"Is it, laddie?" asked Lisbeth, softly, her heart going pit-a-pat. "An' what micht it be?"

"I was jist thinkin'," answered Sandy, "that it was aboot time ye were paying me that penny for my thochts."

CANCER, TUMORS, LUMPS, ETC. (internal and external) cured without pain by our home treatment. Write us before too late. Dr. Hoffman Medical Co., Limited, Collingwood, Ont.

Diet For The Second Year.

In feeding young children no sudden changes should be made in the diet unless ordered by a physician. New foods should be introduced one at a time, and only a little fed for the first few feedings so that the effect may be watched. During the second year the number of meals should be reduced, if possible, from five to four per day, the last to be given at six o'clock and the baby then put to bed. A healthy child will usually make this change for himself. In the case of delicate infants it is sometimes better to give a small amount of food at more frequent intervals, but the average child does better with fewer and larger meals, giving the stomach time to rest.

During the second year the following foods may be safely introduced: Broths, beef, mutton, and chicken; the milk from oyster stew or creamed vegetable soups with stale bread, toast or crackers; baked potatoes, bits of well shredded meat if there are plenty of teeth; creamed carrots, mashed fine; baked apples, prune pulp, tapioca pudding, the juice from roasts or steak on bread or potato; chopped spinach, and always eggs and plenty of milk.

Never give tea or coffee to any child at any age. They do not need stimulants, and the effect on the nervous system is very bad. The proper drink is milk, or water. A quart of milk a day in addition to solid foods is not too much.

Give plenty of well cooked cereals, rice, oat meal and wheat cereals. The wheat cereals should be cooked in the double boiler at least one hour; the oat meal two hours.

Minard's Liniment Cures Diphtheria.

Baking powder biscuit can be made with half flour and half corn meal.

A Dyspepsia Cure

M.D. advises "Persons who suffer from severe indigestion and constipation can cure themselves by taking fifteen to thirty drops of Extract of Roots after each meal and at bedtime. This remedy is known as Mother Seigel's Curative Syrup in the drug trade." Get the genuine. 50c. and $1.00 Bottles.

Takes out the inflammation... Boils, Burns, Infected cuts, Scalds, Bruises, Abscess and Carbuncles and Abscesses. Works like magic! Not a secret medicine, it tells on... FIRST REMEDY COMPANY, Hamilton, Canada.

PRESERVE the LEATHER

BENZINE STOVE POLISH.

Its Use Has Led to Many Serious Accidents.

In the last eight years, according to the U.S. Bureau of Standards, there have been in that country more than 400 serious accidents due to the use of benzine stove polish. A number of women have been burned to death.

Many brands of stove polish contain benzine. It has the advantage of causing the polish to dry quickly—a point that strongly recommends it to housewives. The danger is so great, however, that, say the U.S. Government experts, it should be banished.

The directions accompanying a benzine polish usually state that it should not be used on a hot stove. But this warning is likely to be ignored; and even if the stove be cold, there may be danger from an open light in the room—the benzine vaporizing and causing an explosion.

Only fireproof polishes should be used, even though it may take a few minutes longer to do the work.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

Every boy should realize that, having received untold benefits from the freest and best government on earth, he holds his services in trust for the preservation of Democracy on which that government rests. Although he may have to endure aching limbs and sore muscles in field and factory, he will be happy in the consciousness that he has had a real part in winning the war.

Use a garden line in sowing peas so the rows may be perfectly straight. Crooked rows are annoying to the eye of an accurate person. Peas should have all manured ground and if carefully sown will not need thinning. Plant in double rows, staking tall varieties with brush between the rows as soon as the plants are up.

Minard's Liniment for sale everywhere.

In planning ornamental plantings for home grounds remember that both the picture you see from the home and the picture the passerby sees from the street must be considered.

BEFORE and AFTER
Using Cuticura

The first thing to do in restoring dry, thin and failing hair is to get rid of the cause, viz.: dandruff, itching and irritation of the scalp. Rub Cuticura Ointment into the scalp skin, especially spots of dandruff and itching. Follow at once with hot Cuticura Soap shampoo. If a man, next morning if a woman. Rinse with tepid water. Make Cuticura your every-day toilet preparations.

Sample Each Free by Mail. Address post-card: "Cuticura, Dept. N, Boston, U.S.A." Sold by Druggists and Dealers Everywhere.

Rheumatic Aches

Drive them out with Sloan's Liniment, the quick-acting, soothing liniment that penetrates without rubbing and relieves the pain. So much better than musty plasters or ointments; it does not stain the skin or clog the pores. Always have a bottle in the house for the aches and pains of rheumatism, sprains, lumbago, strains, sprains, stiff joints and all muscle soreness.

Conserve slow bottles at all druggists, 25c., 50c., $1.00.

Sloan's Liniment KILLS PAIN

WOMAN WORKS 15 HOURS A DAY

Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging down pains so badly that at times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist got me a bottle of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to a factory and work all day, come home and get supper and feel good. I don't know how many of my friends I have told what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. ANNA MITTERLANG, 86 West 10th St., Peru, Ind.

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

GLAMIS

Mr. Jas. Brown and family, of Paisley, spent the week end at Mr. S. Stevenson's.

Mr. Tom Colwell, who spent two months in the west, arrived home last week.

Mr. and Mrs. Kaake, of Underwood, called on friends in our village on Saturday.

Mrs. Everett, of Port Elgin, was a visitor in our burg on Friday.

A meeting of the beef ring was held at A. Kirktowe's on Monday evening.

Mrs. Thos. McIntosh intends spending some time with friends in Stratford.

Mr. Neil McLeod and family, of Niagara, purpose making their home for the present on the 2nd of Bruce.

Mrs. Catherine McGregor, of Kincardine, who is spending some time with her son Richard, was renewing old acquaintances in the Baptist church on Sunday evening.

Mrs. McSween and two children returned on Monday from Port Elgin, where she was spending a few days with friends.

Mr. McClung and Mr. McCauley motored to Tiverton on Saturday afternoon.

The ladies' Red Cross Society will pack a week from Thursday, and would like all articles in by then.

Rev. Mr. McClung is in Hamilton this week attending conference.

A very pleasant evening was spent at the home of Mrs. McIntosh and son Mr. David McIntosh, near Glamis, on April 11th, when a few of their friends and neighbors gathered to spend a social evening and make the following presentation and address:

To Mrs. McIntosh and Mr. David McIntosh:

Dear Friends—We, a few of your friends and neighbors, feeling that a fitting opportunity had presented itself, have met to express our kind regards for you both, and our sincere appreciation of the neighborly spirit in which you have lived and labored upon this farm. The announcement that you were having a sale of your stock and implements was interpreted in some quarters as meaning but one thing, namely, that you were about to move from our neighborhood. We are glad that we have reason to believe that this is not the case. But the knowledge that you were giving up farm operations in our midst, and the supposition that you might be leaving us, has brought forcibly to our minds the large place you hold in our affections and the magnitude of the loss we would sustain if you were to go away. We think to-night of the years as they have passed with sunshine and shadow, their joys and their sorrows. You have rejoiced with us when we rejoiced and wept with us when we have wept, and our hearts go out in gratitude to you for all your help and sympathy expressed in so many ways. And now since you will be relieved of the more arduous duties, we hope and pray that you both may be spared in health and strength to enjoy for many years the result of your labors, and find much joy and helpfulness in the fellowship of your friends. As a slight token of our affectionate regard and good wishes for you we ask you, Mrs. McIntosh, to accept this shawl, bedroom slippers and purse, and we ask you, Mr. McIntosh, to accept this bible, tie and pin and box of stationery. Signed on behalf of your friends and neighbors, Mrs. Robt. Wright, Mrs. Geo. Webb.

The chair was very fitly occupied by Rev. P. Reith, of Glamis. The address was read by Mrs. Reith, the presentation made by Mrs. Wright and Miss Elsie Webb. Mrs. McIntosh thanked all very kindly. During the evening there were speeches given and good Scotch music, both vocal and instrumental. A dainty luncheon was served by the ladies, after which all joined heartily in singing "Auld Lang Syne," when each departed to their respective homes hoping yet to spend many social evenings at Mrs. McIntosh's home.

CARGILL

Mr. and Mrs. L. Weis, of New Hamburg, visited at Mr. J. H. Brown's last week.

Mrs. Lobsinger, of Mildmay, spent a few days last week with Mrs. J. H. Brown.

Mrs. Earthy and sons, of Brantford, visited at Mrs. S. Anderson's last week.

Mr. and Mrs. H. Brownscombe are away on a visit to friends in Port Hope and Toronto.

Mrs. Ferguson and children, of Teeswater, visited at Hylehurst the past week.

Mr. and Mrs. J. R. Laidlaw and Miss Mary Laidlaw, of Paisley, visited in the village on Sunday.

Mrs. Irving, of Paisley, is here on on a visit to her niece, Mrs. Martin.

The packing committee of the Red Cross is very grateful to Mrs. Alf Garland for a donation of twenty large blocks of maple sugar to be used to send to our boys overseas.

Mr. Mrs. and Miss Hunstein and Rev. Mr. Wittig spent Sunday with friends in Port Elgin.

Miss Kenna spent the first of the week at her home in Ayton.

Rev. Mr. Wittig, of Arnprior, visited his son and daughter here over Sunday.

The Red Cross sewing contest closed on Monday night. We may be able to give full particulars of this next week.

ELORA ROAD NORTH

Wood-bees, dances and dog-fights are the order of the day.

We are sorry to report that Mrs. McNeil, the Dunblane post-mistress, is in poor health. Her brother, Mr. Archie Brown has also been under the weather.

Mr. Angus McDougall went to Saskatoon in charge of a load of horses.

Mr. Thos. Rae and family have moved out to his father's place where Mr. Rae will assist in running the farm.

Mr. Neil McArthur arrived home from Saskatoon last week. While out west Neil took a trip to Mannville, Alta., to see his brother Duncan.

PINKERTON

At the regular meeting of the Red Cross the following motion of sympathy was passed: "That we, the members of the Pinkerton Red Cross Society, extend our most sincere sympathy to Mrs. Pinkerton in her sad bereavement. In Mr. Pinkerton's death the whole community has sustained a real loss. He took an interest in many circles, and in each was sincere, always willing to help others without regard for himself. In him the Red Cross Society found a real friend, always ready to help us in any possible way. But the loss to the community is slight compared with that of Mrs. Pinkerton and her family. They lost a kind and loving husband and father. This motion is quite inadequate to express our sentiments, but we hope that it will in a slight degree express to Mrs. Pinkerton our deep feeling of sympathy."

The Mystic Tea, which was held in the C.O.F. hall on Monday evening, proved a decided success. The Greenock council presented Pte. Ross Woods, a returned soldier, with a $10 gold piece. An excellent supper was served, after which was a programme of musical selections and speeches by the different members of the council, and the presentation to Pte. Woods. The proceeds of the evening amounted to over $80.

TURNER'S

Farmers here have started seeding.

Miss Rodina McRae is spending a few days in Toronto.

Miss Annie Cairns is improving nicely after an operation for appendicitis.

Mr. Wm. Karcher shipped a car of hay from here last week.

RED CROSS WORKERS OF No. 14, BRUCE

Financial Report for 1917

Amount on hand, $28.82; Neil McGillivray's tea, $57.80; donation from Mr. Alex McGillivray (ex-reeve), $2; council grant, $35; Forrester's tea, $38.26; Walmsley's tea, $54.65; donations from S. S. No. 13 Bruce, $120; donations from race at picnic, $1; interest, $1.91—$309.44. Expenditures—Yarn, $28.80; buttons, 32c; goods at Port Elgin, $26.37; war stamps, 4c; Advocate, printing, $1.55; cheese cloth, $1.35; Hallday, Laidlaw & Co., sects., $103.81; sundries, 48c; balance on hand, $37.56—$309.44. Mrs C. S. White, Treasurer.

Contents of bales in April shipment: 21 flannel shirts, 1 hospital shirt, also 10 pairs socks and 2 flannel shirts sent to Nursing Sister Jessie Ross.

BORN

Howe—In Bruce Tp., on April 13th, to Mr. and Mrs. Wm. Howe, a daughter.

McGillivray—In Bruce Tp., on April 10th, to Mr. and Mrs. John H. McGillivray, a son.

DIED

Mitchell—At London, on April 12th, Jane Mitchell, widow of the late James Mitchell, of 2nd Saugeen, aged 76 years.

SAUGEEN COUNCIL

All the members of Saugeen council were present at their meeting on April 6th.

Communications received from J. W. Anderson, re sale of road allowance—ordered fyled; and from A. Miller, re elm trees in front of lot 31, con. 3: A committee of the reeve and Mr. Atkinson was appointed to investigate.

John Cook offered to operate grader at $1.10 per hour, and his offer was accepted.

It was decided to pay for work ordered done by pathmasters previous to February 9th at same rate as paid under men appointed on that date.

$200 was drawn from the bank to pay current accounts and the following orders issued: E. Chappell, 1.92 ft. cedar, $41.75; E. Chappell, breaking roads, etc., $1.50; E. Doll, do, $2; W. J. Pierson, do, $6.60; D. Currie, do, $21.40; Chris Bell, do, $16.87; Walt Gowanlock, jr., do, $7.75; Chas. Kettles, do, $5; Adam Maas, do, $5; D. J. Porter, do, $6; D. H. Chappell, do, $10.50; F. W. Elliott, 3 months' salary, $56.25; F. W. Elliott, registering 26 births, 4 marriages, 12 deaths, $8.40; The Times, printing, $11.00; The Advocate, printing, $1.50; W. Steele, filling washout, $4.50; council meeting No. 3, $14.95.

F. W. ELLIOTT, Clerk

CHILDREN'S AID WORK

Mr. T. H. Elliott, the newly appointed Children's Aid agent for Bruce County, arrived in Walkerton on Friday. Mr. Elliott comes highly recommended by Prov. Supt. J. J. Kelso. He is a young man who has had several years of valuable experience in the work, and has a fund of energy and enthusiasm for the undertaking that promises well for the future of children's aid work in Bruce. In those counties where an agent has given his whole time to the work, the Children's Aid Society has performed a public service which is widely recognized and appreciated. The possibilities of the service that a thorough organization in Bruce could accomplish with an active trained worker such as Mr. Elliott, are very great, and Mr. Elliott is very much impressed with the prospects. The hearty co-operation of the County Council and of citizens throughout the county will be of course needed. Local branches of the Society will be formed in the various municipalities as has been done in other organized counties. Mr. Elliott's idea is not to fill the local Shelter with children. The children are placed in good foster homes as soon as possible. This will mean keeping in close touch with the farmers throughout the county. Mr. Elliott was in the Children's Aid work for several years at Ottawa. For the past two years he has been at Detroit, doing social service work among the employes of the Ford Motor Works for Mr. Henry Ford.—Telescope.

A Sad Occurrance

After only four days' illness Miss Lillias Marjory, daughter of Mrs. Robt. Maxwell, of this town, passed away on Sunday. Spinal meningitis was the cause of her death. Miss Maxwell had been teaching in Todmorden school, in the suburbs of Toronto, up till Easter, but was not in good health from overwork when she came home for her holidays. Deceased was a particularly bright and active girl, and had taught with success before going to Toronto in No. 6 Elderslie and Sullivan, in No. 12 Elderslie, and Cantire schools, in all of which she gave splendid service, and her work was well spoken of by inspector, trustees, parents and pupils. Her sudden death has cast a gloom over the community. She was a brave Christian girl, and a loving mother and sister. aunts and uncles will always cherish the memory of the one who was so suddenly taken from them.—Enterprise.

Brant Pioneer Dead

On Friday, March 29th, there passed away one of the pioneers of Brant Tp. in the person of James Delemere Reilly (better known as Dell), after an illness of a little over two months. The deceased was born in Adjala Tp., Simcoe Co., in the year 1839, and came to Brant township in 1855 and settled on lot 21, con. 15, near Vesta, where he continued to live up to the time of his death. His wife predeceased him about ten years. He leaves a family of two sons and one daughter, all of whom were at his bedside when he passed away. They were as follows: Jas., on the 4th con.; Joseph, on the old homestead, and Mrs. John McGill, of Owen Sound. In religion he was a devout Roman Catholic.

—Mr. W. D. Reany, of Marquette, Mich., and well known here, sends us a lengthy report of how they treat men in Uncle Sam's land, who talk favorably of Kaiser Bill. A photographer in Duluth made some remarks of hostility to the United States. He was warned by a secret organization, the Knights of Liberty. Other seditious remarks from the photographer brought the Knights to his home, who took him out into the country and administered tar and feathers. Laudin was made to kneel and kiss the flag and acknowledge his wrong. It is said that the Knights of Liberty are being formed in every place in the States. They are composed of men unfit for military service, who propose to see to it that there are no pro-Germans among the people at home.—Port Elgin Times.

FOR FLETCHER'S
CASTORIA

White Feather Farm Slackers

The Canada Food Board Educational Division sends out the following item: "The farm slacker is no better than the man who would not get into khaki when the call for recruits came. The women must "white feather" the man who continues to live ineffectually dawdling through the day and dancing through the night."

The Prompt Answer!

IF the habit of *answering promptly when the telephone bell rings* were universal, the saving of time would be enormous.

¶ Few things are more pleasing to telephone users than a prompt and courteous response to a telephone call. In business, the practice of *prompt answering* has been a money maker, for customers appreciate it.

¶ Practice *prompt answering* yourself and make it a rule in your business.

The Bell Telephone Co. of Canada

Reroof with
Brantford
Asphalt Roofing

Don't let a leaky roof damage the wall paper, carpets or furniture in your home, the crops in your barn or the goods in your store. Tear off the old shingles or other worn out roofing material and put on a lasting roof of Brantford Asphalt Roofing.

This roofing is made of a blend of hard and soft asphalts on a long-fibred felt base. By blending the asphalts a roofing of remarkable elasticity is secured—one that is flexible, durable and capable of resisting all kinds of severe climatic extremes.

Brantford Asphalt Roofing is, in addition, surfaced with silicia sand on both sides, which adds to its weight, fire-resistance and durability. You may be offered other sanded roofings, but it will not have the quality of material or weight of saturation of Brantford Asphalt Roofing.

Made in three weights:—60 lb., 70 lb., 80 lb. per square.

Brantford Rubber Roofing

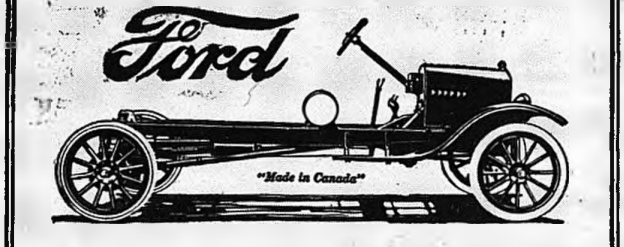
is the same quality as Brantford Asphalt, but has a smooth, rubbery surface instead of the sand. It is particularly suitable for verandah decks and floor coverings. Three weights:—40 lb., 50 lb., and 60 lb. per square.

Standard Mohawk Roofing

consists of the same grade of materials as Brantford Asphalt Roofing but is lighter in weight—a thoroughly reliable roofing at a low price. Tested for years and has given entire satisfaction. Sanded on one side. One weight:—40 lbs. per square.

Mohawk Rubber Roofing

The same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunkhouses, camp sites, even dugouts in the trenches. 35 lb., 45 lb., and 55 lb. weights.



Leatheroid Roofing

Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb., and 55 lb. weights.

Samples of any of these roofings and prices will be furnished by either the makers or their agents in this locality.

For Sale by W. H. DAVISON

A Truck for the Farmer

FARM equipment which will effect a time and labor-saving, and therefore a money-saving, must be carefully considered by every good farmer now-a-days.

The farm wagon, which for years was the most useful of all farm equipment, is now being replaced on the best farms by a sturdy, dependable motor truck. The truck will haul any farm product—fruit, grain, vegetables, stock, fertilizer, or wood—around the farm, or to the town or city many miles distant, in half the time, and at a much lower cost.

The Ford One-Ton truck is a rapid, economical and very serviceable means of transport. One of these on your farm will save you weeks of time in a single season and will enable you to pass through a crisis of labor shortage with less difficulty.

The Ford truck is supplied as a chassis only. This permits you to select any of the many body styles especially designed for the Ford truck and already on the market. Thus you can mount the one which suits your individual requirements.

Price $750 f.o.b. Ford, Ont.

Three of the many body styles that may be mounted on the Ford truck chassis

Notice to Creditors

In the matter of the estate of Julia A Allen, late of the Village of Paisley, in the County of Bruce, widow, deceased.

NOTICE is hereby given pursuant to Sec 56 of chapter 121, R. S. O. 1914, and amending acts, that all creditors and others having claims or demands against the estate of the said Julia A. Allen, who died on or about the 8th day of January, 1918, are required to send by post prepaid or to deliver to the undersigned Dr. H. Putnam, one of the executors of the last will and testament of the said deceased on or before the 1st day of May, 1918, their names and addresses and full particulars of their claims, duly verified, and the nature of the securities, if any, held by them.

AND FURTHER TAKE NOTICE that after the said 1st day of May, 1918, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have received notice, and that they will not be liable for the said assets or any part thereof to any person or persons of whose claims they will not then have received notice.

Trains on Again

Beginning next Monday the Grand Trunk will again be running the early and late trains on this line, which were cancelled about three months ago, following an order from the Dominion Railways Board. The restoration of the full service is welcomed by the public. The G.T.R. had about 50 passenger trains off schedule in Ontario, which will be all in service again.

Returned Soldier Here

Pte. Norman Reed, who recently returned from overseas after doing his bit in France, is her on a visit to his father, Mr. H. Reed. Norman enlisted in Winnipeg, and went overseas as quartermaster's sergeant, but reverted to private to get to France as an infantryman. He contracted trench fever while on service, and after a period in hospital was declared unfit for further service in the field and sent home. It will be months yet before he has fully recovered from the effects of his illness. His friends here are glad to welcome him back.

Died at Portage la Prairie

Mrs. Jas. P. MacKay (nee Miss Margaret McKechnie, formerly of Paisley) died in Portage la Prairie hospital on April 9th, after an illness of only a few hours. She was in her usual health and feeling well when her husband left their home in the morning, but when the latter returned at noon he found Mrs. MacKay ill. Medical aid was summoned and she was rushed to the hospital, and although everything possible was done it was impossible to save her life. Hemhorrage of the brain was the cause of death. Besides her husband, Mrs. MacKay is survived by her mother, four brothers and two sisters—Neil, of Chicago; Hugh, of Hibbing, Minn.; Lachlan, of Minneapolis; John R., Mrs. Adam Brown and Miss Elizabeth, all there in Portage la Prairie. The funeral was held from the Baptist church on April 11th, to Hillside cemetery. The floral tributes were very numerous, completely covering the casket. The deceased was born in Paisley and lived here throughout her school days. Her death will be regretted by many old friends here, and the family will have the sympathy of all in their bereavement.

ST. JULIEN: GEM IN CANADA'S CROWN

WHEN OUR BOYS MADE THEIR FAMOUS CHARGE.

Third Anniversary of a Day Which Makes a Shining Page in the History of the Dominion.

The morning of April 22, 1915, broke clear and warm. The first light breath of spring was in the air. A mid-summer silence brooded over the "Valley of Death." The occasional shell in bursting echoed back from the shattered walls of St. Julien. All was peace, the peace of death, says D. E. Campbell of the 16th Battalion.

The First Canadian Division, said by competent observers to be the "Flower of the British Army," held the apex of the Ypres salient. It was known to be a danger point on the Allied line. General Sir Horace Smith Dorien had warned the men that their endurance might be tested to the uttermost in holding it. His words came true.

The Third Brigade held the left of the Canadian line. First came the Thirteenth Battalion (Fifth Royal Highlanders of Montreal) and the Fifteenth Battalion (Forty-eighth Highlanders of Toronto). To the left again lay the North African troops of the French. The Sixteenth Battalion (Canadian Scottish) lay in billets on the outskirts of Ypres.

Gas Does Its Deadly Work.

The warm day drew to a close. Suddenly all the world seemed to spring into life. The air trembled. The city rocked and groaned on its foundations. The universe seemed filled with a roaring, a whirring and a throbbing. A frightful roar and a house collapsed. Houses and cellars vomited people—old people, young, cripples, crippled women with crippled children on their backs. An agonized scream went up. Shells burst everywhere. The city was mad with fear. The German guns were getting in their work.

Over the rise, across the canal, dim figures appeared. There were scores of them. They reeled and staggered as they came. The vanguard reached the bridge. They coughed and wept, turning agonizing faces to the Canadians. Now and then one dropped, writhing. It was the French Turcos. German hate had done its work.

The order came to fall in on the road behind the canal. Darkness was coming on. The men obeyed silently. Extra ammunition was issued, and the battalion moved silently off, going along the canal and through the outskirts of Ypres until it reached the road. The darkness was thinned by the glare from burning Ypres and the flash of bursting shells.

Down the St. Julien road they passed. The ranks moved stealthily. The front rank was not more than 150 yards from the trenches——

Then it happened.

Their Baptism of Fire.

With a roar like a great forest afire, the whole front of the wood and hundreds of yards on either side burst into lines of jagged flame. Hundreds of flares shot into the sky, laying bare the earth like a noonday sun. The front lines melted. Down went the men. They seemed to fall like leaves, but none paused to inquire a comrade's fate. How did any win through? The air seemed filled with rifle and machine gun bullets. The roar was constant. Shrapnel burst overhead. Up again and on, through ditches, wire, over hedges that offered no shelter, men falling everywhere, on they rushed. With a wild yell the trench was reached. The firing broke suddenly off. Gray figures darted away through the trees. Those who remained were simply killed in passing. On into and through the wood went the Canadians.

The place was won. The Germans had been removed.

The wood was wide and the undergrowth thick in places. From the left broke out a heavy rifle fire. The bullets ripped through the trees. The Canadians headed them not. They were hunting Germans and they toyed with death. Many fell.

Lieutenant Colonel Boyle, of the Tenth, was dead. Lieutenant-Colonel Leckie, of the Sixteenth, collected the men and took them back to the captured German trench. This they lengthened and consolidated. When dawn broke they were partly dug in.

Second Day of Battle.

Then commenced a day of horror. Two thousand men had rushed to the attack. The roll-call at dawn revealed a scant 600.

To the left of the wood and for a mile beyond stretched a German trench. In front of it not a single Allied soldier. The Canadian trench extended beyond the edge of the wood. German machine guns played upon it constantly. Many of the defenders went down.

Then the German artillery somewhere on the right got the range. All day long the great shells swept the Canadian line from end to end. Horribly accurate was their fire. By noon the trench was filled in places. To move, one was forced to crawl over dead and dying. One's comrades breathed their last in a roaring, crowded solitude. Scant help could be rendered. A shell lighting in a pile of dead and wounded; red flesh and gory heads streaked the air.

But the Canadians hung on. The thought of retreat simply occurred to no one. They waited the German onslaught. It was sure to come. But it never came. Men's nerves were worn thin and ragged. But they hung on.

Finally night drew on. The enemy fire slackened. Still the attack held off. No sleep for, weary men, though. All night long they stood to arms. A little food was brought up. The men felt somewhat refreshed. The night ended.

Saved the Road to Calais.

Then some news of the battle began to leak through. The Germans had attacked with three army corps, about 120,000 men, and immense quantities of artillery. This and the new asphyxiating gas which they hurled at the French and Canadians lines caused the French to break, forcing the Canadian left to retire. A gap of more than a mile was made in the line. The Forty-eighth Highlanders and the Fifth Royals, of Montreal, were almost surrounded.

With the exception of the Canadian Scottish and the Tenth battalion, not a man lay between the Germans and Calais. They might have marched through. These two units were hurled at the German line, were sacrificed, but they forced the Germans to pause, believing the British must be in force or they would not dare attack.

And so for days the battle went. Each night the roar of fire died down. Each dawn the roar of fire rolled up. Then the reserves commenced to come, a struggling unit at first, but in a day or two the face of the earth was yellow and blue, with British and French uniforms.

Then the Canadians got some sleep. Five days and nights they went, and many of them had not four hours' sleep. Now came a chance to rest at night.

From one part of the field to another they moved, sometimes "digging in" three times in one day, now behind the British and now in support of the French. Always under that galling fire they stayed in the battle.

At last human endurance reached an end. The boys could stand no more. On the night of the fourth of May, after twelve days of constant effort at high pitch, they were taken out. That night they marched twenty miles to billets near Bailleul.

SPELLING REFORM.

The Revolution in Russia Brings Joy to the School Children.

Russian school children are rejoicing. Not only have the school teachers gone on strike, but the Bolsheviki Government has adopted phonetic spelling, which will eliminate some of the difficulties of Russian orthography.

The National Commissioner of Education, with a view to raising the general standard of education, has issued a decree that from Jan. 1 the new simplified spelling shall be taught in the schools. The reform consists in the elimination from the Russian alphabet of three letters—yatt, phita, and the simple form of E. The pronunciation of these letters is identical, respectively, with A, F and the double form of E; and the correct use of the respective letters has always been a test of education. Yatt, a survival of one of the old Slavonic characters, has been a stumbling-block to many, not only to foreigners, but even to middle-class Russians.

Get onion sets in as soon as the Evergreens may be pruned at this time, if required.

POISON GASES AS WAR WEAPON

FIRST USED BY GERMANS IN APRIL, 1915.

Direction of Wind, Hour of Day, and Slope of Terrain, Important Factors in Success.

In the first week of April, 1915, there came into the Ypres salient a deserter who said that the Germans were preparing to assail the British army with floods of a poisonous gas. He described the installation for the purpose—the cylinders filled with liquid chlorine, and all the rest of it. His story was absolutely true, but nobody believed it. The thing was too incredible.

A few days later came the first gas attack. It changed the whole course of the war. The British troops were overwhelmed by it. There was no defense. Whole regiments perished on the spot, with no chance to fight. A gap miles in width and several miles in depth was made in the Allied lines.

The Germans themselves had not realized what the effect of this new weapon would be. If they had done so they might have won the war then and there. But it was an experiment; they could not count on such results. As it was, they claimed 6,000 dead and as many prisoners as a total immediate gain.

For defense against this novel weapon "respirators" were immediately adopted. The first ones were made by hundreds of thousands in England by patriotic women, the device adopted being simply a pad of cotton-wool wrapped in muslin and saturated with a solution of sodium carbonate and thiosulphate.

First Gas Helmet.

Later on the respirator developed into a helmet of sorts, which was merely a flannel bag (to be put over the head) saturated with the same solution and provided with a mica eye-piece or window. This is still used, in a modified form, the bag being put over the head and tucked into the wearer's jacket.

It is an old saying that the only way to fight the devil is with fire, and, accordingly, the gas weapon was quickly adopted by the Allies. The method used for the production of gas clouds is substantially the same today, however, as that originally employed by the Huns.

Holes are dug in the bottom of the trench, beneath the parapet, and the cylinders of liquid chlorine are buried in them. When wanted for use, each cylinder is connected with a lead pipe bent over the top of the parapet. A sandbag is placed on the nozzle, to prevent the "kick" of the outrushing gas (the chlorine rapidly vaporizing) from throwing the pipe back into the trench.

Each cylinder contains forty pounds of liquid chlorine. Commonly there are three cylinders to each two yards of front. Sometimes the cylinders are double banked. The idea in view is always to make the gas as strong as possible. When liberated it combines, of course, with the air. A percentage of one part of the gas to 1000 of air is considered strong. Usually it is much less.

Necessary Conditions.

The most suitable terrain for a gas discharge is where the ground slopes gently away from the trenches in which the cylinders are placed. But the direction and force of the wind are of absolute importance. If the wind blows less than four miles an hour it is too weak to carry the gas cloud. If it exceeds twelve miles an hour it tends to disperse the gas and carry it upward.

The best time for a gas attack is between sunset and dark, or between early dawn and sunrise. In the first light of dawn the cloud cannot be seen approaching. The defenders, under such circumstances, can obtain warning only from the sense of smell, or from the hissing sound which the cylinders make when emitting the deadly gas.

All of the German poison-gas business is directed and operated by two regiments of pioneers, officered by men highly trained in the technology of various sciences—engineers, chemists, meteorologists and so forth. These experts are busy all the time with new inventions, one of the most recent being a silencer for the cylinders, to prevent them from giving a warning noise. This, however, has proved a failure, because it diminishes the rate of gas escape.

Another idea of theirs has been to mix the gas with smoke, or to alternate gas emissions with smoke emissions, so that the enemy cannot tell where the gas ends and the smoke begins. There is no limit to such tricks.

Tricks of the Hun.

We have got to hand it to the Hun. He may be a brute beast, but where cleverness in warfare is concerned he has the best of us. The best we can do at times is to imitate his methods.

Prussic acid is the deadliest of known poisons. It was reported a while ago that the Germans meant to use it for gas clouds. Much alarm was created by this announcement. But it was mere camouflage. They never contemplated anything of the kind, because for this particular purpose another kind of gas, "phosgene," was deemed more deadly.

The Hun intention was to advertise prussic acid and incidentally to distract attention from phosgene. Also, to frighten. In neither aim was it successful. The Allies were not scared, and being warned in time of the phosgene they provided helmets that were proof against it.

THE DEAD WHO LIVE FOR EVER.

Premier Lloyd George Pays Tribute To Empire's Heroic Dead.

Here is the tribute paid by Prime Minister Lloyd George to those who have died in the war:

"There are hundreds of thousands of sorrowing men and women in this land on account of this war. Their anguish is too deep to be expressed or to be comforted by words, but, judging the multitudes whom I know, there is not a single one of them who would recall the valiant dead to life at the price of their country's dishonor. The example of these brave men who have fallen has enriched the life and exalted the purpose of all. You cannot have four millions of men in any land who voluntarily sacrifice everything the world can offer them in obedience to a higher call without ennobling the country from which they sprang.

"The fallen, while they have illumined with fresh lustre the glory of their native land, have touched with a new dignity the household which they left for the battlefield. There will be millions who will come back and live to tell children now unborn how a generation before in England, Scotland, Ireland and Wales, and in the ends of the earth, the men of our race were willing to leave ease and comfort to face privation, torture and death to win protection for the weak and justice for the oppressed.

"There are hundreds of thousands who will never come back. For them there will be for ages to come sacred memories in a myriad of homes of brave, chivalrous men who gave up their young lives for justice, for right, for freedom in peril.

"This resolution means that the greatest Empire on earth through this House thanks the living for the readiness with which they supported its behest. It also means that this great Empire, through this House, enters each home of the heroic dead, grasps the bereaved by the hand, and says: The Empire owes you gratitude for your share of the sacrifice as well as for theirs, partakes in your pride for their valor and in your grief for their loss."

The Joys of Gardening.

Don't you want a garden plot,
Just a little corner lot,
Seeds to plant, and things that grow?
That's the life you want, I know?

Just a spade, and rake, and hoe,
Seedling soldiers, row on row;
Guard them from the wily foe
(Regiments of weeds, you know).

Just a shower of gentle rain,
Then the sun to shine again!
Soon, fresh rows of tender green
Shoot up where the seeds have been.

Now, once more, the hoe and rake,
Sure success comes in their wake!
Keep some yards of hose at hand,
Water's always in demand.

Just a bit of work, you see,
Good fresh air for you and me;
Everybody's doing it,
Come on, fellows, do your bit!

—Nell Ruth Roffe.

An imitation wool for filling mattresses and pillows is being made from cork in Spain.

The AUTOMOBILE

Low-Gear Performance.

What is your opinion about using a motor car for work that requires hard pulling in low gear? And is there any way of telling whether any parts of a car have been strained? These questions come from a reader who apparently thinks he has abused his car, judging from other remarks made.

The use of a motor car for pulling heavy loads that require it to be in low gear is not particularly injurious if the amount of such work is limited. Naturally a great deal depends on the skill of the driver in handling his clutch and throttle. However, continual low-gear performances is likely to make the water in the radiator boil and also cause considerable carbon in the cylinders. Do not let the water in the radiator get below the upper hose connection. And if the water boils violently and continuously, that is a warning to stop.

But probably the greatest injury is suffered by the rear tires when an automobile is used for heavy pulling. Putting chains on the rear wheels will help considerably to reduce this injury should the wheels show a tendency to spin around without getting traction. There is no definite means of determining whether any parts have been strained, except that excessive wear is indicated by a noisy rattling mechanism.

Employing the motor car to pull a loaded wagon is a type of usefulness permissible on a small scale, but if a person has much hauling to do he had better get a tractor. An automobile is designed to do most of its work in high gear and at fairly high speed.—B.S.

Repairing Tube Cuts.

It sometimes happens that an almost new and otherwise perfectly good inner tube will receive a long tear or cut and be thrown away because the owner thinks a satisfactory repair cannot be made. Now this is all a mistake, as I have proved to my own satisfaction on more than one occasion.

My first experience of this kind was when an almost new tire for some unknown reason (some thought it had been improperly attached) blew off its rim and tore an almost straight slit in the new inner tube about 30 inches long. I was told that the inner tube was beyond repair, but it outraged my sense of economy to think of throwing away that practically new tube. I had a small vulcanizer with which a hole nearly four inches long could be repaired at one time, and with this I started to work.

A four-inch portion at one end of the long tear was filled with the repair gum according to the directions for making ordinary repairs. After allowing the cement to dry the recommended length of time, I clamped the tube in my vulcanizer, which was then lighted. It happened to be a steam vulcanizer, and after lighting the heating element no further watching was necessary, as the vulcanizer is entirely automatic in its action.

In the meantime the opposite end of the tear was filled with repair gum in the same manner, so that by the time the first repair was vulcanized the second was ready. Thus the repair progressed, first one end and then the other, the tear being gradually closed until at last one patch closed it entirely. I tested the tube in a pan of water and was gratified to find no leaks. Afterward this same tube gave thousands of miles of service, and was finally scrapped because of old age.

I should state, perhaps, that the repair was not made at one time or one day, spare time only being used, which otherwise might have been wasted or used less profitably.

The repair described in the foregoing was done some years ago, and since then I have mended even longer tears, and always with perfect success. All that is required is patience, a little time, repair materials, and a good vulcanizer. One that is automatic in its action is to be preferred. —H.K.

British Line Regiments.

(Written in Flanders After the Second Battle of Ypres.)

Last year they came across the sea
To fight in Flanders' greasy plain,
A dozen in each company
Are all of them that now remain;
It matters not that few survive,
That losses mount to cent per cent;
Still there remains awake, alive,
The Spirit of the Regiment.

The same old stuff they seem to be,
The same old qualities they show,
Unconquerable infantry,
The same to-day as long ago;
In stench and heat, in dust and glare,
In freezing mud and driving rain,
Stubborn as their forefathers were
Who fought with Wellington in Spain.

Winter and summer making good,
Through dawn attack and night alarm,
The trenches in the sodden wood,
The outpost line in field and farm;
Though day by day the Germans drench
Our lines with poison gas and shell,
Turning the torn and tattered trench,
Into a high-explosive hell,

Still at full strength upon parade,
Special Reserve and "Section D,
They hold with bayonet, bomb and spade
Lands where the Prussians meant to be;
No more by "smarter" corps despised,
The Guards themselves cannot outshine
The common, old, unadvertised
Battalions of the English Line.

—J. C. Fauntthorpe.
Lieut.-Col., First United Provinces Horse, India.

"A section of the British Army Reserve.

Select from the root cellar a few good carrots, parsnips, turnips and onions and plant them in the garden for next year's seeds. The seeds may not be quite as good as a seedsman would supply, but it will permit the seedsmen to supply some one else who otherwise would be obliged to go without.

Grateful to the Briton.

How much America owes to the gallant Briton for standing between it and the Hun, says the Ohio State Journal. The British have been killed by the thousands fighting for our cause, as well as their own. The Briton has saved this republic from a terrible peril. Through the smoke of the conflict we can see the British standing steadfast and dying for the Union Jack and the Stars and Stripes. Hereafter Great Britain and the United States are united by a bond of friendship that can never be broken. France belongs, too, and they will constitute the triumvirate of civilization that will make the earth a decent place to live. Let us once get through the present ordeal and democracy will be safe.

Ocean Pressure.

An expert salver explains that it is impossible to reclaim the Lusitania. She lies under a pressure of 140 lb. to the square inch. Every pound of pressure represents nearly two feet of water—one atmosphere for every 33 feet. Therefore the Lusitania lies deeper than mortal man can go. We are constantly being told of new inventions to enable men to sink lower into the water, but, says the London Daily Chronicle, there is no finer diver in the world than the Admiralty man, and 210 feet is his limit. Were St. Paul's flooded to the top of the cross descending divers could not explore the lowermost 60 feet.

From now until the next harvest watch your grocery list or there will be no groceries to list.

Canada consumes about twenty-five times as much sugar as she produces. Last year her total sugar beet land was about 35,000 acres, which yielded 14,000 tons of sugar.

Good nature, happiness and laughter are as contagious as a yawn. Happiness is a state of mind, and there is nothing that contributes more largely to the general well-being of society than a man with a hearty sense of humor.—Marshall J. Wilder.

THE DEBUT OF THE TANKS

DESCRIBED BY NOTED WRITER, IAN HAY.

An Engine of Warfare Which Assuredly Did not Win the Approval of the Hun.

An Observation Post—or O Pip, in the mysterious patois of the Buzzers—is not exactly the spot that one would select either for spaciousness or accessibility. It may be situated up a chimney, or up a tree, or down a tunnel bored through a hill. But it certainly enables you to see something of your enemy; and that, in modern warfare, is a very rare and valuable privilege.

Camouflage Again!

Of late the scene-painter's art—technically known as camouflage—has raised the concealment of batteries and their observation posts to the realm of the uncanny. According to Major Wagstaffe, you can now disguise anybody as anything. For instance, you can make up a battery of six-inch guns to look like a flock of sheep, and herd them into action browsing. Or you can despatch a scouting party across No Man's Land dressed up as pillar-boxes, so that the deluded Hun, instead of opening fire with a machine gun, will merely post letters in them—valuable letters, containing military secrets. Lastly, and more important still, you can disguise yourself to look like nothing at all, and in these days of intensified artillery fire it is very seldom that nothing at all is hit.

If you peep over the shoulder of Captain Leslie, the gunner observing officer, as he directs the fire of his battery, situated some thousands of yards in rear, through the medium of map, field glass, and telephone, you will obtain an excellent view of tomorrow's field of battle. Present in the O Pip are Colonel Kemp, Wagstaffe, Bobby Little and Angus M'Lachlan. The latter had been included in the party because, to quote his commanding officer, "he would have burst into tears if he had been left out."

The Curtain Goes Up.

Overhead roared British shells of every kind and degree of unpleasantness, for the ground in front was being "prepared" for the coming smash. The undulating landscape, running up to a low ridge four miles away, was spouting smoke in all directions—sometimes black, sometimes green, and sometimes where bursting shell and brick dust intermingled, blood-red. Beyond the ridge all-conquering British aeroplanes occupied the firmament, observing for "mother" and "granny," and signalling encouragement or reproof to these ponderous but sprightly relatives as their shells hit or missed the target.

That evening a select party of sightseers were driven to a secluded spot behind the battle line. Here they were met by Master Osborne, obviously inflated with some important matter.

"I've got leave from my C.O. to show you the sights, sir," he announced to Colonel Kemp. "If you will all stand here and watch that wood on the opposite side of this clearing, you may see something. We don't show ourselves much, except in late evening, so this is our parade hour."

The little group took up its appointed stand and waited in the gathering dusk. In the east the sky was already twinkling with intermittent Verey lights. All around the British guns were thundering forth their hymns of hate—full-throated now, for the hour of the next great assault was approaching.

Wagstaffe's thoughts went back to a certain soft September night last year, when he and Blaikie had stood on the eastern outskirts of Bethune listening to a similar overture—the prelude to the battle of Loos. But this overture was ten times more awful, and, from a material British point of view, ten times more inspiring. It would have thrilled old Blaikie's fighting spirit, thought Wagstaffe. But Loos had taken his friend from him, and he, Wagstaffe, only was left. What did fate hold in store for him to-morrow? he wondered. And Bobby? They had both escaped marvellously so far. Well, better men had gone before them. Perhaps——

Fingers of steel bit into his biceps muscle, and the excited whinney of Angus M'Lachlan besought him to look.

The Show Begins.

Down in the forest something stirred. But it was not the note of a bird, as the song would have us believe. From the depths of the wood opposite came a crackling, crunching sound, as of some prehistoric beast forcing its way through tropical undergrowth. And then suddenly out from the thinning edge there loomed a monster—a monstrosity. It did not glide, it did not walk. It wallowed. It lurched, with now and then a laborious heave of its shoulders. It fumbled its way over a low bank matted with scrub. It crossed a ditch by the simple expedient of rolling the ditch out flat, and waddled forward.

In its path stood a young tree. The monster arrived at the tree, and laid its chin lovingly against the stem. The tree leaned back, crackled, and assumed a horizontal position. In the middle of the clearing, twenty yards farther on, gaped an enormous shell crater, a present from the kaiser. Into this the creature plunged blindly, to emerge, panting and puffing, on the farther side. Then it stopped. A magic opening appeared in its stomach, from which emerged, grinning, a British subaltern and his grimy associates.

Thanks to the Tanks.

And that was our friends' first encounter with a "Tank." The secret—unlike most secrets in this publicity-ridden war—had been faithfully kept; so far the Hush! Hush! Brigade had been little more than a legend even to man high up. Certainly the omniscient Hun received the surprise of his life when, in the early mist of a September morning some weeks later, a line of these sulfsame tanks burst for the first time upon his incredulous vision, waddling grotesquely up the hill to the ridge which had defied the British Infantry so long and so bloodily—there to squat complacently down on the top of the enemy's machine guns, or spout destruction from her own up and down the beautiful trenches which had never been intended for capture.

In fact, Brother Boche was quite plaintive about the matter. He described the employment of such engines as wicked and brutal, and opposed to the recognized usages of warfare. When one of these low-comedy vehicles (named the Creme-de-Menthe) ambled down the main street of the hitherto impregnable village of Fiers with hysterical British Tommies slapping her on the bark, he appealed to the civilized world to step in and forbid the combination of vulgarism and barbarity.

"Let us at least fight like gentlemen," said the Hun, with simple dignity. "Let us stick to legitimate military devices—the murder of women and children, and the emission of chlorine gas. But Tanks—no! One must draw the line somewhere!"

But the ill-bred Creme-de-Menthe took no notice.

The Seers.

(On looking at the Roll of Honor Page.)

Too young for love, with all its joys and fears,
Too young to know the thrill that little feet
Bring to a father's heart through long glad years
Of care and sorrow sweet.

When came the call, they rushed from desk and field,
To fields of blood with Freedom as the goal;
In pain from which no mother's hand could shield,
They lost—to find—their soul.

No gamblers they, who threw away their right
Of life, of love, of children yet to be;
But seers all, who saw beyond the night
The Morn of Liberty.

—Elizabeth H. Shillito.

The Settlers.

How green the earth, how blue the sky,
How pleasant all the days that pass,
Here where the British settlers lie
Beneath their cloak of grass!

Hard to the plow their hands they put,
And whereso'er the soil had need
The furrow drave, and underfoot
They sow'd themselves for seed.

O willing hearts, turned quite to clay,
Glad lovers holding death in scorn,
Out of the lives ye cast away
The coming race is born.

—Lawrence Housman.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN
Apply a few drops then lift corns or calluses off with fingers—no pain.

Just think! You can lift off any corn or callus without pain or soreness.

A Cincinnati man discovered this ether compound and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off.

Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterwards. If your druggist has freezone, tell him to order a small bottle for you from his wholesale drug house.

Waste of Food Illegal.

The wilful waste of any food or food products where such waste results from carelessness or manner of storage, or is due to any avoidable cause, is now penalized by the law of Canada, and it is the duty of each municipality to enforce the regulation. The managers of storage warehouses, private residences, railway cars and other conveyances containing food stored or in transit, may be called upon to smell food or food products when there is danger of loss from deterioration.

GIRLS! LEMON JUICE IS SKIN WHITENER
How to make a creamy beauty lotion for a few cents.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

Queen Mary's Silver Wedding Shower

The Queen Mary's Needlework Guild in Ontario earnestly asks the people of this Province to contribute to a shower of Soldiers' Comforts, Supplies for Hospitals and Trenches, or money with which to buy them. Donations may be sent in until the last week in May and should be addressed to Mrs. Arthur VanKoughnet, 20 King St. West, Toronto, during which week a meeting will be held in the Parliament Buildings, when the shower will be on view and reports made of the contributions received. Immediately after, shipment will be made to England, to arrive in time for her Majesty's Silver Wedding Day, on July 6th, 1918.

A Suitable Rebuke.

Innumerable are the stories—many of them "chestnuts"—of the ready wit of Mr. Justice Duff. Here is one that is new to me, at all events.

It appears that one day while trying a case he was disturbed by a young man who kept moving about in the rear of the court, lifting chairs and prying under seats.

"Young man," exclaimed the learned judge at last, "you are making a good deal of unnecessary noise. What are you doing?"

"M'lord," replied the offender, "I have lost my overcoat and am trying to find it."

"Well," came the witty reply, "people often lose whole suits in here without making all that fuss."

Metal that is wrapped in waxed paper will not rust.

Minard's Liniment Cures Dandruff.

GILLETT'S LYE
HAS NO EQUAL
It not only softens the water but doubles the cleansing power of soap, and makes everything sanitary and wholesome.
REFUSE SUBSTITUTES.

Garbage as Hog Feed.

Saskatoon, Sask., feeds 500 to 800 hogs on garbage, mixed with a small amount of grain. The city of Worcester, Mass., feeds 3,000 hogs on garbage. Springfield, Mass., sells $50,000 worth of municipal fed hogs; Grand Rapids, Mich., feeds 800 cattle, 400 sheep and 700 pigs on garbage and a certain amount of hay. Arlington, Mass., Lowell, Mass., Fall River, Mass., and Providence, R.I., all distribute their garbage to private companies who feed it to livestock.

Dominion Statistics Up-to-Date

A valuable feature of the 45th annual report of the Royal Bank of Canada is a compilation of statistics for the Dominion brought up to date. These cover population by provinces, public debt, revenue and expenditures, field crops, trade summary, mineral production, insurance, commercial failures, food and fuel prices, immigration, etc. The publication also lists the names of those of the staff overseas and brings out the creditable fact that 1,000 employees of this institution are on the Honour Roll.

Greater Production Plans.

Ontario will plant 1,000,000 acres more in cereals and cultivated crops this spring; Quebec, 600,000 and the Maritime Provinces, 400,000 acres extra. The farmers in Eastern Canada are called upon to plant five acres per farm extra. 400,000 farmers in Eastern Canada can save the situation.

I consider MINARD'S LINIMENT the BEST Liniment in use.
I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT, and it was as well as ever next day.
Yours very truly,
T. Q. McMULLEN.

Pigs and Potatoes.

Grow potatoes and vegetables in every vacant lot and feed pigs on kitchen refuse—there are two ways of doing something to help the present food crisis.

MONEY ORDERS

Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Bulbs and all plants that have been covered for winter protection may now be uncovered and the beds forked over.

Minard's Liniment Cures Burns, Etc.

Herb seeds can be sown early, sage, thyme, etc.

A Constipation Cure
A druggist says: "For nearly thirty years I have commended the Extract of Roots, known as Mother Seigel's Curative Syrup, for the radical cure of constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops thrice daily. Get the Genuine, at druggists.

HOW TO AVOID BACKACHE AND NERVOUSNESS
Told by Mrs. Lynch From Own Experience.
Providence, R.I. "I was all run down in health, was nervous, had backache all the time, was tired and had no ambition for anything. I felt that life was [illegible] and I tried different medicines without any benefit. My neighbours advised me to take Lydia E. Pinkham's Vegetable Compound as they had been benefited by its use. I did so and can honestly recommend Lydia E. Pinkham's Vegetable Compound to any woman who is suffering as I was." Mrs. ADELINE B. LYNCH, 100 Plain St., Providence, R.I.
Backache is often one of the symptoms or nature's warnings that indicate a functional disturbance or an unhealthy condition which often develops into more serious ailments.
Women [illegible] should not drug themselves with habit forming drugs, but continue to drag along without help, but profit by Mrs. Lynch's experience, and try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, for special advice write to Lydia E. Pinkham Med. Co., Lynn, Mass.

The Paisley Advocate

PAISLEY, APRIL 24th, 1918

—A number of prominent business men of Owen Sound are getting into the production campaign in earnest. They are arranging to secure a few hundred acres of farm lands that would not otherwise be cropped this year, and will put the whole of it under cultivation. The object is not to make money, but to add to the food supply. Should there be any profit made the surplus will be devoted to the patriotic fund. Could Paisley men not do something along the same line? We believe they would find it a game worth while.

—In discussing the conscription measure in the House of Commons, Hon. F. B. Carvell stated the situation very tersely. "The Military Service Act so far," said Mr. Carvell, "has proven a splendid exemption act, but an extremely poor recruiting act. It has produced 30,000 soldiers and 200,000 exemptions." He then turned to the farming situation, and asserted that he was not so pessimistic about it as members of the Opposition appeared to be. He represented a farming community, and was prepared to admit that the enlistment of men from the farms might cause some dislocation to Canadian agriculture, but, he asserted, there were hundreds of thousands of men fit for farming who could be put on the farms if the Government was courageous enough to force them to go. The Government had made a start in the right direction by constituting idleness a criminal offence. Perhaps it would become necessary to force men to go to the farms, and if that were the case, Mr. Carvell felt that the Government would not hesitate to do it, and the country would give its support. He stated that he was not advocating the calling of women to work on the farms, but women could work on the farms if necessary. The people of Canada, he said, must learn the lesson that in times of peril their first duty was to the State. The British army within the past month, he said, has been subjected to one of the most terrible ordeals which an army had ever experienced. Did the people of Canada realize what it meant? What the terrible consequences would be if that line over in France should break? "Do the people want German guns on the St. Lawrence River or along the Atlantic coast before they will wake up?" he asked. "That is what will happen if that line in France breaks, and if that happens what's the use of your farms?"

PAISLEY CONTINUATION SCHOOL

Easter Exams—Form III

Normal Entrance—Wallace Tanner 86 per cent., Harold Collins 84, Gladys McCallum 80, Velma Winch 79, Meryl Bell 75, Winnifred Megraw 70, Robert McBride 68, Lorne Cargill 67, Jessie Young 66, John Brown 65, Alan Shoemaker 56, Jean Cameron 53, Ethel Roberts 52, Beulah Ruthven 50, George Neilson 38.

Junior Matriculation—V. Winch 71 per cent., Harold Collins 70, Robt. McBride 64, Lorne Cargill 60, John Brown 58, Alan Shoemaker 54, Beulah Ruthven 51, Jean Cameron 49, George Neilson 40.

Fences on Roadway

Road Supt. D. J. Izzard has now gone over a great deal of the mileage of the Bruce county system of highways. At many points he found that farmers have their fences built out so far from their rightful property that the roadway is only 45 feet wide. The Provincial Department requires that all county roads be 66 ft. wide, and fences that have been placed on the highway will have to be moved back sooner or later to meet this requirement. Farmers who are building fences should see to it that the fence is 33 ft. from the centre of the roadway.

Queen Mary's Silver Wedding Shower

The Province of Ontario will celebrate Her Majesty's silver wedding day on July 6th, 1918, by a shower of gifts of soldiers' comforts and hospital supplies for our troops on the firing line and our wounded in the hospitals at the front. All who are interested in patriotic work are invited to co-operate in this shower by contributing some gift such as sox, handkerchiefs, towels, pillow cases, or chocolate, etc., etc., just as you wish. Owing to the present congestion in transportation it is necessary to have donations ready as soon as possible, and in order to make it convenient for the people in the country, it has been arranged that a shower will be held in

Putnam's Hall on Saturday Afternoon May 11th

A complete record of the gifts, the kind, the name and address of the donor, will be carefully noted and sent to Her Majesty, and fully reported at the Parliament buildings of this province. It is hoped that it may be possible to make this shower throughout Ontario not only an historical event and worthy of the anniversary, but one of value in this time of great need to our courageous soldiers at the front, who are so nobly defending Canada and the British Empire.

Good Village Property for Sale

18 ACRES of good garden land on which are two dwellings, one good stable on brick foundation and cement floorings. Known as the McNally property. Apply to T. H. HUNNER, Paisley, or MRS. DAVID PARLIAMENT, Galt, Ont.

Vast Issues Depend Upon the Welfare of Our Men!

Cheer Up and Thank God for the Y.M.C.A.

TRY to picture yourself in the muddy cold trenches after exciting days and long nights of mortal danger and intense nervous strain. Rushing "whiz-bangs" and screaming "coal boxes" are no respecters of persons. You are hit! But despite shock and pain you still can face the long weary trudge back to dressing station. Weary, overwrought and depressed, you are prey to wild imaginings of that other coming ordeal with the surgeon. There are other "walking wounded," too! You must wait, wait, wait. And then—

Up comes a cheery Y.M.C.A. man, the ever-present "big brother" to the soldier, with words of manly encouragement. Close beside the dressing station the good generous folks at home have enabled him to set up a canteen. He hands you biscuits, and chocolate or coffee.

Y.M.C.A.

Red Triangle Fund

$2,250,000, May 7, 8, 9

Canada-Wide Appeal

"In thousands of cases," writes an officer, "it was that first hot cup of coffee that dragged the man back to life and sanity."

The tremendous helpfulness of the Y.M.C.A. as an aid to the "morale," or fighting spirit, of the soldiers is everywhere praised. No wonder the Germans make every effort to smash the Y.M.C.A. huts out of existence.

The Y.M.C.A. is everywhere. You first met the helpful, manly Y.M.C.A. worker in camp, then on train and boat, at camp in England and in France, close to the firing line. Often he risks his life to reach you in the trenches. He has won the warmest praise from military authorities, statesmen—the King!

Have you a precious boy at the front? You cannot be "over there" to guide him away from fierce temptations of camp and city. You cannot comfort him in his supreme hour of trial. Your parcels to him are necessarily few. But the Y.M.C.A., thank God, is "over there," going where you cannot go—doing the very things you long to do—doing it for you and for him.

Will you help? This vast organization of helpfulness needs at least $2,250,000 from Canada for 1918. For your boy's sake be GENEROUS!!

War Work Summary

There are:

—96 branches of Canadian Y.M.C.A. in France.

—79 branches in England.

—Dozens of Y.M.C.A. dug-outs in forward trenches under fire.

—Over 120 Military Secretaries overseas.

—300,000 letters a day written in Y.M.C.A. overseas buildings.

—$133,000 needed for athletic equipment. (Helps morale of soldiers.)

—Y.M.C.A. saved hundreds of lives at Vimy Ridge by caring for walking wounded.

—Over 100 plants in England and France, also 300 gramophones and 27 moving picture machines.

—Y. M. C. A. helps boys in hospitals.

—More than 60,000 cups of hot tea and coffee distributed daily in France—free. Estimated cost for 8 months, $48,000.

—150,000 magazines distributed free every month. (Estimated cost $18,000.)

—$123,000 used in 1917 to build huts in France.

—Concerts, sing-songs, good-night services and personal interviews energetically conducted. Concerts, lectures, etc., cost $5,000 a month.

—Thousands of soldiers decide for the better life.

—Y.M.C.A. sells many needful things to soldiers for their convenience. Profits, if any, all spent for benefit of soldiers.

—Series to boys in Camp hospitals.

—Red Triangle Clubs for soldiers in Toronto, St. John and Montreal. Centres in Paris and London for men on leave.

—Out of Red Triangle Fund, $75,000 to be contributed to the War Work of the Y.W.C.A.

Boys!

Here's your chance to do a fine stroke in the big war! Help the Y.M.C.A. to help your big brothers overseas by joining in the

"Earn and Give Campaign"

Six thousand Canadian chaps boys are invited to earn and give at least Ten Dollars ($10) to the Red Triangle Fund. That means $60,000 in all! Splendid! Five thousand dollars will be used for boys' work in India and China; another $5,000 for the National Boys' Work of Canada, and $50,000 to help big brothers in Khaki. Ask your local Y.M.C.A. representative for information and pledge card. When you have subscribed ten or more units of Ten Dollars, you will receive a beautifully engraved certificate.

LOCAL AND DISTRICT NEWS

County Council to Make Grant to Y. M. C. A.

Mr. Wilson, of London, was in town on Saturday interviewing Reeve Stegle in regard to having the County Council make a grant of $21,000 to the overseas Y. M. C. A. fund instead of raising this amount in the county by means of a canvass in each municipality. As nearly all the members of the County council are agreeable to this plan, it is likely that the warden will act in the matter and the grant will be sanctioned at the June session. This grant would call for a county levy of three-fourths of a mill on the dollar.

The Coal Situation

Our coal dealer, Mr. D. A. Lyon, spent last week in Buffalo looking into the prospects for obtaining supplies for his customers, here for the ensuing season. He found hundreds of Canadian dealers there on the same mission. He was advised that as the U.S. Government is reserving a percentage of the coal output from all the large companies, the latter have been bound not to sell to any dealers more than a percentage of the quantities delivered in 1917. However, Mr. Lyon has made such arrangements for a supply that he feels assured he can obtain all the coal required for Paisley before the cold weather comes again. Prices cannot be quoted in advance.

Soldier Dies of Pneumonia

Mr. Hector McGillivray, of 12th con. Bruce, received the sad news on Monday that his son, Pte. Jas. McGillivray, previously reported ill, had died in St. John's ambulance brigade hospital at Etaples, France, on April 18th. The deceased enlisted in the 160th Bruce Battalion, and went to France with a draft after the breaking up of that unit a couple of months ago. He was taken ill with pneumonia, and we are informed his death occurred four days later. He was just a few days past his 20th birthday, and was the youngest in the family of five boys and one girl. While he did not live to engage in combat with the enemies of freedom whom he went out to fight, he has been called upon for that great sacrifice which he was ready and willing to make for home and country, and his name will be honored with a place among the soldier heroes of Bruce. The bereaved ones have the sympathy of all in their loss.

Died of Wounds

That Pte. George Switzer, cavalry, had died of gunshot wounds on Mar. 23rd, in the 43rd casualty clearing station, France, was the sad message received on Monday by Mr. and Mrs. Thos. Switzer of Saugeen, parents of the deceased soldier. George Switzer left his home here in 1914 and went to the west, shortly after that joining the Northwest Mounted Police. In the fall of 1915 he transferred to the Royal Canadian Dragoons for overseas service, and he had been in France for about two years. He was of strong physique and fine bearing, a splendid specimen of that Canadian manhood which has made the soldiery of this new dominion the admiration of the Empire. He served through much heavy fighting as an infantryman, but it is quite probable that when he met with his fatal wounding had been in action with mounted troops. His elder and only brother died in England over a year ago while in training. To Mr. and Mrs. Switzer and daughters the second bereavement comes as a heavy blow, and the sympathy of all goes out to them in full measure.

We have had several years' experience in large city garages, and are therefore in a position to do work that we can guarantee as satisfactory. We are aiming to give up-to-date service to all car owners. Motorists who get stalled on country roads in this locality should call up Paisley garage for quick service.

We carry a full line of Overland, Chevrolet and Ford parts.

MILLER & McKINNON, Props.

—What about the next winter's fuel supply? The fuel controller gives warning that we will not be able to feed our stoves and furnaces to full capacity as we did last winter, as the supply of coal will be smaller. There is a considerable area of timber standing in the vicinity of Paisley yet, but the owners complain that they cannot possibly get any down, because of lack of help. No doubt this is quite true. In some towns and villages the council or a committee of citizens has bought up sufficient bush to supply a large quantity of wood, and are going about getting the cutting done. There is nothing to prevent the same thing being done by Paisley in time to avoid any great scramble for wood when winter comes upon us again.

—At the last meeting of Bruce Presbytery a motion was passed asking the General Assembly to petition Premier Borden to take such steps as will result in equality of treatment of theological students with regard to military service. Students in Roman Catholic seminaries, studying with a view to the priesthood, are exempt from military service. It is claimed, while students in Protestant colleges preparing for the ministry are not exempt.

I. SHOEMAKER

Jeweler and Optician

To drive a tank, handle the guns, and sweep over the enemy trenches, takes strong nerves, good rich blood, a good stomach, liver and kidneys. When the time comes, the man with red blood in his veins "is up and at it." He has iron nerves for hardships—an interest in his work grips him. That's the way you feel when you have taken a blood and nerve tonic, made up of Blood root, Golden Seal root, Stone root, Cherry bark, and rolled into a sugar-coated tablet and sold in fifty-cent vials by almost all druggists for past fifty years as Dr. Pierce's Golden Medical Discovery. This tonic, in liquid or tablet form, is just what you need this spring to give you vim, vigor and vitality. At the fag end of a hard winter, no wonder you feel "run-down," blue, out of sorts. Try this "Medical Discovery" of Dr. Pierce's. Don't wait! To-day is the day to begin! A little "pep," and you laugh and live.

ST. CATHARINES, ONT.—"Several years ago, when convalescing after a serious illness, I took a half dozen bottles each of Dr. Pierce's Golden Medical Discovery and Favorite Prescription as tonics. I cannot praise these medicines too highly for the benefit I received—my health was completely restored. I always take pleasure in recommending these two of Dr. Pierce's remedies."—MRS. FLORENCE LOGAN, 83 Beach Street.

The Pure Bred Clydesdale Stallion "Fascinator"

Will be put on the spring route as last year for the season of 1918. Those wishing to breed to this splendid stock will be on the lookout for bills with their names for time and route. Terms $15.

WM. WILSON, Prop., 12th Grenadier.

An Open Letter—

To the Reeve and Councillors of Paisley:

Have your citizens organized to increase food production?

If they have not yet done so, We, the Organization of Resources Committee, earnestly ask you to call them together in a Mass Meeting, and lay before them the necessity of immediate and vigorous efforts—the food situation is critical.

It may astonish you to learn that in 1917 Ontario did not grow enough wheat for its own needs. Consequently every Ontario farmer whose land is suitable, has been urged to sow 5 acres more spring wheat this year so that Ontario's demand for wheat shall not be met at the expense of that portion of the Western crop that should more rightfully be shipped overseas.

For this same reason every householder who has a garden or a piece of vacant land is being urged to grow vegetables, because the more vegetables that are grown and eaten in Ontario the less wheat and meat there will be consumed, and, that being so, the Ontario wheat crop should then be sufficient to feed our own people, and leave more Western wheat and other foods available for export.

By intelligent effort, in the cultivation of his own back garden, or from the cultivation of a nearby piece of land, the average citizen can grow, this summer, enough vegetables to support his family through the next winter. *And remember, if food restrictions are enforced next winter, a supply of vegetables in the cellar will be very desirable.*

If you already have an unofficial or semi-official organization to stimulate food production, so much the better. That will give you the basis for a comprehensive committee.

A plan that has been adopted in many places is here outlined. *You should adapt it to the needs of your own community.*

1. **A General Committee should be formed, representing every important interest of the community.**
2. **The work should be done by sub-committees. The following list is sufficiently comprehensive for the largest places. You should adapt it to your own community.**

(a) A sub-committee on Finance. The Organization of Resources Committee is willing to help local branches financially with publicity, public meetings and organization.

(b) A Publicity Committee to place local problems properly before the people, supplementing the larger work of the province-wide publicity, by securing pledges, sending out circular letters, arranging for addresses in churches, schools, motion-picture houses, etc., and by supplying local papers with news items.

(c) A sub-committee on Vacant Lot and Back-Yard Gardening to include representatives from horticultural societies, school teachers, etc.

(d) A sub-committee on Farm Labour, composed of employers of labour, representatives of organized labour, war veterans, etc. Labour is the key to the food production problem. All boy, girl, part-time and vacation labour should be enlisted. Make sure that sufficient labour is ready to meet any demands made by your farming community. This labour should be placed on farms locally through the Agricultural Representatives or the Government Employment Bureaux.

(e) A Farm Lands sub-committee, composed of groups of men to cultivate larger tracts of vacant land in the vicinity of cities, towns and villages. Flax growing is profitable and suitable—flax seed and fibre are much needed.

(f) A sub-committee on Schools, to enlist all school-children of sufficient age to work either in home gardens, community gardens, school gardens, or on farms.

(g) A sub-committee of women on Conservation to deal with the problems of food-saving in the homes; the more broadly representative it is of women's activities the better. Existing women's organizations should not be interfered with, but since conservation is one of the greatest problems, there should be a women's committee in each community to deal with this problem alone.

3. **An Executive Committee should be appointed, to include the chairman of the general committee and the chairmen of the sub-committees. This committee should meet frequently.**
4. **A Secretary to the committee should be chosen, for his knowledge of the situation, who would be free to devote considerable time to the work.**

Lack of food threatens the battle-line and we must deal with the situation.

TO THE INDIVIDUAL CITIZEN

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.

Send for copy now. Mail the coupon below:

ONTARIO

Co-operation in Churches

The committee on co-operation of the Presbyteries of Owen Sound and Orangeville, also representatives of the Methodist churches within these Presbytery bounds, met at Owen Sound last week and recommended that at ten named places services be given by Presbyterian church to former Methodist appointments, and at an equal number of places service be given by the Methodist church to former Presbyterian fields. By this re-grouping at least five ministers will be released for service in fields now without regular service, of which there are in both churches an increasing number. If this meets the approval of Presbyteries and district meetings, it will be submitted to congregations for approval and adoption.

—At the annual convocation of Knox College, Toronto, last week, Principal Gandier pointed out that as a result of the war, the church would have to depend more upon mature men who might, after a short course of training, fill the immediate needs of mission fields and pastoral charges. A few men of this class have been associated with Knox College this year, and Dr. Gandier said that for the next few years congregations will have to depend largely upon workers of this class, and to place their hopes for the distant future in those who are boys to-day.

Children Cry
FOR FLETCHER'S
CASTORIA

—Here's a note for feminine patriotism. The main thing in Britain to-day is self-sacrifice. It is common knowledge that a society belle in that country is honored in her old clothes and would stand a chance of being ostracized if she plumed herself in the latest modes. With six million of Britain's men standing on the battlefields of that western front, "with their backs to the wall," the women are occupying their minds with more than the "glad rag" question this spring.

—The Dominion Government will call for a registration of all the man power of Canada shortly. Every man and woman between the ages of 16 and 60 years will have to report.

CANADA MAKES NEW CALL ON MAN-POWER OF THE COUNTRY

Feeling that the military situation on the west front is likely to continue serious until the allied nations have added materially to the strength of their forces there, the Dominion Government has decided upon a course of action which will not fail to secure recruits to reinforce the Canadians in considerable numbers. It has passed an order-in-council taking to itself wide powers to enroll men in the army. For that order it asked for the approval of both Houses of Parliament, and having obtained that aproval, it will call to the colors all men who are married or are widowers without children, between the ages of 20 and 23 inclusive. Exemption which has heretofore been freely granted to such men, will be swept aside, and the only reasons which will excuse any of them from service will be that they are members of His Majesty's regular, reserve or auxiliary forces, that they are members of forces raised by other British dominions or possesions, that they are serving in the navy or marines, that they have been discharged after actual service on the firing line, that they are members of religious orders or of the clergy of a recognized religious denomination, that they are Doukobors or Mennonites exempted from military service by orders-in-council in 1873 or 1898, or that other members of their family have died, suffered disablement or served in a "theatre of actual war." By reason of the death, disablement or service of other members of the same family a man may be granted by the Minister of Militia leave of absence without pay. Other grounds for exemption will be of no effect, and even men who have been discharged from the military or naval forces if they have not seen actual service in France or some other "theatre of actual war" will be required to report. As far as those who have been examined by military medical boards and found unfit for service are concerned, the Minister of Militia may use his discretion as to whether or not they shall be ordered to report for service.

While the Government contemplates the immediate calling to the colors only of unmarried men and childless widowers from 20 to 23 years of age, it proposes to take still wider powers. It may, under the order-in-council, call up any class under the Military Service Act and disallow exemptions granted to men included in that class. Furthermore the order will bring within the scope of the Military Service Act all young men who have attained the age of 19 years since the passage of that law or who hereafter reach that age. Such youths who are unmarried or childless widowers have been added to class one under the Act, and such as are married or widowers with children are added to class 2. Each of those classes now comprises men between the ages of 20 to 34.

Good Address on Missions

Miss McGregor, of the W. M. S Council, who addressed the congregation of Knox church on Sunday morning, presented a broad world view of the importance of missionary work. Miss McGregor spent fifteen years in the new fields of our Canadian Northwest, principally among settlements of foreigners such as the Ruthenians or Ukranians. She states that there are blocks of the west populated almost exclusively by that class of emigrants—from ten to thirty thousand in a block—and it is one of the problems for Canada to make good citizens of them. The parents are very illiterate and superstitious, but industrious and thrifty, so are making money. The power of that money is one of the menacing things in those people are not christianized. The children are apt pupils, applying themselves to their tasks better than the Canadians do, so that the boys and girls of foreign extraction will be in no way inferior intellectually to the native when they go through school and ready to take their places in the industrial life of the country. After acquiring the education and enlightenment obtainable from the public school course, these young people are not inclined to follow the old iken worship of their forefathers, but are likely to drift into infidelity unless induced to embrace christianity. Herein lies the work of the home mission department, and a great deal is being accomplished, but thousands of children are growing up who can not be reached by the number of missions established, so there is great need for greater support of the cause. The magnitude of the work dertaking that the foreign missionary department has in hand in the various fields of Japan, China and India, was also emphasized by the speaker, and the warning given that civilization may again be called upon, within another generation or so, to pass through the throes of war as we are doing now, unless the Oriental peoples are imbued with the spirit of christianity instead of a combination of infidelity and militarism.

The Mystery House

Next Door to the Parsonage Lived an Unknown Stranger, Setting Village Gossipers Astir with Wonder

Told By The Minister's Wife.

During the six months that I have lived in a Methodist Episcopal parsonage there have been exactly forty-six marriage ceremonies performed in our living room.

"Is there anything that you like better than a wedding, Priscilla?" laughed Billy over a month ago as he made out a certificate for the person he had just married.

Everyone in Hazelton calls Billy the Reverend William Lester; some day, when he has been a Methodist minister a long time, they will call him Reverend William Lester, D. D. Meanwhile he is just my husband and Hazelton's young minister.

"I do love weddings," I said, "but I should love better to have a real living Romance come to stay for a long time right in our parsonage."

Billy's Irish blue eyes looked reproachfully up from the certificate.

"Of course ours is the very best romance of all," I smiled back at him, "but, Billy, I want one that I can stand off at a distance and watch and analyze."

Billy laughed and folded the certificate into an envelope. "You might take this to the post office if you have nothing else to do," he suggested. "I have a whole sermon to get ready before Sunday."

At the post office I exchanged the long envelope for another one, square, correct and white. Gingerly I took it back to my husband's study.

"I do hate to disturb you," I explained, "but this envelope looks so important that I think you would better open it now."

Billy took it. "From my only rich relative," he commented as he tore it open. "Probably a birthday check."

Instead of a check there fell out of that envelope the beginning of a real parsonage romance.

Billy gave a low ejaculation. "Betty Rose Brammer is coming here," he announced. "Great Scott, Priscilla, do you realize what I am telling you? Betty Rose Brammer is coming to visit in this parsonage for a whole month."

"Yes," I murmured weakly and my knees began to wobble.

I had never seen Betty Roes Brammer but Billy had a wonderful portrait of her and what that portrait had not told about her, Billy had.

Moreover she had sent us a wedding present. It was an automobile basket, filled with solid silver equipment for auto lunches. Billy told me that its price would have brought a modest car. We were saving the basket until we could buy a little car to take out with it.

Billy pushed the correct envelope toward me and delved into the ponderous volume before him. I went into my room to make plans.

Two things the letter revealed to me. Betty Rose Brammer, my husband's wealthy cousin, was coming to us in four days to seek a quiet spot in which to make a momentous decision. Four suitors were pressing their claims for her and she felt that in our midst she could decide which of the four was the most desirable.

The next three days were winged ones. I had planned to take the fourth for a day of rest but early on that morning Aunt Tudor Campbell, the village caretaker, came uninvited to our parsonage. "The reason I came to-day, Miss Lester, honey," she explained with elaborate carelessness, "is because there isn't anyone else in this town who needs me so I want to visit you."

"Oh, then you can help me bake!" I exulted. "Billy's cousin comes in the morning and I want to be all ready for her."

"I wouldn't bake if I were you. Somebody will be sure to hear she is coming and send in something. Then you and I can have the time to straighten up your pantry and cellar so that if your husband should take a notion to buy up a lot of groceries while they're cheap, you will have room for them."

Billy never did "buy up" things. A queer, aching feeling started in my heart. Had someone said that I was not a neat housekeeper? Had Aunt Tudor heard of it and come over to help me clear myself of the charge?

I went to work meekly, following her lead. I decided not to tell Billy. If there is anything about which ministers are sensitive, it is their wives. They desire them to be models of housewifely excellence as pointed out by Timothy and all his followers down to John Wesley. I never was intimately acquainted with a pantry or cellar until I came here to live. While the women in Hazelton were learning to sew and bake and scrub I was hustling for news for a city paper. Then I discovered soon after I was married that pantries and cellars are problems.

While we were working, Aunt Tudor suddenly called me to the pantry window. "She's here again," she whispered and pointed toward the bay window of the great house next door. "They're quarreling over money probably. He has a bundle of things like bills in front of the window. He was showing them to her and pounding and carrying on like everything."

When I reached the window no one was visible. The great white house with its shuttered windows faced me. People in Hazelton dubbed it the Mystery House because they knew so little about its owner. He came to the house about twice a year, stayed a few months talking to no one except his Japanese servant, whom he brought with him, and the woman, who came to see him usually about twice a week.

"She's his wife, probably wanting to be divorced," said Aunt Tudor.

Aunt Tudor stayed till after supper. While we were washing the dishes our doorbell gave a terrible peal. Hurriedly I started toward it but Aunt Tudor reached out her arm to detain me. "Let the preacher go," she whispered. "Let's watch."

I turned to stare at her. She was smiling. I heard Billy stumble out into the hall, light the gas and open the front door. Instantly there came a noise as of the stamping of the feet of a multitude. I almost fainted but Aunt Tudor caught me. "It's a donation party," she laughed and dragged me into the living room. "Don't you know what that means?"

I found out. Every one in Hazelton was crowding into our living room. Each carried bundles. They filled our dining room with every thing from sugar to vinegar and from cabbages to kingly gifts of money.

A donation party is an honor to a minister and his wife because it is proof that the people like them. In Hazelton the gifts did not count in on the minister's salary.

It was about nine o'clock when the doorbell rang again. Billy looked at me weakly. What if more people were coming?

Something furry and vivid and slender rushed into the room and faced us all. "O Billy, you dear!" a silvery voice cried. "Not to meet me and then to have a whole party ready to surprise me the minute I get here."

She was Betty Rose Brammer and behind her, at the door, stood the Mystery Man of the Mystery House. We all stared but Betty Rose turned to him laughingly. "Aren't you coming in? After you brought me to the party, aren't you going to stay?"

Feebly Billy managed to re-echo her invitation. The Mystery Man shook his head and without a word walked off the porch into the darkness.

"He was like that to me too," bubbled Betty Rose without giving any one else a chance to talk. "He was at the station putting a stunning-looking woman on the train. There was no one else there so I asked him the way here and he brought me himself. He is the most silent man you ever saw but I talked every step of the way."

"I'll warrant you did," laughed Billy and proceeded to introduce her to every one in the room. They all liked Betty Rose. And it came to me that no one in Hazelton had said that my pantry and cellar were not clean. Aunt Tudor was preparing me for the donations.

That week, ushered in by the donation party and Betty Rose, was like a toy balloon, beautiful and full of promise in the beginning but only little ragged pieces of disappointment and heartaches after the bursting.

To begin with there was a letter. When Billy handed it to me, I excused myself and slipped up to my room and read it.

Almost tremblingly I opened the envelope. Out came the answer to the letter I had dared write weeks before to the editor of a newspaper syndicate. He remembered my work on the Star and was glad that the writing game had lured me back.

He would pay me ten dollars for every short story he could use. I did some rapid calculation to find out that if I worked hard I could buy that automobile to go with Betty Rose's silver, for Billy's birthday.

While I was planning, Betty Rose came to my door. "If you have time, Priscilla," she began, "I'd like to show you the photographs of the men I wrote about. How about right after dinner?"

A beautiful shiver began in my heart and rushed clear to my finger tips. Romance was beginning!

I hurried to my kitchen to cook the most wonderful dinner "it" was ever eaten in a parsonage rushed Aunt Tudor.

"There's something queer going on next door!" she whispered insistently although I was alone. "One of those little Japanese men went to the station late last night and telephoned by long distance. Early this morning and then at ten o'clock he did it again."

Together we peeped through the window. The blinds of the Mystery House were higher than usual; a tornado of smoke was pouring out of the chimney and while we watched, one of the Japs rushed out and toward the station.

Then our doorbell rang and I heard Billy inviting one of his parishioners to dinner. Betty Rose slipped into the kitchen. "I'll lay the table for you," she offered, "may I?"

Watching the Mystery House and trying to cook at the same time, I had put the sugar and salt into the wrong kettles. If only that parishioner had not been there, Betty Rose would have laughed, Billy would have teased me and I might not have felt as badly as I did.

After dinner Billy stalked away with the parishioner without telling me good-by. Betty Rose giggled as she watched them leave. "Billy is ridiculous when he tries to be dignified," she told me. "and Priscilla, something must be wrong next door. Our little Japs are hurrying stationward again."

About the House

BAKING IN GLASS.

For a crystal wedding, for a shower for the bride-to-be or for a gift for any time or season there is nothing more acceptable than glass baking dishes, either a set or one or two pieces. They are durable, practical and attractive and may be brought from the oven straight to the table for the serving, thus saving time and labor.

The ingenious housewife will find that many of her favorite receipts are adaptable for cooking and serving in these dishes. Here are a few that are especially appropriate:

Spanish Rice:—Wash one-half cupful rice and put in glass baking dish. Add one-half can tomatoes, one cupful hot water, one onion cut in small pieces, one-fourth cupful chopped olives, a sweet pepper or half a can pimentoes cut in pieces and one-fourth cupful cooking oil or fat. Bake in moderate oven one hour. Just before serving, remove cover and sprinkle over top one-half cupful grated cheese. When cheese is melted, serve rice from dish in which it was baked.

Scalloped Potatoes:—Peel and slice raw potatoes thin. Grease glass baking dish, put in a layer of potatoes, season with salt, pepper, butter, a bit of onion chopped fine, if liked; sprinkle well with flour. Add another layer of potatoes with seasoning and continue until dish is nearly filled. Before putting on cover pour enough milk over to cover. Bake three-fourths of an hour.

Fish Pudding:—One pound cooked fish or one can salmon, one-half cupful milk, one egg, one cupful fine bread crumbs, one tablespoonful fat, salt, pepper, one teaspoonful onion juice and one tablespoonful of any savory sauce or catsup. Mix, turn into buttered oblong baking dish and bake one-half hour. Serve with parsley sauce.

This oblong dish is very nice for baking bread, cake, meat loaf and various favorite dishes.

Corn Pudding:—One can corn, one egg, one teaspoonful sugar, one-half cupful milk, salt and pepper. Mix well, pour into well-buttered individual glass baking dishes and bake twenty minutes. If the dishes are placed in a dripping pan half full of hot water, they will need no watching to prevent burning.

These little dishes are ideal for individual scalloped dishes, cup cakes, muffins, custards or puddings.

Chocolate Pudding:—Cream together one tablespoonful butter and one-half cupful sugar. Add one well-beaten egg, one-half cupful milk, one-half cupful cocoa. Sift into mixture one cupful flour, one teaspoonful baking powder and pinch of salt. Pour into individual glass dishes, set in pan of hot water and bake one-half hour. Serve in baking dishes, with hard sauce.

Butterscotch Pie:—Bake the crust in the glass pie dish and pour in the filling.

For the filling, mix three-fourths cupful brown sugar with yolk of one egg, three tablespoonfuls flour, three tablespoonfuls melted fat and pinch of salt. Add one and one-half cupfuls milk and cook in double boiler until thick. Pour into baked pie shell. Beat white of egg and beat into it one tablespoonful powdered sugar. Spread on top of pie and brown slightly.

How To Preserve Eggs.

Surplus eggs preserved in the spring will supply the home with good eggs in the fall and winter, when eggs are hard to get and are high priced.

Eggs to be preserved must be fresh, and should be placed in the preserving container as soon as possible after they are laid. One of the best methods of preserving is by the use of waterglass, a pale yellow, odorless, syrupy liquid that can be bought by the quart or gallon from the druggist or poultry supply man. It should be diluted in the proportion of 1 part of waterglass to 9 parts of water which has been boiled and allowed to cool. Earthenware crocks or jars are the best containers, since their glazed surface prevents chemical action from the solution. The crocks or cans should be scalded and allowed to cool before they are used. A container holding five gallons will accommodate fifteen dozen eggs and will require one quart of waterglass.

Half fill the container with the waterglass solution and place the eggs in it. Eggs can be added from day to day as they are obtained, making sure that the eggs are covered by about two inches of waterglass solution. Cover the container and place it in a cool place where it will not have to be moved. Look at it from time to time, and if there seems to be danger of too much evaporation add sufficient cool boiled water to keep the eggs covered. Eggs removed from the solution should be rinsed in clean, cold water. Before they are boiled holes should be pricked in the large ends with a needle to prevent them from cracking.

Limewater also is satisfactory for preserving eggs and is slightly less expensive than waterglass. A solution is made by placing two or three pounds of unslaked lime in five gallons of water which has been boiled and allowed to cool, and allowing the mixture to stand until the lime settles and the liquid is clear. The eggs, should be placed in a clean earthenware jar or other suitable vessel and covered to a depth of two inches with the liquid. Remove the eggs as desired, rinse in clean, cold water and use immediately.

Salt dissolved in a little ammonia will remove grease spots.

Onions contains fleshmaking elements and they are soothing to the mucus membrane.

A rich pudding needs a plain sauce and a plain pudding a rich one.

Books are the best things, well used; abused, among the worst.—Emerson.

Articles Wanted for Cash

Old Jewellery; Plated Ware; Cutlery; Kitchenware; Pictures; Needlework; Lace; Old China; Old Glass; Gramophones; Watches; Mirrors; Table Ware. Write or send by Express to R. M. S. T. STERLING Limited ANTIQUE GALLERIES 23 and 25 College Street, Toronto, Ont.

The Peerless Perfection Fence

Divides your stock and all of your crops. The fence that serves you for all time. Don't rust, rot or burn down. Stands any weather. Each joint securely held with the Peerless lock; all parts heavily galvanized, the strongest, most serviceable farm fence made and fully guaranteed.

SEND FOR CATALOG of all kinds of fencing for farms, gardens, parks, cemeteries, poultry yards, ornamental fencing and gates for the home. Prices right at your railway station. Agents wanted in unrepresented districts.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

W. J. F.:—Is there anything that can be done to save the trees that the rabbits have girdled? We have a nice young orchard which has been planted three years, and the rabbits have ruined the trees, about fifty in number, and if nothing can be done it is a total loss.

Answer:—The trees the rabbits have entirely girdled will scarcely survive the injury. If some of the trees, however, have been simply injured at one side you will do well to paint over the injury or cover it with grafting wax. This protects and will tend to prevent the entrance of fungus disease germs and also "bleeding". You will do well to work in some stock manure around the trees that will likely survive.

Subscriber:—Will you please tell me the value of barley as a horse, cattle and hog food? Will it take the place of corn with digester tankage in a self-feeder for hogs, and if so should it be fed whole or ground? What is the relative value of barley at $1.70 per bushel, and oats say at 90c., in a ration for horses? If it is a good horse feed how ought it to be fed, whole or ground and in what proportion with oats? Will barley and oats make a good ration for cattle, both growing cattle and milch cows, and if so in what proportion?

Answer:—Barley as compared with corn contains the following food elements:

	Digestible food in 100 lbs		
	Protein. lbs.	Carbo-Hydrates. lbs.	Fat. lbs.
Corn	7.9	66.7	4.3
Barley	8.7	65.6	1.6

Barley is usually called the "corn" of colder areas. That is where corn cannot be grown, barley takes it place. Analyses of the grain shows it closely approximates the food value of corn. In feeding it must be supplemented by a concentrate, or a carrier protein. It should give satisfactory results with tankage. In all cases it should be fed ground and not whole. Concerning barley as a feed for cows, Dean Henry says: "Barley alone is not fed extensively to cows, wheat bran being preferred on the score of cheapness and influence on the milk secretion. Barley will prove a benefit to cows fed heavily with roots since it counteracts their laxative influence. From 3 to 5 pounds of ground barley will suffice in the ration of the cow, bran proving an excellent complementary feed."

As a feed for horses it is not looked upon with great favor, since the ground barley forms a sticky paste in the horse's mouth which is distasteful to the animal.

For hogs, experiences at Wisconsin and in Denmark show barley has an important place. Fed alone at Wisconsin it did not give quite as good gains as corn. However, fed with skimmed milk to hogs it surpassed gains obtained from cornmeal and milk. Barley and oats ground, will make a good basis for a ration for cattle, but even this mixture will require supplementing with a concentrate.

R. H.:—What will be the best crop to sow on five acres of sandy land for the pasture of three or four cows? Have been thinking of sowing rape, and could I seed it and stand a chance of getting a catch if sowed with the rape? It was sown last year to millet and buckwheat and seeded, but failed to get a good stand of clover.

Answer:—For a pasture mixture on sandy soil, you will do well to sow the following per acre; 1 bushel of rye, half bushel wheat, half bushel oats, and five pounds of common red clover. This mixture will make a summer pasture. In order to get a successful permanent covering, I believe you will have to keep stock off this area for a season and then seed your ground to about 1½ bushels of barley and grass seed mixture, consisting of 20 lbs. common red clover, 2 lbs. alsace, 6 lbs. of timothy, and 5 lbs. sweet clover, to the acre. In order to make sure of the catch you would do well to fertilize the soil with about 200 lbs. to 300 lbs. of fertilizer carrying 3 to 5 per cent. ammonia and 6 to 8 per cent phosphoric acid. This should be thoroughly worked into the soil at the time the seed bed is being prepared.

W. W.:—Would be glad to have advice in regard to sowing winter vetch and spring rye this spring to plow under late in summer for fertilizer purposes. Would it be a success or is something else more successful?

Answer—1: Half a bushel of winter vetch seed, with a bushel and a half of rye to the acre should be sown. The ground should be thoroughly prepared and the seed drilled or harrowed in carefully. In preparing the ground you will do well to apply about ¼ ton of fine ground limestone per acre, harrowing it in carefully. This will make the soil sweet, which condition is most suitable for the rapid growth of vetch. In order to make sure of a satisfactory catch, you will do well to use fertilizer at the time of seeding as recommended in the last question.

The Dairy

The butter made on the farms of Ontario may be materially improved in quality in most cases, if standard methods are employed and greater care is exercised in carrying out the necessary details. Here is an outline of the essential steps to be taken in making good farm butter:

1. Produce clean milk and cream. Cool the cream immediately after it comes from the separator. Clean and sterilize all utensils.

2. Ripen or sour the cream at from sixty-five to seventy-five degrees F. until mildly sour. Always use a thermometer in order to know that the right temperature is reached.

3. Cool the cream to churning temperature or below, and hold at that temperature for at least two hours before churning.

4. Use a churning temperature—usually between fifty-two and sixty-six degrees F., that will require thirty or forty minutes to obtain butter.

5. Clean and scald the churn, then half fill it with cold water and revolve until the churn is thoroughly cooled, after which empty the water.

6. Pour the cream into the churn through a strainer.

7. Add butter color—from twenty to thirty-five drops to a gallon of cream—except late in the spring and early in the summer.

8. Put the cover on tight, revolve the churn several times, stop with bottom up, and remove stopper to permit escape of gas; repeat until no more gas forms.

9. Continue churning until butter granules are formed the size of grains of wheat.

10. Draw off the buttermilk through the hole at the bottom of the churn, using a strainer to catch particles of butter. When the buttermilk has drained out, replace the cork

11. Prepare twice as much wash water as there is buttermilk, and at about the same temperature. Use the thermometer; do not guess at temperatures. Put one-half the water into the churn with the butter.

12. Replace the cover and revolve the churn rapidly a few times, then draw off the water. Repeat the washing with the remainder of the water.

13. The butter should still be in granular form when the washing is completed.

14. Weigh the butter.

15. Place the butter on the worker and add salt at the rate of three-quarters of an ounce to a pound of butter.

16. Work the butter until the salt is dissolved and evenly distributed. Do not overwork.

17. Pack in any convenient form for home use, or make into one-pound prints for market, wrapping the butter in white parchment paper, and inclosing in a parchment carton.

18. Clean the churn and all butter-making utensils.

Time to Start Drive to Save Apple Crop.

Wormy apples are prevented by having the small fruit covered with arsenical poison when the newly hatched codling worms start their first meal. This spray must be applied liberally just after the apple blossoms fall.

Commercial concentrated lime sulphur diluted with 40 parts of water (5 quarts to 50 gallons), along with three pounds of arsenate of lead paste (or half as much powder) to each 50 gallons of spray, is the formula recommended. The use of soluble sulphur compound is not advised for spraying apples or other fruits in foliage, particularly when it is mixed with arsenate of lead. Plant lice present may be killed by adding one part of nicotine sulphate to 700 parts of spray.

Don't overstock your yard. Twenty to thirty square feet for each hen is an average allowance.

SEED SOWING AND GROWING

H. E. Gosnell.

I want to refer to the seed business—the possibilities of growing grasses, vegetables and flowers for seed purposes. Mr. Sweet, the Colorado potato king, believes that in our vast areas of new soils in the Great West, free from diseases, lies the seed bed for the rest of the world, but it is true of all of Canada. Certain seeds are now selling at a tremendous price. The supply itself has in many cases been cut off by war, and so much of Belgium and France, two great seed-producing countries, has been laid waste that the supply at its sources has been diminished. But while there has been much written and talked of about seed-growing it is not an amateur game to play; and there are also certain limitations to its possibilities in Canada. There is a temporary demand which will not exist after the war. In certain seeds we shall never be able to compete with France, Holland and Belgium in normal times. One great factor in the seed and nursery business is labor, and in that the European labor is cheaper and more plentiful. There are seeds which can be grown in greater abundance and more cheaply in parts of the United States than in Canada. There are other seeds, too, in which the intensive cultivation of certain fields completely cover the demand. Bulbs come within the field of limited possibilities and in flower seeds generally there is a greater surplus now than ever before the war. The Southern States is a better flower field than the north and the industry there is contracting instead of expanding.

A campaign is going on in the West and in other parts of Canada, as well, for seed-growing, and the advice of members of the United States Department of Agriculture and of Canada is to first get the benefit of expert views of the trained horticulturist before embarking in any particular line, which can be had by writing. Some seeds do remarkably well almost anywhere in Canada that would not pay commercially. The grass seeds which are in demand at very high prices are alfalfa, red clover, sweet clover, small white clover, alsike clover, sweet peas. The vegetable seed whose production should be pushed are potato, of course, beet, turnip, spinach, cabbage, mangolds, carrots and seeds of grain, corn and the legumes, such as peas and beans.

Last year in the United States there were a great many gardens planted for seed purposes which looked well at first, but which from limitations as to soil or neglect in cultivation or lack of the varieties suitable, in which results were far from satisfactory. Amateurs by careful study of their subjects often succeed as well as experts, but the majority fall for lack of skill and experience. As seed time is now all over Canada, those who are urged and wish to undertake seed production are advised to get wise and find out all they can as quickly as possible.

By the way, those desirous of getting more definite information on seeds and seed-growing, can get free a bulletin entitled "Every man his own seed-grower," by writing to the Dominion Experimental Farm, Ottawa.

Seeds are scarce this year and will be scarcer next. Grow your own.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Said Will, "I'd like to be a clown,
And carry laughs from town to town;
I'd get a loop and fix it up,
And you'd jump through it—won't you, sis?"

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Ulcer of the Stomach.

G. S.—Please describe ulcer of the stomach. How long does it take to get well? Are there different kinds, and what medicines and diet would be useful?

This condition comes to those who are anaemic, who work hard and are poorly nourished, and occasionally to those whose gastric juice is acid and corrosive, or who have some kind of corrosive juice in the stomach, from whatever source.

It may be a long time coming on, and may last for years. There are different kinds, in the sense that there are ulcers of different size, of different degrees of discharge and absorption, and of different degrees of poisoning and harmfulness in other ways.

In most cases, the ulcer does not eat through or perforate the entire wall of the stomach; for that would almost certainly mean the occurrence in such cases of peritonitis, which usually would quickly have a fatal issue.

An accident which is not unusual with this disease and often is serious or fatal, is haemorrhage; and as it is wont to come on suddenly, without warning, it must always be anticipated and prepared for, when ulcer is known or suspected.

The treatment is principally dietetic, the diet being composed of simple substances which may be easily digested; meat and other foods which are digested in the stomach, with the exception of milk, being excluded.

Medical treatment is also useful in some instances, especially such medicines as may have an astringent and healing tendency, for example bismuth.

If the diagnosis is clearly made out, an operation by a skilful surgeon will result in a cure of the ulcer, but this does not mean that other ulcers may not develop.

There is usually but one ulcer, but others may be in the course of formation and it is quite possible to overlook them in the performance of an operation, if the corrosion has made only slight or moderate progress.

Many cases are cured by medical measures, and it by no means follows that every case which is discovered must be treated surgically.

QUESTIONS AND ANSWERS.

L. A. R.—I noted in the report by the physicians who examined me for the draft, the statement: "covered with ichthyosis scales." Is this disease inherited? I have a brother and an uncle who are troubled in the same way. And is there any cure for it? It causes intense itching, especially after taking a bath. During the warm weather, my skin is clear and smooth. Are there many people who are troubled with this disease?

Answer—This disease is a rather rare one. It is sometimes inherited—possibly always. I do not think that you could have it in a very severe form if your skin is clear during the warm weather. I should think it more probable that your trouble is of the nature of a scaly eczema—which is quite troublesome during the winter. If you would sponge your body every night with a solution of bicarbonate of soda and use castor oil freely in keeping your bowels open, you would obtain a very decided relief.

* * *

Mrs. L. A.—1. What causes violent beating of the heart about three hours after eating?

2. I am troubled with insomnia, and sometimes have chills after going to bed, even though I feel perfectly warm.

Answer—1. If I were you, I would omit the evening meal for a few times and see if it does not relieve the trouble you refer to. Very frequently this trouble indicates indigestion.

2. The chills you refer to may be nervous chills. If you would use a hot water bag at your feet, in going to bed, I think it would obviate the trouble.

Poultry

There is nothing to equal bread crumbs as a first feed for young chicks. Of course in these war-time days bread crumbs, especially of wheat bread, are not over plentiful in the average household, if they are to be had at all.

However, if your brood are not too large sufficient crumbs may be had to at least give the youngsters enough first feedings to see them on the road and out of danger during the most critical period of their lives

There is no doubt but what there is too much grain fed to chicks at all stages of growth. Grain, alone, is harmful; in fact it plays havoc with the young chicks' digestive organs if freely given the first week, and even if the chicks do pull through and live they will not amount to much more than a runt at the time of maturity.

Chick feeds, such as a variety of finely cracked grains, are a necessary and valuable part of the chicks' daily bill of fare, but it should be remembered that growing mash and not hard grain feeds makes rapid and proper growth.

Growing mash contains animal, green and ground grain protein feeds to the extent of 100 per cent. more than is found in grain feeds; therefore, in feeding chicks to make growth, see to it that you are getting the best obtainable in bone and muscle building feeds, and put your faith in the manufactured article, for the best of home-made poultry feeds are not properly blended or balanced nine cases out of ten to meet the requirements of the fast maturing birds.

Do not overfeed of any feed Better not feed enough than too much. Growing mash may be safely kept at all times before the chicks day in and day out after they are 10 days old. Just as its name implies, growing mash makes growth the same as scratch feeds promote the exercise conducive to health and activity.

Never allow the chicks' crops to become overloaded on chick grain any time during the day. If such becomes the case it shows that the floor litter is not deep enough, and that the chicks are finding too much grain with little effort. In such cases the depth of litter should be increased or amount of grain decreased.

Incubation.

The keynote to successful winter egg production is "Early hatching." It matters not whether the natural or the artificial method of incubation be used, the chicks must be hatched early, if the best results are to be obtained. If it is impossible to secure enough broody hens early in the season to hatch the number of chicks required, purchase an incubator.

In buying a machine, it should be borne in mind that at the most only three batches can be taken off in the proper hatching period. The incubator, therefore, should be of sufficient capacity to produce at each hatch, at least one-third the number of chicks required.

There are a lot of good incubators on the market. Do not be deluded into buying a machine just because it is low in price. The low-priced incubator is very often the most expensive in the end.

The incubator should be placed in a room that is fairly even in temperature, has a good, solid floor, and that can be well ventilated without draughts.

In running any incubator, the manufacturer's general directions should be carefully followed as he is the one that should know best what his machine requires.

At the same time, a little variation in the handling will often greatly improve results. Climatic conditions sometimes alter requirements. A machine that does not require added moisture in one locality may in another. A relative humidity of between 50 and 60 inside the egg chamber gives the most satisfactory results; if a machine is not giving these conditions, moisture should be added. This may best be done by placing a tray of wet sand either under the egg tray or above it, depending on how the machine is heated.

In starting the machine, run it for several days until it is perfectly regulated before putting in the eggs. The two kinds of thermometer most commonly used are the standing, which should register about 102, and the hanging, which is usually hung and should register 103. If the hatches are slow in coming off, raise the temperature in succeeding hatches and vice versa.

From the second day until the eggs begin to pip, they should be turned twice a day. They should also be cooled, the length of time for cooling depending on climatic conditions and the temperature at which the machine is being run.

It is advisable to test the eggs twice during the hatch, once about the seventh day when the infertile eggs and "blood rings" should be removed and again about the fourteenth when all dead germs should be taken out. A little practice will soon teach just what it is safe to take out and what to leave in.

As soon as the eggs begin to pip, which will usually be about the eighteenth day, close up the machine and leave it until the hatch is over. When the temperature rises a degree or two, don't get excited, as the rise is to be expected at this time, and is a good sign. It is due to the heat generated by the chicks struggling to free themselves from the shells. Wait until the hatching is over and the chicks have become thoroughly dried before opening the machine.

Peaches are ripened by high tension electricity, discharged directly upon the fruit, by a process invented in England.

Get the grass seed on the thin spots in the lawn or sow seed for new lawns. As soon as the seed is sown give a light top dressing of bone meal and roll well to level the surface. As soon as the grass shows well, give a light dressing of sheep manure.

A Woman Advises Women

Tyrconnell P. O., Ont.

"I received your sample of GIN PILLS and after using them I felt so much better that I got a box at my druggist's and now I am taking the third box.

"The pain across my back and kidneys has completely gone and I am better than I have been for years. I was a great sufferer from rheumatism but it has all left me. I strongly advise all women who suffer from pain in the back and weak kidneys to try GIN PILLS."

MRS. T. HARRIS.

Gin Pills will be given a box on trial to any sick woman who writes to National Drug & Chemical Co. of Canada, Limited, Toronto, or to U.S. address, National Drug Co., Inc., 202 Main St., Buffalo, N.Y.

PINKERTON

Rev. Jas. Gale preached in Mono Mills on Sunday last.

Miss Alma Reid returned to Toronto on Monday after spending some time at her home here.

Senator Donnelly has started his sawmill at Trout Creek. We understand it is his intention to bring the engine to his mill here when he has finished at Trout Creek.

The full returns for the Mystic Tea held on Monday night week are now in and total $93.

—The municipal councils in numerous towns and villages are prohibiting dogs running at large. A by-law is passed compelling owners to tie up their dogs and keep them tied.

—The Germans are preparing to try a third drive on the Allies' positions. There has been a lull on the British front for the last couple of days.

GLAMIS

Mr. Jas. Cameron, of Walkerton, called on friends in our burg last week.

We are sorry to report the illness of our postmaster, Mr. Jos. Cunningham.

Mr. Jim Kuepen, of Underwood, was in the village on Saturday.

Mrs. Allen McKinnon, of the 10th of Kincardine, left last week to visit friends in Quebec.

Mrs. McSween is confined to the house with a bad cold.

Mr. and Mrs. Reith and Miss Campbell attended the missionary meeting at Underwood on Thursday. Miss McGregor, a returned missionary, gave an address.

Mr. Black, of Clifford, made a professional visit to J. K. McLennan's on Monday.

In Saturday's casualty list we see among the wounded the name of one of the Sproule brothers. Two are serving in the 160th Batt. They are well known in our neighborhood.

The daylight saving system seems to work alright in our village. All clocks were put on an hour. We haven't heard of anyone having bad dreams or nightmare through retiring an hour earlier, like the Eden Grove's correspondent. St. Paul's church is not changing their time of service. Instead of half-past ten they now meet at half-past eleven, and at half-past eight in the evening. The Baptists split the difference, and will have service in the morning at eleven, and at eight at night.

CARGILL

Perhaps the best entertainment that has been given behind the footlights in this village in recent years was pulled off last Friday night, when a minstrel show was given in aid of the Red Cross, by local talent. Eighteen darkies arrayed in white coats, high white collars and large splashy red ties, kept up a continuous fun of songs, jokes, etc., which brought forth the applause of an appreciative audience. The program was divided into two parts, the first being of a patriotic nature, Revs. Gale and Storey contributing solos, and Mr. Mathers a reading, besides choruses and quartettes by the colored gentlemen. The second part was solos, quartettes, choruses and the usual jokes. The end men did their parts well, especially Topsy, who was a whole show himself. Sambo and Julius gave a step dance, and Julius an exhibition on roller skates. The following acted as end men: R. Loughleen (Julius), W. J. Loughleen (Sambo), H. Napper (Tim), F. Balsdon (Bill), R. A. Fowlie (Joe), W. Russell (George), E. Wittich (Topsy), H. Grice (Rastus). E. Crawford acted as interlocutor, and filled the bill well. During the evening the Red Cross sold $6 worth of candy. The receipts at the door amounted to over $77, so that the venture enriched the coffers of the Patriotic League to the extent of nearly $83. We understand the darkies have an invitation to go to Eden Grove and may put on a show there in a week or so.

Mrs. Himmel, of Mildmay, spent Friday at Mr. P. Hunstein's.

Corp. Harold Laughleen, late of the C.M.C., was home for a few days last week prior to going to Toronto where he has now become attached to the Flying Corps.

Mrs. McDonald and son, of Edmonton, Alta., who visited at Mr. Ed. Crawford's for the past few weeks, left Saturday for Cape Breton, where they will visit friends. Mrs. McDonald, whose maiden name was Lottie Hamilton, was raised on the farm now owned by Mr. Wes Napper. Her husband was killed in the great war now in progress.

Mr. F. Wittich received a message last week informing him that a cousin, Pte. Emerson Brown, late of Elmira, and who went overseas some three years ago, had been killed in battle on April 4th.

Miss Agnes Keyes, of Chesley, visited at her home here on Sunday.

Owing to the rain on Monday the taffy party, which was to have been held in Mr. Jas. Garland's bush, had to be postponed. If the elements behave the party will be given on Friday evening.

CHESLEY

As a horseman Jas. Beattie is hard to beat, but he couldn't hold that old charger, "Prince," when the bit broke and the horse took the side of the road and dumped Jim and a fat traveller named Charles out when a wheel hit a telephone post on their home from Paisley one night last week. Jim was stunned for a while, but the fat traveller escaped with a slight shaking up. If the bit and lines hold out its a hery steed that Jim Beattie can't hold.

In the roll of service in the University of Toronto appears the name of a Chesley boy, James Stark Bell, who won the Military Cross. And he got the much coveted honor for conspicuous gallantry and devotion to duty when adjutant to his battalion. At a critical time, when two platoons in an isolated position were harassed by heavy shelling, he went and established connection with the company on their flank. He secured this badly battered sector of trench by means of skilfully placed advance posts and held on under heavy shell fire. He again went forward at night and established a system of reliefs for the difficult part of the line. His work was of the greatest value, and he displayed the utmost pluck and devotion to duty at a very critical time.—Enterprise.

NO MORE NERVOUS HEADACHES

Since She Tried "FRUIT-A-TIVES", The Famous Fruit Medicine.

MISS ANNIE WARD

112 Huron St., St. John, N.B.

"It is with pleasure that I write to tell you of the great benefit I received from the use of your medicine, 'Fruit-a-tives'. I was a great sufferer for many years from *Nervous Headaches and Constipation*. I tried everything, consulted doctors; but nothing seemed to help me until I tried 'Fruit-a-tives'.

After I had taken several boxes, I was completely relieved of these troubles and have been unusually well ever since."

Miss ANNIE WARD.

'Fruit-a-tives' is fresh fruit juices, concentrated and increased in strength, combined with finest tonics, and is a positive and reliable remedy for Headaches and Constipation.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or Fruit-a-tives Limited, Ottawa.

White Shoes

OUR 1918 line is the most complete line of summer shoes. It includes a shoe for every use, for every person — men, women, children. It will pay you to call and see our White Shoes.

H. PFAFF & SON

TURNER'S

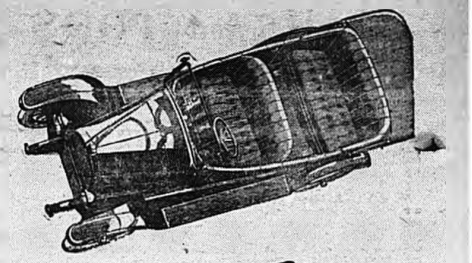
Mr. Wm. Schell has purchased a touring car.

Mrs. Robt. Fleming, of Toronto, is visiting at the home of her daughter, Mrs. J. Bell.

A Red Cross lecture was given in Aberdour schoolhouse on April 15th by Rev. Thos. Wilson, of Walkerton. There was a large crowd to hear it.

Mr. and Mrs. Sam Fleming, of Paisley, were calling on their many friends here before leaving for their new home at Monnieh in New Ontario, where he intends to farm.

The late Mrs. J. Mitchell, who died at London and was buried in Queen Hill cemetery on April 16th, was one of the first settlers in Saugeen Tp. She came here over 50 years ago, and was very well known. She had not been in good health for many years. The family left are James and Agnes on the homestead; Thos. and Mrs. John Wright, Saugeen; John, in France; Mrs. McMillan and Mrs. Flood, Toronto; Mrs. Anning, Detroit; Mrs. Monkman, Tara; Mrs. McArthur, Owen Sound.



WALKERTON

Ex-reeve Spence Nesbitt of Brant is said to have been so mixed up over the new change in time that he came into Walkerton on Friday to do his shopping, thinking it was Saturday. As another farmer was seen out plowing on Sunday, Spence is apparently not the only one who got balled up over the talk that preceded the turning on of the clocks.

While Mr. Lou Rankin, a Bell telephone lineman, was assisting in raising a telephone pole into position at Hanover on Friday afternoon, one of the props slipped and pole fell on Mr. Rankin, striking him on the waist and narrowly escaping breaking several ribs. Although no bones were fractured he was badly bruised about the body, and on two Hanover physicians being summoned he was bandaged up and spent over night in that town, when he was removed to his home here. While progressing favorably he will be off duty for some time through the mishap.

The dope fiend who took the jail cure in order to rid himself of the drug habit, will be liberated from the Walkerton bastile on Sunday next, after spending two months behind the bars. Although he called for dope like an ex-drunk raving for a and after having on convict clothes glass, soon after confinement, yet the spell seemed to wear off him, for a time he ceased calling for the wares of a drug store and took to his prison beef and skilly with more relish. If he comes out cured of the opium habit, the Walkerton jail will have done a good deal, and surrounded as it is by four churches, will have belied that pagan adage that says "the nearer the cross, the farther from grace."

Mr. Albert Mansel, a class A man, who has been assisting his father, Mr. J. A. Mansel, in the blacksmithing and wagon-making business in Chepstow for several years, received notice on Saturday that his exemption had been refused by the Central Appeal Judge of Canada. Albert, who is a popular, fine, stalwart chap, was refused exemption by the Tribunal Board at Paisley, but on the petition of two hundred farmers of that section he was granted exemption on an appeal to Judge Greig at Walkerton. Major Weeks, the military representative who was here from London going over many of the cases again, appealed from Judge Greig's decision to the Central Appeal Court, with the result that Mr. Mansel received notice on Saturday from District Military Headquarters at London to the effect that the military representative's appeal against him had been successful and that his exemption had been refused. We understand that Major Weeks' appeals against the local court rulings in several other cases have also been successful, and that the parties are receiving the usual notice preparatory to reporting for duty.—Herald and Times.

Take Care of Your Telephone!

MANY repairs to telephones are made necessary by careless handling.

¶ A telephone instrument has more than a hundred parts and is built like a watch. Rough usage impairs its efficiency.

¶ Help us to conserve the supply of telephone material and skilled labor *by always handling your telephone carefully to avoid costly breakages and repairs.*

The Bell Telephone Co. of Canada

Necessary Farm Equipment

MORE and more the Ford car is looked upon by progressive farmers as necessary farm equipment, the same as the plow, the hay-rake, the drill, the mower, the harrow and other labor and time-saving machinery.

A farmer with a Ford car can dispense with one or two of his horses and make the trips to town, railway station, creamery, or to the neighbours in one-third the time. In fact there is no farm machine made that will save the busy farmer and his busy wife so much valuable time as a Ford. And it's so easy to take care of—far easier than a horse. No bed to make, or hay and oats to get, no harnessing and unharnessing, and no stables to clean. The Ford practically takes care of itself.

Ask any farmer who owns a Ford if he would ever again try to get along without it. His answer will hasten your decision to own one.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

FACTORS INFLUENCING CROP YIELDS.

Crops require moisture, heat and food in suitable amounts and proportions to make rapid, strong growth. Nature supplies the essentials for crop life and growth, the farmer's task and problem is to utilize these resources in such a way as to ensure satisfactory yields. Investigations conducted at the Central Experimental Farm, Ottawa, have led to the conclusion that the following factors exert a telling influence towards increasing crop production.

Underdrainage—Probably the most important and indispensable where the rainfall is great,

(a) To carry off surplus water.

(b) To allow air to enter the soil.

(c) To aid in raising the soil temperature.

It is equally a necessity in soils where moisture conservation has to be considered. Drainage lowers the natural water table in the soil leaving the soil in shape to absorb rain as it falls, that is preserved for use of crops.

On the whole drainage improves the mechanical condition of the soil and assists in influencing the liberation of plant food elements.

Plant Food.—In proper proportions for the different classes of crop to be grown. This involves the adoption of a good crop rotation. This rotation should be a short one, say of 3 to 4 years' duration, and the order of crops is most important. Crops such as corn, roots, potatoes and hay, require large supplies of food from the soil for stem, leaf and root growth. This may be most easily supplied by clover or other sod turned down, or by heavy manuring. The cereals, such as wheat, oats and barley require less of this food and generally do best if sown the year following an application of manure. The area sown to these cereals, if seeded down to clover and grasses, will supply a hay crop the third, or the third and fourth years, and the sod turned down, manured if necessary, fits the land for corn or roots once more.

Such general plan of rotation may be modified by such farmers as will best suit soil and needs, but some such scheme is necessary in order that humus, probably the most valuable of all soil constituents, be added and maintained in the soil, to keep it in good producing shape. Humus decomposed and decomposing vegetable matter is provided in applications of barnyard manure, in legume crops such as clovers and in green manuring crops like buckwheat. Humus absorbs and holds soil moisture and is a means of raising soil temperature since dark soils absorb heat readily and rapidly.

Manure—Barnyard manure is most effective fertilizer and furnishes humus forming material. Fresh manure gives crop yields almost equal to those from rotted manure and when applied directly it can be handled more economically with regard to labor. Manure should be spread evenly and incorporated thoroughly with the soil. Applications should be made in moderate quantities frequently rather than in larger quantities at longer intervals. Apply the manure for hoed and clover or other hay crops in a suitable crop rotation which provides that each field in the farm will receive regularly its fair share of manure.

Proper Cultural Methods.—To make a good seed-bed requires thoroughness in carrying out each step in its preparation.

The Dairy

An easy, quick and thorough way to get the lice off, or keep them off cattle is to put about equal parts of wood ashes and sulphur in a salt sack or close-woven gunny sack and hand it where cattle will run under it, and rubbing against it dust themselves.

Infectious abortion is retarding some farmers in developing a dairy business. It causes losses in the herd increase but does not unfit the milk for human use although the germ is frequently located in the udder. It is a source of great discouragement to some cattle owners but as yet there is no way of overcoming it. The animal diseases are a warfare between the microbe and the host and they make a high degree of intelligence necessary in the successful live stock owner. If it were not for the skill which is necessary to fight diseases, almost anyone could be a live stock farmer. Stable sanitation is an important factor in the control of animal diseases.

It takes just one dairyman in a community to start the movement to obtain a community-owned pure-bred bull. In many sections scrub bulls are used because everyone knows that they need a good bull, but no one wants to bother his neighbor with the suggestion of starting an organization.

A dairyman owing forty cows recently said: "The milking machine has taken all of the 'sting' out of dairying on our farm. We now obtain more satisfaction in caring for the cattle and save much time." He is the type of a man who has milked cows all of his life and knows the dairy business thoroughly. He is also the kind of a man who has sometimes been discouraged with the drudgery of milking a large herd of cows. His milking machine has given him quite a little inspiration and as he says, it has helped overcome one of the unpleasant features of dairying on a large scale.

There are many old barns still rendering good service and they have to be used, but it is unfortunate that the value of sunshine as a disinfectant has not always been appreciated. It is the dairyman's best friend for keeping a stable in good condition and when the sun can shine on the gutters, the work of keeping the barn sanitary is not so difficult. In buildings used for live stock it pays to arrange for plenty of sunshine and it pays to study bulletins and building literature before using expensive material to experiment with home-made plans.

Horse Sense

The brood mare that seems to have the least trouble and produces healthy sound colts, and also has little trouble at foaling time, is one which had been worked moderately, or has had regular daily exercise. Of course, she should have plenty of nourishing food of good quality, especially during the latter gestation period. It is also important that she should be supplied with clean drinking water, groomed once a day and her stable well supplied with fresh air. The brood mare does best when kept in a box stall. The writer knows of no very good reason why a brood mare cannot be used to do moderate work up to within ten days or two weeks of foaling time. A box stall should be thoroughly cleaned and disinfected with either coal tar disinfectant or white-washed with fresh lime wash for her to foal in. She should be kept in this stall for a week before she foals. The bedding should be clean. A quiet secluded place where the mare can hide away from other horses seems to be her choice location. Her food supply should be nourishing, but of a laxative nature. A few well-salted bran mashes or roots will open her bowels. A mare that is constipated sometimes has trouble foaling. When she foals, notice if she cleans properly. The udder of mare should be washed clean before the colt is allowed to suck; this will often prevent the young colt from becoming infected. The navel of colt should be washed with one part bichloride of mercury and 1000 parts water; or one part coal tar disinfectant and twenty parts water, then the cord immediately painted with one part tincture iodine and two or three parts of glycerine or olive oil two or three times a day until it shrivels completely. It is not necessary, and sometimes a great mistake to tie the cord. If there is much hemorrhage, it sometimes has to be done to stop the bleeding, but the string should not be left on more than twelve or twenty-four hours. The bowels of the new born colt are usually costive, but if it is allowed to suck the first milk from mother, it will usually loosen its bowels, but if not, inject two or three ounces of olive oil cautiously into rectum occasionally until bowels move fairly free. Both the mare and colt should be kept in a warm, dry, clean portion of stable until the colt is two or three days old; then you need to pay little attention, more than to feed the mare. During warm pleasant weather the brood mare that is running on pasture seldom requires much watching or special care.

Apples cored and baked with raisins in the cores are delicious.

Sure Cure for HEAVES

Here's what Mr. McKinnon, Harrville, P.Q. says:—"SPECIAL HEAVE REMEDY is the CAPITAL HEAVE REMEDY. I entered a horse that another man had given a fair position to MATCH. I cured her with One package. I can prove this about the old horse. I have her yet; she has never showed a symptom."

FREE TRIAL OFFER

We have such confidence in this remedy that we send a full week's trial free, by express, prepaid and without C.O.D. Write to VETERINARY DEPT. HOUSE, 1 Church street, Toronto, Ont.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Willie's always up to tricks,
Hope the teacher doesn't look;
Till we fold him up and fix
His attention on his book.

A Home-Made Stone Boat.

A very convenient stone boat for hauling big rocks can be made easily. The simplicity of this device leaves little to explain. It consists of two two-inch planks about eight feet long, with a cross-piece two inches by six inches, having two three-quarter-inch holes, 20 inches from centre to centre. This piece is bolted loosely to the planks at one end with five-eighth-inch bolts, the heads of which are counter-sunk in the undersides of the planks.

At the other ends of the planks, about six inches from the ends, two-inch holes are bored. A piece of chain with a toggle on one end is slipped through these holes. The planks are drawn up to straddle the boulder. The chain being held in one plank with the toggle, is drawn tight through the hole in the other plank, bringing the planks as close up under the boulder as possible. A hook, spike or an old bolt may be used to hold the chain in the other plank after it is drawn tight.

The team is then hitched to the chain between the planks. The first pull draws the planks together under the boulder which will ride perfectly as if on a rigid sled.

To unload the boulder, a stone or a chunk can be placed where one of the planks may be drawn over it. The boat will tilt, rolling off the stone.

Riced Potatoes Help Out Flour.

Freshly cooked potatoes, put through a ricer, or forced through a fine strainer, can be used in place of part of the flour in batters or doughs. Cold, left-over potatoes may be used, but are not so easily blended as the fresh hot potatoes, nor is the flavor quite as good.

Beef can be made more tender by soaking in vinegar and water.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed question in of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Ulcers.

X.—Please say a word about ulcers, their cause and effects, and the proper treatment—if they are responsive to treatment. I have heard a strict diet is beneficial in ulcer of the stomach. What are some of the symptoms?

Answer—An ulcer is simply a sore upon the skin or mucous membrane; in other words, a breaking down of the cells, frequently with only slight tendency to get well.

In the latter respect ulcers differ from healthy wounds which begin to get well almost as soon as they are formed or made.

Ulcers may be caused by injury, by burns, and by poor nutrition of the tissues where they occur.

They may be accompanied with sloughing or destruction of the tissue, and perhaps by reabsorption of dead and poisonous material.

They are often attended with haemorrhage and with great weakness in consequence of the prolonged discharge which comes from them, and which means waste of tissue without proper strength for repair.

This is particularly the case with ulcers which attend such diseases as syphilis and tuberculosis.

Ulcers which accompany these diseases are often incurable unless means are found to cure the diseases which caused them. The treatment of ulcers should be constitutional and consist in building up the general condition; and also local, which is directed to the sore itself.

The first will include all necessary hygienic measures, comfortable and well ventilated housing, sleep, exercise in the open air, good food, including an abundance of milk, and perhaps such tonics as cod-liver oil, quinine, strychnine and iron.

Local treatment includes cleanliness and frequent dressing of the ulcer, and the application of astringent and stimulating substances, especially such minerals as lead, copper, zinc, mercury and silver.

In ulcer of the stomach a strict diet is almost imperative—that is, the stomach must be given just as little work as possible.

Some of the symptoms of ulcer of the stomach are sharp pain, indigestion, loss of appetite and haemorrhage.

If the ulcer perforates the peritoneal coat of the stomach, there may be serious haemorrhage and even fatal peritonitis.

QUESTIONS AND ANSWERS

J. H. H.—For two years I have suffered with dull pain on the back of both legs, from knees to toes, and I have thus far been able to get very little relief. Is there any cure for this trouble?

Answer—I should imagine, from what you say, that you are suffering from sciatica. There are many things for the treatment of this trouble—including blistering, heat, baths, massage and electricity—and sometimes it is necessary to make a trial of all of them before finding the proper means of relief.

A young Mother—My baby, seven months old, is healthy and strong, but cross and fretful and has no teeth. She nurses my breast. Shall I begin to feed her with any other nourishment?

Answer—Do not worry because of the non-appearance of teeth. If they are delayed for a few months, it usually does no harm. If you have sufficient nourishment in your breast, there is nothing better for the child; and if your supply continues, I would advise you to nurse the baby through the summer—perhaps supplementing the breast with milk by the bottle if the breast supply should fail.

Do not neglect to plant gladioli every ten days from, say, May 5 to July, for a succession of flowers late into the autumn.

CANADA'S PRIDE

CANADIANS have good reason to be proud of the position Canada holds in the world today. This pride is justified by the activities of her people, by her unlimited natural resources, by her splendid institutions, *and particularly by her Industries.*

Facts about the immensity of some Canadian industries would astonish most people.

These industries, when viewed in the light of comparison with other countries, are simply tremendous.

The growth of any industry is limited to the number of people it can serve, and that is a fact not often properly appreciated when Canadian industries are compared to similar enterprises in, say, the United States.

For example: the population of the United States exceeds 100,000,000. Opportunity for industries there is almost unlimited. In comparison, Canada with its seven million population is a small country—yet in spite of this comparatively small population, Canada possesses several industries which in actual size rank among the biggest in the world.

In shoemaking, one Canadian concern has developed a volume of business and a service to the Canadian people which is not equalled by another shoe manufacturer anywhere in the world. This concern, if located in the United States, would rank as one of the twelve largest out of some two thousand shoe manufacturers there.

While the sales of the largest shoe manufacturer in the United States—selling to the American people—do not exceed twenty-five cents per capita per year, the sales of Ames Holden McCready to the Canadian people last year were approximately *eighty* cents per capita.

In a comparative sense, therefore, this Canadian concern is greater than the foremost American shoe manufacturer in the United States.

Thus Ames Holden McCready truly merit the distinction of their title "Shoemakers to the Canadian Nation."

Just imagine for a moment the enormous work of supplying a large portion of Canada's 7,000,000 people with its boots and shoes!

—it requires—huge up-to-date factories equipped with the most modern machinery able to turn out 8,000 pairs of shoes a day.

—it requires—a variety of nearly 800 different styles to meet the requirements of all classes of people, for different grades, shapes and kinds of shoes.

—it requires—the maintenance of six large distributing branches in principal cities from coast to coast, and in these are carried over a million dollars worth of stock, ready for quick delivery to retailers.

—it requires—many travelling salesmen to call on the retail trade, because out of approximately 10,000 retail dealers who sell shoes in Canada, more than 5,000 handle A.H.M. Shoes.

—it requires—many other details of organization and equipment, but this brief outline will give you some slight idea of the part that this great shoe concern is playing in the business of supplying footwear to the Canadian people.

You will be interested in these facts, because the next time you buy footwear bearing the A.H.M. Brand, you will know that they are the product of a large and efficient organization making shoes which will in every case give you the greatest value for your money.

LIFE IN THE DEAD SEA.

Animal and Vegetable Life Exists Near Its Shores.

The Dead Sea is not so dead as it has been painted, if we are to believe a recent lecturer before the Royal Geographical Society, Dr. W. G. Masterton. He is thus quoted in The English Mechanic and World of Science.

"Ancient writers established a myth that the Dead Sea was an abode of death, that its shores were sterile, and that even birds flying over its water were liable to fall dead. All these ideas are now known to be the reverse of the truth. It was true that the waters were so permeated with salt that no animal or vegetable life could flourish in the bulk of its volume, but near the shores, where streams of brackish water found their way into the sea, small fish, crabs, and mosquito larvæ were found, and he had seen fish in the sea. A bottle of water taken from the same spot immediately afterward was proved to contain no less than 23.3 per cent. of solids. In one of the Jericho hotels, before the war, there was a declaration jointly signed the same year by over a dozen tourists that they saw fish actively swimming at the same spot. At many spots along the shore there are races in which acres of reeds and many trees flourished, and at such spots animal life and bird life was abundant."

Parsnips do well on land that last year produced potatoes, celery or leeks.

ONE RESULT OF THE WAR.

The World-Famous Passion Play May Never Again Be Enacted.

Oberammergau, the little village in Bavaria that became world-famous as the home of the Passion Play, is virtually a deserted village where sorrow broods. All of its male inhabitants capable of bearing arms have entered the ranks of the Bavarian army, and many have fallen in battle.

Miss Madeline Doty, who has visited the village, in recording her experiences in the Atlantic Monthly relates a conversation that she had with a waitress at the little hotel.

"The town is sad," we averred.

"Why shouldn't it be?" she retorted. "We have lost so much."

"How many men have gone to the war?" we asked.

"Every one under forty-five. Five hundred and fifty out of a population of eighteen hundred."

We paused a moment. It seemed brutal to go on now, but we wanted information.

"There were forty killed and forty-eight wounded the first year. I don't know the number now."

"Will there ever be another Passion Play?"

She shrugged her shoulders. "How can I tell?" Some of the players and musicians have lost an arm or a leg, and others are dead. The town no longer has any money."

We pushed back our chairs and went out into the golden sunshine. No one moved about the streets. It was like a village swept by a plague and deserted. War has been a special disaster to Oberammergau. It has dealt a blow at its spiritual as well as its physical welfare.

The Soldier's Father.

I'm feeling pretty much alone
And lonely, since the boys are gone.
They've left me with the hired man
To run the farm as best we can.
It's hard, and work is moving slow—
But when their duty calls, they go.

So I, like old man Zebedee,
Beside the Lake of Galilee,
Said: "Leave behind your cares and frets;
I'll stay on here and mend the nets,
And keep the tight old bark a-swim;
You go and follow Him."

The Archbishop of York at Wycliffe College.

On his recent visit to Toronto, the Archbishop of York spent a short time at Wycliffe College, where the Founders' Chapel was the particular point of his interest, the larger part of the building being at the present time used for military purposes. Doctor O'Meara, the principal, showed him the Roll of Honor which gives the names of thirty graduates and seventy undergraduates who are serving with His Majesty's forces as Chaplains of combatants, and the Memorial Roll on which are inscribed the names of two graduates and seven undergraduates who have paid the supreme price of self-sacrificing service. The tablet in memory of the Founders, and Axel Enders' famous picture of the Resurrection, were objects of his special remark.

Before leaving, His Grace offered intercession for the College and its Staff, its students and its graduates. He was accompanied by the Archbishop of Algoma, the Bishop of Toronto, the Mayor of the city, Archdeacon Cody, and a number of clerical and lay friends.

The new College flag was flown in honor of his visit.

British Treasury Receives Gift.

An envelope containing $500 recently was found in a letter box in Liverpool, says a London correspondent. The packet was addressed "For the Treasury."

One luxury that is actually an economy is Salada Tea. It yields many more cups than ordinary tea and, besides, has that unique, delicious flavor.

A New Kind of Foghorn.

The new "fisherman knight," Sir Thomas Robinson, tells an amusing story, according to an English weekly, about an incident that happened during one of his many journeys across the Atlantic.

A short time after leaving port the ship on which he was traveling ran into so dense a fog that it was impossible for anyone to see more than a few yards ahead. The captain remained on the bridge and took charge of sounding the foghorn himself.

After he had sounded the first signal he heard a foghorn in reply directly ahead.

To avoid a collision he turned the ship a point and then sounded again. Once more the reply came, "B-o-o-o!" directly ahead, as before.

"It was very strange; I could not make it out," said Sir Thomas in telling the tale. "Neither could the captain. He tried again; still the same 'B-o-o-o!' right ahead. The captain was flabbergasted; and, as for me, I was giving myself a mental shake to pull myself together, when the lookout man forward called out:

"'It's only the old cow, sir!'

"And so, in truth, it was—the milch cow kept on the forecastle for the use of the ship."

Protect Birds, Conservation Plea.

At a time when the largest crops possible are being urged in England the public is advised that starlings and chaffinches kill pests, and that pests prey on the crops, says a London correspondent. A campaign for the protection of birds is being waged throughout the country as an aid to crops.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

I Know.

I know whence you came
By love's own art:
Your home was the peace
Of a wild rose-heart.

I know why you smile:
The sunshine lay
On your wild rose home
For a long spring day.

I know why your voice
Is sweet and high:
A thrush sang each eve
The wild rose nigh.

I know why your cheeks
Are rosy fair:
A petal of pink
Is blooming there.

I know that your hands
So tiny hold
A love that will live
When years are old!

—Arthur Wallace Peach.

LEMONS WHITEN AND BEAUTIFY THE SKIN.

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Good bread pudding is made with apples and brown bread.

Minard's Liniment Relieves Neuralgia.

Could Not Trace Him.

During the British advance on Jericho an enemy shell struck an ancient tomb and revealed a skeleton. Investigation by the official archeologists connected with the British staff pointed to the skeleton being that of an historical figure, John of Antioch. Accordingly a cable was despatched to the War Office in London: "Have discovered skeleton supposed to be that of John of Antioch."

The War Office replied: "Cannot trace John Antioch. Send identification disk."

LIFT YOUR CORNS OFF WITH FINGERS

How to loosen a tender corn or callus so it lifts out without pain.

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called freezone, applied directly upon a tender, aching corn, instantly relieves soreness; and soon the entire corn, root and all, lifts right out.

This drug dries at once and simply shrivels up the corn or callus without even irritating the surrounding tissue.

A small bottle of freezone obtained at any drug store will cost very little but will positively remove every hard or soft corn or callus from one's foot.

If your druggist hasn't stocked this new drug yet, tell him to get a small bottle of freezone for you from his wholesale drug house.

Mixed Them Up.

The squad of recruits was particularly dense, and the sergeant got more and more exasperated. One man appeared quite incapable of telling his right hand from his left.

Said the sergeant at last: "Now, yer bloomin' idiot, hold yer hands in front of yer. Twist them one over the other. Stop! Now tell me which is yer left hand and which is yer right."

The recruit looked blankly at his hands for a moment.

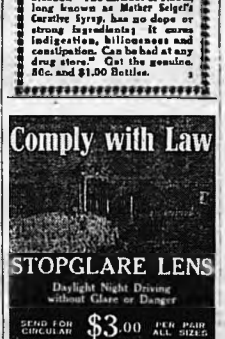
"I'm blowed if I know," he said; "you have gone and mixed 'em up."

Minard's Liniment Cures Distemper.

A Schoolboy's Idea.

A schoolboy's composition: "Winter is the coldest season of the year, because it comes mostly in winter. In some place, in auntie's podes, it comes in summer, then it is not so worse. I wish winter came in summer here, then we could go skating barefooted and make snowballs without getting our fingers frozen. When it snows in summer they call it rain."

Minard's Liniment for sale everywhere.



Produce is the Call.

"Whosoever makes two ears of corn or two blades of grass to grow where only one grew before, deserves better of mankind, and does more essential service to his country than the whole race of politicians put together."—Swift.

How to Cure Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "Tee Extract of Roots, long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it cures indigestion, biliousness and constipation. Can be had at any drug store." Get the genuine. 50c. and $1.00 Bottles.

Market Your Maple Sugar.

There is a big market for maple sugar and maple syrup in Canada, the United States and in England. Farmers who can't find local markets should write to Montreal or Toronto.

Minard's Liniment Cures Burns, Etc.

The Ideal Husband.

Every woman wants her husband to be four things—her lover, her comrade, her child, and her master.

Minard's Liniment Co., Limited.

Gentlemen,—I had my leg badly hurt, the pain was very severe and a large swelling came above the knee. I expected it would be serious—I rubbed it with MINARD'S LINIMENT, which stopped the pain and reduced the swelling very quickly. I cannot speak too highly of MINARD'S LINIMENT.

THIS WOMAN SAVED FROM AN OPERATION

By taking Lydia E. Pinkham's Vegetable Compound, One of Thousands of Such Cases.

Black River Falls, Wis.—"As Lydia E. Pinkham's Vegetable Compound saved me from an operation, I cannot say enough in praise of it. I suffered from organic troubles and my side hurt me so I could hardly be up from my bed, and I was unable to do my housework. I had the best doctors in Eau Claire and they advised me to have an operation, but Lydia E. Pinkham's Vegetable Compound cured me so I did not need the operation, and I am telling all my friends about it."—Mrs. A. W. Bunker, Black River Falls, Wis.

It is just such experiences as that of Mrs. Bunker that has made this famous root and herb remedy a household word from ocean to ocean. Any woman who suffers from inflammation, ulceration, displacements, backache, nervousness, irregularities or "the blues" should not rest until she has given it a trial, and for special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass.

The Paisley Advocate

PAISLEY, MAY 1st, 1918

SOME WAR NOTES

Although the need for men on the fighting line or for reinforcements to support our army in the climax of the war—which is now on or will be surely reached this summer—is the paramount need of the hour, there is a strong protest from the farmers since the government decided to call up all young men of 20 to 23 years of age to join the colors. We can't fight and farm, they say.

There is only one class of men who can do effective fighting—the young men—and whether they are needed on the farm or not they are needed more in the army. Since conscription by tribunals has failed to raise the required 100,000 recruits, the authorities are obliged to adopt new methods of filling up the ranks. Were every young man in Canada as patriotic as the 40,000 or thereabouts who enlisted voluntarily, there would have been no need for any kind of compulsory measure. But 'twas ever thus. In all ages some citizens were ready to rise in defence of their liberty at the first alarm, others waited for the appearance of the enemy at the city gates before taking up arms, and some had no inclination whatever to take a hand in the fray.

So many men are needed for overseas that to send all will deplete the farms of help. But there are thousands and thousands of men of the non-combatant classes engaged in non-essential industries, a fair percentage of whom would make very good help on the land, as they were born and brought up on farms along the concessions of this province. They were attracted to city or town life by the bigger wages paid for shop, factory or office work, and the more desirable conditions of life. Many of this class could now be turned back to the land if some organization plan be adopted. Should the war continue, there is no doubt this will have to be done.

In fact, if the Germans hold out much longer, the people of this country will have to do a lot of things they don't like to think of doing. Should the Germans break through there would be a more ready response to various appeals for patriotic service.

We have the land in Canada to grow foodstuffs for the Allied army. We also have men enough to cultivate a lot more land than at present, if they were but properly organized into an army of production.

A body of men could be enlisted or conscripted and sent to our vacant western lands, vast tracts of which are ready for the plow. The government could soon get together an extensive plant for breaking up and cultivating thousands of acres which would produce a much larger quantity of wheat than could be done by the divided efforts of small farmers in Ontario. A corps of men under the direction of "captain" or "colonel" farmers, or plain foremen in charge of gangs or groups of men and equipment, would seem to be a simple and business-like way of developing that part of our vast resources to best advantage. There are a great many men who might be willing to do their bit in such a way rather than undertake to farm on their own hook.

The fighting men are trained to obey the commands of officers in their operations against the enemy. But the food soldiers are each going their own little way about the job of feeding the men who are beating the Huns. What a spectacle the great Allied fighting machine would be were the individual soldiers "carrying on" as the farmers are. The soldiers are giving their days at $1.10 per, and chances of coming out alive, while a whole lot of fellows at home are grabbing for all the filthy lucre they can make while the prices are high, without regard to how much or little assistance their efforts may be to the campaign being carried out by the boys "over there." We are informed by observing farmers on different sides of Paisley that there are hundreds of land holders who are not doing anything whatever to add to the nation's supply of grain that is needed so urgently. On the contrary, many are actually doing a lighter year's work because they can afford to do so. What a display of patriotism is this!

There may come a time in the course of this war when a better state of things will prevail. A short crop season, or a period of German success might bring a change in the ideas of some. We have enjoyed a cycle of bounteous years, and there is no guarantee of what the next few turns of the wheel may bring.

When the pioneer settlers of Canada came overseas to conquer the wilderness of woods, they faced the task with the same dauntlessness that is being displayed to-day by the grandsons or great-grandsons of the log-cabin farmers, who have now gone overseas to conquer the German hosts that threaten to wreck our civilization and freedom. Those pioneers lived on plain food, wore plain clothing, and cheerfully devoted themselves to the work of that period. They accomplished much. The people of this day might take an example from their forefathers in many things and make the war programme go better.

—The daylight saving enactment does not appear to be looked upon with favor by the farming class, they claiming that it disarranges conditions with them. Many, no doubt almost universally among the farmers, have not disturbed their clocks, and are "marking time" with their labor on the farm as usual. In some of the country schools the old time is still in use, as it is found a hardship for very young scholars going a distance to reach school at the earlier hour. This may be so. In fact there can be no serious objection to the farmers leaving their clocks and arranging for their meals and hours of labor as they see fit. It would be well for them to bear in mind, however, that the official time for postoffices, banks, railways and all business places is one hour ahead of old time, and make their conveniences for doing business accordingly. There can be no justification for customers from the country leaving their shopping on Saturday nights to be congested into closing hours of midnight and after, either old or new time. All should endeavor to do shopping early, so that the stores could close not later than 10 o'clock standard time on Saturday nights. Then again, for Sunday church services, the hours could possibly be arranged more to the convenience of rural church goers, particularly in the evening, as farmers find it difficult to get their chores done in time to leave home for the service. The hour might be changed to 7.30 or even 8 o'clock, if the circumstances warrant it. In cities, towns and villages the summer change of time is a great advantage to the majority of residents, and with a little adjustment the innovation will work out satisfactorily in the country also.

"Earn and Give"

A Y. M. C. A. representative was in town on Tuesday organizing for the boys' earn and give campaign, by which it is proposed to raise $50,000 in Canada for the benefit of soldiers.

Bruce County Casualties

Among the list of casualties during the past few days were: Pte. Jas. Agnew of Chesley platoon, Pte. Wm. Caldwell of Wiarton, Pte. W. D. Adams of Tobermorey, Pte. Oscar Loney of Oxenden, all of the 160th. The first two were killed in action, and the last two gassed. P. J. Carson, a Southampton man, and Murray Walsh of Kincardine Tp., are reported missing.

Baby Girl Died

Mr. and Mrs. Mac McArthur, of Church St., are being called upon to bear more than the average share of tribulation, and we are sure they have the heartfelt sympathy of all in the loss of their second child, a baby girl, who died on Monday night. Their first-born also died in infancy. Mr. McArthur is just getting around after an operation for stomach trouble, and although improving nicely, he will not likely be able to do any work for months yet.

Plaintiff and Defendant Each Got Judgment

At the Division Court in Tiverton on April 13, says the Watchman, Mr. Hugh Hunter, 4th con. Bruce, sued Mr. Angus Bruce, of the same concession, for damage done by his fowl. Mr. Bruce entered a counter claim for damage done by Mr. Hunter's stock. Lawyer Stewart of Kincardine appeared for the plaintiff and Forrester of Paisley for the defendant. After the evidence was heard, the judge, without delay, gave judgment in favor of the plaintiff for $10 and the defendant for $5, each to pay his own costs. The amounts sued for were $60 and $40 respectively.

Two Dead Soldiers Honored

The soldiers' memorial service in Knox church on Sunday evening in honor of Pte. Jas. McGillivray and Tr. Geo. Switzer brought together a large congregation. The sermons were delivered by Rev. G. C. Little and Rev. A. J. Creighton. The musical service was led by a union of the Presbyterian and Methodist choirs.

It is a Great Picture Show

"The Birth of a Nation," given in the town hall on Tuesday evening, was unreeled to the eyes of the audience just as it has been in the big city theatres, and provided the same thrilling and spectacular effects that were produced on the largest stage. This dramatization of American history is one of the great wonders of film art. It is not only entertaining, but must also be a factor for inspiring patriotism at this particular time. To have it appear in small towns and villages is a pleasure unexpected until announced, and the appreciation of the people was shown by the large attendance. The accompanying orchestral music was alone a great treat. The public will welcome a return of the company with "Intolerance" pictures, which may be expected in a few months.

No Hoarding of Sugar to be Allowed

The Canada Food Board have issued an order limiting the supply of sugar that any person may have on hand. A person living within two miles of a store where sugar is sold shall not have at any time in his possession more than is required for 15 days' use. If living from two to five miles from store a supply for 30 days will be allowed, more than five miles a 60 days' supply, and more than ten miles a supply for 120 days. Licensed wholesale and retail dealers must not hold or control more than their ordinary trade requirements for 45 days. Persons holding or controlling sugar in greater quantities than those prescribed are required to return such excess to the dealer or dealers from whom it was purchased. Penalties for violating the order are from $100 to $1000, or imprisonment for a period up to three months.

More Correspondents Wanted

The Advocate has received most loyal and acceptable support from its list of local correspondents, for which the editor is very grateful. Some sections of our territory have been very regularly heard from, and we would like to see items appear weekly under other headings that do not now appear. There is some literary talent in every school section hereabouts, and we would ask that what exists should declare itself by contributing a budget of news or other original items to grace the columns of The Advocate. The writing of news, views or local sketches will be found excellent literary exercise for any person, young or old. We can name some very successful newspaper men who began their career as local correspondents to this little family journal. Let not your light be hidden under a bushel. If you have news items, or would like to express your views upon any question of the day, send them along for publication.

ONLY MEDICINE MADE FROM FRUIT

Extraordinary Success which "Fruit-a-tives" Has Achieved

One reason why "Fruit-a-tives" is so extraordinarily successful in giving relief to those suffering with *Constipation, Torpid Liver, Indigestion, Chronic Headaches, Neuralgia, Kidney and Bladder Troubles, Rheumatism, Pain in the Back, Eczema* and other Skin Affections, is, because it is the only medicine in the world made from fruit juices.

It is composed of the medicinal principles found in apples, oranges, figs and prunes, together with the nerve tonics and antiseptics of prune rapids.

50c. a box, 6 for $2.50, trial size 25c.

At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

To Motorists

One of the warnings to motorists from Deputy Minister of Highways reads thus: Pedestrians who have started to cross a street at a reasonable distance from an approaching car have the right to, do it at the pace of an ordinary walk, and the motorist has no right to compel pedestrians to rush or run for safety by the insolent blow of his horn.

Street Grading and Cleaning

The village council have had the Elderslie road grader engaged for several days, rounding up Queen St. south and some other roadways that were worn flat. The machine was also put on Queen Street north to clean up the mud, executing the job with neatness and despatch. Mr. S. K. Ewart is the operator in charge. Our council find the machine not only more expeditious for cleaning purposes, but also cheaper than hand labor.

Red Cross Shipment

Following articles were shipped by Paisley Patriotic League on April 23rd: 140 pairs socks, 22 flannel shirts, 14 stretcher caps, 36 pillow covers, 84 treneh towels, 14 suits pyjamas, 8 cheesecloth handkerchiefs, 18 personal property bags, 24 housewives (not furnished). Donations—Knox Church Patriotic Class—6 pairs socks, 18 personal property bags, 24 housewives (not furnished). Lockerby ladies—16 pairs socks, 8 flannel shirts, 6 suits pyjamas.

War Souvenirs

The Advocate is in receipt of a package of souvenirs sent by Pte. H. Woodcock from London, Eng. The collection includes a German machine gun belt and cartridges, an empty whizz-bang shell, a safety razor, a German soldier's cap. Those who would like to have a look at these articles will find them in our curio box. Pte. Woodcock is the owner of Paisley pork factory building. He left England last month for France.

Recruits for Tank Draft

Fifty recruits are urgently required from Military District No. 1 for the "First Tank Battalion, Canadian Machine Gun Corps." Recruits should be:—(1) In Category A; (2) age 19 to 35; (3) It is not necessary that men should belong to a universities corps, but they should as a rule have a similar standing of educational efficiency; (4) knowledge of engineering and petrol engines useful but not essential. Applicants may apply to any authorized medical examiner in the district for examination.

BLACK LEG KILLING MANY YOUNG CATTLE

An Improved Remedy Available

The deadly cattle disease known as black leg seems to be more prevalent in the locality during the past couple of years, and is threatening to reduce many herds very considerably. The latest outbreak is in the Mount Hope section, where several good animals have been lost through this cause recently, and the farmers are becoming alarmed about the spread of the disease. There is reported a considerable outbreak in different provinces of Canada.

We note that a new immunizing agent for black leg in cattle is being introduced in the various Dominion veterinarians throughout the country by the Agricultural Department at Ottawa. The new filtrate, which is being distributed for the first time this year is replacing the old vaccine pill, which has hitherto been used in cases of epidemics by the government veterinarians, and it is claimed that with the new preparation the losses, which averaged from one to one and a half per cent with the old vaccine, will be reduced to one-fifth of one per cent, based on results secured from the United States. It is stated that the great advantage of the new filtrate is in the fact that it does not contain the germs of the disease, and while the old vaccine pellet. The pill, which was used in the past, was compounded of black leg germs and relied upon giving the animal inoculated a mild form of the disease, and while splendid results were achieved, some losses occurred. On the other hand the new filtrate does not contain the disease germ and therefore cannot produce the disease. The filtrate is prepared in a concentrated form, is suitably preserved and will retain its potency for an almost indefinite period of time.

CARD OF THANKS

Mr. Hector McGillivray and family desire to thank their neighbors and friends for the kind sympathy and condolence extended to them in their recent bereavement by the death of Pte. Jas. McGillivray.

We are aiming to give up-to-date service to all car owners. Motorists who get stalled on country roads in this locality should call up Paisley garage for quick service.

We carry a full line of Overland, Chevrolet and Ford parts.

MILLER & McKINNON, Props.

A One Day Job

The registration of the man and woman power of Canada is to be all done in one day, according to a dispatch from Ottawa, before the end of June. The detailed regulations make provision for the places of registration being open from seven o'clock in the morning until ten p.m. Owing to the number of individual questions which each will have to answer, the process of registration will be considerably slower than that of voting at an election. All the number of persons to register will greatly exceed the number of voters, a large staff of Deputy Registrars will have to be provided to complete the registration in one day. As already explained, however, provision is made for the subsequent registration of persons who, on account of sickness or for other reasons, are unable to register on the regular day. These persons will be able to obtain registration cards from postmasters and to send them to the Central Registrar, who will be located at Ottawa.

A LESSON FROM THE NAPOLEONIC WARS

With Russia crushed and helpless at the feet of Germany we are passing through trying days. But a century ago Britain had days even more trying. We think of Trafalgar as a great victory which gave us mastery of the sea for a hundred years.

Do we remember what happened just after Trafalgar? At the very moment of the battle Napoleon was leading an army from France to attack Austria and Russia. On December 2, six weeks after Trafalgar, he defeated Austria at Austerlitz. By the end of the same month he had occupied Vienna and dictated terms of peace to Austria. Austria down, he threatened Prussia, and when, at length in October, 1806, Prussia defied him, he smashed her completely at Jena, and was in Berlin by the end of the same month. Here he issued the famous Decree closing practically all the ports of the continent to British ships.

Napoleon in 1807

When Russia still held out, he pushed eastward, and in July, 1807, forced Russia to sign at Tilsit a peace which made him master of all western Europe. He carved up Prussia, as Prussia is now carving up Russia. Out of German territory he created a new kingdom of Westphalia with his brother as king. He set up a new Poland. And all these piled-up victories within a year and a half after our triumph at Trafalgar!

Pitt, who had vowed that England would fight on till France retired to her own territories, died in January, 1806, heart-broken because his country seemed to be ruined. The outlook remained black for years. By 1808 Napoleon had occupied Portugal. He had put his brother on the throne of Spain. Another brother was king of Holland. His brother-in-law, Murat, was made king of Naples. Napoleon himself was king of Italy. Europe, Napoleon once said, was too small for him. He would reach out to Asia, to Africa by way of Egypt, even to America. He had had plans to conquer Canada and had thought it would be done by sending a force up the Mississippi and taking Canada in the rear.

Seven Long Years of Agony

From 1805 to 1813 Britain had a dark outlook—seven long years of agony. We all know the famous poem, "The Burial of Sir John Moore," a kind of dirge for Britain's failure in Portugal in 1808 and 1809. Lisbon was the only great port in Europe to which Britain had free access, and in 1810 and 1811 Wellington was able to hold on there only because of the defensive lines at Torres Vedras which protected the seaport.

It took the British five years to fight their way across Spain and get into France. As late as in 1812 Napoleon was certain of victory over all his enemies. His soldiers still believed that he was unconquerable. Sidney Smith was not ashamed to say publicly in 1807 that Britain could not win, that the blockade was useless, and that a French army would probably land in England. Eight years were required to prove him a false prophet, but Britain fought on and won in 1814 and 1815.

The First Blow Against Napoleon

The first blow which struck down Napoleon's pride came from his own ally, Russia. He made Russia suffer bitterly by coming to Moscow. But he could not hold his conquest. When Russia struck, others plucked up courage to strike too. Prussia rose on his retreating armies. So did Austria. Even with this menace he would not make peace when he might still have retained both his throne and the old frontiers of France. At last all Europe saw that its only safety was his complete downfall and refused to treat with him.

We need to remember to-day that our fathers went through darker hours than any which we have yet faced. They made one great mistake. In 1802 they signed a premature peace by compromise—and in the following year were again at war! They fought the would-be conqueror of Europe for twenty-three years. He held western Europe from the Mediterranean to the Baltic. At one time, and that when Napoleon was strongest, Britain had no Allies. Russia deserted her in 1807. Her taxes were crushing. Her people complained of famine. Croakers talked of a hopeless struggle with ruin at the end. Compared with those days ours are bright.

We Too Shall Triumph

The great nation against which we contended a hundred years ago is to-day our ally. France is with us in this war against military tyranny and will be to the end. The United States with its boundless resources has come into the struggle and her military strength is only beginning to be felt. We have on our side two other great powers, Italy and Japan. In men and resources we are vastly superior to the enemy. It will take time to strike effectively but nothing like the time it took a century ago. To our ancestors this would not seem a long war.

Our danger is lest we grow weary by the delay. We owe a stern tenacity in the fight to the men who confronted trials heavier than ours. At last they triumphed. We, too, shall triumph if, we but continue strong and resolute.

They Must Not Look in Vain!

AN officer was missing. His brother crept out and found him in a shell hole. He bore him back to the lines—dead. "Are you not sorry you ventured all this?" asked the commanding officer. "No", because when I found him he looked up into my face, smiled and said "I knew you would come!" What could more fittingly illustrate the work of the "big brother to the soldiers"—the Y.M.C.A.! No danger is too great to be risked for the sake of the physical, mental and spiritual welfare of those dauntless heroes of Ypres, St. Julien, Vimy Ridge, Passchendaele! Everywhere he goes the Y.M.C.A. follows—faithful to the limit of its resources.

Y.M.C.A.

Red Triangle Fund

$2,250,000—May 7, 8, 9

Canada-Wide Appeal

Think of the inspiration to the Canadian soldiers in this tremendous Campaign of 1918 as they learn that the folks at home are heart and soul behind them, showing it by a magnificent response to the Red Triangle Fund appeal—the worth while way.

Help the Y.M.C.A. to increase its helpfulness. Help it as far as possible to measure up to the boundless need! Help with your money, that more and ever more soldiers can say, "I knew you would come!"

Many people are located at points where one cannot get into touch with any canvasser working in aid of the Red Triangle Fund. If you are so situated send your money direct. Remit by cheque, money order or registered letter to Thomas Bradshaw, National Treasurer, Red Triangle Fund, 120 Bay St., Toronto. Make your contribution as large as possible, but whether large or small it will be welcome.

A Village Without Y. M. C. A.

Frank B. Sayre writing in Harpers' says: "With only evil ways in which to spend money burning in their pockets, with nothing to relieve the dull monotony of idle evenings, many of the soldiers began to get lonely and homesick, or to drift along dangerous paths.

"It was not many days before officers began to send hurry calls for the Y.M.C.A.: 'For God's sake come down before it's too late and do something for my men.'"

"Earn and Give" Campaign

Serve your Country by your labor and make a gift to the Red Triangle Fund from your earnings! What a fine chance to do a double service! Six thousand boys are asked to give $10 each. Of the total, $60,000 goes to help the soldiers, the balance for boys' work. Gifts must be at least $10, the standard unit. A boy may subscribe more than $10 in $10 units, but not less. A beautifully engraved certificate will be given to each subscriber. Ask your local Y.M.C.A. representative for pledge card and full information, or send your contribution direct to headquarters.

National Council, Young Men's Christian Association

While no reason for panic or apprehension can be found, government and other forecasts and reports should not be allowed to create undue optimism or prompt misleading conclusions. The U. S. Department of Agriculture, for example, indicates a possible yield of between 800,000,000 and 900,000,000 bushels, and the estimate may even prove conservative. But last year's crop was insufficient for the demand and reserves are already nearing exhaustion.

As an offset to wheat expectations a Washington correspondent, after consulting with the department officials, reported that a decrease of perhaps 300,000,000 bushels of corn might be expected, but treated the matter lightly because there "would be more wheat!" His report was not, of course, official, but it is probable enough looking to the dearth of good seed corn and the numerous farmers who have been unable to market their huge crop of last year. It is quite likely, therefore, that the reduction in corn may more than offset the increase of other grains and the net result may be a total grain supply not larger or but little larger than that of 1917. Last year's crop has proved too small to meet the demand. France has been obliged to reduce her already bare ration, and Britain has also been forced to adopt the card system and penalize hoarding. Italy's plight is worse than either's. No one should assume that even a record crop will solve the problem of feeding the allied nations at war. The situation calls for continuous restraint and self-denial, and also for increased production of all kinds of food along all possible lines.

The Y.M.C.A. is able ...her. Though the work ...y be nearer to the ideal ...ace done, the Y.M.C.A. ...e boys."

"There were giants in those days."

It will be cherished as one of the most prized of a little collection of autographed first editions. As a work it I shall cherish the memory of having spent a couple of hours with a well-known man who is doing a noble work himself and is not afraid to give the fullest credit to other men who are doing a noble work—such as the officers and field-workers of the Y.M.C.A., "who play such a great forward line to the Church's backing in the great, great game," as Connor said.

RALPH CONNOR

"But I often hear comments, not always friendly—about the prices that the Y.M.C.A. charges for some of its supplies."

"Such comments have no justification. The prices are as near right as they can be made. If there is any profit on the sales to the boys in the camps or back of the lines, every cent of it goes to provide things free—absolutely free—to those who are in the front line trenches. As a matter of fact, the canteens and other organizations under the control of the churches and chaplains have pretty much the same schedule of prices as the Y.M.C.A."

I could not suppress a smile at finding my ancient enemy the trust or "Gentleman's Agreement" appearing in so admirable a form. But I made no comment. Instead, I asked a concluding question:

"Then I may tell the people that in its war work, especially in the matter of creature comforts, the Y.M.C.A. is nearer to the boys than anyone else?"

"Yes. It stands nearer to them than anything else except the military organization under whose discipline they live—and die. You see they are specially organized, trained and outfitted for this kind of work—and they are a mighty spiritual force, too."

When leaving him, I stopped to talk to several other clergymen who appeared in the offing—it was a place of clergymen—and he stepped from the room. Shortly afterwards he returned with a copy of his latest book, on the fly-leaf of which he had written in memory of the men we had known in our boyhood.

Court Sangster, C.O.F. No. 88

...Bell.—W. J. WILSON, Prop., 18th Greenock.

...living conditions on the farm may become more attractive and cheerful than town or city life.

10. To encourage others to join this association, to take the pledge and to keep it."

Such an organization with such a pledge card cannot but help be a big factor in the matter of increasing production. Every township in Canada should follow the example set by Nottawasaga to the advantage of the residents of the township and to the Empire as a whole. The spirit of co-operation is a big factor in the success of an institution or class.

where it appears that hotels are not needed to accommodate the travelling public or have not proper facilities, licenses are being refused.

—The Heintz Co., manufacturers of pickles, are asking the farmers about Wiarton to plant a hundred acres or more in cucumbers. The company furnish the seed free, and pay $2.50 per hundred pounds of cucumbers from 1 to 3½ inches long, or for over 3½ inches long 80 cents per 100 pounds. They state that at the rate of 32 per 100 pounds growers have made over $800 per acre.

With something of the zeal that fired your son.

That struck me as a very important point, and I decided to question him from an angle that might not be pleasing to a clergyman.

"You know," I insinuated, in a spirit of half confession, "that there are a lot of boys who would be inclined to look at a Y.M.C.A. at home as a sort of sheltered institution, beneath the notice of young men of the world who like to affect a sort of manly wildness. Does the Y.M.C.A. get near to them?"

"Yes. The helpfulness of the Y.M.C.A. has won out, over every obstacle. In the beginning, the officers of the High Command had something of the attitude you suggest. But whenever there was anything to be done to help the boys the Y.M.C.A. was there to do it and do it well. By its spirit of unassuming helpfulness the Y.M.C.A. has won the hearts of both the officers and men, no matter what their church connections may be or may not be. It gives and it does not ask anything in return. Its sole reward is that it helps freely all who need help. The thing to emphasize about its work is that it gives—it is an organized spirit of giving, and it gives without a string to the giving."

A LESSON FROM THE NAPOLEONIC WARS

With Russia crushed and helpless at the feet of Germany we are passing through trying days. But a century ago Britain had days even more trying. We think of Trafalgar as a great victory which gave us mastery of the sea for a hundred years.

Do we remember what happened just after Trafalgar? At the very moment of the battle Napoleon was leading an army from France to attack Austria and Russia. On December 2, six weeks after Trafalgar, he defeated Austria at Austerlitz. By the end of the same month he had occupied Vienna and dictated terms of peace to Austria. Austria down, he threatened Prussia, and when, at length in October, 1806, Prussia defied him, he smashed her completely at Jena, and was in Berlin by the end of the same month. Here he issued the famous Decree closing practically all the ports of the continent to British ships.

Napoleon in 1807

When Russia still held out, he pushed eastward, and in July, 1807, forced Russia to sign at Tilsit a peace which made him master of all western Europe. He carved up Prussia, as Prussia is now carving up Russia. Out of German territory he created a new kingdom of Westphalia with his brother as king. He set up a new Poland. And all these piled-up victories within a year and a half after our triumph at Trafalgar!

Pitt, who had vowed that England would fight on till France retired to her own territories, died in January, 1806, heart-broken because his country seemed to be ruined. The outlook remained black for years. By 1808 Napoleon had occupied Portugal. He had put his brother on the throne of Spain. Another brother was king of Holland. His brother-in-law, Murat, was made king of Naples. Napoleon himself was king of Italy. Europe, Napoleon once said, was too small for him. He would reach out to Asia, to Africa by way of Egypt, even to America. He had had plans to conquer Canada and had thought it would be done by sending a force up the Mississippi and taking Canada in the rear.

Seven Long Years of Agony

From 1805 to 1813 Britain had a dark outlook—seven long years of agony. We all know the famous poem, "The Burial of Sir John Moore," a kind of dirge for Britain's failure in Portugal in 1808 and 1809. Lisbon was the only great port in Europe to which Britain had free access, and in 1810 and 1811 Wellington was able to hold on there only because of the defensive lines at Torres Vedras which protected the seaport.

It took the British five years to fight their way across Spain and get into France. As late as in 1812 Napoleon was certain of victory over all his enemies. His soldiers still believed that he was unconquerable. Sidney Smith was not ashamed to say publicly in 1807 that Britain could not win, that the blockade was useless, and that a French army would probably land in England. Eight years were required to prove him a false prophet, but Britain fought on and won in 1814 and 1815.

The First Blow Against Napoleon

The first blow which struck down Napoleon's pride came from his own ally, Russia. He made Russia suffer bitterly by coming to Moscow. But he could not hold his conquest. When Russia struck, others plucked up courage to strike too. Prussia rose on his retreating armies. So did Austria. Even with this menace he would not make peace when he might still have retained both his throne and the old frontiers of France. At last all Europe saw that its only safety was his complete downfall and refused to treat with him.

We need to remember to-day that our fathers went through darker hours than any which we have yet faced. They made one great mistake. In 1802 they signed a premature peace by compromise—and in the following year were again at war! They fought the would-be conqueror of Europe for twenty-three years. He held western Europe from the Mediterranean to the Baltic. At one time, and that when Napoleon was strongest, Britain had no Allies. Russia deserted her in 1807. Her taxes were crushing. Her people complained of famine. Croakers talked of a hopeless struggle with ruin at the end. Compared with those days ours are bright.

We Too Shall Triumph

The great nation against which we contended a hundred years ago is to-day our ally. France is with us in this war against military tyranny and will be to the end. The United States with its boundless resources has come into the struggle and her military strength is only beginning to be felt. We have on our side two other great powers, Italy and Japan. In men and resources we are vastly superior to the enemy. It will take time to strike effectively but nothing like the time it took a century ago. To our ancestors this would not seem a long war.

Our danger is lest we grow weary by the delay. We owe a stern tenacity in the fight to the men who confronted trials heavier than ours. At last they triumphed. We, too, shall triumph if we but continue strong and resolute.

They Must Not Look in Vain!

AN officer was missing. His brother crept out and found him in a shell hole. He bore him back to the lines—dead. "Are you not sorry you ventured all this?" asked the commanding officer. "No", because when I found him he looked up into my face, smiled and said "I knew you would come!" What could more fittingly illustrate the work of the "big brother to the soldiers"—the Y.M.C.A.! No danger is too great to be risked for the sake of the physical, mental and spiritual welfare of those dauntless heroes of Ypres, St. Julien, Vimy Ridge, Passchendaele! Everywhere he goes the Y.M.C.A. follows—faithful to the limit of its resouces.

A Village Without Y. M. C. A.

Francis B. Sayre writing in Harpers' says: "With only evil ways in which to spend money burning in their pockets, with nothing to relieve the dull monotony of idle evenings, many of the soldiers began to get lonely and homesick, or to drift along dangerous paths.

"It was not many days before officers began to send hurry calls for the Y.M.C.A.: 'For God's sake come down before it's too late and do something for my men.'"

Y.M.C.A.

Red Triangle Fund

$2,250,000, May 7, 8, 9

Canada-Wide Appeal

Think of the inspiration to the Canadian soldiers in this tremendous Campaign of 1918 as they learn that the folks at home are heart and soul behind them, showing it by a magnificent response to the Red Triangle Fund appeal—the worth while way.

Help the Y.M.C.A. to increase its helpfulness. Help it as far as possible to measure up to the boundless need! Help with your money, that more and ever more soldiers can say, "I knew you would come!"

Many people are located at points where one cannot get into touch with any canvasser working in aid of the Red Triangle Fund. If you are so situated send your money direct. Remit by cheque, money order or registered letter to Thomas Bradshaw, National Treasurer, Red Triangle Fund, 120 Bay St., Toronto. Make your contribution as large as possible, but whether large or small it will be welcome.

"Earn and Give" Campaign

Serve your Country by your labor and make a gift to the Red Triangle Fund from your earnings! What a fine chance to do a double service! Six thousand boys are asked to give $10 each. Of the total, $60,000 goes to help the soldiers, the balance for boys' work. Gifts must be at least $10, the standard unit. A boy may subscribe more than $10 in $10 units, but not less. A beautifully engraved certificate will be given to each subscriber. Ask your local Y.M.C.A. representative for pledge card and full information, or send your contribution direct to headquarters.

F. PURDY

HE HAD INITIATIVE

Nearly everyone has read an account of howTommy Holmes, the 19-year-old soldier from Owen Sound, won the Victoria Cross. Miss Louise Julyan, writing in the Spanish River News, extracts a moral from the exploit of the young hero who so gallantly rose to the emergency of a most dangerous moment. Following is the article which sets forth the value of initiative in any undertaking :

Last October when the Canadians taught most of the world how to spell Passchendaele because they made it necessary to use the word so often, a certain company of Canadians "went over the top" and through the mud in No Man's Land to an objective opposite their trench. They reached the point to which they had been assigned and began to entrench. While they did so, another company came on in the second "wave," went through the first line and would have gone through the flying bullets of the enemy gunners only the officer in charge saw that it would mean a useless waste of life and ordered his men into a shell hole.

The men on both sides of this company had carried their objectives, and were waiting for this group in the shell hole to even up, but though they begged to run a risk, the officer refused to let anyone face those bullets. While they waited for even a faint pause in the deluge of fire, there was a sudden scuffle at one side and the members of the company turned to see one of their chums scramble over the lip of the crater and run straight for a "pill-box" a few yards in front, from which the particularly devastating fire was coming.

Expecting every moment to see the flying figure fall, his chums watched him with bated breath, saying that he was as good as dead, and that he should have done what he was told and kept still.

They saw him plunge into a shell hole, and then in a few minutes there was the roar of an exploding Mills bomb, and the hail of bullets that had held them prisoners stopped as suddenly as raindrops after a sun shower.

They were speechless for a moment, wondering what had happened, and then suddenly there was a leaping figure among them who snatched another bomb from somebody's hand and was over the edge again, and dashing back to the "pill-box" from which only rifle fire, though it was from fourteen guns, was now coming.

On the heels of the flying figure went the rest of the company, mad with excitement, just in time to see the second bomb thrown through the door of the pill box, and the cry of prisoners offering themselves as "kamarads" to a nineteen-year-old Canadian.

This was Tommy Holmes, V. C., whose exploits have put him in the "top-notch" of war heroes. There are plenty of men who deserve the V.C. and other decorations, and who never get them, but every man who saw what Tommy Holmes did that day at Passchendaele, says that he rightly deserves his rewards.

"Doing things on his own" is something on which the British and American soldier prides himself. Tommy Holmes would never have won that objective for his company if he had waited to be told what to do, for no officer would have given the order that would have risked his life.

While in the industry it is not necessary to risk life and limb, "doing things on our own" is quite possible in the office, in the mill, or in the lumber camp. The man who does not have to be continually told what to do and keeps his work up to high standard of quality meets with the greatest appreciation. If he is not in need of constant supervision and produces work of high quality, he can be assured of success.

PROFIT IN FLAX CROP

Demand for Aeroplane Wings Stimulates Production.

BOYS WILL AID THE FARMERS

Seasonable Hints for the Fruit-grower and Agriculturalist—Information About the Work That Has Been Done to Secure Lads to Aid Production.

(Contributed by Ontario Department of Agriculture, Toronto.)

FLAX fibre is absolutely necessary for the construction of aeroplane wings. Yet because of Russia's defection, Great Britain has not now more fibre on hand than is sufficient to keep the mills running one and a half days a week. To further complicate matters the flax seed crop in Ireland was perilously near a failure last year.

These vital facts were disclosed recently at a meeting in Toronto, of the Agricultural Section of the Organization of Resources Committee of Ontario, called to discuss the flax situation. Evidence was also given regarding what Ontario already had done to relieve the shortage. In 1917 thirty-three flax mills were operated. 6,000 acres were planted and 2,600,000 pounds of fibre and 45,000 bushels of seed were produced. Our flax business last year had a total value of $2,000,000. Moreover, the seed produced will accomplish a vital mission abroad, as a large part of it has been shipped to Ireland to meet the great seed deficiency there.

8,000 Acres at Least This Year.

Already flax growers are planning an 8,000-acre production, at least, for this year. Each of the mills are in the market for all the straw and seed that can be secured and good prices are assured the grower. The arrangements made in the past have, for the most part, provided for the leasing of flax land by the mills at a rental of from $10 to $15 an acre. The grower ploughed the land, prepared the seed bed and hauled the crop to the mill—except where the crop was carried on the railroad. The mill operator supplied the seed, often did the seeding, and harvested the crop. The flax was pulled by hand and the workers were housed in the fields in tents. Their transportation was paid by the mill company and they received $15 an acre for pulling. It took a first-class puller three days to finish an acre. As the workers prepared their own meals, the growers were in no way inconvenienced by having them on their farms.

Flax a Highly Profitable Crop.

While this system is still followed almost entirely, farmers may very profitably grow flax, doing all the work and selling the crop outright to the mills. An acre of good flax will produce some nine bushels of seed and two tons of straw. The seed sells now for from $7 to $9 a bushel, while the price of straw will be dependent upon quality. In case labor conditions prevent the pulling of flax the crop may be harvested with a binder, the seed sold at a remunerative price, and the straw at about $15 a ton.

Old sod land is preferred for flax and any soil which will produce a good crop of oats will be suitable. Wireworms and white grubs, so destructive to other crops, will not attack flax. The seed should be planted not later than May 10th and the crop is harvested during the middle of July; thus the soil is left in excellent condition for winter wheat. A thorough discing, without ploughing, is sufficient preparation for the wheat crop. The fear that flax is particularly hard on the land is unfounded, as it does not take more from it than any ordinary field crop.

Fifteen Thousand Boys for Ontario Farms.

In 1916 and 1917 the Department of Education made regulations which permitted students to leave school in April, provided that their term's work was satisfactory, for the purpose of engaging in farm work. If they spent three months or more on a farm, they were given their school standing without passing the customary promotion examinations.

When the students had responded to the Government's appeal and had volunteered in thousands for the work which they realized to be of such importance, there remained the problem of putting each individual applicant for work in touch with a farmer who desired assistance. This was accomplished through the Ontario Government System of Public Employment Bureau in cases where the students were unable to make their own arrangements. A minimum wage of $15 per month was set, but the farmers soon realized the value of the students' labor, and offered as high as $35 per month. The average wage paid was $18.

It is expected that 15,000 boys between the ages of 14 and 19 will be available this spring for farm work in the province. The minimum wage this year will be $15 per month, with board. It is hoped that every farmer who can make use of the services of a High School boy will make early application through the District Representative in order that he may not be disappointed. There are over 150,000 farmers in Ontario, and only 15,000 boys to go round, so the wise farmer will be the one who speaks quickly.—Dr. W. A. Riddell, Ontario Labor Bureau.

Get a Spray Calendar.

This is the time of year when spraying must command the attention of the fruit grower. Everyone should procure from the Department of Agriculture, a spray calendar in which directions are given for the spraying of all kinds of fruit trees and the preparation of the various insecticides and fungicides.—Ontario Agricultural College Notes.

OUR DEFENSE

In the spring we may be attacked at any moment. Toxic poisons pile up within us after a hard winter, and we feel "run-down," tired out, blue and discouraged. This is the time to put our house in order—cleanse the system and put fresh blood into our arteries. You can obtain an alterative extract from Blood root, Golden Seal, Stone and Queen's root, Cherry bark, rolled into a sugar-coated tablet and sold by most druggists as "Golden Medical Discovery." This blood tonic, in tablet or liquid form, just what you need for "Spring Fever," that lack of ambition. It will fill you full of vim, vigor and vitality.

SUDBURY, ONTARIO.—"When my little daughter was five years old her liver was so sluggish that I feared she might be troubled with habitual constipation. I read about Doctor Pierce's Golden Medical Discovery and decided to try it with her, giving her small doses. I found that is not only gained her liver but it also proved to be a splendid tonic, as well. It was such a splendid medicine that I would never hesitate to give it to her again if she needed it, and I take pleasure in recommending it to other mothers whose little ones seem to need a liver regulator and blood maker."—Mrs. LOUISA BEACH, Box 1135.

The
Pure Bred Clydesdale Stallion
"Fascinator"

Will be kept on the same route as last year for [illegible] Special attention will be given to the raising of breedings to suit their mares for him this season. Terms, $15.00.

Sire — W. J. WILSON, Prop., 18th Greenock

"Woe unto you that are full, for ye shall hunger."

Luke 6: 25.

Not spiritually (although even the penalty of remorse may follow your neglect of this national warning) but ye shall hunger in the trying physical sense in which hunger now gripes the peoples of Europe.

We know "it is difficult to talk to the belly which hath no ears," and it is just as difficult to persuade a person who has a full dinner before him to-day that he may want for food next month.

But you may as well let this fact sink into your mind—*the last people that Canada and the United States will allow to suffer for want of food are our fighting men*, and if a sufficient exportable surplus of food cannot be raised and saved by voluntary efforts, then very drastic rationing measures will be enforced.

It may astonish you to learn that in 1917 Ontario did not grow enough wheat for its own needs. Consequently every Ontario farmer whose land is suitable, has been urged to sow 5 acres more spring wheat this year so that Ontario's demand for wheat shall not be met at the expense of that portion of the Western crop that should more rightfully be shipped overseas.

For this same reason every householder who has a garden or a piece of vacant land is being urged to grow vegetables, because the more vegetables that are grown and eaten in Ontario, the less wheat and meat there will be consumed, and that being so, the Ontario wheat crop should then be sufficient to feed our own people, and leave more Western wheat and other foods available for export.

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.

ONTARIO — ORGANIZATION OF RESOURCES COMMITTEE — ONTARIO
In Co-Operation with Canada Food Board

CO-OPERATIVE PRODUCTION

The town of Nottawasaga, in Simcoe county, has formed an association for the purpose of increasing production, and a complete canvass has been made of the township to ascertain what quantities were raised last year, what will be under crop this year and the amount of imported labor that will be required. Every resident of the township is asked to sign a pledge card containing the following ten clauses:

"I hereby pledge myself and my household, during the period of the war, as follows:

1. To assist every patriotic effort made to carry on this war to a victorious conclusion.

2. To maintain and endeavor to increase by every possible means the production of foodstuffs.

3. To co-operate with the Greater Production Association of my township in order to encourage and direct the production of foodstuffs. To attend all meetings of the Association or any other body called for a similar object. To provide information to the Association as to production, increases of acreage, and possible requirement of feed, tools and labor.

4. To co-operate with my neighbor and friends by changing work, implements, tools and seeds in order that our acreage will be increased and the shortage of labor occasioned by the war relieved.

5. To co-operate during the season so that wood for fuel will be provided in such quantities that the country may be relieved of the necessity of importing so much fuel for household purposes.

6. To do everything in my power to prevent waste of foodstuffs.

7. To limit my purchases as much as possible to articles produced in my neighborhood or my own country and so to relieve transportation for national purposes and lessen the debt which my country may owe to foreign nations on account of the war.

8. To invest as much as I can spare of my earnings in the bonds and other securities of my country when invited by the government to subscribe.

9. To endeavor in every possible way to inspire friendly relations in my neighborhood by encouraging social relations and gatherings of various kinds so that the work and living conditions on the farm may become more attractive and cheerful than town or city life.

10. To encourage others to join this association, to take the pledge and to keep it."

Such an organization with such a pledge card cannot but help be a big factor in the matter of increasing production. Every township in Canada should follow the example set by Nottawasaga to the advantage of the residents of the township and to the Empire as a whole. The spirit of co-operation is a big factor in the success of an institution or class.

DEATH OF MRS. WM. RUSSELL

The death of Mrs. Wm. Russell, widow of the late Wm. Russell, took place at her home, 6th con. Bruce, on Sunday morning, April 21st, after a short illness of two hours, from heart trouble. Her sudden death was a shock to friends and the community. Mrs. Russell was well known and highly respected by all who knew her. She was a lover of home, and by her unselfish devotion to her husband and family she had been to them all a help and an inspiration, always ready to lend a helping hand in time of trouble and sorrow. Conscious to the very last, she bravely bore her pain for the sake of those around her. Although she is absent from the family circle we know she has joined the happy throng in heaven. She was a member of the Presbyterian church. She was born near Coburg in the county of Northumberland. Her husband predeceased her two years and a half. The service on Tuesday was conducted by Rev. G. C. Little of Paisley, and was largely attended. Interment was made in Stark Vale cemetery. The bereaved family of one son and three daughters have the sincere sympathy of the community in their sorrow.

Death with its cold and icy hand
Has made another call,
And severed one from earth away
Esteemed and loved by all.

A dear and loving wife,
A mother, too, has gone,
And we are left to grieve for her
Both night and day alone.

Though dark and dismal seems the hour,
Though night excludes the sun,
Help us with resignation, Lord,
To say, "Thy will be done."

Her sorrowing family, full of grief,
Doth mourn their mother's end;
One son and three daughters, too,
Have lost a priceless friend.

But why should we lament for her—
She is only gone before.
In heaven we soon shall meet again
To separate no more.

Prepare us, Lord, for that great change,
That change that's sure to all—
The day, the hour we do not know
When we may get the call.

—At least forty standard hotel licenses will be cut off by the Ontario License Board this year. The board is going over the list carefully, and where it appears that hotels are not needed to accommodate the travelling public or have not proper facilities, licenses are being refused.

—The Heinte Co., manufacturers of pickles, are asking the farmers about Wiarton to plant a hundred acres or more in cucumbers. The company furnish the seed free, and pay $2.50 per hundred pounds of cucumbers from 1 to 3½ inches long, or for over 3½ inches long 80 cents per 100 pounds. They state that at the rate of $2 per 100 pounds growers have made over $200 per acre.

FRENCH-CANADIANS "HERE AND THERE"

The Boston Transcript recently called attention to the fact that the attitude of the French-Canadians in the United States towards conscription is entirely different from what it is in Canada. In the New England division in the States there are hundreds of the sons of French Canada, of the first and second generation, all of whom are volunteers, and the same racial element is strongly and enthusiastically represented in the national army. The Transcript therefore asks "Why the difference between the French-Canadian in Canada and the French-Canadian in the United States? Is it a question of leadership, moral and political?" The Transcript is naturally nonplussed over the existence of a most anomalous condition of affairs. The French-Canadian in the United States receives no special consideration of any kind, while in Quebec he practically runs things to suit himself. Yet he is willing to fight for the Stars and Stripes, to which he owes nothing but his livelihood, while he is not willing to fight for the Union Jack, under which he enjoys everything which makes life worth living. The situation is paradoxical, try to explain it as you will.

IN MEMORIAM

We country folks are gentle with our dead:
We lay them white-robed on a bed,
And gaze upon that strange tranquility,
And folks from round us come and see,

But this is new—so shocking, dreadful, strange—
To lose your lad and realize no change:
No limbs to stretch, no tender face to love,
No tender gifts of loving tears beside the grave.

You only know from what his chums have said,
Who spared the time to tell you he was dead:
That on a shell-torn height he gave his life,
And that he played a British lad's part in the strife.

Yet God is good to folks bereft;
In spite of tears, I know that there is left
Hope, that the rest of your life's span may run
With something of the zeal that fired your son.

THE CALL FOR GRAIN

Perhaps it is not surprising that difficulty is found in convincing the public of the United States and Canada that a world shortage of wheat is well within the limits of possibility. Russia before the war was among the largest contributors to the international supply. To-day it is a negligible quantity. The German commission that has recently investigated the situation, and in the Ukraine found that not only were there no available stocks, but that no prospect existed of a harvest this year yielding any surplus for export. Lack of shipping prevents any movement of wheat from Australasia, where upwards of a hundred million bushels are awaiting transport, nor is there any hope that transportation facilities will improve sufficiently to open that source any time in the near future. The burden of supplying the European Allies with bread enough to make up their deficiency rests irremovably on the United States and Canada. Increased production of wheat and other substitutes is an imperative necessity.

Farmers in North America have been and are responding nobly to the appeals of the home and allied governments, and in both the Republic and the Dominion every additional acre possible is being placed under cultivation. This is in the highest degree creditable to the patriotism and sense of public duty. But the fact and the bulletins regarding the position and prospects of this season's crops that will from now on be fed in the press must not be allowed to produce too optimistic an outlook. While no reason for panic or apprehension can be found, government and other forecasts and reports should not be allowed to create undue optimism or prompt misleading conclusions. The U. S. Department of Agriculture, for example, indicates a possible yield of between 800,000,000 and 900,000,000 bushels, and the estimate may even prove conservative. But last year's crop was insufficient for the demand and reserves are already nearing exhaustion.

As an offset to wheat expectations a Washington correspondent, after consulting with the department officials, reported that a decrease of perhaps 300,000,000 bushels of corn might be expected, but treated the matter lightly because there "would be more wheat!" His report was not, of course, official; but it is probable enough looking to the dearth of good seed corn and the numerous farmers who have been unable to market their huge crop of last year. It is quite likely, therefore, that the reduction in corn may more than offset the increase of other grains and the net result may be a total grain supply no larger or but little larger than that of 1917. Last year's crop has proved too small to meet the demand. France has been obliged to reduce her already low ration, and Britain has also been forced to adopt the card system and penalize hoarding. Italy's plight is worse than either's. No one should assume that even a record crop will solve the problem of feeding the allied nations at war. The situation calls for continuous restraint and self-denial, and also for increased production of all kinds of food along all possible lines.

Nearer to the Boys

An Interview with Ralph Connor

By PETER McARTHUR

When I was told that if I went to a certain office at a certain hour, I would have the pleasure of meeting the Rev. Charles W. Gordon (Ralph Connor), I accepted with joy. I wanted to meet him for two reasons. I wanted to meet him because he is our most distinguished Canadian novelist, and also because in my boyhood I weighed on hard, uncompromising benches, listening to the same stern ministers that he "sat under." I had listened to them in both Gaelic and English, and wondered if he would have a fellow-feeling for one who had gone through the same boyish experiences. As my eagerness had brought me early to the place of appointment, I had a few minutes to wait, and fell to wondering what he would be like. Unconsciously I associated him with those old-time Free Kirk ministers and wondered if he would be like the Rev. John Ross, of Bruce field, or the Rev. Lachlan MacPherson, of East Williams. So my surprise was complete when a brisk man in khaki uniform stepped into the room. He did not look enough like those old ministers to make my heart come into my mouth with terror as I faced him. Neither did he look enough like a military martinet to make me stick my heels together and come to "attention." And there was absolutely nothing to suggest the producer of "best sellers." It took less than a minute to discover that "Ralph Connor" is, first of all, a fellow-human being, who is ready to take a glance at anything from any man's point of view.

A reference to the old ministers gave us an instant point of contact, and with much laughter—kindly and reverent—but still laughter—we compared notes and exchanged reminiscences of the good men who made the Scotch settlements where we had been brought up, the places of stern discipline we remembered so well. The hour that had been promised to me was gone and part of another hour with it, before I remembered that the man who arranged the meeting had not done it out of pure kindness. He wanted me to interview Ralph Connor about the war work of the Y.M.C.A. By the time I remembered my duty we had reached a point where I felt that I could ask him about it from a rather daring point of view. I began with a straight question:

"What do you think of the work of the Y.M.C.A. in the war?"

He hunched his shoulders slightly and slipped down a trifle in his chair. From the expression on his face I was afraid that I was going to offer an unfavorable criticism. But his answer made it clear that that was not what disturbed him:

"It is doing a lot of work that the church should be doing."

Now you can understand why my question caused him a little of discomfort. The minister in him—a touch of the old Free Kirk spiritual guide that made him feel the responsibilities of his calling—made him regret to confess that a purely lay institution is carrying practical Christianity to a point that is as yet impossible for the churches—"beating them to it," as the soldier boys would say.

"Don't misunderstand me," he protested. "The churches and their chaplains are doing a wonderful work, but the Y.M.C.A., being without a propaganda, and designed to adapt itself instantly to any needs that may arise, either at the battle-front or wherever the boys may be located. It meets them at all hours and in all places with a spirit of good cheer, comfort and helpfulness."

"Then you are of the opinion that the man who supports the war work of his church is not doing all he can to help the boys?"

"Assuredly. The Y.M.C.A. is able to go a little farther. Though the work of the church may be nearer to the ideal of what I want to see done, the Y.M.C.A. gets nearer to the boys."

That struck me as a very important point, and I decided to question him from an angle that might not be pleasing to a clergyman.

"You know," I insinuated, in a spirit of half confession, "that there are a lot of boys who would be inclined to look at a Y.M.C.A. at home as a sort of shaded institution, beneath the notice of young men of the world who like to affect a sort of manly wildness. Does the Y.M.C.A. get near to them?"

"Yes. The helpfulness of the Y.M.C.A. has won out, over every obstacle. In the beginning, the officers of the High Command had something of the attitude you suggest. But whenever there was anything to be done to help the boys the Y.M.C.A. was there to do it and do it well. By its spirit of unassuming helpfulness the Y.M.C.A. has won the hearts of both the officers and men, no matter what their church connections may be or may not be. It gives and it does not ask anything in return. Its sole reward is that it helps freely all who need help. The thing to emphasize about its work is that it gives—it is an organized spirit of giving, and it gives without a string to the giving."

RALPH CONNOR

"But I often hear comments, not always friendly—about the prices that the Y.M.C.A. charges for some of its supplies."

"Such comments have no justification. The prices are as near right as they can be made. If there is any profit on the sales to the boys in the camps or back of the lines, every cent of it goes to provide things free—absolutely free—to those who are in the front line trenches. As a matter of fact, the canteens and other organizations under the control of the churches and chaplains have pretty much the same schedule of prices as the Y.M.C.A."

I could not suppress a smile at finding in my ancient enemy the trust in "Gentleman's Agreement" as a working so admirable a form. But I made no comment. Instead, I asked a concluding question:

"Then I may tell the people that in its war work, especially in the matter of creature comforts, the Y.M.C.A. is nearer to the boys than anyone else?"

"Yes. It stands nearer to them than anything else except the military organization under whose discipline they live—and die. Once we get a properly-organized, trained and outfitted for this kind of work—and they are a mighty spiritual force, too."

When leaving him, I stopped to talk to several other clergymen who appeared in the offing—it was a place of clergymen—and he stepped from the room. Shortly afterwards he returned with a copy of his latest book on the flyleaf of which he had written in memory of the men we had known in our boyhood.

"There were giants in those days."

It will be cherished as one of the most prized of a little collection of autographed first editions. And with it I shall cherish the memory of having spent a couple of hours with a well-known man who is doing a noble work himself and is not afraid to give the fullest credit to other men who are doing a noble work—such as the officers and field workers of the Y.M.C.A., "who play such a great forward line to the Church's leading in the great, great game," as Conner said.

The Mystery House

Next Door to the Parsonage Lived an Unknown Stranger, Setting Village Gossipers Astir with Wonder

Told By The Minister's Wife.

"Bother next door!" I scolded. "If it hadn't been for that place my dinner wouldn't have been ruined."

After we finished wiping the dishes she brought down the photographs. "These are my suitors," she laughed, standing the pictures in a row.

They are just ordinary men and not at all romantic looking.

"The one with the little moustache is a millionaire and the bald-headed one is too. The others are near millionaires."

"Betty Rose," I asked earnestly, "which do you love?"

Betty Rose stared. Then she fell back and laughed and laughed until she almost cried. "You really—don't—believe—in love, do you?" she leaked out between her gales of laughter.

Before I could answer I heard Billy in the hall. He called me and as I went up the stairway I heard Betty Rose still laughing. And I knew that romance had not entered our little parsonage.

Billy, in his study, looked at me as Moses must have looked at the Israelites when they made the graven image while he was on the mountain. All I had made was salty pudding.

"Why didn't you let me see your letter this morning?" he asked in his "warning-to-sinners" voice.

"You never asked to see one of my letters before," I stammered.

"You never received one before of such a nature that you had to leave your husband's presence to read it," he thundered back.

I reached the door. Once there I faced him. "I will not be scolded," I flared, "and I will not let you read my letters."

Betty Rose's voice floated up from the hall. "I'm going out for a little while," she called. "Don't worry about me."

I rushed to my own room. On my dresser was the letter. I hated it. It had caused our first quarrel. I started to tear it into a hundred pieces but something held my hand.

After a long time I heard Billy go down stairs. I watched him go down the street and then looked at the big white Mystery House next door. While I looked, a woman wearing a magnificent fur coat came up the walk toward it. She was the alimony wife, the wife who seemed to come only to quarrel over money, Haselton people said. She walked to the door, rang the bell, someone opened it and she went inside. In a minute later the door again opened and out of it came Betty Rose.

With a wild rush I was downstairs to open our door for Betty Rose. Straight into my arms she walked and hysterically she began to giggle.

"It is the most beautifully Oriental house you ever saw," she stopped laughing to say. "And our perfectly beautiful man had on a stunning Turkish dressing gown."

"When the little Jap opened the door I slipped in before the Mystery Man saw me. Then the door opened and"—her voice sank almost to a whisper, "what do you think? It was that woman, his alimony wife, you call her. I don't believe they're divorced or wanting a divorce or anything like that at all. He looked glad to see her.

"And I"—Betty Rose looked as helpless and disappointed as a little girl, "well, I came home."

She was leaning against the window casing, looking wistfully toward the Mystery House. Several long minutes passed, then she crossed to the table and stood restlessly beside it looking at the four suitor photographs. With a quick movement she swept them into the table drawer. "I'll leave them here until to-morrow," she said wearily. "I don't want to talk about them to-night. Priscilla, you didn't answer the question I was asking you when Billy called you. Do you really believe in love?"

I started to answer her when the front door opened and I heard Billy drop his overshoes into the brass umbrella stand. A minute later he came into the living room.

At supper Billy was elaborately polite. Betty Rose was by turns subdued and gay and all that evening I smiled and chatted.

After supper Billy went to his study. Betty Rose and I went into her room and she read aloud from one of the poetry books. After that we both felt better and began to talk. "I wonder if the Mystery Man's still glad to see her or if they've begun to quarrel," Betty Rose said.

"After all, quarreling is just a part of love. You and Billy are sort of angry now but you'll be more in love than ever when you've made up."

Betty Rose's reasoning reassured me. I determined that when he came to kiss me good-night I would tell him all about the letter.

But when he came into the room he was as polite and distant as he had been all during the supper period. And he did—not—kiss—me—good—night.

The next morning and all of the other mornings that intervened between it and Sunday found Billy just as distantly polite as he could be. If Betty Rose had not been visiting us I would not have had the courage to live through the week.

Sunday brought the patronage an air of calm.

The church was full of people when we reached it; the choir had sung and Billy was reading. I was so proud of him as he stood in the pulpit that I almost forgot to listen to the Scripture lesson.

"For if a man know not how to rule his own house, how shall he take care of the church of God?" read my husband in his most stentorian tones.

Seventy-seven years pass over my head, through every one I shall remember that sermon. It was preached straight at me.

Doctor White's wife came directly to my pew when church was over. "My dear," she whispered laughingly, "I shall never cease to be thankful that Doctor White was out on a case this morning and missed that sermon. Had he heard it, many days of authority in our house would have been numbered."

She laughingly shook my hand and started to pass on, then looked at me again. "Aren't you well dear?" she whispered. "You must slip over and see me. I think you need a tonic. At any rate you need Doctor White to tell you that you are overdoing."

Dutifully I waited for my husband. Before all those women who had flattered to that sermon I must be an example of Billy's words if I did not want them to think that they were buried at me over their shoulders.

Coming down the aisle with Betty Rose was the bishop—our bishop who had married Billy and me and who was one of our most welcome guests.

He took my hand in his hearty grip. "I stopped for one of your famous dinners," he said laughingly. "Of course Billy will think it was to hear his sermon but we know differently."

Together we three went to the parsonage and we were at the dinner table when Billy came home. He was flushed and plainly had been discomfited by something. The bishop greeted him jocially. "I heard most of that heavy discourse of yours this morning, son," he boomed in his good-natured way, "and I imagine you'll hear from the good women of your church after their husbands begin to follow the precepts you laid before them. How are finances? Are your people keeping you paid up?"

Billy nodded and began to tell of the donation party. In the middle of the story Betty Rose interrupted him. "Oh, what do you think?" she suddenly gasped. "The alimony wife just went in next door. You told me that she never came Sundays, Priscilla."

Through the window I saw the woman, who visited next door, come on the side veranda and shake something out of her muff. A little Jap followed her and insisted on doing it for her. Laughingly she demurred and consinged her shaking.

The bishop too was watching. "She looks familiar," he began. "Who did you say she was? What did you call her?"

"The alimony wife," answered Betty in a subdued voice. Then she told him all that she had learned of the mysterious people in the house next door.

"Well, well, well!" pondered the bishop as he helped himself to my good rolls. "That woman did look familiar to me. If she is who I think she is, she has no business thinking of a divorce. After dinner I shall go over to that house and find out a few things. Another cup of coffee, Mrs. Billy, my dear."

While the bishop was at the house next door, Billy at his Mission Sunday School and Betty Rose talking over long distance to one of her suitors, I went for a walk. A strange longing drove me out of the house, away from people and to the edge of town.

The frozen crust of snow crunched beneath my feet and suddenly under some other person's feet behind me. I turned. It was the alimony wife dressed in her beautiful fur coat and carrying a bundle of papers.

"Pardon me for following you," she began. "I was on my way to the station and you were so white I was afraid you might faint."

She slipped her hand into my arm. "You are the young minister's wife," she smiled. "We've often said you were too young for such a big place. Do you feel better now?"

I nodded.

"You mustn't let things worry you," she said gently, looking at me closely. "That's a lesson you must learn now."

I walked all the way to the station with her. At first she did all the talking, telling me about a trip she had once made up into snowy Canada. She said the crunching snow reminded her of it. Soon I was talking too, telling her of the years when I wrote newspaper stories and of the lonely life I had when doing it.

"But you're happy now, dear! Women who desire careers above everything else don't know what happiness is until they've chosen the right path—the one that leads to wifehood and motherhood. You'd better go back now," she ended, giving my hand a friendly shake. "I'll feel better if I can see you turning into your own home street before I board the train. And," she smiled brightly, "I believe we're going to have an opportunity soon to know each other well. I shall be very glad."

The bishop and Billy were discussing the new Discipline when I reached home. Not one word did the bishop tell us of his visit next door and I didn't tell them that I had walked and talked with the alimony wife. That was my secret. I loved her and I loved Betty Rose and I believed that Betty Rose cared for the man next door.

The next morning after breakfast, Billy put both his arms around me. "You are going to be my good little wife again because you love me," he whispered and kissed me.

Some way I just could not kiss him. It was not on account of the sermon the day before because I did not feel like it. I could not explain my feelings even to my self. I wanted Billy and yet I didn't want him. I felt so lonely all the time that I could hardly stay in any place for a very long time.

(To be continued.)

HEIGHTS OF HEROISM.

Attained by British and French Soldiers at Verdun and the Somme.

James M. Beck, former Assistant United States Attorney-General, declared in an address in New York recently that he was violating no pledge in stating that the British casualities in the battle of the Somme last year numbered 500,000 and that the French lost 240,000 men killed at Verdun.

"The field east of Albert, where they are battling now, is probably the greatest graveyard in all the world," he continued, "and never before in the history of warfare has heroism reached such heights as in this year of 1916.

"I was privileged to spend four days with the British forces on the western front and I saw them in action. I have witnessed the French soldiers, and I have been among the British and French people during their greatest hours of trial. They do not boast, they do not promise, they do not cry and whine. If it may be called boasting, the French people have made but one declaration, 'They shall not pass.'"

More small towns in Norway use electricity than in any other country, owing to the abundance of water power.

Food Control Corner

If there is one phase of food conservation more than another that comes within woman's immediate sphere it is the question of waste. When she is saving on the little things and straining every nerve to make the most of what she has, wholesale and indiscriminate waste of food-stuffs through hoarding or storing naturally ipcenses her greatly.

It has been a sore point for some time past with many women that they have known of cases of waste on a large scale without being able to do anything to alleviate the situation. Even among themselves there has been a certain tendency to lay in large supplies of food-stuffs. For instance, when it was first intimated that flour and sugar would be scarce these commodities were brought in large quantities and stored in the cellar, in some cases to go to waste.

It is now against the law either to hoard or to waste. The Canada Food Board has put into every woman's hand a weapon to fight against these war-time menaces. Hereafter it will be her privilege to report any case of waste or hoarding that comes within her knowledge.

An Order-in-Council has been passed which should be of the utmost significance to every woman in Canada and should lay on her shoulders a certain sense of responsibility, for it puts her in the position of bringing within the grip of the law any firm, dealer or individual whom she knows to be hoarding or wasting food-stuffs.

We are a nation of spenders rather than savers. Our prosperity is the result of the natural riches of a new country rather than the outcome of thrifty living. It is calculated that $50,000,000 a year is a conservative estimate of the waste in food-stuffs that has gone on in Canada in recent years. Waste on the European Continent, in times of peace, has been a mere bagatelle as compared with the waste on this side of the Atlantic.

True, four years of war have made a difference. Infinitely less food finds its way into the garbage cans to-day than in 1914. The persistent preaching of the gospel of thrift and the increasing gravity of the food situation in Europe have made the women of Canada vigilant for the small channels of waste that drain a country's resources.

Nevertheless, there is waste both on a large and small scale and there is hoarding to a certain extent. But both practices are now illegal and henceforth any person guilty of either offense is liable to a heavy fine or imprisonment.

To cultivate a small garden is not a task—it is a pleasure, and the development of the crop is a study that is in itself interesting. Many who this year will cultivate that little piece of ground around their homes will be surprised at the amount of food which can be secured from a few square feet of land.

Vinegar will soften the bottle of dried glue.

To prevent a lamp chimney from breaking, make it stronger by putting it on the fire in a vessel filled with cold water. Add a little coarse salt, heat gradually till the water boils and then cool slowly.

PHYSICAL REQUIREMENTS OF CHILDREN

An important fact that the mother must keep constantly in mind is that the growing child will require certain foods for making bone and tissue. This must not be confounded with the requirements necessary for the regular upkeep of the body. This necessary material may be found in milk, eggs, fish, cereals, chicken, meats and legumes.

When planning a breakfast for the child of from three to six years old fresh fruit should be placed on the menu. This should consist of the juice of an orange or a baked apple, preferably. It is unwise to give the small child berries, bananas, peaches and the like for breakfast.

A well-cooked cereal comes next, with plenty of good milk. Do not give the children skimmed milk. They have urgent need of the butter fat.

Children from seven to twelve years old who attend school and indulge in active play will require in addition to the material needed to build up the body, an additional amount of fuel material that will rebuild the tissue that they have expended in their active play.

This explains why the healthy child will sometimes complain of feeling hungry one and one-half hours after mealtime. He has consumed his fuel and nature calls for more. These children should have for breakfast fruit, cereal and good milk, soft-boiled egg or medium chop, baked potato, toast and milk or cocoa.

Do not give the children fried foods. When they are hungry between meals a dish of cold oatmeal and stewed fruit in the form of a pudding, or two slices of whole-wheat bread and jam, will satisfy them.

Sufficient cereal may be prepared in the morning and set aside until required. Mold in cups and when ready to serve simply unmold and cover with stewed fruit and serve. Cereals in bulk will be found to cost less than those in packages. Where time is the object these foods will be found to be an economy of time, fuel and strength, but to the woman who stays at home they will add to the cost without giving any additional benefits. Where time must be considered an important factor, the fireless cooker will prepare cereal to a turn.

Oatmeal, barley, cornmeal, natural rice and hominy may be prepared over night in a fireless cooker, using the proportion of one cupful of the cereal to three and one-half cupfuls of boiling water. This amount will furnish sufficient cereal for a family of four. One cupful of oatmeal will weigh two and three-quarters ounces and cost approximately one and one-half cents. One-half cupful of milk is the usual allowance for adults; three-quarters to one cupful for children, with an additional one-half cupful later. One-quarter cupful of cream in place of the milk may be used, or a fruit whip made of one glassful of jelly and the white of one egg. Whip into a stiff meringue. This has additional value of requiring no sugar, the necessary amount being present in the jelly.

Dinner for children should be in the middle of the day. The children may be served with cream soup, toasted croutons, baked potato, small piece of meat, spinach or mashed carrots, lettuce, junket of plain gelatin and cocoa or milk.

It is vitally necessary that the child be taught to eat abundantly of green foods. A fresh vegetable and a salad are easy to obtain and require little time to prepare. The abundant mineral salts and vitamines present in these foods are essential for making bone and teeth structure and aids for furnishing the life giving elements to the blood stream. Occasionally a piece of chicken or an egg may be used in place of meat for the sake of variety. This menu will answer very well for the average child from three to twelve years of age. A large portion will be necessary for the older child.en. Supper may consist of omelet, potatoes au gratin, lettuce, cold cereal with fruit sauce and milk or cocoa.

Boiled fish, broiled chop or a slice of medium roast beef, mutton or lamb may replace the omelet.

Tomatoes, cucumbers, radishes, pork and fried foods have no place in the child's dietary. The English custom of serving the children before the adults in a separate room has much to commend it to the wise mother. By this method it is possible to give the child food suitable to his requirements.

To bring the baby or small child to the table and let him eat the food that is suitable only for adults is nothing short of criminal.

Many children who are irritable and cross would be made smiling youngsters by a carefully chosen diet served at proper hours. Remember that coffee and tea are strictly taboo in the child's dietary.

IF there was just one WALKER HOUSE in towns along my route,
Then "drumming" would be joyous,
And I wouldn't give a hoot
For all the inconveniences of
The trains that poke so slow,
If there was just one WALKER HOUSE
In every town I go.

I'd hustle like the dickens,
And take orders by the ton.
Say, traveling then would be
Just one big round of solid fun.
I wouldn't mind the rain or sleet,
Or mud, or frost or snow,
If there was just one WALKER HOUSE
In every town I go.

SAVE FOOD
In a time needing food economy many people are not getting all the nourishment they might from their food. It is not how much you eat, but how much you assimilate, that does you good.
The addition of a small teaspoonful of Bovril to the diet as a peptogenic before meals leads to more thorough digestion and assimilation and thus saves food, for you need less.

Leave It to Parker

THE postman and expressman will bring Parker service right to your home. We pay carriage one way. Whatever you send—whether it be household draperies or the most delicate fabrics—will be speedily returned to their original freshness. When you think of
Cleaning or Dyeing
think of PARKER'S.
A most helpful booklet of suggestions will be mailed on request.

THE FUTURE OF AIR-CRAFT

ADDRESS OF REAR-ADMIRAL KERR, OF THE AIR COUNCIL.

No Man Has a Greater Knowledge of Aircraft and Its Possibilities Than the Admiral.

War has made very incredible and fantastic dreams of ten years or less ago commonplaces of the present. Yet no development has been more swift and dramatic than that of aircraft. Every day gigantic strides are being made in the further conquest of the air by man, and with the arrival of peace there will have to be laws laid down to meet the vast aerial traffic that is certain to become a part of the fabric of civilization.

All air vehicles will have to be registered, like our shipping. They will have a Pilmsoll mark, or its equivalent, and no doubt a Lloyd's list will grow up with class A 1, and so forth, for vessels taking passengers and mails in the air. If they do not carry a flag they will be classed as pirates, the police will knock them down, and it will be a long fall.

As a matter of fact, there is in existence a large association which has aerial laws of its own. It is an association of birds known as the "lost souls of the Rosphorous." They have laws clearly laid down, and fly in large groups, and I have never seen any of them in collision. Almost as if using a compass they navigate the air, and I have noticed that these flying south-east pass over those flying north-west. When our own aerial laws are made we shall have to take a hint from those birds, and use the compass in making rules for passing.

Imagination and Energy.

Aerial law is one of the foundations on which the aerial communication of the future will rest. Its statutes will have to provide for regularity in wireless communications, rule of the air, aerial navigation, and in addition to this, the rights of states and individuals to pass through the atmosphere over countries and properties belonging to other peoples, and also control of landing-places on the lines of routes, as well as the licenses to be granted, authorizing types of machines that may be used for conveyance of passengers and mails, and testing the qualifications of those in charge of these aircraft.

In my opinion the formation of the Royal Air Force is a distinct advance in aeronautics. It means the establishment of a General Staff whose business it is to devote their imagination and energy principally to the study of aerial problems, a subject too great to be looked on as a by-product of the work of any other Ministry. To do so would be going back to the ancient days when the sailors sailed the ship, and the soldiers fought the sea-battle. We all know the result of that system was to produce a state of stagnation in matters connected with the sea.

When the blessed day of peace arrives there will be a great struggle all over the world to get a start of others in matters commercial, and one of the principal features will be priority in aerial communication.

Must Get Into Training.

These things cannot be done suddenly. It is essential that we must prepare. Preparation means organization, and the strength of organization is the law. As a nation we are prone, in things new, to wait for others to give us the lead, and afterwards we generally catch them up and pass them; but I have ridden many hundred races in my time, and though in some things to ride a waiting race is necessary, yet I never saw a jockey who did not believe that one length gained at the start was worth a good three pounds in weight. Other countries are already getting into training, and we must do the same.

There will be many difficulties, but difficulties are an incentive to our race, and when confronted with them, we must throw our minds back to the great men of the past who, with the smallest means, performed the greatest deeds. Sir Walter Raleigh it was who first put into words the truth of sea-power. He said, "He who commands the sea, commands the commerce; he who commands the commerce, commands the world." All the great Elizabethans realized this, and the thought spurred them on in laying out foundations on which we have since been building, and it is now being gradually realized that to Sir Walter Raleigh's dictum, the power of the air must be added to the command of the sea.

"Stir Up Our Sleeping People."

Imagination and organization in the past, by men whose names are now household words, have succeeded in building up the most wonderful fabric that the world has ever seen. A construction whose stones are nations and peoples, cemented by the blood of men who have died for their King and Country, and whose different units are bound together by a great network of maritime communication of commerce, spread like a vast web over all the globe, and guarded ceaselessly in the past by the argus-eyed British Navy, which must be assisted largely in the future by the fleets of the air.

This priceless inheritance, bequeathed to us by our ancestors, in which all component parts, whatever their race or creed, have an equal interest, and enjoy the same freedom, is known to us by the name of the British Empire. If we are not to fail in our trust, we must call up the same spirit of patriotism, imagination, and work to our aid, and go through with it, as our forefathers did, and without regard to personal interest, and only think of the glory of the empire and the welfare of the human race at large.

In conclusion, I give you this quotation as a prayer that all should pray:

"O! God of the restless ocean, Lord
Arbiter of Earth,
Sow us the patriotic seed, and multiply its birth;
Stir up our sleeping people in north,
south, each and west,
To keep themselves in second thought,
and give their land their best."

TRAP THAT NATURE MADE.

Asphalt Pool Furnishes Wonderful Lessons in Book of Nature.

Six miles east of the city of Los Angeles, Cal, is a trap. It is not merely prehistoric, but pre-Neanhian, antediluvian, and, in fact, indescribably ancient.

It is a pool of asphalt 500 feet across, solid at the edges, but softer and stickier as the centre is approached. Apparently it was much the same many thousands of years ago—perhaps much softer and stickier yet.

Small animals, fleeing from bigger ones, took a short cut over the asphalt pool. If only one foot stuck that was the end; they could not escape. But elephants, mastodons, camels, sabre-toothed tigers met the same fate.

Strange creatures seem to have lived on this continent in ancient days. We should never have imagined that they did prowl about this New World of ours if it were not that their remains have been dug up. The asphalt pool near Los Angeles has told a wondrous story.

Near the surface of the asphalt pool are found skeletons of present-day animals; deeper, animals not now native to California; deeper still, animals not now known on the earth, and deeper still animals hitherto unknown in any age.

Recoveries from the pool have proved that anciently there were in that region tigers more formidable than any tiger of modern Bengal. Their sabre-like teeth were four times as long as the distance their mouths could open. The beast could not possible bite with them. They were weapons, used to strike the prey, tearing long gashes.

Among other remains that have been found in the pool are those of antelopes with spiral horns; eagles, hawks, condors (the last doubtless attracted by animals struggling in the asphalt), and a bird much larger than the condor—larger, in fact, than those of any known bird; its bones actually larger than those of a man!

The asphalt pool is a book of nature furnishing the most wonderful and instructive lessons.

WHAT IS A YAHOO?

Baboons of South Africa Form Basis of "Gulliver's Travels."

In the course of his travels, the celebrated Gulliver came across a country where horses were the real people, the nearest representatives of humankind being a most degraded and bestial race called Yahoos.

Dean Swift, who wrote the story, got his data from what he had learned of the baboons of South Africa, which are great apes remarkably humanlike. They travel in bands of two score or more usually and at night post sentinels, whose cry of warning in case of danger is "Yah-hoo, yah-hoo!"

The baboons are undoubtedly remote cousins of our own, but they do us little credit. Of all animals they are the ugliest tempered, and no amount of kindness will ever tame them or (in captivity) inspire in their minds the slightest affection for their keepers.

Nevertheless, they are perhaps the most intelligent of all beasts—so much so, indeed, that to kill or capture them is exceedingly difficult. They fear a man, but not a woman. And if the man is without a gun they will not run away from him.

Ranging about the neighborhood of farmsteads and small settlements in South Africa, they raid the fruit orchards and kill the sheep—first disposing of the sheepdogs. This last is an easy matter, for not even the most powerful mastiff would have a chance in combat with a creature such as a baboon—larger and stronger, with mighty teeth and four hands to fight with.

The only effective way to tackle baboons is to surround a bunch of them at night, wait until daybreak silently and shoot them down with rifles in the morning as they emerge from cover.

Plant Every Acre.

Every extra acre of wheat farmer's can put in this spring will save somebody from starving. Europe is short about 500,000,000 bushels.

You Know It's True.

You are only playing at food saving yet. In England and France they are "doing" it.

Milk, to keep properly, should not be warmer than 50 degrees Fahrenheit.

STAFF OFFICERS "THE BRASS HATS"

TENDENCY TO UNDER-RATE THEIR WORK.

Nevertheless Some Officers "On the Staff" Have Done Great and Dangerous Service.

It is the fashion to-day with a certain class of people in and out of khaki to deride the Staff, says an English writer. It is not of considered criticism of the failings of the Staff that I would speak. I mean the attitude of generally girding at everyone who wears a brass hat and red tabs.

Knowing that red tabs are the badge of the Staff, the general public is apt to condemn in a body all Staff officers, never pausing to consider (because it does not know) that all Staff officers do not hold sheltered positions; that a very large percentage of them are exposed to almost as many dangers, if not the same hardships, as the men in the trenches, and that the vast majority of them are really indispensable and irreplaceable in their respective positions.

A Man and His Conscience.

It must be remembered that the phrase "The Staff" includes in its scope officers employed all the way from Brigade Headquarters, within a mile or so of the front line, right back to our bases on the sea-coast. Brigade Headquarters is invariably within gun range, often within machine gun range, of the enemy when the brigade is in the line, and I believe it is the universal custom for the brigadier, accompanied by his brigade-major, to make a daily round of the trenches occupied by the troops under his command. What with the later developments of this war in the way of air raids and spasmodic bombardments with high-velocity, long-range guns, it may truthfully be said that the danger zone at the front now extends right back to Corps Headquarters, and in case of aerial attack even as far as the bases themselves.

The war has taken a heavy toll of brigadiers and their staffs, to a lesser extent of divisional generals and theirs.

The names of men who wore the brass hat and the red tabs of the Staff are inscribed on some of the brightest pages of the war—Charles FitzClarence ("the man who turned the tide at Ypres," killed a few days after he had saved the Empire, John Gough (Haig's chief-of-staff, struck by a spent bullet just behind the line), "Tommy" Capper (killed by shrapnel as he sat his horse in full view of the enemy), to mention a few names at random; while the general public has yet to learn the whole splendid story of the stands made by brigade staffs in the dunes by Nieuport and in the reverse at Cambrai.

While it is thus manifestly unfair and ungenerous to criticize the Staff as a body, there are (or, perhaps, I should say were, for the comb is reported to have been busy in France) men in Staff positions who, by reason of their youth and the decorative nature of their duties, would certainly be seen to better advantage fighting beside their comrades in their respective units. Some time or other in this war every man of military age has to decide between himself and his conscience whether he should become a combatant or no. A man must be left to his conscience, and therefore no man has the right to judge another in this matter of serving in a combatant capacity.

"Sheer Waste."

Of course, every officer who has served at the front comes into contact sooner or later with that offensive creature, the bumptious Staff officer, who thinks that the gold oak leaves on his cap give him the right to be supercilious to his regimental comrade. I hasten to add that this type is by no means representative of the Staff as a whole, and is, fortunately for the harmony of life at the front, rare.

When men abuse the Staff to me as a lot of decorative shirkers, I tell them the story of Hugh Dawnay, that perfect, gentle knight who was killed at the head of his Life Guards on the Zillebeke Ridge in the first battle of Ypres. Dawnay was on the Staff, but learning that his regiment was short of officers, he applied to go back to it, and, after much difficulty, succeeded in obtaining permission. It takes years to make a good Staff officer, and the bullet that killed Hugh Dawnay deprived the Army of one of its most talented. The spirit that sent him back to his regiment was worthy of the man and of the men that fought at Ypres in those autumn days; but, from the purely utilitarian standpoint, it was sheer waste.

So don't "knock" the Staff. Leave the few among them who are deliberately "taking cover" to their consciences.

Difficult Feat.

The schoolgirl was sitting with her feet stretched far out into the aisle and was busily chewing gum when the teacher espied her.

"Mary!" called the teacher sharply. "Yes, ma'am?" questioned the pupil. "Take that gum out of your mouth and put your feet in!"

LONDON BABIES AND THE BARRAGE

STORIES OF ENEMY AIR RAIDS TOLD BY EYEWITNESS.

One of the Most Remarkable Features in the Amazing Heroism of the East End Children.

I happened to be walking along a quiet road in the suburbs of London at 10 o'clock the other evening when suddenly the crash of guns broke out and the pink maroon lights, which serve as a warning that enemy aircraft is approaching, were shot into the sky, says a London correspondent.

There was a most unearthly screaming of sirens and hooters—a really deafening noise!

And then the bombs began to fall.

The whole thing happened immediately, before we even had time to run. Behind us roared a certain well-known "Archie"—London anti-aircraft gun—and the patter-patter from its shrapnel as it fell on the pavement was far from pleasant and rendered walking in the open streets more dangerous than did Fritz's bombs!

But we have grown hardened these days, and though we hurried a little faster than usual, we did not feel seriously alarmed, nor did we "get the wind up" as the soldiers say.

Terrors of Air Raids.

Stories have been told me by some of the poorer Londoners concerning the raids that run from grave to gay.

Churches, crypts, cellars and tubes are filled with the poor East Enders whenever the raids begin. Their own miserable dwellings afford but little protection, and—judging from the way they flock together into so-called "refuges"—they evidently believe that there's safety in numbers.

There are those among them, however, who will not leave their rickety homes.

"I'd sooner die among me pots and pans," declared one old lady of eighty-four, who clung tenariously to her little house, although she had "seen the front door go past me up the front staircase."

Another old London woman, who is too terrified to go to bed for fear of night raids, was saying what she would do when peace comes.

"I shall take me stockin's off," she remarked airily. "I haven't had 'em off for two years."

Heroic Little Girls.

The heroism of the children in these air raids is remarkable. Listen to the story of a little ten-year-old girl, who slung with her small brother, was rendered homeless, her mother missing.

After the relief committee had sent them to a shelter, the little girl remembered that "the lady upstairs" had a baby which was asleep at the time of the explosion!

So she and her little seven-year-old brother sallied forth into the night to find the baby.

The boy's courage failed him in the darkened, bombarded streets, and he ran back into safety. But the little girl went on, and in the dark she groped about among the ruins and debris of the tenement where once she lived, and which was now reduced to atoms, until she found the baby.

It was then too dark to venture back, so the little girl sat nursing the baby in the ruins alone all night and arrived triumphantly at the relief depot the next morning, with the baby in her small arms!

Courage of Seven-Year-Old.

A London tram conductress told me that her five little children, the oldest a seven-year-old girl, were all alone at home when the raid began.

As soon as she was off duty she hurried home through the bombardment, creeping along in shelter of walls and houses and frightened for the safety of her babies.

"The little ones are timid," she said. "They might have gone mad with fright and rushed out into the streets."

But when she got home she found that the eldest little girl—only seven years—had got her four little brothers and sisters out of bed the moment the raid had started, had dressed them all, brought them downstairs, gathered them all under the kitchen table, had lighted a candle and was reading to them out of the Bible!

"And they were all as good as gold!" she added. "Just as I came into the kitchen one of them had begun a prayer for their father, who is fighting at the front. 'Please, God, don't let the Germans hurt our daddy!' —with never a fear for their own safety, poor little mites!"

Hope With Work.

Hope's singing of a future sky,
With not a cloud in view,
But the sky to-day,
With bright or gray,
Is the wonderful sky for you!
And strength of Toil
On the old home-soil
Is making Hope's song come true.

It Can Be Done.

Recruit (nervously)—Shall I mark time with my feet, sir?

Lieutenant (sarcastically) — My dear fellow, did you ever hear of marking time with the hands?

To fry fish properly they should be put into boiling hot fat.

MAKING USE OF OUR CAMELS

South America Possesses Four Species of the Camel Tribe.

There seems to be little doubt of the fact that camels, of which we are accustomed to think as Old World animals, originated in America. Anciently they were perhaps the most numerous of mammals in the territory between the Mississippi River and the Rocky Mountains, as proved by their bones dug out of rocks, some of them being no bigger than jack rabbits.

We have to-day on this continent four species of the camel tribe, all of them native to South America. Largest of them is the llama, which in that part of the world is extensively used as a beast of burden. The others are the guanaco, the vicuna (which is the smallest, hardly bigger than a sheep) and the alpaca.

Nobody has ever seen an alpaca in this country, unless in a menagerie or "zoo," but we have long been acquainted with its wonderful fleece, very fine and lustrous, which fetches nearly four times the price of the best marino wool. Indeed, it is commercially rated above mohair—the wool of the Angora goat.

In suitable regions (which we do not lack) all four of these "cameloids" could doubtless be introduced and bred within our borders and turned to useful account. The vicuna, in South America, is as yet virtually a wild animal, though not hard to tame, and the alpaca is only partly domesticated.

The alpaca industry reaches its highest development in southeast Peru and northwest Bolivia; in and around the valley of Lake Titicaca, which is more than two miles above the sea. It is an arid region with great diversity of climates, ranging from subtropical at the lake level to arctic on the lofty mountain slopes. But the alpaca selects its own zone of temperature by going higher in summer and descending to lower altitudes in winter.

Conditions very similar in respect to climate, elevation and vegetation are found in the vast area between the Rockies and the Sierras. These alpacas would doubtless multiply greatly, the herds (in which they are accustomed to wander) maintaining themselves on coarse grass and herbage, for the consumption of which the peculiar construction of their mouths and stomachs adapts them. The succulent vegetation of warmer and more humid climates does not suit the health of any species of the camel family.

Alpacas are remarkably active and vigorous beasts, thriving where cattle and sheep could hardly exist. They have two-toed feet, like the camel, and similar teeth.

USES FOR TOMATO REFUSE.

Oil is Obtained From the Seeds Leaving a Nutritious Cattle Feed.

In the canning of tomatoes and the manufacture of catsup there is much waste in the form of seeds and skins. How great is the quantity of such refuse may be judged from the fact that in Indiana alone 20,000 tons of tomatoes are "pulped" annually, yielding as a by-product (hitherto deemed worthless) 624 tons of seeds and 732 tons of skins.

A beginning has been made in the utilization of this refuse, which is available for valuable purposes. After drying, it is passed through machines (with sieves and fans) that separate the skins from the seeds.

From the latter is obtained (by pressing) an oil that, when refined and bleached, is excellent for table use. It is good for cooking. In a cruder state it makes first-class soap and may be turned to account in the manufacture of paints and varnishes.

The "cake" left in the press after the oil has been squeezed out of the seeds affords a highly nutritious cattle feed. In the preparation of such feed the skins are mixed in with the seed residue.

In view of the present shortage of oils for the making of soaps, etc., the U.S. Department of Agriculture strongly recommends the saving and use of tomato-seed oil. By chemical means the seeds can be made to yield 22 per cent. of their weight in oil.

His Clothes Come Home From Camp To-day.

His clothes came home from the camp to-day,
The clothes he had on when he went away,
The jacket and trousers the schoolboy wore,
Things that the soldier boy needs no more.
His mother took them and put them away
In the room upstairs where he used to stay.
His clothes came home from the camp to-day,
The cap that he waved when he went away,
The coat that was snagged and mended with care,
The bright-colored scarf that he liked best to wear.
She held them close to her heart to-day
As she knelt alone in his room to pray.
His clothes came home from the camp to-day,
The shoes where the prints of his feet still stay;
His mother, seeing them through her tears,
Thought of the baby boots kept through the years;
And, with the relics of yesterday,
She put her soldier boy's clothes away.

YOUTHFUL AIRMAN VICTOR OVER FOE

GERMAN AVIATOR DOWNED BY 20-YEAR-OLD ETON BOY.

Lieutenant Davids Brought Down Twenty-Two of Foe Before His Own Death.

When Voss, the intrepid German airman, was brought down there was considerable demand that the name of the British airman who accomplished the feat should be revealed. He was Lieutenant Arthur Rhys Davids, an Eton boy of twenty. In the official Gazette it is stated that among his other feats he brought down nine enemy aircraft in nine weeks, says a London correspondent.

But after much anxiety the boy's father, Professor Rhys Davids, and his mother, both Oriental scholars of distinction, no longer have any doubt that their son, missing since last December, is dead.

In their home on Chipstead Downs the parents and sisters mourn the brave and daring boy, said to be one of three very elect among the bravest of British airmen.

Arthur Rhys Davids, after doing brilliantly at Summerfield, where, a King's scholar, he won a Balliol exhibition and the Newcastle scholarship, took his commission in the Royal Flying Corps in the autumn of 1916, leaving his civil service ambitions until after the war.

Brought Down Twenty-Two Germans.

Young Davids had been good at sports and he took to flying as though born to it. He won the M.C. with the bar, and the D.S.O. after five months in France in April, 1917. He brought down twenty-two Germans for certain —he actually saw that number crash —but he drove down many more out of control. Among the twenty-two were the German super-fliers, Voss and Schafer.

The story of the defeat of Voss, who had been credited with being the greatest airman of all the armies, is thrilling. When Rhys Davids went up with a squadron of six and four Germans were sighted it was not so easy as it seemed, for Voss was among them and he took on three of the British machines. Two of these he put out of action, causing them to return home with their engines full of lead. The third was the boy from Eton.

Voss and Rhys Davids made a duel of it. The Hun was in a triplane, and there was a most tremendous fight. The story of it was afterward told to the family by an officer acquainted with the facts.

Fought For Twenty Minutes.

"I want to give Voss all credit," says Miss Rhys Davids, sister of the brave young airman, in repeating the story. "He had a fearful fight with the three for twenty minutes, and then my brother and Voss wheeled round and round; and then, suddenly, Voss crashed to earth.

"Yes, my brother spoke of one or two narrow escapes. On the very first time he went up out there something made him turn round, and to his astonishment he saw a Hun on his tail. If he had not glanced round at that moment he would have been killed. Worse still, his gun jammed, and for ten minutes he had to get out of this machine's way by rolling and turning. Then suddenly, to his amazement, the Hun turned tail and went home. That was one of the narrowest escapes he had.

"My brother was inclined to fly recklessly low, and that is probably how he met his death in October last year. We knew he was missing, and we hoped and hoped for eight weeks before we had any practical certainty.

Shot "Painted Banana."

"He had very often been in a big fight of twenty-five on each side, and when he wrote home about such he said, 'All you can think of is pumping lead into any machine you see and banking out and avoiding collisions, just missing each other by perhaps a couple of feet. He used to laugh when he saw the German machines painted up 'like an unripe banana.' He described one of these machines, and said that when it came toward him he chuckled with laughter at the curious appearance of it, and then let fly. He brought the painted banana down."

And now young Rhys Davids has himself been brought down. But he lives a memory of schoolboy British pluck that can never die.

Depth Bombs.

What is said to be one of the most efficient weapons in the anti-submarine warfare is the depth bomb, which carries several hundred pounds of high explosive and bursts automatically at a predetermined depth. The effectiveness of the weapon lies in the fact that it does not have to hit the submarine to destroy it. Water is incompressible, and the shock of the explosion of a mass of trinitrotoluene or other high explosive under water is felt immediately for a long distance in all directions. According to the Scientific American, four cubic feet of trinitrotoluene at the moment of detonation produces forty thousand cubic feet of gas, which of course exists its pressure in the line of least resistance; and if a submarine is near, the tremendous pressure will crush its walls like an eggshell.

CARGILL

Messrs. A. Johnston and Jas. Garland made $42 for the Red Cross at the taffy party given by them in Garland's bush last Friday night. Eight gallons of syrup was used to make the taffy. There was a nice crowd out, and an ample supply of candy to satisfy those present. Quite a few from Walkerton and Paisley were there, as well as people from the near by villages.

An account of the accidental death of Mr. B. Bradley at Harriston appeared in the papers last week. It appears Bert was repairing some electric wires when a live wire touched his neck, killing him almost instantly. His head was said to have been burnt off his body. We are sorry to hear of this unfortunate accident. It will be remembered that Bert was at one time an employee in the planing mill and was well liked here.

Mrs. and the Misses Cargill returned home on Saturday night from a trip to California and Vancouver. Mr. W. D. Cargill went as far as the latter place to meet them.

Miss F. Newman was called to her home in Owen Sound on Saturday owing to the serious illness of her father.

Mr. Wells and family, of Port Elgin, spent Sunday at Mr. R. Wells'.

Miss Cowden, an old and respected citizen of our village, passed away at the Bruce County hospital on Saturday morning. The late Miss Cowden has lived in this neighborhood a great many years. She was born in Ireland almost eighty years ago, and came to this country with her parents. She and her brother James lived on the farm now rented by Mr. John Parker until the death of her brother, when she moved to Mr. Elder's house this side of the Grand Trunk station. Some three years ago she was taken ill and removed to the hospital, where she remained until her death. Miss Cowden was a fine Christian character, and was well liked by all who knew her. The funeral took place from her nephew's residence (Mr. Jas. Garland) on Monday to Douglas Hill cemetery, and was largely attended. Rev. R. M. Gale conducted the services.

Mrs. and Muriel Dietrich, of Chesley, are visiting at Mrs. Thos. Grice's.

A meeting of the bowling club was held last week, when the following officers were chosen for the season of 1918: Pres., Geo. Sirrs; Vice-Pres., W. D. Cargill; Sec'y-Treas., C. Kyle; Exec. Com.—John Clancy, R. A. Fowlie, Jas. A. Garland; Grounds Com.—W. D. Cargill, R. Loughleen, G. Saunders; Games Com.—John Clancy, F. Balsdon, R. A. Fowlie; Members Com.—J. A. Garland, F. Balsdon, R. Loughleen; Caretaker, R. Loughleen; Auditors—R. A. Fowlie, G. F. Saunders. The treasurer's report shows a balance on hand of $13.36.

Children Cry
FOR FLETCHER'S
CASTORIA

—Mr. Jas. Garland, of Brant, has made over 250 gallons of maple syrup this spring.

GLAMIS

Mr. and Mrs. Jos. Purdy have returned from Hamilton, where they spent a week with friends.

Mr. and Mrs. Alex Kippen, of Tiverton, spent Wednesday with friends in our burg.

Mr. McClung, Miss McDermid and Mrs. Nesbitt motored to Kincardine on Thursday.

Miss Catherine McDermid arrived on Saturday from London.

Mrs. Madden left last week to join her husband in Port Huron.

Mr. Jack McKeeman, Miss and Mrs. McKeeman and Miss McDermid motored to Chesley on Tuesday of last week.

Mr. Duncan Guest, of Bervie, spent a few days last week with his uncle, Mr. Jim Guest.

Mr. Blair and Mr. Eugene Montgomery, of Tiverton, were here on Sunday in the interest of Sunday school work. They addressed the school in the Baptist church.

Some of our villagers went to the lake on Monday to fish suckers.

Rev. Mr. Smith, of Galt, will hold quarterly meetings in the Free Methodist church beginning on Friday night.

The Red Cross Society sent their monthly shipment on Thursday last —54 pair of socks, 12 suits pyjamas, 84 personal property bags and 192 handkerchiefs.

Pte. Wilber McNally, who was in London to report for military duties, returned on Monday.

Miss Jean McDermid, who has been hoef omteosrm,eeiurnrt mown been home for some time, returned to London on Tuesday.

EBENEZER

Owing to the wet cold weather, seeding is being hindered. The farmers here are all putting in large crops this spring. Some are putting in 40 acres of their 100. All that is needed now is warm, dry weather. The soil is in excellent condition for cultivation this spring owing to the severe frost of last winter.

Mr. and Mrs. J. H. Lipsett and family, of Chesley, spent Saturday and Sunday with friends here.

Mr. Eph Grant made a business trip to Owen Sound last week.

Miss Mary Kirkland, of Chesley, visited the Kirkland family here over the week end.

Reeve Grant, of Tara, and family visited at Mr. John Grant's on Sunday.

Miss Eva Potts, of Tara, is visiting her brother I. D. here.

The Sunday School has been organized for another year, with C. A. Thomas as supt., and J. H. McFadden asst supt.; bible class teacher, F. Gibson; intermediate class, R. Grant; girls, Miss A. Kirkland; juniors, Miss G. McFadden; beginners, Mrs. D. Sparrow; cradle roll supt., Mrs. C. Thomas; sec'y-treas., Russell Fleming.

The financial meeting of the skating rink was held on April 24th. After all expenses were paid there is a balance of $9. This goes to show that a skating rink in a rural community can be a complete success if properly managed.

WALKERTON

Mr. Leonard Reilly of Glen Grove well known as a hay presser and shipper throughout this section, has received notice from military headquarters at London that his application for exemption had been refused.

Mrs. Fink, of Hanover, was operated on at the Bruce County Hospital on Friday afternoon, when Dr. Stalker of town, assisted by his son, Dr. Berkley Stalker, of Hanover, removed 45 gall stones from the aged patient, who is in her 68th year. As peritonitis had already set in her condition has been critical.

Major A. McLean Moffat, who was temporarily in command of the 160th (Bruce) Battalion in England, has reverted to the rank of captain and joined the 44th Battalion in France. Bobbie Rowland also reverted from captain to lieutenant and went to France some time ago with a draft for the same battalion. Mrs. Moffat, who has been residing with her husband in England, is preparing to return to Canada again.

Several young Walkertonians who had ordered spring suits at tailor shops are said to be either cancelling their orders or seriously wondering what they will do with them since reading the recent decree of Parliament calling up men between the ages of 20 and 22, and notifying others of 19 and 23 years, respectively, that they must get busy shortly and register.

Dr. Sinclair was jolted out of bed on Monday morning by the spirited ringing of his telephone, and on hastening to the receiver was informed by a rural cousin that Jack Garbutt was dead. After recovering from the shock, the local physician drove out, as it were, to view the corpse, but on arriving at the home found his man sitting up smoking in the house and looking anything but in urgent need of the undertaker. It seems that Jack had fallen over in a faint, and thinking he had dropped dead, a neighbor who was summoned phoned the sad news to the family physician. As Jack was the fittest looking candidate for the obituary column that Doc. had ever seen, the pill-man decided from the way John was puffing that he would be sooner in need of another cigar than anything in the line of a floral wreath, and so passed the Brant planter a fragrant Havana, with the fervent hope that he might long continue to beat out the coffin trust in this way. —Herald and Times.

UNDERWOOD

Messrs. Albert Coleman and Chas. Fletcher, of Clifford, spent the week end here.

Mr. Harstone was down to Toronto for a few days last week. Mr. Bert Russell was engaged in the store during his absence.

Miss Shewfelt, of Kincardine, visited friends here last week.

Quite a number of young people from here took in the concert in Tiverton on Friday night.

Miss Ray Richardson, of Port Elgin high school, spent the week end at her home here.

The Underwood Agricultural Society has started a field crop competition in oats for this year. The present scarcity of farm labor is a great hindrance to anything of this sort, yet a very nice list of entries was secured.

Mr. and Mrs. John Cole, of Toronto, are visiting their son, Mr. W. A. Cole.

Mr. W. F. Summers recently spent a few days in Huron, renewing old acquaintances.

Miss Jenny Drummond, of Kincardine, is visiting at Mr. Jas. Johnson's.

There will be no service in the Methodist church here next Sunday on account of communion service being held in Wesley church on the 12th.

Rev. Mr. McNabb will be home next Sunday to preach his farewell sermon.

SECOND CON. ELDERSLIE

Mr. and Mrs. Wm. Lamont and family, of 8th con. Brant, visited at W. J. Allen's on Sunday.

W. J. Sheane, of Toronto, was calling on friends here last week.

Mrs. F. McLeod and Miss Dina Addison, who have spent the last couple of years in Chesley, have moved back to the home of their brother, Geo. Addison.

Miss Lizzie McDonald is spending a couple of weeks here visiting her aunt, Mrs. W. Hope.

D. C. Lillico has been engaged for the last few weeks with Wm. Young who has been laid off work, suffering with stomach trouble.

Mr. and Mrs. D. Jelkins, of Arran Tp., visited friends here recently.

Owing to the cold weather the seeding operations are not progressing very favorably as yet, but a goodly number are contemplating sowing spring wheat. Will the women of this district turn out and do their bit to produce in the garden and help win the war?

Vernon Keith, who has been under the doctor's care for some time, expects to soon be able to resume his bank duties.

PINKERTON

Mr. Frank Donnelly is home from Toronto University.

Mrs. J. Murray and sister, Miss McGibbon, spent a few days visiting friends in Paisley.

The following shipment was made by the Red Cross on Thursday of last week: 22 suits pyjamas, 8 pillows, 6 pillow covers, 3 quilts, 1 package old linen, 136 pair socks, 17 light weight flannel shirts.

The ladies of the Red Cross are very grateful to Mr. Wm. Alexander, of Greenock, for his generous donation of $25.

Rev. Mr. Gale is attending a Synod meeting at London this week.

Mr. Walter Birrell, of Toronto, is spending a few days at his home here.

—A resolution is being submitted to the British House of Commons proposing to conscript all unmarried women of from 19 to 30 years of age for work of national importance.

FIRE AT CHESLEY MUNITION FACTORY

There is a strong suspicion that alien enemies are responsible for a disastrous fire which wiped out the manufacturing part of the munition plant of the Canada Beds, Ltd., at Chesley on Friday morning. The fire started from the explosion of a resin pot, but as there had been no fire near it since the day before, there appears to be no doubt but that the fire was of incendiary origin. It is understood that a full investigation will be made at once.

The loss is a serious one, the entire machine shop and power house, together with thousands of shells in different stages of completion, being totally destroyed. It is estimated that the loss will be about $40,000.

The fire broke out by the explosion of a resin pot in the machine shop about 6.30 in the morning. The flames spread throughout the department with incredible swiftness. Before the fire brigade arrived the entire machine shop was a mass of flames, and it was only a short time until this section of the building was a complete wreck. The fire spread to the power house at the side, and this building was destroyed.

The firemen were successful in confining the fire to the machine shop and power house. The machine shop occupied the centre part of the main building, and fire walls and fire doors made it possible to save the heat treating department at one end and the storehouse, inspection rooms and offices at the other end.

Several thousand completed shells, ready for shipment in the storehouse, were undamaged, and large quantities of raw material in the heat treating department were saved.

The Prompt Answer!

IF the habit of *answering promptly when the telephone bell rings* were universal, the saving of time would be enormous.

¶ Few things are more pleasing to telephone users than a prompt and courteous response to a telephone call. In business, the practice of *prompt answering* has been a money maker, for customers appreciate it.

¶ Practice *prompt answering* yourself and make it a rule in your business.

The Bell Telephone Co. of Canada

The Most Artistic Roof

is the one that completely harmonizes with the design and finishing of the house. For this reason there is a steadily increasing demand for Brantford Asphalt Slates for the modern style of homes.

Brantford Asphalt Slates have a surface of crushed slate embedded into our asphalt coating, the base of the roofing being felt saturated with asphalt. They are cut the size of shingles, and their beautiful soft colors of reddish brown and dark green give a roof a most artistic appearance. The colors are the natural shades of the slate as it comes out of the quarries. Brantford Asphalt Slates are, therefore, unfadeable —never require painting.

Brantford Asphalt Slates

are accurate in size and pliable, which makes them very easily handled and quickly laid, saving time and labor, and therefore costing less to lay.

Brantford Asphalt Slates make an artistic, durable and economical roof. Booklet describing them mailed on request.

D. H. COOPER

I. O. O. F. Anniversary

About 75 Oddfellows marched to the Methodist church on Sunday evening, to celebrate the 99th anniversary of the order. Rev. Mr. Crighton preached an excellent discourse from the words "Choose ye the best gifts"

Telephone Bonds Sold

The Bruce Municipal Telephone System sold $8,600 worth of bonds to Mr. Jas. McEwen and Mr. Mur. McNeil. The sale was closed up last Friday by Reeve J. Johnson and Clerk I. G. McKay. The price obtained was in excess of any offers made by brokers. Local capital is beginning to realize that the bond issues of the home municipalities are of exceptional value, and much money is being invested in debentures being now issued throughout the County of Bruce. Why should bonds be allowed to go outside for sale? There is no better security than your own bonds which find ready sale in outside markets.—Kincardine Reporter.

Men of 19 to Register

Men of 19 years of age are to be called upon to register for military service. A proclamation to this effect will be issued shortly, and it is understood, will provide that the men must register before June 1. None of the men will, however, be actually called to the colors before July. The proclamation will apply to unmarried men and widowers without children, born since October 13, 1897. The men will be required to register through the postoffices, simply giving their names and addresses and such details as will permit full registration to be effected. The actual call to the colors will be received by registered post from the District Registrar. The purpose of stipulating that the call shall apply to men born since Oct. 13, 1897, is apparently to make it include all those who were 19 years of age and not 20 when the first class was called out on Oct. 13, 1917.

CARD OF THANKS

Mr. and Mrs. Mac McArthur desire The Advocate to convey to the people of Paisley and surrounding country an expression of their heartfelt gratitude for the generous aid extended to them in their time of distress and need through the illness of Mr. McArthur; also for the sympathy extended in their bereavement by the death of their baby.

Young Food Soldiers

The Education Department having accepted the recommendation of the teachers of Paisley Continuation School, based on the special Easter examinations, the following pupils have received their standing:—Normal Entrance—Meryl Bell, Harold Collins, Gladys McCallum, Winnifred Megraw, Wallace Tanner, Jessie Young. Junior Matriculation—Harold Collins. Under the special war regulations these pupils must spend three months on a farm in planting, cultivating and harvesting crops. Previous to their departure for the farms, the pupils of Forms I and II held an "At Home" at the school in honor of these six boys and girls of Form III who are going out on the national duty of serving as "soldiers of the soil."

—Miss Euphemia McKinnon, of Toronto, is visiting her sister, Mrs. Neil McArthur, Water St. Miss McKinnon is a graduate nurse, and is just recovering from an attack of typhoid fever contracted while attending a patient.

A May-Day Wedding

On Wednesday, May 1st, at the Methodist parsonage, Port Elgin, by the Rev. Dr. Scanlon, Irene Evelyn Megraw, third daughter of Mr. and Mrs. Wallace Megraw of Greenock, and James Neilson Stark, second son of Mr. and Mrs. James Stark of Paisley, were united in marriage. The happy couple returned to the home of the bride's parents, and after dinner had been served they set out in the groom's car on a tour of the counties of Bruce, Grey and Simcoe. The bride was married in her travelling costume of navy blue serge, with grey picture hat and summer furs, and wore the groom's gift, a beautiful necklace.

—Salem garden party June 27th.

—How about tea? The wise buyers are stocking up now before the jump in prices. Ballachey, Laidlaw & Co.

—For Sale, privately, 1 Jewel coal heater, 1 wood cook stove, 2 sewing machines, 12 kitchen chairs, sideboard, fruit jars, and other articles. Mrs. N. D. McLeod.

Order Your Coal Early

Leave us your order for needed supply at once, so that we can have your bin filled before the cold weather comes on again. D. A. Lyon.

Seeds! Seeds!

Get your seeds early this season, as the supply of some kinds is not equal to the demand. We have a full assortment of garden seeds, also clover, turnip, mangel, etc. See us for seed corn. Walter Stark.

Shower of Soldiers' Comforts

Remember Queen Mary's silver wedding shower of Soldiers' comforts and hospital supplies for money with which to buy them, for the queen's distribution to our troops on the firing line and for wounded in the hospitals in France. The shower will be in Putnam's Hall, Saturday afternoon, May 11th.

Tenders for Gravel

Tenders for gravel will be received, addressed to the clerk, for street gravel, subject to inspection by the supervisor, to be delivered on streets where and when requested, with sufficient teams to keep the spreader busy, to be opened Wednesday, 15th inst. No tender necessarily accepted. J. C. Gibson, clerk.

ATTENTION!

The Tiverton Dramatic Club will present "The Finger of Scorn," a rattling comedy full of good things, on Tuesday evening, May 14th, in the Town Hall, Paisley. The same club, it will be remembered, were successful last year in putting on that screaming farce, "Untangling Tony," and as the present entertainment will be given for Red Cross purposes under the auspices of the Paisley Women's Patriotic League, it is hoped that as many as possible will attend on the evening of May 14th. The Paisley orchestra will provide the music.

Wall Paper

A DISCRIMINATING customer will find all they desire in variety of designs, novelty of colorings and general desirability of the goods we offer to suit their fancy. Our stock is full and complete. Eggs taken in exchange.

The Mystery House

Next Door to the Parsonage Lived an Unknown Stranger, Setting Village Gossipers Astir with Wonder

Told By The Minister's Wife

Billy looked disappointed at first and then stern. He went into his study and I wanted to run after him, but something held me back.

Betty Rose brought the mail with her when she came into the kitchen. She held up a beautiful crested envelope. "Ted Broughton wants to come down next week. I'm getting lonely so I believe I'll let him come. He will liven us up a little anyway."

Betty Rose looked tired, as is part of the world's glamour had rubbed away. I wondered if the Mystery Man caused it.

There was a letter for me. It contained a check for ten dollars for the story I had sent the syndicate only three days before. I did not feel so elated as I had thought I should feel. I tucked it into a drawer and wondered how many more I could write.

Billy thanked me for his mail and stood courteously waiting for me to leave his study. It made me angry for him to be coldly polite. Stubbornly I said, "I got another letter this morning. You may not read it either."

He stared at me as I walked away and as I was dusting the dining room I heard him walking up and down in the study.

After a long time I went out to sweep our side porch and saw Betty Rose snow-balling the Mystery Man. When he went into the house, Betty Rose came home and went straight to her room. After a while she came down. "I've written that he can't come," she told me, "I'm going to mail the letter. Don't you think we could have dinner a little earlier to-night? He is going to take me skating."

Of course I knew that "he" was the Mystery Man. When they came back she was radiant.

"Please don't accuse me of trying to make him fall in love with me," she began when she saw my disapproval. "I'm not trying that and besides he couldn't care anyway. We're just like two children together. I do want to have one beautiful time to remember after I have gone into one of those millionaire homes."

She hurried into her room where I heard her sobbing to herself while the Mystery Man on his back porch was sharpening skates and whistling.

It was curious about the little home rifts. Instead of time closing them it seemed to make them grow wider. Outwardly Billy and I were the same but inside my heart was a feeling of loneliness and apathy that I could not dismiss.

No more checks came to the parsonage. I could not write; I almost forget that I had ever tried until one day I happened to come across the two checks I had received.

"Twenty dollars," I giggled as Betty Rose would have done. "I can't buy much of an automobile with that."

A few days later Betty Rose baked spice cakes. She insisted on carrying some to the Mystery Man. "There's nothing that can make a man happier than spice cakes," she told me as I piled the cakes on a plate and covered them with a napkin, "and, Priscilla, I never shall be a dressed-up Dresden-doll sort of wife. Just being here with you has taught me that. Can not cooking for the man she loves make a woman happy?"

After a time she came back from the Mystery House with the empty plate. "He's horribly snappy to-night," she began. "If there is anything he seems to hate it is a woman. No wonder his wife sees so little of him. He hardly noticed me until I put the cakes before him. He was writing some sort of a legal paper, looked up, saw the cakes, grunted his thanks, took one, began eating it and then went right on with his writing. I'm writing Ted Broughton to come down to-morrow."

The next day, Sunday, brought us one of the millionaire suitors. He came in a car which was the wonder of all Hazelton.

Betty Rose dragged him to church although he protested. Together they went up the aisle, creating amusement among Hazelton's younger citizens. When we all came out together we met the Mystery Man on the steps. He seemed to be waiting for us but when he saw Ted he lifted his hat and stalked away.

Ted looked at him through his monocle. "Who is that bally chap?" he asked in his affected English drawl. "He looks familiar. What did you say his name was, my dear girl?"

"I didn't say," she snapped. "I don't know it."

This time Ted's monocle turned upon Betty Rose.

The next week the Mystery Man seemed to ignore Betty Rose altogether. Every time he went past the parsonage he looked away from the house instead of towards it. My heart ached for her and she knew it. "I don't want you to think I care for him, Priscilla," she told me. "He's just a part of my happy day here, in Hazelton."

The happy day turned into one of excitement. A train robbery startled all Indiana. One of the fastest trains running out of Chicago was robbed, little Jimmy White said, of "tons" of money and the robbers had been traced to Horton Junction only four miles away from us. By noon we knew that there were at least ten detectives there.

"My dear Mrs. Lester," panted Mrs. Stein when I met her near the post office. "They might have come here—those detectives, I mean. Think how Hazelton would have been disgraced! Nothing worse could have happened to our reputation!"

"Unless the robbers themselves came," whispered Betty Rose as we walked on. "I'm glad I decided to go home Monday. I may save myself the disgrace."

"But you ought to postpone it a week longer," I told her. "You haven't made up your mind which one of those men you care the most for."

"I don't know how to decide," she said slowly. "Priscilla, tell me, do you really believe in love?"

I saw Billy helping the choir boys sweep the snow from Widow Leatherman's path. How tall and wonderful he looked, my Billy, and how well he remembered to do beautiful things for people!

Betty Rose's eyes smiled mistily. "If I loved a real man who loved me too, I'd expect him to sermonize me often. Of course I'd want him to make it all up to me afterward and Billy is doing his level best to but you won't let him, honey. Why don't you tell him what was in that letter?"

"Once you advised me never to tell him," I reminded her.

"I've changed since then," she said softly, "and of course, Priscilla, you really do believe in love?" She raised her hand to wave a greeting. We were in front of the Mystery House and its owner was on the front porch. With elaborate politeness he lifted his hat, turned and went into the house.

Two men passed us hurriedly. One of them jostled against my arm. Impulsively both Betty Rose and I turned from our gate to watch them. They were scanning all the houses along the street.

After supper Betty Rose slipped into her mackinaw and red tam-o-shanter. "I believe I'll walk down to the post office," she said. "There may be mail for some of us on the last train."

After she had gone the telephone bell rang and Billy answered it. "A wedding in the lower settlement," he explained as he donned his overcoat and kissed me. "Don't wait up for me. I'll probably be late."

The house seemed lonely after he had gone. I washed my dishes, tidied the living room and sat down on the edge of his great chair to wait. Suddenly it seemed as if I were not alone nor ever would feel lonely again. I walked to the window and looked down the street. The church stood tall in the moonlight—white against the white of the snow. Its windows were softly lighted. The choir boys were having a last rehearsal. The music from the organ came soft and low and tender. It seemed to whisper the same secret that the shadows had told me back in the room.

After it came dreams—the most beautiful dreams that had ever come to me. Just as they were leaving I heard the front door open and Betty Rose rushed into the room.

"Priscilla," she began breathlessly, "There are crowds of people uptown. I stayed a long while to listen to them talk. Those men we saw yesterday out by our gate were detectives. They were after the people who robbed the express train. They wouldn't tell anyone whether they had discovered a clue or not but the people here think they have and O Priscilla," her voice was tragic, "they suspect the Mystery Man! The new sheriff is coming—"

(To be continued.)

Eradicate cedar trees growing near orchards to keep down apple rust. It is chiefly a foliage disease, but also attacks the fruit.

A MYSTERIOUS CRATER.

Geologists Are At a Loss to Account For Its Formation.

About forty miles from Flagstaff, Ariz., in the midst of a great plain, there is a saucer shaped hollow or crater about three-quarters of a mile across and 600 feet deep. The rim of the crater rises between 150 and 200 feet above the surrounding plain.

Rocky fragments are scattered about for several miles around the crater. Among these rocks many fragments of meteoric iron, some containing thick black diamonds, have been found. The inner walls show that the crust of the earth was broken when the crater was formed, yet no volcanic rocks exist there.

Geologists have offered several theories to account for this phenomenon. One is that an immense meteorite made the hole, and that the meteoric fragments mentioned are remnants of the falling star. Another theory ascribes the origin of the crater to a tremendous explosion of steam in the rocks beneath, and a third combines the first two by suggesting that the blow of a falling meteor, striking the earth's crust at a point where subterranean water had accumulated in the neighborhood of heated rocks was the cause of the explosion.

About the House

SPONGE BOX AS KITCHEN COMMODITY.

A home-made sponge box or bread raiser will prove a great convenience in the wartime kitchen. It enables the housekeeper to keep her sponge or dough at the right temperature so that it will rise in less time. A sponge box or bread raiser, therefore, takes much of the uncertainty out of bread baking. It can be made from an ordinary dry goods packing box, and the government has sent out directions for making it, as follows:

A box 28 by 20 by 20 inches is a convenient size. About ten inches from the bottom of the box a shelf made of slats or strips of wood rests on cleats fastened to the sides of the box. A second shelf is placed four inches above the lower one. The shelves can be removed when cleaning the box. Below the lower shelf a sheet of galvanized iron slightly wider than the shelf is inserted. It is curved in order to make it slip in and stay in place securely. This prevents scorching of the lower shelf when a lamp is placed below and also helps to distribute the heat more evenly. The door is hinged and fastened with a thumb-latch or hook and staple.

Several small holes are bored in the lower and upper parts of the sides and in the top of the box to promote circulation of air. A cork which has been bored through the centre to admit a straight thermometer is inserted in one of the holes in the top of the box. A Fahrenheit chemical thermometer that registers as high as 100 degrees can be used. Such a thermometer may be ordered through a hardware dealer or directly from an instrument dealer.

To avoid all danger of fire, the box should be lined with asbestos or tin when a kerosene lamp is used for heating the box. If an electric light is used the lining is not necessary. A sixteen-candle power light will heat the box nicely. A small and inexpensive night lamp is placed in the bottom of the box and a shallow pan of water is placed on the lower shelf so that the air in the box will be kept moist.

The bowl of sponge or pans of dough are placed on the upper shelf. The temperature of the box should be kept as near 86 degrees F. as possible (80 degrees to 89 degrees F.) when bread is being made in the quick way. If a sponge is set over night 65 to 70 degrees F. is the better temperature until the dough is made in the morning, after which the temperature may be increased to 86 degrees F. The temperature in the box may be varied by raising or lowering the flame of the lamp or by using warm or cold water in the shallow pan.

Honey a Sugar Substitute.

Honey is much more easily digested than sugar, and much more quickly assimilated. It has the peculiarity of retaining moisture, keeping bread and cakes, for instance, fresh and soft for a long time. It is delicious on dry cereals of all kinds, even dry bran. In combination with most fresh fruits and nuts, there is no sweet like honey. Try it with baked apples, baked peaches, sour cherries, boiled or baked quinces, grapefruit, coconut, almonds and Brazil nuts and you will surely want it a second time. Raisins, spices and spicy seeds blend well with honey.

Honey cakes, as we have said, are noted for their keeping qualities. For this reason, the use of honey is recommended for wedding or black fruit cake, while it gives a richness of flavor and texture to even a plain raisin loaf like the following:

Honey Plum Cake.—½ cupful shortening, ½ cupful brown sugar, ½ cupful honey, 1 egg, ¾ cupful milk, 2 cupfuls pastry flour, 1 teaspoonful soda, ½ teaspoonful salt, ½ teaspoonful ginger, ½ teaspoonful nutmeg, ½ teaspoonful cloves, 1 teaspoonful cinnamon, 1 cupful raisins or mixed fruit. Cream the shortening and brown sugar together, add honey and egg well beaten. Mix and sift together all the dry ingredients, reserving a little of the flour to dust over the raisins. Add dry ingredients alternately with the milk to the first mixture; beat well, add raisins and bake in a well-greased and floured loaf pan in a moderate oven.

Honey is unequaled for making small cakes. The following will keep indefinitely:

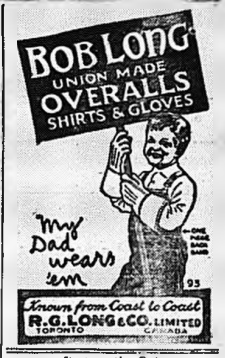
Nutlets.—1 cupful shortening, 1 cupful honey, 1 cupful brown sugar, 1 cupful chopped nut meats, 1 egg, 2 scant teaspoonfuls soda, 1 teaspoonful salt, 1 teaspoonful cinnamon, 4 cupfuls pastry flour. Sift the dry ingredients together, beat the egg well, and mix in order given. This will make a stiff batter; drop by teaspoonfuls on a greased pan and bake in a moderate oven, as cakes made with honey will burn easily. This recipe makes about eight dozen small cakes.

Honey Hermits.—½ cupful shortening, ¾ cupful honey, ½ teaspoonful mixed spices, 1 cupful chopped raisins, 1 egg, 1 teaspoonful soda, ½ teaspoonful salt, about 3 cupfuls pastry flour. Heat the shortening and the honey together until the shortening is melted, add the mixed spices, using cinnamon, cloves and nutmeg. Allow it to cool. Then add the egg, well beaten; raisins, and two cupfuls of flour in which the soda and salt have been sifted. Add more flour if needed to make a dough stiff enough to roll out. Roll, cut in squares and bake in a moderate oven.

Pickled cabbage, white or red, is wholesome and appetizing.

FEWER STIFF COLLARS.

Better Uses Are Found at This Time For Starch and Linen.



The separate starched collar was invented about ninety-two years ago by the wife of a blacksmith of Troy, N.Y., who made one for her husband. Since then it has grown in popularity until there is probably nobody who has not worn a starched collar at some time or other. Now its popularity is on the decline again, partly on the score of comfort and partly as a result of the war.

The crux of the matter does not lie with the collar itself, though that is made from material which is useful for bandages. It's the starch that is to be saved—valuable foodstuff that ought not to be wasted on collars.

A permanently stiffened collar is being introduced which is not celluloid, but is a regular fabric collar treated with a kind of varnish that makes it possible to clean it under the tap or with a damp cloth. Automobilists should be among those who appreciate this new fabric, for in spite of road dust, it is always possible to "feel clean" in a clean collar. A collar of this kind will last from two weeks to a month.

Dog depredations to flocks of sheep are not only disheartening and discouraging to the flock master but they also break up breeding plans and render flocks heedless and nonproductive.

Cats are supposed to kill rats. Possibly some do but most cats do not kill rats. Every cat will kill birds, and as the birds kill insects, every cat is an insect protector. Get rid of useless cats to protect the birds that protect crops from destruction by insects.

Destroy the Rat.

A single pair of rats, breeding uninterruptedly and without deaths, would at the end of three years be increased to 359,709,482 individual rats.

The common mouse increases almost as fast as the rat.

Those facts show why it is necessary to trap and kill rats and mice to keep them from overrunning a house, ply, destroy food and other valuable

If left to themselves, they multiproperty and spread disease.

Destroy these pests!

"A more glorious victory cannot be gained over another than this: that when the injury began on his part, the kindness should began on ours."—Tillitson.

Send it to Parker's

YOU will be astonished at the results we get by our modern system of dyeing and cleaning. Fabrics that are shabby, dirty or spotted are made like new. We can restore the most delicate articles.

Send one article or a parcel of goods by post or express. We will pay carriage one way and our charges are most reasonable.

PIANOS! PIANOS!

In order to get our justly high grade piano in each town, village or township throughout Ontario, we shall offer one instrument, and only one, in each place, at factory price, as far as it can be done consistently. These pianos are made in Canada and have been before the Canadian public for over twenty-five years, and are sold on a straight guarantee.

For further information apply to BOX 427 - TORONTO, ONT.

A New Dress For Your Home

Cover the scars of wear and tear on walls and floors and furniture.

A wall re-tinted—a floor varnished—a hall painted—a chair or dining room set re-stained—the whole house made fresh and bright, spic and span. There are

SPIC AND SPAN FINISHES

for every surface—for everything you want to "do over".

"NEU-TONE"—the washable sanitary, soft tone Wall Finish, in pleasing tints.

"WOOD-LAC" Stains make soft wood look like expensive Mahogany, Walnut, etc.

"MARBLE-ITE" Floor Varnish—for hardwood floors. Won't mar or turn white.

"LIQUID WAX"—for floors. Easily applied, Dries hard, Shines easily.

"SENOUR'S FLOOR PAINT"—the hard-drying paint for the floor that wears, and wears, and wears.

"VARNOLEUM" brightens up and protects Oil Cloth and Linoleum.

These Finishes have proved their worth and wear and economy is a great many homes. We have handled them for years and can guarantee results.

FRUIT JAR LABELS FREE—a handy book of them—printed in colors and ready gummed, given away. Write for them. 104

GREENSHIELDS AVENUE, MONTREAL

WHAT OUR FIGHTING MEN READ

IN TRENCHES AND BILLETS AND HOSPITALS.

The Soldier Likes a Yarn That "Takes Him Away" From the Discomforts of Warfare.

Whatever horrors and hardships our fighting men have to face, they still have plenty of time for books. Indeed, as one of them, who has spent over two years at the Front, said to the writer, "I don't know what we should do without them. I myself have read over two hundred volumes in France and Flanders, often with the shells crashing all round me; and they have been the greatest comfort to me."

What kind of books does Tommy read in trenches and billets and hospitals? Naturally, novels are in the greatest demand; and the more exciting the plot the more popular the story. "A book to hold the attention of soldiers," says one of them, "ought to go like a moving picture all through"; and the call for these "quick-action stories," full of plot and sensational incidents, is almost universal.

That is why Jack London's and Nat Gould's books are in such big demand. Nat Gould, in fact, heads the list of Tommy's favorite authors, with Jack London as a close second, and a big gulf between the two of their nearest rivals. Rudyard Kipling, however, stands high in the fighting-man's favor; and Conan Doyle, Rider Haggard, Dumas and Stevenson, in the order given, count their admirers in scores of thousands; while among the short story writers, O. Henry, the American writer, who has sprung so rapidly into fame, is supreme even with our own soldiers.

Not Conservative.

A list of the books recently asked for by the patients in a London hospital throws an interesting light on the soldier's taste in reading. In it, Nat Gould's "Regiments at the Front" rubs shoulders with Burns' poems, and a book on "Bird-Life." Three more of Nat Gould's novels are sandwiched between "A Tale of Two Cities," "Gil Blas," and Tolstoy's "Resurrection."

"Handy Andy," "Treasure Island," and Haggard's "Dawn" share company with Macaulay's Essays, and volumes on radiography, horse-breaking, and high explosives; and "The "Scarlet Pimpernel" has for companions Milton's poems and a book on rose-growing.

In fact, the British soldier's reading covers just the same wide range as the civilian's. The ranks to-day include almost every grade of men, from the poet and philosopher to the factory operator and farm laborer. One private known to the writer has for companion in the trenches Horace and Homer; and another declares that he has read his pocket Shakespeare six times from cover to cover in the Flanders firing-line.

In all the war zones, too, there is a constant demand for scientific books, volumes on mathematics, engineering, banking, different European languages—in fact, on almost every conceivable subject which young men require for their future career when peace comes again.

Modern poetry, too, is in surprising demand, especially war-poems; plays are attractive reading to thousands; and volumes on the war, its conduct, causes, and so on, are keenly read and enjoyed; while French books of all sorts have a very large following.

An old French Seventy-Five.

She doesn't look so deadly,
The famous "Seventy-five";
You'd hardly dream of her pomp and power,
Or the force of her fearful drive;
She's slim and battered and weary,
Her guards and gears are bent,
And she lies like a wounded lion
Whose hunting days are spent.

Her broken wheels are sagging,
They stand and gather dust,
There isn't an inch of all her length
But is caked with dirt and rust;
But she seems to guard her memories
With a fierce and wary glance,
And she's proud of the very mud she bears
From the fighting fields of France.

A savage thing you call her,
The deadly "Seventy-five"?
Ah, yes, but the hand that loosed her belts
Was holding France alive!
And what if her force had failed her,
Her fires withheld their breath?
The walls of freedom, the gates of hope,
Had all crashed down to death.

Hate of to the old Defender,
The famous "Seventy-five"!
Hate of to the soul behind her/
The hand that let her drive/
Outworn she lies, and shattered,
But she had her splendid chance,
And she did her best for you and me
On the fighting line of France.

Keep a box of sifted soil, sharp sand and leaf mould rubbed up fine for use in drills in seed sowing and germination will be very much better, particularly in heavy soil.

BABYLON—THEN AND NOW.

Interest May Again Centre in Marvellous City of Antiquity.

If the Germans, as some military experts think likely, direct their next great military effort to the Balkans and attack Salonica, big fighting would be likely to follow on the plains of Babylonia, in which neighborhood the British are none too strongly established.

There is magic in the name of Babylonia. If it had been a "dry" town Cyrus could not have captured it and the whole course of history in the Near East would have been changed.

Babylon, when the army of Cyrus sat down before it, was provisioned for twenty years. It is by far the most formidable fortified city of antiquity, being surrounded by a wall fifty-five miles long, 350 feet high and eighty-seven feet thick. Half a dozen four-horse chariots could be driven abreast along the top of the wall for the entire circuit of the metropolis, whose inhabitants numbered 2,000,000.

They laughed at Cyrus. But, unfortunately, they felt too secure. On a certain memorable night the whole city went on a spree. The guards deserted their posts and in the great palace of King Belshazzar a drunken orgy reigned.

Now, the banks of the Euphrates where it ran directly through the city were defended by walls corresponding in height and thickness to that which encircled Babylon. They were pierced at suitable intervals (where streets ran parallel across the town) for ferry gates, which were massive affairs of bronze.

The river bottom, within the city limits, was paved with brick. For if desired, as had happened when huge quays were built, the Euphrates could be turned out of its course, its waters being diverted into an artificial reservoir 160 miles in circumference outside the walls. This engineering expedient, in fact, had made it practicable to pave the bottom.

On the night of the most famous jamboree in history, Cyrus, being helped by spies within the walls, turned the Euphrates out of its course and marched his army over the dry river bed into the city, entering through one or more river gates which had been left open. The royal palace, a vast structure on the west bank, was quickly captured; Belshazzar, sword in hand, was slain, and the city belonged to Cyrus.

He did not destroy it; but, ceasing to be a center of dominion, it shrank. A large part of the population migrated, deserting Babylon, whose huge walls and gigantic buildings (including the Tower of Babel and the famous Hanging Gardens, built by Nebuchadnezzar for the enjoyment of his wife Amytis) soon fell to pieces. There is no stone whatever in that region, where the land is a mere alluvial deposit, and all the great structures of Babylon, erected by the labor of myriads of slaves taken in war, were of sun-dried brick faced with burned brick.

This is the reason why Babylon today is represented by nothing more than mounds of debris, in which archeologists dig for burnt-clay books and other treasures.

BLOTTERS.

Various Means of Drying Ink on the Written Page.

Even to-day there are a few old-fashioned people who use sand instead of blotting paper. Stationers once in a while have a call for a "sand box."

The sand box is a very ancient contrivance. It somewhat resembles a pepper box, but has a concave top. When the sand has been sprinkled over a freshly written page to dry the ink, the overplus is turned back into the receptacle.

The method is primitive, but it must be said that sand does the work a whole lot better than much of the blotting paper one buys. The latter ought to be made of cotton rags, but too often the material is wood pulp, which lacks absorbent quality.

The sand box went out of use at about the same time as the quill pen. In old times, for the purpose, there was a special demand for a fine black sand of uniform grain that came from Lake Georgia, in New York State.

Excellent blotters are made of a porous kind of stone formed of sediment deposited in hot springs of Missouri. Very light in weight it soaks up ink more readily than any bibulous paper. In fact, such mineral blotters do the work so well that it is surprising they have not come into more common use.

She'd Walk.

An old Irish lady thought she would like to know what the probable expense of her funeral would be, as she desired to arrange for it, and thus save all trouble to her heirs.

The old lady, who stuttered, sent for Mr. Blank (the undertaker), and said to him:

"Mr. Blank, what would your charge for a funeral? I don't w-w-want plumes and all s-s-s-sorts of grand things, but a nice, plain hearse without any n-n-n-nonsense."

"Ten pounds," replied the funeral furnisher.

"Ten pounds!" said the old lady. "Th-thank you, I'd rather walk."

"There is nothing the body suffers that the soul may not profit by.—George Meredith.

HOW JACK TAR AMUSES HIMSELF

FAORITE PASTIMES OF THE BRITISH SAILOR.

What Men of the Grand Fleet Do While Waiting for the Germans to Appear.

The British matelot in the interim of waiting for Mr. Fritz—and the waiting does seem long—amuses himself in a variety of ways. In the Grand Fleet the recreation routine is looked after as carefully as other orders of the day. Concerts, boxing-matches, gymkhanas, are held with agreeable frequency. Some of these concerts are of a decidedly classical bent, and I, who pretend to a knowledge of the masters, felt quite at sea in "explaining" a programme of a concert held recently on a battle-cruiser. Boxing-matches are tremendously popular, and the tournaments offer an opportunity for all and sundry in the vicinity to make an "evening of it." That is, of course, if the enemy and other exigencies of the Service permit. I, in particular, have been unfortunate in this respect. On every occasion upon which a concert, a sale of work, a boxing-match has been held I have been on watch! So that one has to snatch—as Jack does—any little pleasure that offers itself in odd moments. His scheme is to organize impromptu sing-songs. Some fellow—anybody with ten fingers will do—"accompanies" on a sort of piano, and somebody else with plenty of bark does the "yapping."

Let it not be imagined that Jack cares only for rag-times or comic songs. At some of these sing-songs the best applause is often given to the "straight" singer—i.e., the chanter of sentimental or serious songs. A song with a bit of love in it goes a long way with Jack.

Eastern Dignity.

My particular duties necessitate my making the round of the Fleet on alternate days, and I have been able, therefore, to watch Jack recreating. Often he amuses himself alone. On some of the biggest battleships, I observed that skipping was the favorite pastime. I watched a matelot double-skipping for what seemed to me to be an interminable time. Once I saw an Indian, sitting silently in the shadow, watching a sailor at this form of amusement on a deserted part of the deck. It was a strange picture, and I wondered what the philosophical East was thinking of the strange, hard Englishman, who occupied his leisure in this energetic but seemingly pointless manner.

After skipping and swimming, Swedish exercises. As if Jack does not get enough of this pastime! I watched a man swinging a pair of Indian clubs in the late noon on my way out to the Queen Elizabeth. On my return, two hours later, the man was still swinging the clubs, and grinning at his "pals," who were chaffing him. Another man amidships was amusing himself by walking on his hands.

The boxing enthusiasts I have already mentioned spend every available hour in training. I have seen dozens of men dancing round the deck, lunging out at their own shadows.

For the most part, however, Jack afloat employs his leisure in singing, and sometimes dancing to the merry strains of the excellent Marine bands.

TRENCH FEVER AND SHOCK.

Two of the Wars Most Difficult Medical Problems.

Trench fever and shell shock are the two most difficult problems that this war has presented to medical science, according to a report issued by a British-American medical commission which recently has been sitting in London.

Cases of trench fever were reported from France as early as 1916, and the disease has been continually studied ever since, but the organism which causes it has not been discovered, nor has any drug been found for its successful treatment. The American army doctors believe that they have definitely established that trench fever is communicated by a body louse, a fact which has been repeatedly suspected by the British investigators also.

The fact that the disease is growing more prevalent, and is spreading from the trenches to the back areas, is also noted in the report. The original cases were all among troops in the trenches, but the disease is now prevalent on various lines of communication and at the bases. Even hospital orderlies and nurses are occasional victims.

The actual crux of the discussion seems to be whether trench fever is a disease of man transmitted by the louse, or some disease among lice themselves which is transmisible to man. If the latter, the cure would seem to be the eradication of lice, a gigantic and almost hopeless task in wartime. If the former, the dissemination of the disease comes down to a control of the human carriers, and is probably an easier task. The commission recommends energetic action in the direction of greater personal cleanliness, which will also contribute greatly to the general comfort and health of the troops.

FROZEN IN MID-AIR.

Incident in the Life of a Russian Observer.

The Russian Sikorsky biplanes were of immense value while Russia was still in the war, and it was to one of these craft that the incident occurred that Mr. Clarence Winchester relates in Flying Men and Their Machines.

The Sikorsky dreadnaught, as it was called, went out over the German lines on a scouting flight when the air was clear of enemy craft. Soon there in the distance rose three German scouting monoplanes, all fast and fitted with automatic guns. Rapidly they climbed to higher altitudes, all after the one prey—the Russian Sikorsky giant aeroplane. The Russian, however, continued his reconnaissance, and, although in numbers the Germans were superior, none of the monoplanes seemed eager to engage in combat. The Sikorsky was well armed, and opened the attack. The fire was returned, and the very first German shot pierced one of the petrol tanks, fortunately one that held a reserve supply. Taus encouraged, the same German gunner ventured nearer; but this fight was the last on which he participated, for the next moment his craft was diving headlong to earth.

There were still two Germans to be dealt with. They were careful after witnessing their brother take his fatal leap, but even so their fire was not by any means spasmodic. A hail of bullets rattled through the planes of the Russian giant craft. Then zing! They had hit the main tank. Ping! Another well-placed shot by the Germans, and again in the fuel tank. Petrol leaked out rapidly. The danger of fire and the risk of failing to get back to the Russian lines through exhaustion of petrol presented themselves before the crew of the Sikorsky. The observer knew as well as the pilot did that the tank must not empty itself; and so he stood up, outside of the cabin, placed both hands tightly over the bullet holes and thus prevented a further leakage of fuel from the main tank.

The enemy now made a special mark of the brave aviator and a ball grazed his leg. But he hung on in his perilous position, thousands of feet above the earth. The cold was intense, and the man soon became numbed almost to death. Presently he was entirely oblivious of his position. The dizzy height and the extreme temperature had affected him. How he managed to keep his hands over the bullet holes was a miracle, for the machine swayed and turned steeply in its efforts to avoid the ceaseless fire from the other aeroplanes. But he did hang on, although he knew nothing that was going on about him. He was still a good target for the Huns, but luckily he escaped their shots.

Nothing more could be done by the Russian machine; and so the pilot headed for home with the observer still holding the tank. At last his energies gave way and he collapsed on the lower plane, where he lay until the huge craft landed at its base with the information for which it had been sent. The observer was resuscitated, but it some weeks before he could leave the hospital.

ARTIFICIAL LEATHER.

Manufacture of Substitutes Has Made Vast Strides of Late.

Within the last ten years the manufacture of substitutes for leather has become an important industry, although the general public knows little or nothing about it. The chief ingredient of the substitutes is cotton. According to the Textile Journal, the base is a roll of cotton cloth, varying from thin muslin to drills and even heavier materials. The cotton cloth is covered with a paste that varies in every factory, but that requires guncotton, oil, acetamilide, lead colors and other chemicals. On one top of that is put a very thin celluloid dressing, and when the artificial leather is completed it is put through steel rollers that impress a grain upon it to imitate whatever kind of leather it is desired to represent. The finished material gets about three fourths of its weight from the cotton. Some of the articles made from artificial leather are belts, suit cases, trunks, slippers, pocketbooks, grip handles, suspender ends and similar trimmings, toilet rolls, fancy leather goods and sweatbands for hats. It is also used in bookbinding. Shoe factories have also taken to inner soles, although substitutes for top leather and most other shoe leather are still in the experimental stage. But the largest use is found in automobile factories and cheap furniture factories for upholstery. The consumption of leather substitutes has so far been chiefly domestic, but exports are increasing. Although the present scarcity of leather has no doubt helped to promote the industry, the low price of the substitute is tending to expand the use of it. Leather to-day costs about twice as much as it cost two years ago. Imitation leather sells for about a third as much as real leather.

Would Have Saved Trouble.

"Mamma," said Edith, home from school for vacation, "when the first man started to spell 'psalm' with a 'p' why didn't he scratch it out and start over?"

Spray with the wind (or when there is no wind). When the wind changes, spray the other side of the trees. Don't attempt to spray against the wind.

H. M. THE KING—WAR WORKER

IS HARDEST WORKED MAN IN GREAT BRITAIN.

Arduous and Anxious Duties Unostentatiously Carried Out by the King Daily.

What duties has this war brought to King George V.? In the first place, his daily programme sounds like the daily programme of any great business man. It is a rigid, Spartan day, with no ceremony and surprisingly little of formality.

When the King is at Buckingham Palace he is up as early in the morning that he is through his newspapers and ready for his secretaries by 8.30 o'clock. Although his morning mail is gone through at high pressure, it is usually 10.30 o'clock before his morning engagements come on for his attention. These last until luncheon, and are so nicely ordered that not a quarter of an hour goes to waste.

They usually begin with an Investiture, if there be one on the morning's programme. And these Investitures are quite invariably the King's first concern.

Simple and Unassuming.

Then come the first of his audiences. There is no limit to the sort of people whom the King receives in his study, except the limit fixed by attainment. His Majesty's callers are those who have done something of merit. From all worlds they come—the political world, the war world, the diplomatic world—men of all sorts of personal attainment entitles them to special recognition, are greeted very simply at these audiences.

Luncheon and dinner are very seldom events of a ceremonial nature during war time. Both meals are very simple family affairs. It is, of course, well known that all in the royal residences are rigidly rationed in accordance with the Food Controller's requirements.

No Escape.

Between three and five o'clock his Majesty, frequently accompanied by the Queen, is engaged in inspection of projects of interest to the realm—munitions plants, war hospitals, public projects, and military and naval establishments of all sorts.

Between five-thirty and eight he is back at the palace, if the inspection has not taken him out of the London area, and busy with the hundreds of documents that come flowing to the palace; for his Majesty's mail reaches an astounding volume. State documents of all sorts come to him. To cite one instance, every list of promotions has to be signed with his own hand.

Even during dinner, which is served punctually at 8.30 o'clock, other papers of State importance reach the palace, and these require to be gone over before the King may retire.

When his Majesty is away from London—and always it is his effort to be in London throughout an air raid—messengers follow him daily with despatches to be read and papers to be signed. Wherever he goes he is the Sovereign of the Realm, and the heavy responsibilities that devolve upon him as such follow him. Even during what are intended to be his periods of recreation at Windsor or Sandringham, where he enjoys what little relaxation he is able to secure, the same routine frequently breaks into his day.

King George V. has never sought to become the instructor of generals in war tactics, of statesmen in politics, of painters in art, and of scholars in learning. It is not the British way.

A Blogger.

For this reason it is possible that the work which the King has accomplished during the war may seem small. But, as the Prime Minister said recently, "there is one man who is working as hard as the hardest-worked man in this country, and he is the Sovereign of the Realm."

EACH TRAIN HAD A MOSQUE.

German Built "Holy" Railroad Was Financed by Turkish Government.

The Hedjaz Railway, recently captured by General Allenby, was planned by Abdul Hamid and constructed by German engineers. Its ostensible purpose as a "holy" railway for the conveyance of pilgrims to Medina and Mecca was proclaimed all over the Mohammedan world, and huge sums were sent to Abdul Hamid towards its cost by Moslems of all nationalities. The officials of the Turkish Government were compelled to contribute their quota by means of an annual 10 per cent. cut on their salaries while it was being built. Only Mohammedans were permitted to work on the sections within the sacred zones of Medina and Mecca, and Turkish engineers were especially trained by the Germans for this purpose. The pilgrim trains had each a mosque attached, but probably they have all been converted into munition waggons since General Allenby began his advance from Beersheba.

Brightening a Dingy Rug.

After a rug has been well cleaned and aired, if it still remains dull and dingy, go over it with a cloth wrung lightly out of strong vinegar and hot water. A spoonful of ammonia will help the brightening effect.

ONE YEAR'S WAR FACTS

GENERAL SURVEY OF 1917 WAR ACTIVITIES.

Recently Issued by the British War Cabinet Contains These Astonishing Details.

Britain loaned £1,186,000,000 to her allies up to December, 1917, and £175,000,000 to the Dominions.

The manufacture of beer has been reduced from 36,000,000 barrels to 14,000,000 barrels.

It is estimated that the present system of coal distribution will save the equivalent of 700,000,000 tons being carried a mile.

The War Cabinet held 300 meetings in a year.

There are 7,500,000 men in the British Armies.

Only one ship in 200 of convoyed vessels has been lost.

The German submarine has a surface speed up to 18 knots, and a submerged speed of 10 to 11 knots. She carries from 15 to 20 torpedoes; she can travel 100 miles completely submerged; and she can remain under water, sitting on the bottom, up to 48 hours.

The range of a German torpedo is 6 miles, and the speed 40 knots.

Since the beginning of the war the Admiralty believe that between 40 and 50 per cent. of German submarines operating in home waters have been captured, sunk, or otherwise destroyed.

In one month battleship-cruisers and destroyers in home waters steamed more than 1,000,000 miles, while auxiliary patrol services steamed more than 5,000,000 miles.

Great Britain has 7,700 miles of coast to defend.

The Royal Naval Air Service numbers 46,000 men, 176 airships and kite balloons, and well over 2,300 seaplanes and aeroplanes. These figures are constantly increasing.

In one week the aircraft patrol round the British Isles flies 30,000 miles.

Of 13,000,000 men transported overseas, only about 3,500 have been lost.

Up to August 25,000,000 tons of explosives and army supplies and 51,000,000 tons of coal and oil had been shipped overseas.

Over 7,000 men and 30,000 tons of supplies are sent daily to France.

About 567 steamers are continually supplied in carrying troops and army supplies.

There are 420,000 men in the British Navy.

During 1917 we took on all fronts 115,000 prisoners and 781 guns.

Military hospitals in the United Kingdom number 2,000.

More than 17,000 women are employed as military nurses and 28,000 others are employed in various work at military hospitals.

In the brightest moonlight it is almost impossible to see an aeroplane flying at 10,000-15 0 feet.

There are 2,022,000 men and 704,000 women engaged on munitions.

Since the beginning of 1917 the output of high explosives has more than met our own demands, enabled us to build up large stocks, and supply our Allies.

Some 9,000 tractors and tractor-ploughs have been ordered in America.

The number of articles handled each week by the central stores branch of the Ministry of Munitions exceeds 50,000,000.

If we had paid the same price for gun ammunition in 1917 as in 1916, the increase in cost would have been £43,000,000.

Excluding officers, non-commissioned officers, and invalids, there are in this country some 80,000 enemy prisoners, all but 400 of whom are at work.

Only 586,000 tons of paper reached England in 1917, as against 1,708,000 tons in 1914.

Potato Growing Made Easy.

So great was the demand for the recently issued bulletin on Potato Cultivation, written and edited by the Dominion Horticulturist, that a popular edition of 16 pages has been prepared and can be had free by addressing the Publications Branch, Department of Agriculture, Ottawa. As an aid to the potato grower, especially to the less experienced and the beginner, this bulletin, which is numbered 90, should prove invaluable. In plain, terse language practically all that it is necessary to know is told about the preparation of the soil, the subsequent planting and cultivation of the potato, the protection from insect and diseases and the digging and storing. A list is given of the varieties recommended for different districts in every province.

A good windbreak is ornamental, and as it tempers the wind it helps keep the coal in the coal bin and lights the work of the fireman who has the furnace to attend to in severe weather. Country schools and churches should be well protected by trees properly planted to afford shelter in cold weather and shade in hot weather. In planning windbreaks plant on the side toward the prevailing winds, and arrange the trees in groups of mixed species. Have several rows of trees, including evergreens, to shut off the wind as completely as possible.

The Paisley Advocate

PAISLEY, MAY 8th, 1918

Reinforcements Must be Secured

With great deliberation Sir Robt. Borden told about 300 farmers at the House of Commons at Ottawa on Friday that after giving serious consideration to the question of drafting farmers between the ages of twenty and twenty-two for service overseas, the Government had decided that the necessity for reinforcements was more pressing than the need for increased production.

The farmers, who came from all parts of Ontario, were headed by C. J. Thornton, ex-M.P. for Durham, and after an organization meeting, waited upon the Prime Minister, Hon. N. W. Rowell, Major-General Mewburn, Hon. J. A. Crerar and Hon. Hugh Guthrie. Five of their number presented arguments against the conscripting of young farmers, stating that their appeal was prompted in no sense by disloyalty, but rather by a desire to serve the country and the men at the front in what they considered the best way.

The Prime Minister did not mince matters, but told them firmly that reinforcements must be obtained, and that the Government had decided on the only plan possible under the circumstances. He appreciated the difficulties the farmers would be placed in, but called their attention to the fact that the hardships suffered by the people of Canada were not to be compared to those endured by the people in Great Britain and France. Sir Robert appealed to them to reflect on the onerous duties which devolved on the Government, and to facilitate in every way the drafting of the farmers called out under the Order in Council. In concluding his remarks he referred to the registration of man and woman power, stating that industries would be given all possible assistance.

The Minister of Militia stated that in order to solve the problem of seeding he had issued instructions to commanders in the various military districts to grant leave of absence to all farmers consistently following their occupation.

In the course of his address Premier Borden told the farmers that "if we waited for further exemptions, and our men were decimated and destroyed, what kind of answer would it be to say we had increased production?" Also "I want to tell you that if the British line, of which our men form a part, breaks, I don't know where you would get a market for your produce."

—Extra taxation is inevitable to the people of a country involved in this war. Canadians are just about as willing to submit to the extra burden as any other people. We would prefer, however, that our government adopt a method of taxation which will give the least opportunity and excuse for profiteering on the part of those who handle the commodities for which we are to be taxed. There's a good deal to be said in favor of a stamp tax on many things we buy instead of so much per pound, per thousand or per hundred. When the tax is designated in stamps the seller cannot manipulate the price so that a hundred or two extra per cent. profit is made on the sale. It's an easy matter to figure out the addition that should be made to the regular cost when the tax stamp is affixed to the article or parcel. The Toronto Star reasons out the point in regard to the tax on smoking matters, which will apply to many of the more necessary articles for consumption as well. The Star says:

A tax of six dollars a thousand on cigars means a tax of a little less than two-thirds of a cent on one cigar. How much will the price of cigars go up? Will the cigar that formerly sold for ten cents now sell for eleven, or will the price be jumped to fifteen? Another question smokers are asking is this: Why should tobacconists, because of the new tax, hoist the price on stocks on hand to which the new tax does not apply? It seems probable that there will be taken from tobacco users many times as much as will go to the Government in revenue, although the sole object of the tax is to raise more revenue for the national treasury. There is no tax so economical to the country and its people as the direct tax, which goes straight to its object. For instance, if there were a war stamp in the shape of a cigar band to be bought at the cost of a cent with each cigar purchased, there would be in each case a clean and direct transaction, with the public revenue receiving all the extra cost imposed on the consumer, less the cost of printing the war stamps, which would be very small. But when any sort of tax is so imposed that the trade has to pay it, it is usually made the excuse for a raise in prices about ten times as much as the tax actually amounts to.

ELDERSLIE COUNCIL

Gillies Hill, May 6th, 1918

All members were present at meeting on above date.

Oswald—Clement—That Chas Calhoun be appointed weed inspector in place of Jas. Robinson, resigned.—Carried.

Clement—Allen—That orders be issued for the following accounts.—Carried.

Ambrose Zettel, insurance Tp. Hall, $2.24; S K Ewart, services with grader, $13.50; The Municipal World, 7 subscriptions and other supplies, $9.45; Miss A. Brown, grant to Locke-by Patriotic Society, $25; Miss V. Peacock, grant to Williscroft Patriotic Society, $15; Mrs W Palmer, grant to Mt Hope Pat Society, $15; R. P. Collins repairing culvert, lot 2, c. m. S. $1; D McArthur, postage for clerk's office, $3; Harry Wilson, fill on 25 side road between cons 7 and 8, $10.75; W. O. Anderson, building culvert and work, lot 32, con 2, $11.90; Gray & Ewart, wire, etc. $2.87; John Patchell, gravelling lot 32, con 2, $2.50.

Allen—Fraser—That this board do now adjourn to meet again at 2 o'clock p.m. on Wednesday, May 29th, for general business.—Carried.

R C Pearce, Clerk

—Hundreds of farmers in this district are doing their best to help production of grain. Every farmer should do the same.

FRIENDS THOUGHT HE WOULD DIE

"FRUIT-A-TIVES" Conquered Dyspepsia and Restored His Health.

MR. ROBERT NEWTON.

Little Bras d'Or, C. B.

"I was a terrible sufferer from *Dyspepsia and Constipation* for years. I had pain after eating, belching gas, constant headaches, and did not sleep well at night. I lost so much weight—going from 165 pounds to 146 pounds—that I became alarmed and saw several doctors who, however, did me no good. Finally, a friend told me to try '*Fruit-a-tives*'.

In a week, there was improvement. The constipation was corrected; and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

VILLAGE COUNCIL

Council met at 8 p.m., May 2nd. Members all present. Minutes of former meeting read and confirmed.

Communication from the Local Board of Health, stating that the town scavenger was committing a breach of the health act by depositing scavenging matter at the dump, uncovered.

The clerk read draft of agreement for the renting of show ground pasture to F. Purdy for the current year at $20.

Forrester—Logie—That the reeve is hereby authorized to sign and that the corporation seal be attached to the rent agreement of exhibition grounds.—Carried.

Forrester—Pearce—That the clerk be instructed to notify the scavenger to properly cover with earth the contents of closets after removal to the dumping ground.—Carried.

Pearce—Skinner—That the clerk be instructed to advertise for tenders for gravel for streets, sufficient teams to be engaged to keep spreader busy, gravel to pass inspection of supervisor. No tender necessarily accepted. Tenders to be opened 15th May inst. Carried.

Pearce—Skinner—That John Barnfather be appointed, without remuneration, to look after the dumping ground to see that the same is used in conformity with the health and municipal regulations.—Carried.

Forrester—Pearce—That the reeve and Councillors Forrester and Logie be a committee to interview the property owners adjacent to the pumping station re supply of heat by steam.—Carried.

Logie—Skinner—That the clerk be instructed to purchase 25 ft. of hose for street watering.—Carried.

The following payments were authorized: Murdoch Leitch $62.50, Weighmaster $7.85, John H. Maurer $35, Paisley Elect. Light Co. $40, Assessor $61.30, Wm. Sparrow $23, Geo. Heath $9.25, J. Pearce $11.75, Wilson Carr $13.25, Alex Blue $8.50, Wm. Rankin $28, Wm. Pearce $29, Mrs. Dobson $13.50, Dan Sutherland $5.50, David Thompson $6.25, Thos. Sparrow 50c.

Don't Wait and——Wish Work Now and——Have!

When drastic regulations for the rationing of food come into effect (and such an Order in Council may be made very early next Fall) you will wish then, that you had a crop of nice vegetables ready to take off your garden or nearby piece of vacant land that you could have cultivated if you had *really wanted to.*

Well, all we say is—

Don't Wait and—Wish

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.

REV. JOHN MacNEILL TELLS THRILLING STORY OF CANADIANS' HEROISM

Praises Work of Y. M. C. A.

Capt. (Rev.) John MacNeill, D.D., delivered a thrilling sermon on "Work with Canadians Overseas" to a congregation that filled Eaton Memorial Church, Toronto, on Sunday morning.

Taking as his text, "By these things men live," Capt. MacNeill described how life had been opened up in its mighty, naked depth to Canadians at the front. "I think man's immense capacity for pain proves his immortal birthright," said the speaker. "In the time before the war men enjoyed life, but it is doubtful if so many discovered its greatest depths."

These men had found at the front not the romance of war but the very terors of hell and the ever-recurring call that they should go back to the line.

"In war the Y.M.C.A. has not only served the men, but has recovered its own soul," said the speaker emphatically. Recounting an experience in a little village on the other side of Vimy Ridge he said that the Commanding Officer of a McGill Battery had dropped into a Y.M.C.A. dugout and had witnessed his rain-soaked, weary men receiving biscuits, hot drinks and cigarettes free, and then making their way back to the gun pits refreshed and heartened. After observing the work for some time he approached the man in charge and said: "You know, I did not have much use for the Y.M.C.A., but if ever there was a cup of water given in the name of a disciple it has been given to me and my men to-night."

With great enthusiasm Capt. MacNeill described the free concerts and picture shows that the Red Triangle endeavors to provide for each battalion immediately on coming out of the line. The men would enter with tense faces and haunted eyes, but under the influence of the entertainment would gradually relax and soft laughter would eradicate the hard set lines.

Some of the German pill-boxes at Passchendaele had been taken over and converted into canteens and 25 of the forward places were under fire. With Capt. H. Dixon, the speaker was at Lens attending the walking wounded when the Canadians captured Hill 70. The men, he said, absolutely disregarded their own injuries in the hilarious joy at the capture of their objective.

The free service provided in the forward area last year had cost $100,000 in money, but no one would ever be able to estimate its value in morale. Germany was right, the Captain held, when she gambled on the decadence of the British Empire, but even now in these crucial hours as the conflict deepened the great spirit of endurance of the British people could be seen steadily rising. The British line, he felt sure, would not break on account of the ever-rising and indomitable spirit of the men who held it.

KILLED BY FALL FROM WINDMILL

Mr. Samuel H. Lowry, of Port Elgin, was almost instantly killed by falling from a windmill on Saturday morning. Mr. Lowry was an expert in the erection of windmills and installation of barn machinery, and was on the top of a large windmill at the farm of Mr. Alex McGillivray, 12th of Bruce. He was in the act of taking off the head of the mill when the tail swung around, striking him on the side of the head, knocking him from the platform of the mill to the ground sixty feet below. Death was almost instantaneous.

Help was quickly at hand and physicians summoned, but Mr. Lowry was beyond human aid. He was a man of powerful physique, and was 62 years of age. He was in the best of health, and his taking off so suddenly is a severe shock, not only to his grief-stricken widow and daughter, but to the whole community.

The late Mr. Lowry had lived in Port Elgin for about 15 years, coming here from Holland township, Grey county, where he farmed successfully. After his removal here he represented a large firm in barn machinery, and was very successful in business.—Times.

May 14th—"The Finger of Scorn," Town Hall, Paisley. For Red Cross. Finger of Scorn." For Red Cross.

—Bruce County offered $65,000 of debentures for sale about two weeks ago. The whole issue was disposed of in the county in less than ten days, Carrick taking one-third of the whole amount.

AUTOCRACY vs. DEMOCRACY

Mr. Samuel Gompers, president of the American Federation of Labor, addressed the two chambers of Parliament at Ottawa on April 26th.

He declared that this was a war between autocracy and democracy, and that the world could no longer remain half democratic and half autocratic; the Allies and the United States must see the struggle through. There had been large sacrifices, more may be necessary, but though they may be large and exacting, they must be made that liberty, opportunity, justice and democracy may survive for humanity.

We must dismiss from our minds the thought that after the war is over we shall return to pre-war conditions and jog along somehow. Through this war there are going to be new concepts of duty, responsibility and service. With the sacrifices that our men are making, with the new ideas and ideals that are quickening in our minds, with the faster pulsations of our hearts and our beings, there is coming a new, a better and a nobler time. We are waiting for that time and for those ideals that human brotherhood, that higher conception of duty devolving upon us to all and from all the world over.

Sacrifices count as nothing as against all that is at stake as the outcome of all this unusual conflagration. There can be but one ending to it all. Right, justice, consideration, opportunity for development and for the attainment of the highest of which the human mind can conceive, will prevail and bring peace and contentment to the whole human race. We are fighting and sacrificing that peace may come to the world. God grant the day is near at hand when the forces not only at arms, but the forces of the spirit dominating the mind of the peoples of all democratic countries shall prevail, and our boys come to us with the triumph of glory.

NEW MILITARY ORDERS EXPLAINED

Mr. C. J. Mickle, of Chesley, gives out the following through the last week's Enterprise:

I have received a number of enquiries by telephone as to the Orders in Council respecting cancellation of exemptions and the calling out of Classes 1 and 2 for military service, and as the newspaper reports were not clear, I have obtained from the Solicitor-General at Ottawa, copies of the Canada Gazette containing the Orders in Council passed on the 20th day of April.

For the information of those who wish to know I beg to submit the following short synopsis:

1. Order in Council No. 919 recites that there is immediate and urgent need for reinforcements admitting of no delay, that it is necessary notwithstanding exemptions already granted to withdraw men from civil life for military service.

2. Class 1 is made to include men who have attained the age of 19 years, but were born on or since the 13th of October, 1897, and are unmarried or widowers without children.

3. Class 2 includes men who have attained the age of 19 years, but were born on or since the 13th of October, 1897, but are married or widowers with children.

4. Authority is given to the Governor-in-Council to order to report for duty men in any class under the Military Service Act of any named age who were born in named years and any exemption previously granted is cancelled from the date of the order.

5. From the above it is clear that all men who were 19 years of age on or since the 13th of October, 1916, are placed in Classes 1 and 2, and are liable for military service and must report when ordered to do so.

6. It is also clear from the above that on the day on which a man is ordered to report, all exemptions heretofore granted cease; the only concession is that the Minister of Militia may grant leave of absence without pay to any man in whose family some other man has been killed or disabled in action or is in service at the front. The fact that some member of the family is in service either in Canada or on the high seas or in England does not count. He must be actually at the front.

7. The Minister has power to take into consideration the result of medical examinations and to direct that no orders be issued to those who have been placed in certain categories by medical examiners.

8. Any man who at any time hereafter attains the age of 19 years shall, if the class within which he falls has been called on active service, forthwith become subject to military law, and shall **within ten days thereafter** report to the Registrar of his Province.

9. Order in Council No. 962 calls out and orders to report for duty, irrespective of any exemption granted or any claim for exemption, every man in Class 1 under the Military Service Act, who at the date of the application for exemption heretofore made by him, or on his behalf, had attained the age of 20 years and had not attained the age of 23 years.

10. From the foregoing provisions it is clear that those who are bound to report for military service are men who on the date on which they applied for exemption were of the ages of 20-21-22. So far no others have been called out but are liable to be called upon the issue of any further proclamation.

11. From the newspaper reports it appears that these regulations may be modified in the case of a widow whose only son is engaged in farming and perhaps in another special class of cases where military service would seriously affect the production of food.

Eugenia Has Big Surplus

According to the annual report for 1917 of the Provincial Hydro-Electric Commission, just lately issued, Ontario has returned a very substantial surplus for the year's operations. Owen Sound is more directly interested in the report of the operations at Eugenia Falls, where there is an investment of $1,271,736. The year's operation of this plant showed a surplus of $50,469 which it is hoped will result in a substantial lowering of rates. A total surplus applicable to sinking fund and depreciation amount to $18,582, after wiping out a deficit in the sinking fund account of 1916.—Owen Sound Sun.

—The government inspector says there is going to be a bumper crop of peaches and a good crop of plums in the Niagara fruit district this year.

A PRIEST'S OPINION

Grievances of the most grievous kind the Irish people have had. Grievances we have here in Canada. I know no country where governments are ideal. But this I know, that I was in quite a few countries some years ago, during a European trip, and I found more civil and religious liberty, less vexatious interferences under the British flag in Ireland and England than anywhere else. There was more babble about liberty elsewhere, but there was more of the real thing where John Bull with all his faults held away than in any other land I visited.

The British democracy has only just come to its own. The British democracy is, I am convinced, anxious to wipe out that sad and shameful record of Irish misgovernment for which the ascendancy faction, and not the British people as a whole, is responsible. If Ireland will only rise to the occasion, see the significance of this tremendous struggle against ascendancy embodied in its most brutal and domineering form in Junkerism, grasp the grand opportunities of self-development awaiting her as a free constituent of the mighty British federation of self-governing states, the poet's dream of an Ireland "great, glorious and free," shall be ere long realized.

Her supreme danger is her extremists—the Anglo-phobes and the Rome-ophobes. Both have become obsessed with hatred, religious or political, to such an extent that an appeal to reason causes them to foam at the mouth. Exorcism, not reason, is needed in their case. They deserve more pity and sympathy than contempt.—L. Minnehan.

The Censorship

Under the recent Order in Council the press is among other things forbidden to publish any statement, report or opinion which may tend to weaken or in any way detract from the united effort of the people of Canada in the prosecution of the war. Offences are punishable by a fine not exceeding $5,000 or by imprisonment or both, and in addition printed matter may be destroyed and printing offices closed.

—A man that's clean inside and outside; who neither looks up to the rich nor down on the poor; who can lose without squealing, and who can win without bragging; considerate to women, children and old people; who is too brave to lie, too generous to cheat and too sensible to loaf, and who takes his share of the world's goods and lets other people have theirs, comes very near being a true gentleman.

—Wingham Advance: While there has been a reduction of thirty cents a ton on coal in the United States, the summer price of stove, egg and nut coal in Wingham will remain the same as in the winter, $9.75 and $10 per ton. Wingham is favored in having excellent men in the coal business. While other towns nearby are paying $11 for a cheap coal, we are getting all coal the same as Toronto dealers are selling.

—The principal of a high school in Massechusetts has sent word to the parents of pupils who are irregular in attendance that every day in the high school is worth $25 to a pupil. He bases the assertion on statistics that show that high school graduates earn during their lives an average of $18,000 more than grammar school graduates earn. That is, each of the 720 days that the pupil spends in the high school is worth $25 to him.

Court Saugeen, C.O.F No. 88

MEETS in Putnam's Hall on the third Monday evening of each month, at 8 o'clock. Sojourning brethern are welcome.

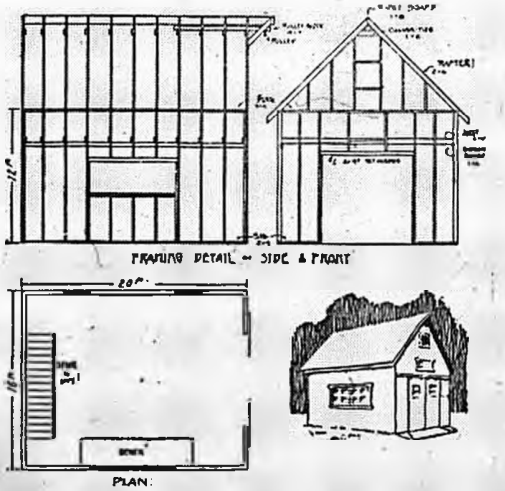
WHY DOES NOT GOD INTERVENE?

Undoubtedly men of keen minds and sincere and sympathetic hearts have seriously asked themselves the question. Why does not God intervene in this war? It has been difficult for some to harmonize all this fiendish cruelty of the past four years with the love of God. The hard facts of the world as seen on the surface seem so different to all they have held dear in their Christian beliefs. With saddened perplexity they ask why did not God intervene on the side of Earl Grey as he endeavored to preserve the peace of Europe and prevent earth's fairest fields from being turned into a human slaughter house? If a merciful God, why does He not rise in His power to prevent further bloodshed and loss of life? The failure to find a suitable answer to these questions has driven some from the belief in a personal God, omnipotent and all-loving. Their faith has become shipwrecked in the blinding storm of staggering events.

Any attempt to answer these questions must drive us back to the creation of man. The human spirit possesses a moral will of its own. We are living in a world in which God has entrusted man with marvellous power, the power of free will. Man is a rational, self-determining being, responsible for his choices and actions. God does not demand right by compulsion. He does not override by paralyzing free will, nor intervene by destroying moral manhood. The will and conscience of men are never forced or compelled to choose right. Moral sensations and motives are used to influence and guide man in his choice, but to man is given the liberty and responsibility of choosing.

It might be asked that if moral perverts set on drenching Europe with blood through lust for power cannot be stopped by intervention, cannot the terrible consequences be lessened or defeated? Could not God intervene to save our armies? Could not the torpedoes of the submarine butchers be diverted from their courses and our brave sailors and innocent citizens be spared? We are compelled to recognize we are living under the regime of law and these laws are working for the ultimate good of man, and it is not the purpose of Providence to perpetually intervene to change the workings of laws or prevent the results of law would not do in a moral government. It would change things from law and order to chaos and caprice. Through the very laws of God He makes evil to work itself out in bitter fruits and consequences upon the heads of the offenders. The mills of an all-wise Providence grind slowly, but they grind exceedingly sure. Sin and barbarism cannot go unpunished. Masks of self-righteousness must be torn off and the spirit of militarism of Germany must be exposed. The whole civilized democratic world has brought her to judgment. She stands to-day a sad spectacle, condemned before practically the whole civilized world. The righteous judgment of God is being revealed in making her an outlaw from the society of right thinking nations.

We are forced to recognize that in bringing this to pass one nation is called upon to suffer for the sins of another. The solidarity of the race makes it inevitable. Vicarious suffering and sacrifice is the price of all progress. If we are to lift nations out of wrong ideals upon which their hearts are set and which they are determined to fight to defend, we must pay the price. To blaze the path of truth and liberty for a people must mean suffering and loss of life. Christ suffered for a sinful world. God did not interfere. Had He done so, who can tell what the history of mankind would have been to-day? Nonintervention proved the world's greatest blessing. The cross is still the mightiest magnet in the universe, and its suffering has been for our everlasting good.



If the allies are to be instruments in God's hands to vindicate the right; if they are to lead the world into liberty, national righteousness and truth, then we might well stop to think whether there are not many things in our social, political and moral life that the nation and the empire need to be purged of. It is not necessary to speak of private and public evils that have become rooted in the life of both individual and nation. We know that evils have existed and still exist of which we have need to be ashamed and until expunged from our land we must continue to suffer severe consequences.

There is still with us the popular notion that the absence of pain and suffering is the zenith of happiness and progress. It is a mistaken notion. One day of moral conquest is worth more than a century of superficial painless pleasure.

Perhaps never in the history of mankind has human life gone through such fiery trials as during the past four years. Luxury, comforts, self-indulgence and selfishness have been burned out of the souls of most of our soldiers and the true gold of character has been revealed. Their sufferings have led them out into a new life, given them new ideals, new hopes and nobler characters, and many have lived to value their periods of suffering as the most priceless part of their whole existence. The same has been true of the allied nations. Bleeding Belgium has found her soul in this struggle. France has been transformed into a new France, the admiration of the world. Britain, Canada and America are feeling the throbs of a new era, and are approaching the realization of new ideals. We need not lose faith. Right must prevail. We are passing through tragedy to triumph.—London Free Press.

STEELE'S For Horse Collars and Sweat Pads, Rubber Lap Rugs, Whips, Auto Plush Rugs, Bickmore's Gall Cure, Star Harness Soap, &c
Our Harness includes quality, durability, appearance and high class workmanship found in no other makes of Harness.
Baggage Trunks, Suit Cases, Club Bags, Grips, Good assortment and close prices.
Harness parts and Repairing our Specialty

Dutch Sett and Potato Onions

Eggs and Butter for Cash or Trade

F. CARTER & SON

Glasses for Near By And Glasses for Distance.

Some find glasses perfect for reading but useless for distance.
We supply double vision glasses.
When looking out,
you see through the upper section,
which is just right for distance,
and when looking down,
you see through the lower,
which is suitable for near work.
Satisfaction guaranteed.

BEAUTIFUL JEWELERY

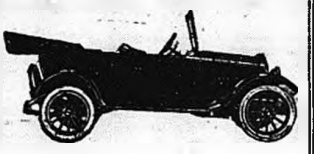
in great variety of novel patterns and artisticdesigns, rings, chains, necklaces, bracelets, everything in the jewelry line, may be found at our store. We give you a cordial invitation to come in and see what we have to offer, for we feel sure there will be something that will just suit you.

I. SHOEMAKER

Jeweler and Optician

Red-blooded men of courage are on the firing line—and there are many anemic, weak, discouraged men and women left at home.

At this time of the year most people suffer from a condition often called Spring Fever. They feel tired, worn out, before the day is half thru. They may have frequent headaches and sometimes "pimply" or pale skin.



Bloodless people, thin, anemic people, those with pale cheeks and lips, who have a poor appetite and feel that tired, worn or feverish condition in the springtime of the year, should try the refreshing tonic powers of a good alterative and blood purifier. Such a one is extracted from Blood root, Golden Seal and Stone root, Queen's root and Oregon Grape root, made up with chemically pure glycerine and without the use of alcohol. This can be obtained in ready-to-use tablet form in fifty-cent vials, as druggists have sold it for fifty years as Doctor Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form.

Wynnson, Ont.—"Dr. Pierce's Golden Medical Discovery and his 'Pleasant Pellets' are wonderful medicines for home use. I used to suffer with weak lungs, smothering spells and sick headaches, but since I have taken the above mentioned medicines these conditions have left me. Such medicines as Dr. Pierce's are worthy of praise and I am very glad to add my testimonial to the thousands of others."—Mrs. ELLEN HARDING, 11 Erie Street, West.

Good Village Property for Sale

18 ACRES of good garden land on which are two dwellings, one good stable on brick foundation and cement floor is. Known as the McNally property. Apply to T. H. OSTRIDGE, Bailey, or MRS. DAVID PAHLMENT, Uxbridge, Ont.

Any maker may claim for his product all the qualities there are. That is his privilege. He may even think his claims are justified.

You read the advertisements, so you know that makers, as a rule, are not over modest in that regard.

If you believe them all, they all make super-cars.

In your experience, that theory doesn't hold.

Maxwell is different.

We never claim anything we cannot prove.

As a matter of fact we never have claimed anything for this Maxwell that has not already been proved in public test and under official observation.

Maxwell claims are not therefore claims in the ordinary sense—they are statements of fact—proven facts.

They are, in every case, matters of official record attested under oath.

For example: The famous 22,000-mile Non-Stop run was made with the Maxwell every minute under observation of the A. A. A. officials.

That still remains a world's record—the world's record of reliability.

That particular test proved about all that anyone could ask or desire of a motor car.

Among other things it still stands the world's long distance speed record.

Just consider—44 days and nights without a stop, at an average speed of 25 miles per hour!

And that, not by a $3,000 car, but by a stock model Maxwell listing at $1045.

You will recall perhaps that a famous high powered, high priced six in a trans-continental trip made 28 miles average over a period of five days and eleven hours.

Now compare those two feats—one of less than six days, the other of 44 days. You know automobiles—which was the greater test?

Is there any comparison on grounds either of speed or endurance?

Proves you don't need to pay more than $1045 to obtain all the qualities you can desire in a motor car—if you select a Maxwell.

For that Maxwell Non-Stop run was made, not on a track but over rough country roads and through city traffic—average of all kinds of going.

And—listen to this.

So certain were we of the condition of the Maxwell at the end of that great feat, we announced that at the stroke of eleven on a certain morning, the car would stop in front of the City Hall, for the Mayor to break the seal.

Five seconds after he had pulled the switch plug and stopped the motor after the 44 days and nights continuous running, she was started again and off on a thousand mile jaunt to visit various Maxwell dealers.

How is that for precision—certainty of action? That incident brought a storm of applause from the assembled thousands.

Hill climbing?—this Maxwell holds practically every record worth mentioning—especially in the West where the real hills are.

The Mount Wilson record—nine and one-half miles, 6,000 feet elevation!—was taken by a stock Maxwell.

Two months ago a 12-cylinder car beat that record by two minutes.

Then—three days later—a stock Maxwell went out and beat that 12-cylinder record by thirty seconds! Pretty close going for such a distance and such a climb—wasn't it?

So Maxwell still holds the Mount Wilson honors.

Ready to defend it against all comers too, at any time—a stock Maxwell against any stock or special chassis.

Economy—also a matter of official record.

Others may claim—Maxwell proves.

Thousands of Maxwell owners throughout the country on the same day averaged 35.2 miles per gallon of gasoline.

Not dealers or factory experts, mind you, but owners—thousands of them—driving their own Maxwells.

Nor were they new Maxwells—the contest was made by 1915, 16, and 17 models, many of which had seen tens of thousands miles of service—three years' use.

Nor could they choose their own road or weather conditions—all kinds were encountered in the various sections of the country.

Good roads and bad—level country and mountainous regions—heat and cold—sunshine and rain—asphalt and mud.

And the average was 35.2 miles per gallon!

There's economy for you. And under actual average driving conditions—not laboratory test.

But that isn't all.

The greatest achievement of this Maxwell was in its showing of speed and reliability and economy all in the same run.

In that 44 days-and-nights Non-Stop run, though no thought was given to either speed or economy, it still remains a fact of official record that the Maxwell averaged 26.4 miles per gallon and 25 miles per hour.

Now you know that speed costs—and that economy tests are usually made at slow-speed—closed-throttle, thin-mixture conditions.

You know too that you can obtain economy of fuel by building and adjusting for that one condition.

Speed you can get by building for speed. Any engineer can do that.

But to obtain that combination of speed and economy with the wonderful reliability shown in that 44-days Non-Stop run—**that car must be a Maxwell.**

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Cultural Methods for Eastern Canada.

Soil management or cultivation in its several phases is a very important factor in crop production. On the Central Experimental Farm, Ottawa, and several of the branch Experimental Stations in eastern Canada, methods have been investigated for several years. The results obtained have warranted the following recommendations being made as applicable to average conditions on eastern Canada farms.

Cultural Operations and Implements.—Ploughing is the basic cultural operation. It is therefore important and should be performed with care and judgment. No definite rule can be laid down as to the best method of ploughing. A safe rule, however, is to plough only when the soil is in shape, not too wet especially if of a heavy clay nature. Plough deep ly in autumn, as deep as the surface productive soil will allow turning an up-standing furrow. Plough shallow in spring, turning a low-lying or flat furrow. Plough well, turn all the land and finish with straight even furrows and lands. Let the ploughing be a credit to the farmer, a reflection of his character, a standard for other operations and an incentive to less thorough, though willing workers to do better.

Harrowing.—Of the several implements on the market for performing this work the disc harrow is the most suitable for preparing soil for seed after it has been ploughed. Thorough cultivation at this time is indispensable and the disc harrow should be used until the surface of the seed-bed is smooth and friable and the soil immediately below is firm and solid.

The drag or spike-tooth harrow, too, may be employed advantageously in seed-bed preparation especially following the disc or roller to restore a mulch or blanket of soil to check evaporation of moisture. It is also a useful implement in the corn field a few days after sowing corn and after the corn is up to stimulate a rise in temperature in the soil, to destroy small weeds and encourage germination of weed seeds and to restore the essential mulch.

Seeding.—This operation is now done by means of seed drills. Several types are on the market but the single disc drill is probably most popular.

Rolling.—The roller is too frequently used to put a finishing touch to the field after seeding. It may be so used to advantage on light soils but even then should be followed by the drag harrow to break the smooth surface. The chief use of the roller, however, should be to firm and crumble the soil before seeding. It should not be used on very damp soil, especially clay; let the surface dry first then use the roller to break the crust.

Where implements are to be purchased it should be borne in mind that larger implements requiring from three to six horses handled by one teamster provide a means of solving to some extent the present manual labor problem. Besides, the work done in this way is accomplished economically and thus tends to keep down the cost of production of crops.

Ploughing may be speeded up by using two-furrow ploughs. Double disc harrows make a thorough seed-bed in the least time. The horse disc seed drill is efficient. More sections added to the drag harrow reduce the time required for this work.

Hogs

Barley As Hog Feed.

Barley will supply grain for hogs sooner than any other crop. A large number of farmers have been asking about this crop because of the scarcity of mature corn for feeding hogs this spring and summer, and because commercial hog feeds are so costly.

Barley is about equal to corn, pound for pound for feeding hogs. But while corn does not need to be ground for pigs, barley should. The grains are too small and hard to be masticated and digested readily when whole. While the pigs may not like the barley very well at first, they will soon become accustomed to it. But they will do better if ground barley is mixed half and half with middlings or some other palatable hog feed. Gains are more rapid, too, when some high protein feed like tankage is fed along with the barley and other feeds.

Spray The Orchard.

When the leaves begin to grow the canker-worms may commence to move up on the trunks of fruit and other trees. Bands of tar, tanglefoot, or printer's ink, if put on the tree trunks in time, will catch many of the pests. The best sticky substance to use is tree tanglefoot, as it will stay sticky longer than the other substances. These sticky mixtures may be applied to the bark of the tree, but they may disfigure the trees for several years. It may be necessary to renew the bands from time to time with the sticky material, especially if the tangle foot becomes hardy or stiff or covered over with the bodies of dead moths. The use of bands is especially recommended on very large rough-barked elm or hackberry trees that it would be difficult and expensive to spray. Maples and oaks are not so badly attacked by the pest. The apple, elm, and plum are the favorite food plants of the canker or measuring-worms. When the injury from these insects is severe, the trees may appear during May or June as if a fire had swept over them. They may be entirely stripped of their leaves by the worms. For small shade and fruit trees any of the arsenical sprays will kill the canker-worms easily if applied about the time the leaves begin to appear. The regular summer sprays applied in the apple orchard for the control of the codling-moth and curculio will also kill the canker-worms. The first summer spray in the apple orchard should be applied just before the blooms, and the second spray should be made immediately after the blooms fall. These two sprays should control the measuring-worms very effectively.

FLINT CORN FOR GRAIN

Flint corn, as a grain crop in eastern Canada, has not received the attention that it merits. At the present crisis of food supply it is the crop that can be increased without disturbing the system of rotation or cutting down the acreage of any other cereal. We do not increase production if we cut down the acreage of one kind of grain to grow another. By growing flint corn we can increase the total output of cereals without alteration or detriment to our system of farming.

Utilization

Its value lies in its feeding adaptability.

As meal in a fattening ration it is without an equal, for cattle, hogs or poultry.

In the unground or cracked state it is valuable in a ration for laying hens.

On the cob if used judiciously it can be profitably given to working horses.

The immature and small ears can be fed without waste in the autumn to fattening hogs.

It can be "hogged" down in the field with profit. An acre or two of corn will fatten the hogs on an average farm. This method can be adopted with profit by the Ontario farmer in these days of labor scarcity.

The dry stalks make excellent roughage for dry cows or young cattle.

Last, but not least, corn can become in Canada an important factor in the human diet. Many bushels of wheat could be released for shipment if we would use the various appetizing foods into which corn meal can be converted.

Range of Profitable Production

The crop should only be grown where it will mature in an average season. Using the proper variety, corn can be grown in practically all the older parts of Ontario, the Eastern Townships and many counties north of the St. Lawrence in Quebec, also many districts in the Maritime Provinces. The District Representatives of Ontario, with the exception of those in the northerly counties, state that maturity is not the factor that prohibits the growing of corn, the Secretary of Agriculture for Quebec making a similar report for that province.

Varieties

Quebec Yellow No. 28 is the variety that will succeed best over the greater part of the area indicated. It is a short stalked variety giving a high yield of grain, and maturing in the average season on well drained soils in a hundred and fifteen days. Where the season is sufficiently long, Longfellow and Salzer's North Dakota will give an equally large yield of grain with a larger tonnage of stalks. These varieties should be grown principally in southern Ontario although they mature perfectly in certain portions of Eastern Ontario and Quebec. Earlier varieties than Quebec Yellow No. 28 do not return a commensurate yield for labor expended.

Labor

The work involved in growing corn for grain is but little greater than that of growing for silage, husking is the additional item but this task can be done at the most convenient time in the autumn and made an evening of neighborhood festivity.

Who Should Grow It

The dairymen who disposes of his milk to the local creamery is the man who can most profitably grow and use grain corn. If he is using silage, at the present price of shelled corn he can afford to decrease his acreage of silo corn in order that he may grow flint for grinding.

The farmer who wishes to increase the output of grain yet does not wish to break his system of rotation. By growing flint corn he is producing grain from his hoed crop.

The man who is without a silo, and wishes to increase his hoed crop. He can grow corn for grain purposes with profit likewise improving the tilth and cleanliness of his fields.

Seed

Owing to the disastrous failure of the seed corn crop in the United States and Canada, seed is extremely scarce. Each farmer should consult with his county representative as to a possible source of supply.

Wherever flint corn has been grown there can generally be found a few men who have developed early productive strains out of old varieties. Not having made a practice of disposing of it for seed, these men are occasionally a valuable source of local supply too often overlooked.

Conclusion

Any person who is desirous of growing this crop and failing to obtain seed this season should plan to secure it early in the autumn for another year. As long as the price of corn, mills feeds and live stock remain as they now are, corn for grain will be one of the most profitable crops that can be grown on a farm. Any farmer so situated that he can mature flint corn will find it profitable to plant a few acres even though he has to cut down correspondingly his acreage of silo corn.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Hypnotics.

A hypnotic is a drug which is given to produce sleep; it may do other things, too; but if it causes sleep it is a hypnotic.

Some hypnotics will produce sleep and will also produce bad and undesirable effects, like depressant action of the heart.

Such drugs are dangerous, and particularly so when taken by the advice of a well-meaning, but misadvised friend.

It is always best to have the advice of an intelligent physician before experimenting with such dangerous tools.

Even physicians are not infallible in such matters and have been known to overlook heart weakness or heart injury or underestimate its importance in their desire to relieve one who is in need of sleep.

Want of sleep, or insomnia, is a terrible affliction. What would one not give for sleep when suffering pain, hour after hour? When one is sleeping, physical pain does not exist, for there must be consciousness in order to appreciate pain.

Sleep is more refreshing than food; you can live without food a long time, many days, but not without sleep.

The discovery of hypnotics was a blessed thing for those who suffer, and the new ones are, in many respects, at least, better than the old ones.

By the new ones, I mean those which modern chemistry, by analysis and synthesis, has given us in great numbers, sometimes embarrassingly so, and which also are greatly abused.

Among the old hypnotics are alcohol, opium, Indian hemp, hyoscyamus, henbane and hops.

The soothing effect of a hop pillow or a hop poultice, used to be known (in the country, at any rate), as a first class remedy, but we seldom hear of it, or use it, now.

Drowsiness from the free use of lettuce is familiar, and the quieting effect of hyoscyamus, or henbane, was once highly esteemed.

After the exciting effort of alcohol passes off, it causes deep sleep, as every drunkard knows, until the organs have become so saturated with it that sleep may be replaced by delirium tremens.

Opium was formerly used by many physicians, not only to induce quiet and freedom from pain, but sleep as well; now it's comparatively little given for that purpose. I am happy to say.

The most important of the new hypnotics are the bromides, paraldehyde, chloral, the coal-tar derivatives, and the synthetic preparations. The bromides are often very efficient as hypnotics, and as little harmful as any powerful drugs I know of.

Paraldehyde is a relatively safe hypnotic and I have often wondered why it was not more generally used.

Chloral is one of the best hypnotics we have, but very dangerous, must be taken in larger and larger doses, and sometimes forms a habit which ends fatally.

The coal tar derivatives and the synthetic preparations, many of them, at least, are of German origin and are now tremendously expensive and hard to get.

I am very glad they are not available, for we were being swamped with them, they were producing very bad habits, and I earnestly hope that for all future time the Germans will be compelled to be the exclusive users of their own medicines.

QUESTIONS AND ANSWERS

M. E.—1. Is whooping-cough contagious? 2. Can it occur more than once in the same person? 3. Can it be caught by simply going where there is a person who has it? 4. Is there a cure for it, or must it run its course?

Answer—1. Yes. It is extremely contagious. 2. It is possible, though not a common occurrance. 3. Yes. 4. There are sedative drugs which may be taken to alleviate the cough. I know of nothing which will stop the disease after it has once started. The best plan is careful attention to hygiene and diet.

Poultry

A hoary-headed poultry theory is that thunder spoils the hatchability of eggs. We got this idea from old-timers as soon as we commenced keeping chickens, but our own experience proves that it is largely a superstitious myth. We have had many hatches that could not have been better, in spite of violent electrical disturbance of the elements.

Quite often severe thunderstorms have come up at the time supposed to be most dangerous to the success of the hatch—just a few days before the eggs were due to start pipping—yet the number of chicks that came out of the shells appeared quite normal, and the chicks were strong and healthy.

We have also had good hatches in spite of blasting or other such shocks, except when the vibrations were so near or severe that they leveled buildings or broke window lights. Even then we have found that the embryo chicks are not always killed, or even harmed.

While we take no stock in the thunder theory any more, yet we try to avoid all sudden jars or shocks direct to the egg, as well as rough handling in shipment. The success of hatches is almost always in direct proportion to the care given the eggs when the fertility is strong.

Tin Can Swells Income.

"Farming in a rut," says my neighbor, who was in a rut and now rejoices in being out of it, "is getting so firmly settled in a treadmill routine of growing certain crops as to make it seem well-nigh impossible to attempt growing other crops known to give better profits."

A leaf from his personal experience in breaking away from the old-time grain-hay farming system I believe will inspire some others to do likewise to their profit and satisfaction. Here is his story:

"The establishing of several vegetable and fruit canning factories in my own and adjoining communities furnished the stimulus needed to help me out of my own rut. Now, in place of confining my efforts to two or three staple crops which formerly produced only a meager living, I grow limited areas of several canning crops in a more intensive way, and have averaged a nice addition to the income from the staple farm crops which I still produce.

"The plan followed in growing the canning crops is to contract with the manager of the canning factory to grow a definite acreage of some of the staple canning crops, such as peas, beans, tomatoes, sweet corn, and small fruit. By planning for such of the canning crops as will best work in with a decreased number of standard farm crops, more intensify my efforts and in some seasons double my farm receipts over my old style of farming.

"For example, strawberries, beans, and corn grown for the cannery may best combine with my regular farm crops; and asparagus, cane fruits, and tomatoes may break better in regard to cultural and harvesting requirements for my neighbor. But many of us are finding that we did not make the fullest and best use of a considerable part of our time until we began to plan and systematize our work, as was necessary to do when we took on the growing of several canning crops under contract.

"I feel sure that there are many general farmers who will read this who might with advantage contract to grow a few acres of some of the canning crops I have mentioned by joining with several neighbors to deliver co-operatively their produce to the factory, even if some distance away, with a motor truck. Such a plan of delivery our neighborhood has found to be a great economizer of time, and enables the growers of the canning crop to realize several hundred, or even a thousand, dollars more from a small area of land that will not be missed for the regular farming operations. Moreover, the building up of a great canning industry in this country is one of the important ways of bringing the Kaiser to his knees—by making sure of a great reserve food supply in addition to the regular harvested products."—W.G.

Message to Farmers.

Hon. T. A. Crerar, Minister of Agriculture, has sent out the following message to Canadian farmers, asking them in order to avert a famine to plant every possible acre in wheat: "Let me again draw the attention of the farmers of Canada to the great need there is of planting every acre of land in wheat that seems favorable to growing it. The news that comes daily of that awful, grim struggle now being fought in France and Flanders brings home to us clearly and unmistakably this fact—that, after almost four years' war, human liberty is still in the balance. The call for men is urgent, and they must, to the full limit of our power, be sent. Their places at home must be taken by those who remain. Despite the difficulties, we must produce more food than we have ever done before. Set apart all your land fit for growing crops and plant as much wheat as you can. Plan to bring as much new land on your farm under cultivation as possible, and thus increase your acreage for next year. It will be needed then just as much as now."

Storm clouds move at the rate of 56 miles an hour.

Artificial Fertilizer

Would have abundant crops reward thy toil,
And fill thy barns, O tiller of the soil?
Then ever keep in mind this maxim true,
Feed well the land and 'twill in turn feed you."

Artificial fertilizers do not supply the soil with humus, which can be added by turning under vegetable and animal matter. Artificial, or commercial fertilizers, as they are usually called, owing to their soluble character have a very much quicker effect than animal matter and can be applied just at the time and in about the quantities needed, reducing waste to a minimum. Commercial fertilizers are now sold under a guaranteed analysis, so the gardener may know exactly what amounts to apply.

The principal elements are nitrogen, phosphates and potash. Nitrogen produces luxuriant foliage and is particularly valuable for lettuce, cabbage and other leaf crops. Phosphates cause earlier production of flowers and fruit and are of special value for peas, beans, corn, etc. Potash increases the substance and improves the quality of the fruits, tubers and roots and is especially valuable in the production of potatoes.

Nitrate of soda, sulphate of ammonia, kainit, superphosphate and basic slag are the fertilizers in common use.

Nitrate of soda is used to promote growth and its action is almost immediate and it should be applied while the plants are in growth. The best time to apply it is during rainy weather and it may be used at the rate of a pound a square rod when the plants are growing well, and a second application may be given a month later. Applied in liquid form, use half an ounce to a gallon of water.

Nitrate of soda should not be used on tomatoes and similar plants, as it will cause the plants to make foliage at the expense of the fruit.

Sulphate of ammonia, like nitrate of soda, is a nitrogenous manure. Both are of a caustic nature and will burn if they come in contact with the plants. Sulphate of ammonia is less soluble than nitrate of soda, and therefore slower in its action, but produces the same results and retains its action longer. It may be applied early in the spring and during the early stages of growth. Three-quarters of a pound per square rod is a liberal dressing. Do not use on such crops as beans, peas and corn. Sulphate of ammonia should not be mixed with basic slag, as the lime in the slag causes waste of the nitrogen.

Basic slag is good for peas, beans and root crops. It works slower than either nitrate of soda or sulphate of ammonia, but becomes rapidly available in land well supplied with humus and moisture. Use five to eight pounds per square rod before planting, by dusting on the surface and raking over lightly.

Superphosphate is good as an alternative fertilizer with basic slag or kainit. It is valuable, on potatoes or tomatoes at the rate of one to three ounces per square yard, hoed into the soil when the crops are well started.

Potash is so scarce that it can only be had through ashes derived from burning green wood of trees and shrubs, tree prunings, etc.

Potash is required for potatoes and other root crops and fruit. In ashes the percentage of potash varies greatly, but six ounces to the square yard will make a fair application. Sulphate of potash, when it can be had, is applied at the rate of one ounce a square yard.

A Money-Making Aid.

My business leads me to visit farms of every kind and character, and I often wonder why so many farms lack a well-appointed workship.

I will describe one where I recently found a market gardener and his son by the way, father and son are partners and all their stationery shows that they are doing a partnership business, although the son is only seventeen) busily making every rainy day count every whit as much as the fair days.

This workshop in question is divided into two rooms—one for carpentry, iron work, and general repairing; the other for painting. In addition to saving from $100 to $300 in repairing and painting each year, they make various crates, hampers, and boxes in which to market fruit and truck, also egg crates, bee-hives, brooder coops, and various other farm supplies. These supplies are tastefully painted, and I can easily believe, as they contend, that their attractive marketing contained have many times the cost of the shop equipment in the better prices received for produce shipped to Toronto and other markets.

The shop was purposely made large and high enough so that wagons, motor truck, and farm machinery can be driven in and through both rooms of the shop for repairs and painting, and also movable poultry and hog houses can be built and painted under cover.

Indifference.

He is so small, he does not know
The summer sun, the winter's snow;
The spring that ebbs and comes again:
All this is far beyond his ken.
A little world he feels and sees:
His mother's arms, his mother's kisses;
He hides his face against her breast,
And does not care to learn the rest.

Cover the horses with cloths or old blankets, when spraying. Put vaseline or lard on face, neck and hands, or wear gloves.

HUNTING THE HUN IN THE CLOUDS

"THE GREATEST GAME THERE IS," SAYS AVIATOR.

An "Ace" of the French Flying Corps Tells of Thrilling Experiences On Western Front.

"Flying is the greatest game there is. I think the 'thrillingest' afternoon I ever had was on the western front one time when Major William Thaw and I were having a little Boche hunt. It was the trip when Thaw was wounded and with a smashed arm managed to guide his machine to safety," says Bert Hall, a Kentucky boy in the French Flying Corps.

"We had quite a scrimmage with the Boche airmen that day, and I have always thought it was my fault that Thaw was hit; also, that Thaw saved my life. They certainly were after my life, three of them, away up there, above a nice, soft cloud, which looked nice to fall on, but had no bottom to it.

"Thaw and I started out together, but had become separated in the drifting vapors. I was cruising along about 10,000 feet up, with nothing on my mind but my helmet, when who should drop out of a cloud above me but three of the friskiest little German fliers you ever saw. They didn't look little to me, though. They were the biggest Fritz birds I ever saw, and I said to myself: 'Bert, you will never see Kentucky again—your number is up.'

Defensive Warfare.

"But I took a chance and started to climb, which you can do pretty well in a Nieuport biplane. Somehow, they missed me on the way up, although their machine guns sounded like thunder to me and my wings were punctured a few times. Things didn't look any too good for me, even though I had temporary advantage. I showered a lot of bullets on the nearest Boche without making much impression, and then my gun jammed, and it was a case of defensive warfare.

"I doubled and dived, and zigzagged all over that cloud, but the Kaiser's boys always seemed to be waiting for me. They had spread out, making a three-cornered net. We were up about 15,000 feet by that time and the air was very clear. I was hoping for a cloud to come along, but no luck, and the blighters were coming nearer. One of them began shooting again, and I could hear the ping of the bullets even above the noise of the propeller.

"Suddenly I saw another machine climb up through the clouds to the eastward: 'Another message from the Kaiser,' I thought. 'No use, I'll never get back to old Kentucky.' But then I saw it was a French machine. It was Thaw coming back from Berlin or somewhere. And the Boches were buzzing around me like a lot of hornets. They were so busy trying to get me they didn't notice Thaw.

Thaw climbed like a rocket after those Fritzies, and I certainly was glad when his artillery opened. It took a great load off my mind, and one of the Boches immediately turned turtle and soon was disappearing on his last dive.

One Boche Escaped.

"Then the other two opened up on Thaw, and it wasn't long before I saw he was in trouble. He dropped another one of the Boches, but not before the Fokker chap had landed him in the arm. Thaw started to volplane after he was hit, and all I could do for my rescuer was to try to attract the other fellow while Thaw tinkered with a dismaged engine and guided the machine at the same time.

"It was some afternoon and I have always been sorry I couldn't have punctured that last Boche. He certainly was annoying."

Telling of Thaw's wound reminded Hall that he had also been shot in the arm, which badly injured his right elbow, but an excellent piece of surgery resulted in a silver plate being placed there for a part of the bone, while a patch on his back shows where skin was grafted to cover the shattered place.

"I suppose I had a narrow squeak the day they got me in the arm," said Hall. "It was on the Verdun front, and we were flying over the awful desert-like place that the greatest of all battles was creating.

"I met a Boche machine about 10,000 feet up. It was busy and we almost crashed head on. We swung out and after manoeuvring I let him have it, but my bullets only rattled on his engine. He climbed up and I felt the weight of his lead. My right arm went numb and I knew I was through so far as shooting was concerned. It was sort of painful, then, and I was sore clear through because I couldn't get back at the Boche.

Cool French Observer.

"But I hadn't figured on the observer I was carrying with me, a French officer. He was a quiet chap, didn't say much until they winged me, and then he seemed to get interested. First, he was out of the seat and fiddling with the trigger of the gun. Then I got busy and whirled the old Nieuport around so we had the range of the Boche, who was climbing again to finish me.

"I never saw a cooler chap than that French lieutenant. Believe me, he stood there looking the gun over just as if he were out for a clay bird shoot. He looked at me and smiled and then he turned loose and ruined the Boche. I never saw a Fokker whirl and fall and break up like that one did. I nodded my head at the Frenchman and laughed, although my arm hurt like fury. We landed all right and the observer and I shook hands. I never saw him again and never learned his name."

OLIVE OIL SCARCER.

Industries of France Suffer From the Lack of Labor.

News comes from France that the harvest of olives this year will be three times as great as in 1916. Nevertheless there will be less olive oil in 1918 than ever before. The greater part of the harvest will rot away because hands are lacking to turn it into oil.

The price at the present time of a litre of oil is about five francs, that is, in Canadian values $1 a quart. The price will soon become six francs and, what is worse, the French will have to depend on imported oil, Italian or Spanish, which they abominate.

The lack of labor has become more acute in almost all the vital industries of France. The olive oil situation is typical and adds force to a movement that is becoming more and more popular. There are many soldiers of the old classes in the French army, men 40 years of age or more, whose usefulness at the front is a question open to debate. Agitation has been going on since the time when United States' participation in the war made the demand for men less acute at the battle front to relieve the old poilus. Early in 1917 the doubtful privilege of an honorable discharge was granted to chefs-fes fathers of six or more children. The real problem before the Chamber of Deputies is whether to take up the question of the old classes in a large spirit or whether to continue to make slight concessions to the demands of their constituents.

Why He Failed.

"Were you able to sell old Skinflint a grave?" asked the superintendent of the Kew Mausoleum.

The agent shook his head.

"He was afraid he might not get the full value of it," he explained.

"But, bang it all, a man has got to die some time!" exclaimed the superintendent.

"That's what I told him, but he only answered, 'Suppose I should be lost at sea.'"

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

WILL MAKE SAUSAGE.

British Food Ministry Opens Plant for Utilization of All Meat Offal.

The Ministry of Food is going into the sausage business, says a London correspondent. An official sausage factory will shortly be opened under the control of the department for the manufacture of various kinds of meat products which do not come within the rations.

The intention is to put on the market attractive foods made from by-products of the slaughter house which have been simply wasted—at any rate, in the south of England—but which are staple foods on the Continent.

Various kinds of sausages will be manufactured, in which kinds of offal that are not in the meat schedule will be used, as well as black puddings.

The factory is situated in Liverpool Road, Islington. It formerly was the property of Appenrodts, who ran a string of delicatessen stores in the West End.

The concern will be managed by a company called the National Meat Products, Limited. The directors of the company will be nominated by Lord Rhondda. The company has been registered with a capital of $25 in 100 shares of twenty-five cents each and a called up capital of fifty cents. A Treasury grant has been given, but it is to be repaid out of profits, and all the profits made are to be put into the business. The directors include the meat experts of the Ministry.

Every slaughter house in the country is now under the control of the Ministry of Food, so there will be little difficulty in supplying all the wants of the factory.

In some parts of the north of England there are already factories of the kind. There is a model one at Birmingham, but in the south of the country such foods have been despised until the coming into force of the rationing scheme.

Only One-Third of the Italian Army Fed.

In Italy only one-third of the army is being maintained on the battle lines, the official explanation being that there is not sufficient food. The starving Austrian army facing the Italians is said to have received large supplies from Russia.

No Cause for Pride.

Kiltie—Are you the fellow that dragged me out of a shell hole under fire?

Member of the Ambulance Corps (modestly)—Oh, that's all right.

Kiltie—Oh. it is, is it? Weel then, what did ye do with ma pipe?

ART BY THE FOOT.

When Landscapes Could Be Purchased By the Piece.

Hurry is not characteristic of the present century alone; our ancestors were not always immune from the habit. The Dutch artist Vanderstraaten, according to a story from Das Echo, was a master in scheming out short cuts and saving time.

Vanderstraaten had little difficulty, it is said, in painting in a day thirty landscapes the size of an ordinary sheet of drawing paper. He would surround himself with pots of paint, each of which had its particular purpose—one for the clouds, one for the grass, one for the shadows. When he was ready to begin painting he called to his assistant, "Boy, a cloud!" and the lad speedily brought the desired pot. Vanderstraaten, with a thick brush, quickly transferred the clouds to the canvas. With the finishing strokes he called, "There are the clouds; bring the grass!" And so it went, without a moment's waste of time, until the thirty landscapes were finished.

On occasions Vanderstraaten would paint in the manner described a landscape upon a long piece of canvas. In filling the orders of customers he would cut the strip into pieces of various lengths. A purchaser could buy two, three or four feet of landscape, according to his fancy or according to the size of the space he wished to decorate.

LEMON JUICE IS FRECKLE REMOVER.

Girls! Make this cheap beauty lotion to clear and whiten your skin.

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless.

In Boyhood.

The wild flowers bloomed in beauty there,
'Long paths where once I bare-foot strayed;
None since have blossomed quite so fair
As when a boy I bare-foot played.

The robin built and reared his young;
The bluebird and the swallow came;
The oriole's swinging nest was hung,
And none, since then, seems quite the same.

The grass grew greener in the lane;
The sun shone from a bluer sky;
The lark sang yet a sweeter strain;
The sailing hawk did soar more high.

The berries tasted sweeter then,
That grew in clusters ripe and wild;
And all the world seemed glorious when
I was a bare-foot, sun-browned child.

A well-saddled yard with good walks where needed, keeps a lot of dirt out of the house.

Ask for Minard's and take no other.

The thumb gets pretty hard usage when cutting potatoes by hand—all slit up with the edge of the knife! Take the thumb of an old leather glove and draw it over the thumb of your hand when doing this work. It helps a lot.

Lord Rhondda's Sugar Ration.

Not many people know that most of Lord Rhondda's sugar ration goes to the children in Lady Cynthia Colville's creche at Hoxton, says a London weekly.

On one of his excursions to the East End to see how the rationing scheme was working, Lord Rhondda was particularly struck with the attitude of the poor mothers whom he encountered there, and he decided to make some practical recognition of his appreciation. It took the form of yielding up most of his sugar allowance on behalf of their children.

His sugar is made into jam for the little ones who spend their days in the nurseries while their mothers are at work.

See to it that every child has a garden, if it is at all possible. A real garden in real dirt. A garden and a few tools of his or her very own. You can buy plenty of seeds for a few cents. The children will probably waste most of them, but they will have lots of fun doing it.

There are two kinds of tea: ordinary tea and Salada. Salada is more economical since it takes so much less to make a satisfying infusion.

Radish and carrot seed may be sown together. The radishes will be ready for pulling long before they become troublesome to the carrots, and the radishes break through the crust, being robust plants, breaking the way for the more delicate plants of the carrots.

Minard's Liniment Co., Limited.

I was very sick with Quinsy and thought I would strangle. I used MINARD'S LINIMENT and it cured me at once. I am never without it now.

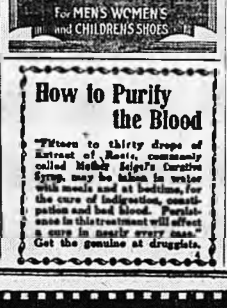
Give the winter-blooming house plants a rest by withholding sunshine and water. Cut to a good shape and keep the buds picked.

Keep Minard's Liniment in the house.



The boy or girl with a garden patch is happy and healthy. Start something in school gardens!

WITH THE FINGERS!
SAYS CORNS LIFT OUT
WITHOUT ANY PAIN

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied. It does not inflame or even irritate the surrounding tissue. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.

How to Purify the Blood

SIXTH CON. BRUCE

May 14th—"The Finger of Scorn," Town Hall, Paisley. For Red Cross.

Mr. and Mrs. J. S. Nicholls and Master Lawson Keyes, of Paisley, Sundayed on the 6th.

Gnr. Melville Snowdon, of Kingston, has returned after being home on last leave.

Mrs. Wm. Foster, who has been ill, is recovering nicely.

Seeding is in full swing. Most of the farmers in this locality will finish this week.

GREENHAM

Town Hall Paisley, May 14th, "The May 14. For Red Cross.

Rev. Mr. Reith, of Glamis, assisted Mr. McNab at the preparatory services here and in Underwood on Friday.

Mrs. Len Shipley visited her parents at Southampton last week.

Mr. Geo. Roppel and family leave this week for their new home in Alberta.

Rev. A. McNab, M.A., preached his last sermon as pastor of the church here on Sabbath last. The sacrament of the Lord's Supper was also dispensed. A large number turned out to hear the farewell sermon, but the services were as usual with only a short reference to his departure and the announcement that Rev. Mr. Robinson, of Tiverton, would preach next Sabbath at the usual hour. Mr. and Mrs. McNab and family leave this week for their future home in Toronto. On Tuesday evening the congregation met in the church, having invited Mr. and Mrs. McNab to be present. After devotional exercises Mr. Jas. Pace:

To the Rev. A. McNab, M.A.:

Our Dear Friend and Pastor—We, the members and adherents of the Centre Bruce congregation, learned with extreme sorrow some time ago that you purposed severing the tie which has bound us together as pastor and people for the past nine years, and the nearer the time of separation has approached the more marked has become our regret that such should be necessary. At such a time as this our thoughts go back over the years you have been with us, and we are reminded of the many acts and noble qualities by which you have endeared yourself to us. You have been an exemplary citizen, a zealous minister of the gospel and a faithful witness of the Lord Jesus Christ. You have earnestly sought to lead us in the way everlasting and inspire us with the high and noble ideals set forth in God's word. You have shown yourself a true friend, comforting and sympathizing with us in our sorrows and bereavements, and rejoicing with us in our joys and successes, and have ever faithfully and conscientiously fulfilled the duties devolving upon you as our minister. With our Scottish reticence we have been slow to make known to you our feelings, and we recognize that we have not given you the support and encouragement you may often have deserved, yet ere we say good-bye we wish to tell you that as a people and congregation we love you and your partner in life and dear children, and we sincerely appreciate your many kindnesses, your faithful labors and your untiring efforts on our behalf. Since you have felt that in the interest of your family it is necessary that you make your home in another place let us assure you that our best wishes, sincere prayers and continued interest shall follow you, and in whatever part of the great vineyard of the Master you shall find your task we trust that you shall have the joy of seeing rich returns for your labor. As a slight token of esteem and sincere appreciation of yourself, Mrs. McNab and family, we ask you to accept this purse. Signed on behalf of the congregation of Centre Bruce.

The presentation of a purse of gold was made by Mr. Jas. McKinnon.

Mr. McNab replied and expressed very feelingly on behalf of himself and family the deep attachment he felt for the congregation, and assured them he would never forget their kindness and the nine years of pleasant labors amongst them. Short speeches were made by Messrs. Alex. Mewhinney, Jas. McKenzie and Jonathan Annes, and an address by Rev. Mr. Robinson of Tiverton. Solos were rendered by Misses Etta and Lily Brown, Miss Kate McKenzie and John G Brown, recitations by Mrs J. G. McKay.

WALKERTON

Ex-reeve Robt. Russell, who has been badly used up since falling down the cellar steps at his home about two months ago, was examined by a physician on Monday and informed that he had broken a rib, in sporting a fracture all that time Mr. Russell wasn't exactly entertaining an angel unawares, as anybody who has had one of his staves bust can amply testify.

About a dozen of his old friends and neighbors in Brant left yesterday to join in the big organized hunt, which the council of Normanby instituted Wednesday in an effort to locate Mr. Alexander Anderson, who disappeared so mysteriously from his home at Hampden shortly after breakfast a week ago Sunday, and who has not been seen or heard from since. One of his mitts was picked up the other day in a nearby bush, but nothing further has been learned. As at time of writing (Wednesday) about forty men are tramping and searching the swamps and woods in that locality, and which are said to be particularly wild and dense, it is probable that the mystery will shortly be solved. Mr. Anderson, who is 60 years of age, was a former reeve of Brant township, and left about ten years ago take over his present farm of 125 acres at Hampden. His wife and two sons who have been with him on the farm, are unable to advance any reason, as is feared, that he should try to do away with himself. Later—On Thursday last a party of hunters from Hanover, on a fishing expedition, found the body of Mr. Anderson in a stream near his home.

Thos. Inglis, of Carrick, who sued his neighbor, Adam Darling, for $50 in the Division Court at Walkerton, for cutting down and destroying a large shade tree near his farm, was given a verdict for $25 and costs in a decision handed out here by Judge Greig on Tuesday. The tree, which was spared by the Inglis family when they cleared the land there about sixty years ago, was particularly prized by Thomas as an old landmark and shade tree. As fishing parties used to tie their horses under its spreading branches, it no doubt witnessed many a yarn pulled in its time. The reeve of Carrick thought the old tree was a nuisance and claimed it darkened the road and obscured the sight so that approaching autos couldn't see each other any too well. He consequently sold the tree by tender to Darling for $3 on the understanding that he would cut it down and remove it from the scene. Darling carried out his end of the bargain with such vigor that he got into a lawsuit right smartly. Carrick, who undertook to protect him, will no doubt finance the affair, the municipality being, it is said, anxious for a decision on this point, as like several other trees marked for the slaughter. With D. Robertson, K.C., acting for the plaintiff and C. F. Klein for the defendant, a bawly legal battle was waged, and about every point in tree lore was brought out by either side to show why that old tree shouldn't be removed and why it should. As the judge reserved his decision, the result of the row wasn't known until His Lordship bulletined his verdict on Tuesday.—Herald and Times.

SURPLUS FUNDS OF 160th BATT. FOR MEN'S BENEFIT

Will Be Used in Bruce Hospitals for Former

In a letter to The Advocate by Major A. McLean Moffatt, officer commanding the 160th (Bruce) Batt., the officer requests that the citizens of Bruce be informed through the press of the final disposition made of the unit's assets on the breakup of the 5th Canadian division.

"I desire to take this opportunity of expressing my appreciation to you of the help and encouragement given to the battalion, and I can assure you that both by the exemplary conduct and military efficiency of its personnel, it has merited your kindness," writes Major Moffatt. "At the final meeting of battalion officers it was decided that the silver cups and trophies are to be returned to Canada and placed in custody of the Bruce County Historical Society. The instruments of the brass and bugle bands will be returned to Walkerton, and will be held in trust by the Bruce County Council.

"It was moved by Capt. Whitehead that the field kitchens, originally donated by the Walkerton branch, South Bruce Women's Institute, to the 12st Battalion, and now in possession of this unit, be handed over to the C. O., 4th Reserve Battalion, Bramshott, Hants, England, to be used by him as far as possible for the benefit of any drafts absorbed into that unit from the County of Bruce; and that on their ceasing to be used for this purpose the C. O., 4th Reserve Batt., be instructed to return same to the Walkerton Branch, South Bruce Women's Institute, Walkerton, Ont. Transportation charges to be borne by consignee.

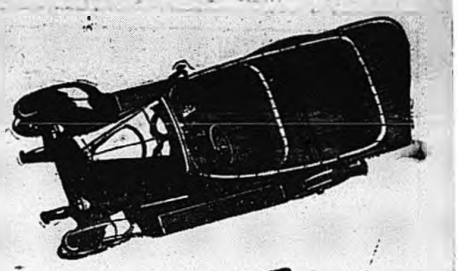
"All surplus funds from the battalion are to be returned to Canada, and to be held in trust by the Bruce County Preparedness League to be used by this organization for the benefit of any member of the 160th Battalion, who is a patient at either the Kincardine or Walkerton hospitals.

"It was decided by the sergeants' mess, too, that all surplus money of the mess be equally divided between the Bruce County (Ont.) hospitals, Kincardine and Walkerton, for the benefit of returned soldiers of Bruce County."

Steel Armed Cavalry

Recruits are urgently needed for Steel Armed Cavalry for immediate service at the front. They must be Category A 2 men, 5 feet 7 inches in height, accustomed to horses and good riders. Men who are in Class I of the Military Service Act are not to be accepted for this service. Steel armed cavalry are armed with a sword and trained for "shock action." This is to differentiate between this arm of the service and Mounted Rifles. If they are found "61" by the medical board in London they will be sent to the Depot Squadron, Royal Canadian Dragoons, Toronto, Ont. Applicants may apply to any authorized medical examiner in the district for medical examina-

SERVICE TO THE NATION DEMANDS GOOD HEALTH



War is bringing home to every woman and child the fact that service to the nation is not a matter alone for the soldier and sailor and munition worker.

There is work, necessary work, for everyone to do, in the way of thrift and production and to do this work, health is the first essential. Even the most willing will find progress is slow if the health is bad.

Probably the most common complaint among those doing unaccustomed tasks is backache. Work may cause a tired feeling that will easily pass off but this backache that almost doubles one up is an indication of a condition of the system that needs treatment. The Kidneys are giving evidence of their weakness and the sufferer should be thankful for the timely warning given by this pain.

The quickest and surest relief from backache is a treatment with Gin Pills. Gin Pills are the best Specific for the healing of the Kidneys. Anyone who wishes to perform his or her full duty to the Nation in these strenuous times will find relief from backache in Gin Pills.

Sold by all dealers—50c. a box, or 6 boxes for $2.50. Money back if you are not satisfied. Free sample on request to National Drug & Chemical Co. of Canada, Limited, Toronto, or to the U.S. Address, Na-Dru-Co Inc., 302 Main St. Buffalo, N.Y. 188

Fruit Cake for the boys overseas a specialty. Try some.

Goods delivered after 4 o'clock and on Saturdays. Phone your orders for prompt delivery.

D. H. COOPER

Returned From France

Pte A E Stewart of Edea Grove, who trained in Walkerton with the 160th, and after crossing overseas went to France last December with a railway construction battalion, was in town on Monday, he having been invalided home last week suffering with asthma contracted while on duty in Flanders.

An Editor Raising a Pig

Mr Wm McDonald, M P P for N Bruce, announces in his paper, the Chesley Enterprise, that he has added to his legislative and editorial duties the care of a young pig. Mac. has The Advocate's best wishes for success in the pork production line. May his piggy grow to outweigh the 750lb. hog delivered to lawyer John Jacques of Paisley by Mr Dan McIntyre of Elderslie. When the killing time comes we trust Mac McDonald to be Hielan' enough to pass a ham this way.

Answering the Call

Quite a number of young men from the farms are answering the latest call to arms and will soon be in training. This class from the land, who up to now have been on the food line, are not in any way inferior to those who have gone before them in the fighting line. All have been following the progress of the war, and many seeing the urgent need for more man power, were quite ready to answer the call. Others who may have considered the importance of Canadians maintaining production fully as vital as keeping up the strength of our army, will before many months get a closer view of the colossal undertaking the Allies have in hand to kick the Huns, and become convinced of the wisdom of the Canadian authorities insisting upon re-inforcements being sent at this time.

Some Appeals

Appeals against assessment of property have been made by E Armbrust and I H Glover. Mr and Mrs A B J Simons appeal against income assessment as being too high, and E Greaves that income is not assessable. Mr Jas Stark appeals against assessment of storehouse at station, which is being torn down.

Found Dead in the Bush

Wilfred Moffatt, son of Mr and Mrs Wm Moffatt of 12th con Greenock, was missed from his home on Thursday about noon, and later his body was found in the bush a short distance away. Death was due to a bullet discharged from a revolver he had carried to the bush, whether by accident or otherwise may probably never be known definitely. Shooting had been heard by a neighbor during the forenoon. The deceased was a very quiet young man, 26 years of age. The grief stricken family have the sympathy of all in their bereavement.

Spring Seeding in Good Shape

The fall wheat was mostly winter killed and much of that which survived the season is not looking very healthy. The spring seeding has been done under some of the most favorable conditions possible. The soil worked up to an ideal seed bed, and at the end of last week, when the greater part of the fields had been sown, the clouds let down copious showers of rain for a couple of days. With seasonable warmth now coming on, there is no reason for the tiller of the soil getting grouchy about the prospects at present. Clover was seriously winter killed also, and this, combined with cold and drouth after the snow had gone, tends to reduce the hay crop below the average of the past two years, which was abnormally high in these parts.

ADVERTISING RATES

Subscription Price $1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertisements—Legal and other casual advertisements for one insertion first insertion, 25 per line for each subsequent insertion.

Advertisements of Strayed, Farms for Sale or to Rent, and similar, 50 for first three weeks and 25c for each subsequent insertion.

I. S. CRUICKSHANK, the Tailor

—Watch for Parcels Night, May 20th.

—Pte. Wm. McBride was home from London over Sunday.

—Mr and Mrs Sinclair, of Mount Forest, were visitors at Mr Alex Fraser's over Sunday.

—Cadet John Temple is home from Toronto on ten days' sick leave. He has just had the measles.

—Mr and Mrs Jas Shaw, of London, were week end visitors at the home of the latter's brother, Mr Jas Stark.

—Mr Robt Fullerton, who was confined to his home for several weeks with stomach trouble, is able to be out again.

—Mrs. A W. Parrish, of Caledonia, was visiting Paisley friends last week, a guest at the home of her brother, Mr. Alex Galbraith.

—Mr P B More has bought from Mr Robt Irving of Toronto the residence on Queen St south built by the latter, and will move in shortly.

—Mrs Jas Watson and Miss D P Cambell, of Kincardine, were visiting friends in Paisley and vicinity for a few days, guests at Mr R Fullerton's while in town.

—A. M. Charlie Mercer, of the transport service branch of the Royal Flying Corps, is home from Toronto on ten days' leave. Charlie spent the winter in Texas.

—Mrs Robt Wilkinson was here for a few days last week before going to Dunlop, where her husband is now employed and where they intended to from Southampton.

—Dr Black, who removed from Paisley to Clifford over three years ago, is leaving there to go to Dresden, where he will take the place of a physician needed for war service.

—Miss Gertie Brown, daughter of Mr and Mrs Thos O Brown, of 2nd con Elderslie, was operated on for appendicitis, in Walkerton hospital. Dr Houston was the operating surgeon.

—There will be a meeting of the Women's Patriotic League in Putnam's hall on Friday evening. Going to the preparatory services in Knox church the hour of meeting will be four o'clock.

—Mrs Jas H Ross of Exeter, Mr and Mrs D J Kemp and son and Miss Bessie Ross of St Marys, motored up and spent the week end with their uncle, Mr W J Ross, and their grandmother, Mrs T Ross.

—Miss Jean Miller arrived home from Toronto on Monday evening, accompanied by her sister and Miss G McIlraith. She has recovered her speech and is able to move about on her feet with a little assistance.

—Since receiving his discharge, Pte Ross Woods has been appointed a government inspector of San Jose scale, and is now at work helping to drive this pest out of its entrenchments in the fruit orchards of Grimsby district.

—Mrs N D McLeod, who has carried on a dressmaking business here for a number of years, has been induced by the ladies of Southampton to remove to that town, and left for there this week. Mrs McLeod has an excellent reputation as a ladies' costumer, and her removal is regretted by Paisley patrons.

Registrars Appointed

Mr Geo D McKay has been appointed registrar in South Bruce for the registration of our man and woman power which is to be taken in June. Mr F R Sayles of Port Elgin is the official appointed for North Bruce.

Judge Klein Returned

Judge Klein returned Friday from Columbus, Ohio, where he had been undergoing treatment for several months. The Judge is greatly improved in health, and from appearance seems rounding into complete recovery.—Herald and Times.

Good Comedy Well Patronized

Local play goers paid a well earned compliment to the Tiverton Dramatic Club by turning out in full force for the Club's second appearance on the Paisley stage on Tuesday evening in the comedy, "The Finger of Scorn." The performance pleased the audience and will get a nice sum for Red Cross, the proceeds amounting to $96 45. The entertainment was held under the auspices of the Women's Patriotic League. At the close the ladies served lunch to the players.

—Salem garden party June 27th.

—Good servant girl wanted at Balmoral Hotel. Wages $15.

—How about tea? The wise buyers are stocking up now before the jump in prices. Ballachey, Laidlaw & Co.

Order Your Coal Early

Leave us your order for needed supply at once, so that we can have your bin filled before the cold weather comes on again. D. A. Lyon.

Wall Paper

A DISCRIMINATING customer will find all they desire in variety of designs, novelty of colorings and general desirability of the goods we offer to suit their fancy. Our stock is full and complete. Eggs taken in exchange.

The Mystery House

Next Door to the Parsonage Lived an Unknown Stranger, Setting Village Gossipers Astir with Wonder

Tole By The Minister's Wife.

Tom Antley is our new sheriff and for a long time he has been eager to make an arrest.

"Hurry, Betty Rose!" I said frantically. "Hurry over there and tell him so that he can get away! The sheriff will arrest him if you don't hurry."

Like a flash Betty Rose was out of the room. I heard her say something about a mob as she tore open the front door; from my window I saw her run across our lawn and up to the porch of the Mystery House. I heard the peal of the bell. I saw her go into the lighted hall. Then softly and slowly I fainted.

It was almost midnight when I came to myself. I was in my own bed and Billy, Doctor White and the doctor's wife were watching me. "I told her a long time back she had better see you," Mrs. White was saying to the doctor.

"The poor dear child!"

Right before the doctor and his wife, Billy put his arms around me and his lips against mine. For a long time he just held me that way, not saying a word. Then Mrs. White commanded him. "Now you just trot away with the doctor for a little while and leave me to have a chat with this young lady."

Motherly Mrs. White took both my hands in hers. "My dear child," she spoke as my own mother would have talked to me, "I am going to tell you the most precious secret that ever any woman heard."

"I know it already," I whispered. "Last night something—like a little voice—seemed to whisper it to my heart."

Softly she kissed me. "I suspected it that Sunday when I told you to come to see the doctor," she told me. "You should not have been left alone last night. Miss Betty Rose didn't understand when she went away and—"

"Betty Rose!" I sat up straight, remembering how frightened she had been and how she had rushed over to the Mystery Man's house. She had been standing near him in his hall when I had fainted. "Where is she?"

Mrs. White gently pushed me back to my pillow. "I'll send her in to talk to you herself."

Then in slipped radiantly happy Betty Rose, still clad in her mackinaw and red tam-o-shanter, although both were awry. She knelt beside my bed. "Isn't it splendid, honey? Billy told me all about it when he first came down and O Priscilla, he was so happy over it that he seemed to be floating down the stairway instead of walking."

I smiled at the vision of my athletic husband floating down the parsonage's narrow stairway. "You must stay with us a while longer," I begged. Then I remembered why I had asked about her.

"Tell me all about to-night or is it last night now? Did they arrest the Mystery Man or did you help him get away?"

Then Betty Rose told me the story of her night's adventure.

All the way across to the Mystery House she was remembering a mob that in her girlhood days she had seen in a Mississippi town. It had broken down the door of the little county jail and dragged a man out to his death. In her mad Betty Rose could almost see a Hazleton mob splintering the massive oak door of the Mystery House.

The Mystery Man himself opened the door for her, caught her hands in his and drew her into his warm living room. "Why, my dear child," he said, "what on earth has happened to you?"

"It's a mob," Betty Rose gasped. "They're forming down town. The new sheriff is heading them. They'll get you! They know you're the train robbers!"

Afterwards the Mystery Man told us that he thought Betty Rose had been suddenly bereft of her senses but he humored her.

"Yes, yes," he soothed her.

With her two little fists Betty Rose frantically beat his breast. "They'll get you," she panted. "They'll get you. Don't you know what a mob does with the man it's after? It kills him. They'll kill you if we don't hide. Hurry! Hurry!"

The doorbell rang. Its peal brought a low scream from Betty Rose's lips. "Don't go," she implored him. "Don't go! Please don't go!"

The Mystery Man made his way to the front door. He expected to see either Billy or me there in search of our deluded cousin. Instead, Hazleton's new sheriff stood alone on the porch; a number of other town men stood respectfully on the snow-covered lawn.

The sheriff was the spokesman for the crowd and without waiting for an exchange of greetings he began his speech. "Beg pardon, mister." His voice was quavering. Tom never was very courageous. "We folks owe you an apology for some suspicious words we've been saying down town these last few days. But to-night we had our words threw back down into our throats. They found them robbers in some woods just two miles out of Horton Junction and they are on their way to Chicago right now. We apologize for them words, sir, we apologize."

He backed off the porch and out of the yard, the other men following him. The Mystery Man turned to Betty Rose and his face was white. "Then you were sane after all!" he said in a queer voice. "What on earth made them suspect me of robbing that train?"

Slowly Betty Rose moved away from the door; majestically she confronted the Mystery Man.

"Why it's just because you're so queer," she explained. "You don't go any place; you won't know anybody and you won't let anybody know you. Not a soul in this whole town even knows your name.

"And it's so queer about your—your wife—the way she comes here, stays just a few hours, and then goes away again. Then while she is here people see you always arguing over bills or something and they think you're divorced or going to be divorced or ought to be divorced and," she finished breathlessly, "and you're so queer!"

Then the Mystery Man laughed a clear, ringing laugh that Betty Rose said she never before would have believed him capable of producing.

"And what did you think?" he growled.

Miserably Betty Rose shook her head. Accusingly the Mystery Man looked at her. "Well, I'm not her husband," he thundered out. "My name is Paul Duffin Kerr."

Betty Rose almost fainted. She knew that Paul Duffin Kerr was the name of the man who was writing the most widely read novels of her own home town.

"And she," he continued without waiting for Betty Rose to gasp more than three or four times, "she is Rachel McDermott Brown. She is illustrating my new book and making the illustrations according to my directions. Also she is respectably married and has two children one almost as old as you are. I slip away to write here where no one disturbs me."

Betty Rose tried to push her tumbled curls back into place under her cap. "Let 'em go," Mr. Kerr said suddenly as he watched her. "I like them rough that way. Tell me, who on earth was that dapper sissy who dared to come down here to see you that Sunday?"

Betty Rose actually giggled and walked straight into his arms. "You needn't be jealous. He was only a millionaire and I'm not going to marry him."

Betty Rose leaned over so that her lips touched my ears and whispered softly, "Priscilla Lester, I really do believe in love myself—I do."

The room was quiet after she slipped out. I raised myself on my elbow and looked around it. Everything seemed soft and subdued as if touched by little angel hands. I looked out at the million stars in the sky. How soft and human they seemed for a cold wintry night!

The old lonely feeling that had been in my heart during the last month, was gone forever. In its stead was a hushed expectancy. So must Rachel have felt when God, after hearing her prayers, had promised her a son. After all it is just the same exquisite feeling that comes to every woman when she knows that God is going to give her a little child.

Billy came into the room before I went to sleep. "Priscilla," he said boyishly, "you were once wishing for a Romance here to analyze and watch —well, you'll get your wish. That fellow down there asked me to marry him and Betty Rose."

"Do you think he is good enough for her?" I asked.

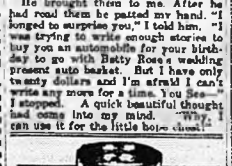
One of the brushes went off the chiffonier with a bang. Stooping to pick it up from the floor Billy mumbled his answer. "Oh, he'll do! But no fellow is ever good enough for the girl he loves."

I lay still and looked at him. At last I understood. Up to this time Billy had thought I was just a little girl, one he was to train and make into the sort of woman he thought he wanted for a wife. In his eyes I read that I was now a woman.

"Billy, come here!"

He came and leaned over my bed. "Do you like the secret?" I whispered.

Billy's answer to me was also whispered and I was close in his arms.



"Dear, won't you go over to my big dresser drawer and get two letters out of the east corner of it?" I finally asked him.

Billy's face was red. "I didn't want you to show me those letters, Priscilla."

"I want you to see them," I insisted.

He brought them to me. After he had read them he patted my hand. "I longed to surprise you," I told him. "I was trying to write enough stories to buy you an automobile for your birthday to go with Betty Rose's wedding present auto basket. But I have only twenty dollars and I'm afraid I can't write any more for a time. You See—" I stopped. A quick beautiful thought had come into my mind. "I can use it for the little boys' shoes."

(The End.)

About the House

HOW TO MAKE A FIRELESS COOKER.

Save your old newspapers and make a fireless cooker.

A three-quart drop-handled camp saucepan, a packing needle, string, scissors, a saucer, a lead pencil, a curtain ring, paste and brush and about two dozen newspapers are the materials needed for the manufacture of this important acquisition to the culinary outfit.

In the first place a "dummy" is to be made about an inch broader and deeper than the saucepan. This can be done by rolling paper around the cooking vessel and tying or pasting it. This covering is only a temporary guide, which enables the maker to place the final cover over the pan with ease.

The newspaper sheets must be opened out singly, care being taken to use only those that are not torn. Those that are torn will come in handy to make the discs, using the saucer as a guide.

Thread the packing needle with about two feet of string, tying the ends together with a large knot. Pass the needle through the centre of about a dozen of the paper discs and pull through up to the knot. Paste a few discs over the knot, so as to hide it, using the paste in sparing quantities and in dabs here and there.

Next make a fold lengwise in one of the perfect sheets of newspaper. This fold is to be fully the same depth as between the centre of the top and the "dummy" and its base. Lay the dummy on its side and secure the paper around it, pasting the side edge of the paper, using as little as possible, care being taken not to paste the disc of pasted paper with the string and needle uppermost on the top of the dummy, which previously has been stood upright. Bring the top edges of the sheet of newspaper into the centre by crumpling them around the double string. Drive the needle through a few discs or squares of paper, and, having put some paste on them and on the string, pass them down on the top crumpled edges of the sheet of paper, thus forcing one complete comparatively airtight cover.

Put on thirty or more such covers. As the sizes of the covers increases so must the depth of the fold, so as to bring the top edge of the paper close up to the central strings. The folded edges of the paper are to be put to the bottom of the covers. To add neatness, the first and last covers may consist of, and the discs be covered with, respectively, white and brown paper. To secure strength the lower edges of the two covers must be folded several times.

The sheets of newspapers must be pieced on evenly and neatly, but care should be taken not to get them too tight, as the object is to form air spaces between the layers of paper. About two hours is required for two people to make the "nested cover."

To finish, pass the needle through the ring, having previously threaded on the string some discs of paper.

Now take the needle back through the same hole in the discs of paper. Tighten up the string so that the ring sits down firmly on the disc. Cut off the needle and pass the top ends of the string several times tightly around the double string under the disc and tie them into a knot. Lastly, paste down the disc. When the paste is dry the cover can be lifted by the ring, when the "dummy" will fall out. The saucepan may now be unpacked from the dummy and used for cooking. This makes the cover. For the bottom pad cut out discs of paper of the size of the bottom of the saucepan and sew them together. The pad can be improved by sewing four buttons, rolls of paper or other non-heat-conducting objects on either side of the discs near the margin. This forms a place for the saucepan to stand, with small surface of contact through which the heat can be conducted away. Three quarts of boiling water put under the covers will stand at a temperature of about 185 degrees Fahrenheit for three hours.

Great Thoughts on Peace.

Peace is liberty in tranquility.—Cicero.

I have never advocated war, except as a means of peace.—U. S. Grant.

Nothing can bring you peace but yourself. Nothing can bring you peace but the triumph of principles.—Emerson.

I am a man of peace. God knows how I love peace; but I hope I shall never be such a coward as to mistake oppression for peace.—Kossuth.

Peace, above all things, is to be desired, but blood must sometimes be spilled to obtain it on equitable and lasting terms.—Andrew Jackson.

Peace? A brutal lethargy is peaceable; the noisome grave is peaceable. We hope for a living peace, not a dead one.—Carlyle.

The Colors of Grapes.

The dark red color of certian grapes is due to a compound of tannin, which all varieties of the vine contain. The color seems to depend on the combined action of the air, light and heat. The change in color is produced naturally by means of a specific ferment which carries oxygen to the grape. These ferments are often the agents of coloring in vegetables substances.

PIANOS! PIANOS!

In order to get our justly high grade pianos in each town, village or township throughout Ontario, we shall offer one instrument, and only one, in each place, at factory price, as far as it can be done consistently. These pianos are made in Canada and have been before the Canadian public for over twenty-five years, and are sold on a straight guarantee.

Buying In Toronto

You'll enjoy buying in Toronto. The big stores are so busy and attractive. And the range of merchandise is so extensive that it is certainly a great pleasure—buying in Toronto.

And this pleasure is the greater because you can stay at the most comfortable of home-like hotels, THE WALKER HOUSE (The House of Plenty) where every attention is given to ladies and children travelling without escort.

And your purchases may be delivered there for you and relieve you of all worry.

When you come be sure you stay at

The Walker House

The House of Plenty

TORONTO, ONT.

The Paint That Costs The Least

Is the Paint that covers the greatest surface—that takes the shortest time to apply—that wears the longest. Martin-Senour "100% Pure" Paint does all three. Here's the proof: "100% Pure" Paint covers 900 square feet of surface per gallon.

Hand-mixed-lead-and-oil, and cheap prepared paints, cover only about 500 square feet.

The greatest cost of painting is for labor. It takes less time to apply Martin-Senour "100% Pure" Paint because its fine, even texture spreads much easier.

MARTIN-SENOUR

"100% PURE" PAINT

(Made in Canada)

Is guaranteed to be exactly as represented. The purity of the White Lead and Zinc Oxide—the high quality of the Linseed Oil—the minute fineness of the grinding by powerful machinery—insure a paint that gives years of protection and beauty to your home.

Why use cheap paint—that is expensive to put on—when Martin-Senour "100% Pure" Paint wears nearly twice as long?

If you are painting this year, you'll be interested in our books—"Town and Country Homes" and "Harmony in Home Tones." Write for copies—free.

MINE SWEEPER NO. 25—A TRUE STORY

RISKING LIVES THAT OTHERS MAY ESCAPE.

The Dangerous Occupation of Clearing the Seas of Mines Sown By the Enemy.

Mine Sweeper No. 25, of the French Coast Patrol, backed slowly away from her moorings and headed for the open sea.

An observation balloon returning from duty the night before had reported the presence of what appeared to be several floating mines in the vicinity of the harbor of X——, and, as everybody knows, floating mines are dangerous things for ships to encounter, therefore Mine Sweeper No. 25 had promptly received orders to go out and investigate the report and pick up whatever she might find.

Only the week before a ship ran against a mine somewhat further up the coast and had in consequence been very badly disabled. The harbor authorities had no desire to lose any more ships if it were at all possible to prevent it.

It was a beautiful morning, with the sun shining brightly over the low hills surrounding the harbor. The fields—some green, some brown and some white, of many shapes—all neatly outlined by hedges or stone walls, resembled an old fashioned crazy quilt, while here and there an orchard or cluster of rocks made a dark, irregular spot like a rent in the pattern.

Two French Sailor Lads.

Just to be alive was a happiness on such a morning, and the sailor men sang as they busied themselves in getting out and rigging the tackle which makes up the equipment of boats whose duty it is to clear the channels and waterways of dangerous obstacles.

Raoul and Jean were brothers. Both had entered the service of their country at the very outbreak of the war and by diligent study and hard work had attained a recognized leadership in the mine sweeping service. Raoul, the elder by scarcely a year, had charge of the handling of the tackle and of hooking on the mine, while his brother Jean saw to the actual work of lifting or laying those balls of steel that if let slip just the least bit can do so much damage.

On this particular morning they of the entire crew were not singing as they went about their work. Their home was in the city that they were leaving behind them, and as they had sat at supper with their mother and sisters the night before a messenger had come telling them that their father, with the army at the front, had been wounded and, suffering upon the field, had been stabbed to death by the charging Huns. Now this morning as they were going out to prevent, if possible, further bloodshed their hearts were loaded down with grief and their thoughts were of hatred and vengeance.

As the boat neared the locality of the supposed mine the feelers were rigged out and the search was begun.

Victim of Third Mine.

Back and forth, again and again, they went across the fairway and after an hour or so their search was rewarded, for there, just beneath the surface of the water, could be seen the top of a mine. As they drew cautiously near the row of projecting horns, any one of which needing only to be pressed a little to cause at once a mighty explosion, could be plainly seen.

Under Raoul's directions a hook and tackle was fastened into the ring bolt at the top of the mine and gently the black ball was lifted from the water to the deck of the boat.

At once Jean and his helpers set about very carefully to remove the fuse, after which, the mine, now comparatively safe, was lashed firmly to the rail out of the way, while the sweeper proceeded in search of another.

As their search carried them further and further out, the sea became rough and their work was made more difficult and hazardous.

Soon another mine was found and it was lifted from the water and taken care of like the first.

About dinner time they found a third. Raoul himself had the hook this time and, leaning cautiously over the rail of the boat to the water, he grasped the ringbolt projecting from the top of the mine and inserted the hook.

"All right, hoist away," he said, and the mine began to emerge from the water.

The Minesweeper Lost.

The steamship Southland was nearing the end of a long trip from the other side of the ocean, and her crew, much relieved to be nearing harbor and safety, were lounging about the decks talking and laughing together while the cooks prepared dinner.

Just as the dinner bell began to ring there was a loud explosion, and the sound of the dinner bell was changed to the general alarm bell.

At the explosion the ship almost seemed to lift and shook from bow to stern. Then all was still and she proceeded on her way apparently none the worse.

Careful investigation proved that the Southland was absolutely intact, nor could any cause for the explosion be found.

Out on the water no sign of an enemy could be seen, and after a quarter of an hour or so the men went wonderingly to their dinner. They were just leaving the tables when the lookout sang out, "Boat ho!" and in a few minutes an overturned boat drifted by. Then another was passed, and the Southland ploughed through considerable wreckage of all kinds.

"Well, there's the cause of that explosion whatever it was," said the officer of the deck, "and from the look of things I think that it was a mine sweeper."

QUEEN WILHELMINA.

Beloved Ruler of Holland Is World's Only Female Sovereign.

Wilhelmina, Queen of the Netherlands, who appears to-day in an international crisis, is the only woman in the world who is a reigning sovereign in her own right, a position she has held since 1890, when, at the age of ten years, she ascended the throne at the death of her father. She is thirty-eight years of age.

The dominating female figure of Europe to-day is a large, heavily-built woman, who is indifferent to the arts of her dressmakers and finds thorough pleasure in personal charge of the affairs of her country. But the Queen's face, with its strong chin and kindly eyes looking straight at you in sincerity and confidence is that of a wise woman.

The sovereign lady of Holland has a will of her own. She has the firm chin of the House of Orange, but she is, as they say, totally lacking in the well-known characteristic which gave the title of William the Silent to the most renowned of her ancestors.

It is, however, in the East Indies that Queen Wilhelmina has her real empire. It is larger than the German Empire. In 1910 the population numbered 42,000,000 souls. Batavia, the capital of the Dutch East Indies, has one of the finest harbors in the East, and the Dutch colonies are among the richest, if not the richest in the world.

Her Majesty is the richest sovereign in Europe in her own right, her income being enormous from the crown lands and from her vast colonies. That vast income is used for the benefit of her beloved Dutch subjects, in the way of public buildings of every kind—such as hospitals, theatres, lecture halls, gymnasiums, public bathhouses and so on, to say nothing of charming and numerous parks that rich and poor alike may enjoy. Do you wonder Holland adores its Queen?

When her neighbor, Belgium, was invaded by the Germans last year, she telegraphed King Albert that she had room in her country for over one million refugees. They came. They are there still, cared for in every way, fed, clothed and housed, and the enormous bill cheerfully paid for all this by the only woman who sits upon a throne in Europe—Wilhelmina, Queen of Holland.

She enjoys a prodigious personal popularity with every class of her subjects, and because of this she can do almost anything, in the way of eccentricity, that would not always be tolerated in another Queen.

CLEMENCEAU AT WORK.

Puts in a Good Day's Labor Before Breakfast.

If there is one man who has more to do with the policy of the Entente to-day than any other—even than Lloyd George—it is the Prime Minister of France. France more nearly is under a single dictator than any other country in the war; French Governmental policy is clearly defined; and it is difficult for England or the United States effectively to depart from it.

It is not without good reason that Clemenceau is called the Tiger. As he sits in his office one is reminded easily of the big cat tribe, so intense he is, so quiet, so lithe. As he approaches there his 76 years look like 60. As he jumps from his seat and hurries across the room his movements are those of a vigorous man of 50. He by no means suggests a man with a grandson in the war.

One picturesque habit of his, as far as I know, has not been made public. Like many great workers he makes an early start. Lloyd George has many of his most important meetings at breakfast. Lord Reading, before he came over here as ambassador, used to do a day's work in helping the Government administer itself before he started his chief justice functions. Clemenceau also puts in a good day's labor before regular business hours begin. He has an old housekeeper who knows how to make a soup of which the Prime Minister is fond. Every night this soup is made hot, put in a stone jug, and the jug placed between the sheets at the foot of the bed, where it serves for a hot water bag until about 2 a.m., when the husky Tiger awakens, drinks the soup and goes to work.

The Life of an Airplane.

The number of German airplanes destroyed by the French aviators and the members of the Lafayette escadrille for the ten months ending October, 1917, was 120 over the French lines and 867 over the German lines—all total wrecks.

Prunes cooked very slowly in their own water will need no sugar.

"JACK" AT THE JUTLAND BATTLE

SOME NEW YARNS FROM "NAVAL INTELLIGENCE."

Story of a Novel "Holiday" When a Hairdresser Got a Glimpse of Big Things.

That our men of the Grand Fleet are desirous of a change after a long spell of isolation "Somewhere in the North Sea" even the landlubber can realize. The weary wait for Fritz to come out to give battle is a sore trial to their tempers, which are not improved by the monotony of the daily routine and seeing the same old faces day after day. Love their ships they do, but they are jolly glad to turn in their own right, a position she has held since 1890, when, at the age of ten years, she ascended the throne at the death of her father. She is thirty-eight years of age.

The dominating female figure of Europe to-day is a large, heavily-built woman, who is indifferent to the arts of her dressmakers and finds thorough pleasure in personal charge of the affairs of her country. But the Queen's face, with its strong chin and kindly eyes looking straight at you in sincerity and confidence is that of a wise woman.

The sovereign lady of Holland has a will of her own. She has the firm chin of the House of Orange, but she is, as they say, totally lacking in the well-known characteristic which gave the title of William the Silent to the most renowned of her ancestors.

It is, however, in the East Indies that Queen Wilhelmina has her real empire. It is larger than the German Empire. In 1910 the population numbered 42,000,000 souls. Batavia, the capital of the Dutch East Indies, has one of the finest harbors in the East, and the Dutch colonies are among the richest, if not the richest in the world.

Her Majesty is the richest sovereign in Europe in her own right, her income being enormous from the crown lands and from her vast colonies. That vast income is used for the benefit of her beloved Dutch subjects, in the way of public buildings of every kind—such as hospitals, theatres, lecture halls, gymnasiums, public bathhouses and so on, to say nothing of charming and numerous parks that rich and poor alike may enjoy. NEWSBOY A BATTLE HERO.

"Frog-Faced Tich" Proves His Gallantry as a Stretcher-Bearer.

One of the familiar characters of pre-war days in London was a street-Arab newsboy who sold papers outside one of the hotels most frequented by American visitors. Delighting in the nicknams, "Frog-faced Tich," he won the admiration of visitors as a master of repartee, varying his nightly refrain of "All the Winners" and "Orrible Murder" with ironical comments on the world's events and caustic replies to pedestrians who ventured to bandy words with him as they passed.

Persons who knew Tich Tapley in the old days would scarcely recognize him now in his khaki uniform, with a "crowned" ribbon on his breast, indicating that he has been twice awarded the prized Military Cross, says the Associated Press correspondent at the front. His comrades of the London Regiment, moreover, declare that if he had been awarded a medal on every occasion on which he has merited it, he would be covered with ribbon from head to foot of his diminutive body.

Too small to go into the army by the regular channels, Tich, after several trials, was accepted as a stretcher bearer in the London Regiment. At the front he quickly became one of the most popular men in the regiment. One of his officers, in a report to headquarters, said of him, "Cheerfulness, courage, devotion to duty, and disregard of danger are as much a part of his equipment as his haversack and his water bottle."

One of his officers wrote in a letter a short time ago: "His gospel, whether consciously or not, is the gospel of cheerfulness, and in practice it works out that his spirits grow lighter in proportion as dangers and discomforts grow heavier. His jests in time of stress provide just the electric spark that turns the hearts of men from gloomy pessimism into luminous defiance."

The ex-newsboy has the reputation from Lens to St. Quentin of being absolutely fearless. In his work as stretcher bearer he goes lustily about among the falling shells, always whistling a popular tune, with an ever-ready word of sympathy and encouragement for the wounded. He is generally looked upon as one who bears a charmed life, for he has never received even a scratch, and his very presence is regarded as a mascot.

Tapley won the second of his two decorations under heavy shell fire in the Chalk Pit, north of Loos, when, single-handed, he bandaged and carried to a safe part of the trench all the wounded of his own company and several from a neighboring battalion.

DRAFTING OF BRITISH WOMEN.

Government is Taking Matter Into Serious Consideration.

The man power bill has stirred up a revival of the suggestion that the Government conscript women for service in those branches of naval, military and industrial work which have not appealed to women, says a London correspondent. It is pointed out that a large number of women are available and competent to fill places occupied by men of military age.

The Government has taken the whole matter into serious consideration and is fully alive to the gravity of the problem. It is understood that a scheme is being evolved to deal with woman power. There is a general feeling that the time is arriving to make a greater use of the available woman power.

Lady Mackworth in dealing with the question of woman's part in the great struggle, said: "We have a plan to accomplish the desirable result and to obtain a maximum effort with minimum friction. We expect the scheme to be ready when the emergency arises. Grave difficulties will arise if woman's work is made compulsory. It is hoped to co-ordinate the three existing women's corps with respect to all arms of the service and the rates of pay. The woman's department has schemes to deal with the whole emergency. The main idea is not to ask women to enroll in large numbers and keep them on a waiting list but to ask them to volunteer in response to specific demands."

THE ENGLISH LINE.

"Stern and Sedate" are the Characteristics of the British Soldier.

The period we are now going through is one of great strain, but our advice to everyone is to feel and talk optimistically, says a United States writer. It is the English against whom the Germans are driving, and, as the Kaiser himself has put it, the English are "a very obstinate people."

In one of the finest passages of his essay upon Warren Hastings, Lord Macaulay speaks of "that stubborn English courage, which is never as stern and sedate as toward the close of some doubtful and murderous day." In those times we count great battles by weeks and not by days, but we do not doubt that the same pirit inspires the British soldiers. English, Irish, Scotch and Welsh, with Canadians and Australians to back them. They are not parade-stricken, they are not even unduly excited. "Stern and sedate" are the adjectives the English historian uses, and we adopt them now. The German soldiers are brave and unyielding, but they will never break the English line.

THE BATTLE SONG OF FRANCE.

How the Children Sang the Marseillaise in Their Captured Town.

There are many persons, by no means all of whom are French, who think that the Marseillaise is the very finest of all war songs. Certainly it is a great song of freedom as well as of France, and is associated historically with the progress of liberty among the nations. Youthful United States used it before The Star-Spangled Banner had been composed; new-born free Russia still sings it, scarcely less often than its own new national hymn. It binds together in the memory of Frenchmen a hundred thrilling scenes of their country's history; and to this rosary of patriotism new jewels are added as the great war goes forward. It is not easy to read unmoved the narrative of how, although sternly proscribed, it was sung recently in one of the invaded districts. A refugee told the story to the American novelist, Mrs. Dorothy Canfield Fisher:

We have tried our best to keep the life of French children what it ought to be. I remember last year Aunt Louise taught a group of children in our part of the town to sing the Marseillaise. The studio of my cousin Jean is at the back of the house and high up; and so she thought the children's voices could not be heard from the street. The mayor heard of what she was doing, and sent word that he should like to hear them sing. The news spread rapidly. When he arrived with the city council, coming in one by one, as if merely to make a call, they found the big studio full to overflowing with their fellow citizens—the old men and women who are the fellow citizens left there. Two or three hundred of them were there—the most representative people of the town, all in black, all so silent, so old and so sad. The children were quite abashed by such an audience and filed up on the little platform shyly—our poor, thin, shabby, white-faced children, fifty or sixty of them.

There was a pause. The children were half afraid to begin; the rest of us were thinking uneasily that we were running a great risk. Suppose the children's voices should be heard in the street, after all. Suppose the German police should enter and find us assembled thus. It would mean horrors and miseries for every family represented. The mayor stood near the children to give them the signal to begin—and dared not. We were silent, our hearts beating fast.

Then all at once the littlest ones of all began in their high, sweet treble those words that mean France, that mean liberty, that mean life itself to us:

"Allons, enfants de la patrie," they sang, lifting their heads back like little birds; and all the other children followed: "Against us floats the red flag of tyranny!" We were on our feet in an instant. It was the first time any of us had heard it sung and lorries, and the roads are strewn with rubber fragments. Now, rubber is scarce and valuable. The Army knows it, for everywhere it is confronted with boards saying:

"Place that piece of rubber in the sack. Thank you!"

These are some of the ways by which the soldier is reducing for himself and others future taxation.

The Sacrament of Sleep.

Thank God for sleep,
And, when you cannot sleep,
Still thank Him that you live
To lie awake.
And pray Him of His grace,
When He sees fit sweet sleep to give,
That you may rise, with new-born eyes,
To look once more into His shining face.

In sleep—limbs all loose-laved and slipt the chains—
We draw sweet-close to Him from whom our breath
Has life, in His safe hands we leave the reins,
In fullest faith trust Him for life or death.
This sleep in life close kinsman is to death;
And, as from sleep we wake to greet the day,
So, too, from death we shall with joy awake
To greet the glories of the Great Easy.

To His beloved healing sleep He gives,
And, unto all, awakening from sleep.
Each day is resurrection—a new birth
To nearer heaven and re-created earth—
To all Life's possibilities—of good
Or ill—with joys and woes endured—
Till that last shortest sleep of all,
And that first great awakening from Life's thrall.

Thank God for sleep!
And when you cannot sleep
Still thank Him for the grace
That lets you live
To feel the comfort of His soft embrace.

Caring for Watch.

A watch keeps more accurate time if always placed in an upright position. A small case for holding the watch upright on the dresser may be made from pasteboard and covered with cretonne. If the timepiece is wanted near the bed and the ticking is annoying, invert a tumber over the watch and the ticking will not be heard at all. A watch should be wound at the same time every night or morning to have it keep good time

A Little Wooden Cross.

No military medal may be mine,
A private's death-is listed, not acclaimed:
I fell too soon upon the firing line,
Yet of my loneliness I'm unashamed,
For now there stands supreme against the loss,
Upon my grave—a little wooden cross.

SALVAGE OF THE BATTLEFIELDS

VAST SUMS OF MONEY SAVED BY BRITISH TROOPS.

How Waste Has Become as Detested An Enemy as the German in Our Army.

Huge quantities of goods of all kinds, representing vast sums of money, are being salved daily from battlefields, roads, highways, railways, dumps, billets, ruined towns and villages.

Special corps of salvage men have been formed, whose duties consist solely in collecting, sorting, and distributing debris which even until quite recently was considered valueless and left unheeded. Bully-beef tins, old clips of cartridges, broken shell cases, empty ration boxes, petrol cans, rum jars, torn—often blood soaked—portions of equipment, damaged rifles, packets of revolver ammunition—multitudinous articles the mere tabulation of which would require columns.

The Poster Craze.

The latest innovation in the "battlefield economy campaign" is the erection of notice boards and hoardings urging saving on everybody's part. These notices make up for lack of artistic beauty in the directness of their appeal.

For instance, opposite the heap of rubble that is all that remains of the once famous church of Boesinghe may be seen a board surmounted by a wooden model of a twelve-inch shell. Beneath it in large lettering is this appeal:

"Shells were made for Fritz. Why not let him have them? Don't leave shells in the mud. Pick them up and pass them on to the gunners."

Somewhat closer to the line in the same sector is another notice:

"Hy!!! Pick up that clip of cartridges! The coat of one clip will billet four men for a night."

Every Little Helps.

On the side of a certain shell-pocked highway not far from Ypres ruins is a hoarding from which looks the head of a horse. The lettering runs:

"Don't leave those nails on the road. They may cause my death. Nails can be used again, you know. Put them in this box."

Speaking of horses, one may mention that even death does not end the animal's usefulness. The body is not buried until the skin has been carefully taken off. The pelt is then cleaned and sent off to a central collecting depot.

The rough pavement of France plays havoc with the tyres of motors and lorries, and the roads are strewn with rubber fragments. Now, rubber is scarce and valuable. The Army knows it, for everywhere it is confronted with boards saying:

"Place that piece of rubber in the sack. Thank you!"

These are some of the ways by which the soldier is reducing for himself and others future taxation.

The Sacrament of Sleep.

Thank God for sleep,
And, when you cannot sleep,
Still thank Him that you live
To lie awake.
And pray Him of His grace,
When He sees fit sweet sleep to give,
That you may rise, with new-born eyes,
To look once more into His shining face.

In sleep—limbs all loose-laved and slipt the chains—
We draw sweet-close to Him from whom our breath
Has life, in His safe hands we leave the reins,
In fullest faith trust Him for life or death.
This sleep in life close kinsman is to death;
And, as from sleep we wake to greet the day,
So, too, from death we shall with joy awake
To greet the glories of the Great Easy.

To His beloved healing sleep He gives,
And, unto all, awakening from sleep.
Each day is resurrection—a new birth
To nearer heaven and re-created earth—
To all Life's possibilities—of good
Or ill—with joys and woes endured—
Till that last shortest sleep of all,
And that first great awakening from Life's thrall.

Thank God for sleep!
And when you cannot sleep
Still thank Him for the grace
That lets you live
To feel the comfort of His soft embrace.

Caring for Watch.

A watch keeps more accurate time if always placed in an upright position. A small case for holding the watch upright on the dresser may be made from pasteboard and covered with cretonne. If the timepiece is wanted near the bed and the ticking is annoying, invert a tumber over the watch and the ticking will not be heard at all. A watch should be wound at the same time every night or morning to have it keep good time

The Paisley Advocate

PAISLEY, MAY 15th, 1918

—The Kaiser's peace programme still means a big piece of Russia or any other desirable portions of this good old earth that he can get a grip on.

—Lloyd George is still the man of the hour in Britain. The vote of 293 to 106, given in the House of Commons in favor of the Premier and his cabinet shows that democracy is making safe headway against aristocracy and militarism in the heart of the Empire, where these two elements of human society have flourished for ages.

—The educative articles that might profitably be inserted in any newspaper regarding the food problem of Canada—chiefly on producing and saving—would fill all the pages of THE ADVOCATE. When its all read and digested, however, it simmers down to this: Do all you can to grow food stuffs, and don't waste any. Are you doing your best? The boys "over there" are.

—President Wilson was invited to a banquet in New Jersey recently, and in his written reply gave expression to the following, which will apply to the political situation in this Dominion as well as in the U. S.

"The old party slogans have lost their significance and will mean nothing to the voter of the future, for the war is certain to change the mind of Europe as well as the mind of America. Men everywhere are searching democratic principles to their hearts in order to determine their soundness, their sincerity, their adaptability to the real needs of their life, and every man with any vision must see that the real test of justice and right action is presently to come as it never came before.

"The men in the trenches, who have been freed from the economic serfdom to which some of them have been accustomed, will, it is likely, return to their homes with a new view and a new impatience of all mere political phrases, and will demand real thinking and sincere action.

"Let the Democratic party in New Jersey, therefore, forget everything but the new service which they are to be called upon to render. The days of political and economic reconstruction which are ahead of us no man can now definitely assess, but we know this, that every program must be shot through and through with utter disinterestedness; that no party must try to serve itself, but every party must try to serve humanity, and that the task is a very practical one, meaning that every program, every measure in every program, must be tested by this question, and this question only: Is it just; is it for the benefit of the average man, without influence or privilege; does it embody in real fact the highest conception of social justice and of right dealing without respect of person or particular interest? This is a high test. It can be met only by those who have genuine sympathy with the mass of men and real insight into their needs and opportunities, and a purpose which is purged alike of selfish and of partisan intention.

"The party which rises to this test will receive the support of the people because it deserves it."

—Mr. Alex McKeeman, of Eden Grove, arrived back a few days ago from a prospecting trip to the west. He sold out his general store business at the Grove with the intention of going west, and has decided upon that plan for the future, but is not yet fixed upon a location. He went as far as Edmonton on his trip. It is likely he will leave with his family in about a month.

Former Paisleyite Honored in France

Word has been received in Brantford that Miss Helen Sheppard, daughter of Mr and Mrs F R Sheppard, formerly of Paisley, has been decorated by the French Minister of War "for long and faithful service on behalf of the French sick and wounded soldiers." Miss Sheppard has been more than two years in France serving as a nursing sister in the American Ambulance Hospital at Juilly, near Paris. The decoration consists of a bronze bar of two laurel leaves held together by a red cross.

Division Court

Judge Craig presided at Division Court in Paisley on Wednesday of last week. H Randolph vs Geo Clayton was a suit arising out of a wages dispute. Plaintiff sued for $20 25 and was given judgment for $6 13 and costs. Frank Stanley vs Chris Ernest, Jr., was another wages dispute; judgment for amount of claim, $9. John Scott vs Ira T Dudgeon, suit for balance of $30 on price of bull; judgment for full amount, without costs. A dispute between J W Brown and J Welchman over sale of a quantity of grain was settled out of court.

CARD OF THANKS

Mr Richard Atkinson and family desire to thank their friends and neighbors for the kindness and sympathy extended to them during the illness and since the death of wife and mother.

TURNER'S

Watch for Poverty Night, May 23.

W. H. DAVISON

Are you giving aid and comfort to the enemy?

Any householder in your neighborhood who has a garden plot, or who owns a piece of suitable vacant land that is not being put under cultivation in order to increase food production, is (though he or she may not believe it) giving aid and comfort to the enemy in restraining food production, as really as is the Submarine Commander who sinks an Allied ship laden with food.

The difference is only one of degree, not of kind.

Look around you! Look around you!

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.

Commercial life offers the great opportunities. Recent lady graduates of this school are earning as high as $1,000 per annum. The last application we received from an office man with some experience offered initial salary of $1800 per annum. Students may enter our classes at any time. Graduates placed in positions. Commercial, Shorthand and Telegraphy departments. Get our free catalogue.

W J Elliott Pres. D A McLachlan, Prin.

—The Canadian Government expects to raise $4,000,000 additional revenue from the new tax on tea and coffee, $9,035,796 from the tax on cigars, cigarettes and tobacco, and $3,000,000 from the stamp tax on matches.

CARGILL

(Intended for last week)

Mr. Fred Grice was up from Toronto over Sunday.

Inspector McCool paid an official visit to the school here last week and found things very satisfactory. He congratulated the Board on this school being the only one in his his inspectorate having all teachers holding first-class certificates.

Mr. E. Wittich spent the first of the week in Elmira and other points.

Mr. and Mrs. Hunstein spent Sunday with friends in Mildmay.

Rev. Mr. Homer, of the Anglican church, preached his farewell sermon on Sunday evening last. Rev. Mr. Homer has been rector of this congregation for about five years and was a good speaker, and will be missed in ministerial circles here. He goes to Montreal as curate. Our best wishes go with him and family to their new home.

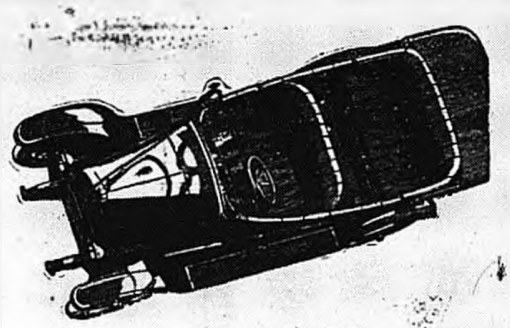
Mr. Zeigler and family, of Blyth, spent Sunday at Mr. J. H. Brown's.

Mrs. W. Grainger and children, of Stratford, are visiting at Mr. H. Brownscombe's.

Miss F. Newman returned from her home in Owen Sound, where she was called owing to the illness of her father, who died shortly after she arrived. We extend our symyathy to Miss Newman.

Mr. and Miss Ross and Miss L. Hettrick, of Wingham, spent Sunday with friends here.

The Methodists and Presbyterians withdrew their Sunday evening services and attended the farewell services in the Anglican church.



LOCKERBY

The silent messenger called at the home of Mr and Mrs M Maurer on May 3rd, and called to rest their third daughter, Elizabeth. The deceased had been an invalid since early childhood, and for three and a half years was bedfast. Her memory will linger long in the heart of the kind and loving mother who faithfully and tenderly waited upon the suffering one during all those years. The deceased was born in Waterloo Co., and her age was 30 years and 7 months. The funeral took place on Sunday afternoon, May 7th, Rev Mr Neilson of Paisley Baptist church conducting the services. Interment was made in Paisley cemetery. The pallbearers were Mr. Laysinger of Elmira, Albert Knechtel and Henry Ostoff of Hanover, Geo. Last of Elderslie. Besides the parents, three brothers and three sisters survive — Mrs. Henry Ostoff of Hanover, Mrs. Fred Green of Palmerston, Mrs. Geo. Last of Elderslie, John of Lovat, Edgar and Oliver at home.

—Rev. Thos. Wilson, pastor of Knox church, Walkerton for the past fifteen years, is severing his connection with that congregation at the end of this month. His resignation came up before Bruce Presbytery at the meeting in Paisley on Tuesday of last week, and was urgently opposed by representatives of the congregation. Mr. Wilson, however, also urgently requested that his resignation be accepted, and Presbytery finally and reluctantly consented to release him from the charge. Rev. R. M. Gale, of Pinkerton, was appointed interim moderator, who will declare the pulpit vacant on Sunday May 26th

Red Cross Shipment

The Elora Road North Patriotic League met at the home of Mrs. Alex Ewing on Thursday, May 4th, and packed 13 boxes for soldiers overseas, containing flannel shirts, socks, tooth paste, towels, soap, condensed milk, loaf sugar, soluable coffee, cake, etc.

PURDY'S LIVERY
Rates Reasonable, and every effort made to satisfy
F. PURDY

GERMANY'S RATIONS TO-DAY

When we see the quantities allotted to the German soldiers and civilian populations by the Food Controllers of the Central Powers, we can appreciate more fully how well off Canada and Canadians are.

The German Soldier

The standard ration of Bread is 1 lb., 5 oz. a day, which is increased in the front line to 1 lb. 10 oz., and the latter scale is the maximum given to young soldiers and to the troops engaged in strenuous work.

Meat or fish is allowed only for six days a week; on the seventh its place is taken by 5 oz. of flour.

The meat ration is 8¾ oz. of fresh, salted, or frozen meat, or 3¼ oz. of smoked or tinned.

When fish is given in place of meat the allowance is 8 3-4 oz. of salt herrings or a fixed weight of other kinds.

Troops in the front line may get up to 10 1-4 oz. of meat, but when they do it is taken out of the allowance for the rest.

The potato ration is 10 1-2 oz., but it may be replaced by a number of substitutes, such as rice or swedes.

The soldier is also allowed a pound of pickled cabbage, or, in its place, various quantities of bottled spinach, preserved lettuce, and so forth, or 4 3-8 oz. of cooking fruit.

The fat ration is 2 oz. of butter or tinned fat pork, but when this cannot be supplied its place is taken by 5 1-4 oz. of sausage or black pudding or 5 1-4 oz. of jam or 1 oz. of marmalade.

Cheese is allowed only on four days a month—1 3-4 oz. each time.

The daily allowance of sugar is 3-5 oz.

"Coffee" is given only on six days a week, and the 1-5 oz. which goes by that name is made up in nearly equal portions of real coffee, "malt or barley coffee," and chicory. The weekly allowance of tea is 1-15 oz. Cocoa is given only by doctor's orders.

The Civilian

The German gets his rations, as a German newspaper puts it, "if sufficient supplies are in the hands of the authorities." That important condition, as we know from frequent complaints, is often unfulfilled.

The nominal weekly allowance of bread varies from just over 3¼ lb. in Dusseldorf to 4 lb. 6 oz. in Dresden and Munich. In Berlin it is just over 4 1-4 lb. In some cases there is an additional weekly ration of flour—generally from 1 oz. to 3 1-2 oz., and also an ounce or two of cereal preparations like groats or malted barley.

The weekly allowance of meat is, up and down, about half a pound a head. In none of the cities has it exceeded 8 3-4 oz., and it sometimes falls as low as 5 1-4 oz. Where sausage is available in addition the highest allowance recorded is 3 1-2 oz. Where fish makes its appearance, it is generally rationed at less than 1 oz. a head weekly, and the allowance of eggs ranges from one to four per month.

The weekly allowance of potatoes is 7 lb. to 8 lb., with 2 lb. or 3 lb. extra in places for "heavy workers."

The weekly allowance of butter or margarine is rarely above 3 oz.

The cheese ration varies from 1 oz. to 4 1-2 oz., according to the supply.

The sugar ration is from 5 1-4 oz. to 8 3-4 oz. weekly, with an extra allowance for very young children. Jam, treacle or "artificial" honey is divided according to the local supplies. The rations are sometimes cut as fine as 7-10 of an ounce weekly.

"Coffee substitutes"—there is no mention of real coffee—are portioned out as they can be obtained sometimes in quantities of less than half an ounce a week.

Such as they are, the rations are often nominal, and the population does not receive anything like the full amount.

The Vorwarts mentions a commune which "received during the last six weeks one egg and a little German tea . . . Nothing else is provided but fresh vegetables . . . and the regulation 7 lb. of potatoes."—Reality.

LABOR SAVING SEEDING IMPLEMENT

A plow that plows, disks and harrows the ground at the same time has been invented and patented by an Iowa man, J. H. Rhomberg, of Dubuque. Three acres of land, it is claimed, can be put into perfect shape for seeding with the new plow to every one that can be prepared by the ordinary method of plowing first, then going over the land with a disk to cut up the clods, and finally with a harrow to pulverize and level the ground. The device is an attachment of several small, knife-like blades which fasten on to the plowshare. In ordinary plowing the earth is turned over in large chunks or slices. When the new attachment is used the knives cut the clods into ribbons and break them into fine soil. The fine soil falls off the plow into the furrow, making a perfect seed bed.

—The General Assembly of the Presbyterian Church meets at London on June 5th.

A Fight for Life

It has been fight or die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierre's, called "An-u-ric." You should promptly heed those warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as diabetes or stone in bladder.

To overcome these distressing conditions take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal take Anuric (double strength). You will, in a short time, find that you are one of the firm indorsers of Anuric.

Hamilton, Ont.—"For kidney ailments I have never known any medicine to equal Anuric. When I started to take it I was very miserable with lame back, pains in the cords of my neck and shoulders and all over my body. The water was high colored and offensive. All of these conditions left me after one week's use of Anuric and I consider it to be the greatest of all kidney medicines."—MRS. JENNIE CLARK, 79 Queen St. So.

Toronto, Ont.—"My husband suffered severely with pains in his back for three or four weeks. He commenced to take Anuric and in three or four days he not only looked better, but remarked that his back felt much better, and now he says that his pain has all gone. It is with pleasure that we recommend Anuric."—MRS. MARY RYAN, 54 Seaton St.

*Note that longest day's run was made on last day of the test.

N. B. The Canadian gallon being 20% larger than the American gallon, on which latter basis the above test was run, the miles per gallon figures should be increased by the same percentage to obtain in Canada the correct ratio of miles to the gallon.

Maxwell

D. A. LYON, Dealer
Paisley

You know, of course, that the Maxwell Motor Car is the long distance champion of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even approached that performance?

In a word, did you take this test seriously when you heard of it?

Or did you set it down as a "selling stunt" to give the publicity man something to talk about?

It's worth your while to read and to study the conditions under which that test was made.

You know that the American Automobile Association (familiarly known as the "A. A. A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A. A. A. supervision he must do absolutely as told and abide by the decisions of the Board.

That's why there are so few A. A. A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verily this was a "stock" Maxwell. Listen—

First: the inspectors disassembled the motor to see that no special pistons, valves, bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled under their own supervision.

As we had much at stake and the test was made in winter (November 23 to January 5) we asked permission to take certain little precautions against accidental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example:—They would not permit a rubber cover over the magneto—it wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight one from tank to carburetor to guard against a breakage from the constant, unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made on the same spark plugs with which all Maxwells are equipped.

So rigid were the rules, we were unable to carry a spare tire on the rear—it wasn't "stock." A telegram to headquarters in New York finally brought a special permit to carry a spare tire.

"It isn't stock!" "It isn't stock!"

That was the laconic reply of those A. A. A. inspectors to every last suggestion that called for anything but the precise condition of the standard, stock model Maxwell that any customer can buy from any one of 3000 dealers anywhere.

We are glad now—mighty glad—that the rules were so strict and so rigidly enforced.

Any other car that ever attempts to equal that record must do it under official supervision—and comply with the same terms.

And it will have to go some.

For Maxwell set the standard when it performed this wonderful feat.

Maxwell complied with those rules—and made good.

Every drop of gasoline and oil and water was measured out and poured in by the inspectors themselves. They would not even let our man pour it in!

Every four hours the car had to report at the official station for checking.

And it had to be there on the minute.

And every minute there was an inspector beside the driver on the front seat—two more men in the rear. One got out only to let another in—day and night for 44 days and nights!

There was one technical stop.

It is interesting to know the circumstances.

Dead of night—a driving storm—a cloudburst—suddenly another car appeared in the road ahead.

In his effort to avoid a collision the Maxwell driver stalled his motor.

At least the observers thought it stopped and so reported.

The car did not stop, however, so its momentum again started the motor (if it had indeed stalled) when the clutch was let in.

The contest board exonerated our driver on grounds that his action was necessary to save life.

That shows you how rigid were the rules—how conscientiously applied by the observers.

You who have owned and driven motor cars—you who know how small a thing may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will realize what a wonderfully well made car this must be to go through that test under those conditions—44 days—22,022 miles without stopping.

The exact amount of gasoline, of oil, of water used; the tire mileage, tire troubles, tire changes; the distance and the routes are matters of official record, attested under oath and guaranteed by the A. A. A.

(By the way, the average was nearly 10,000 miles per tire.)

Any Maxwell owner—or anyone interested may see those records.

And—here's the most wonderful part—though no attempt was or could be made for economy; the Maxwell averaged 22 miles per gallon of gasoline.

Some other car may, some time, equal some one of those performances. But to equal them all in the same test—**that car must be a Maxwell.**

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

WIRE WORMS AND THEIR CONTROL.

Wireworms are to be recognized as one of the worst pests of corn, and carry their destructiveness to wheat, oats, potatoes and many other crops. They are yellowish-brown larvae having hard polished skins, the bodies slender and cylindrical in shape, measuring from three-quarters of an inch to an inch in length. The most injurious form in Ontario prefers low, mucky or poorly drained soils, feeding on the roots of grasses, grains and the like. Two or three years are required for them to reach maturity, which accounts many times, for the damage done by this pest a year or two after sod has been turned under. The adult of the wire-worm is a brownish beetle which, from its habit of snapping its body up in the air, when turned on its back, is known as a "click-beetle," "skipping-jack" or "snapping-beetle."

Where They Live

Early in the spring these beetles come out from the soil and soon lay their eggs in sod land or land thickly overgrown with grass. These eggs hatch into tiny wireworms. It frequently happens that, during the first year, the young worms feed upon sod, that has been turned under, and do not do their greatest harm to the cultivated crop until the second season. They require about three years to turn into beetles. Towards midsummer of the year in which they become full grown they form little cells in the soil in which they transform to the pupa or resting stage. About a month later they change into the beetles but stay in the ground until the following spring.

Control Measures

Susceptible crops like corn, potatoes or root crops should not be planted after plowing up grass sod, especially if wireworms are known to be present. They do not thrive well in clover land and so this crop is a good one to use on infested soil. If wheat is going to follow infested corn land it will be best to have the land well tilled as soon as the corn is removed. Plowing kills many worms by destroying their food supply and preventing them from preparing suitable quarters for the winter.

Inasmuch as many of our worst cutworms live in poorly drained soil it will be well to have such land tiled.

The use of commercial fertilizers has a tendency to overcome wireworm injury. It will not kill the insect but will aid the plant in overcoming its work. It is sometimes advisable to drain land and add lime in order to make it possible for the clover to establish itself, and this has given rise to the impression that lime itself kills wireworms. The action of the lime is simply to change the physical character of the soil which makes it unfavorable to these pests.

TEACH BOY TO BE HANDY MAN

The woman put down the magazine she had been reading and addressed herself to the family in general.

"There," she cried, "it says exactly what I have been thinking for ages and ages and never had sufficient sense to write about."

"What is that?" inquired her husband sleepily.

"It says that boys should be prepared for matrimony exactly as girls should," replied the woman. "It says that they should have a course of training in putting up pictures, in doing simple repairs to the plumbing, in taking care of the furnace, in hanging curtains, making shelves and doing other carpentering work, just as girls should be taught how to cook and keep house."

At this her husband looked self-conscious and he resumed his reading with an ostentatious air of absorption, so that his better half was fain to continue her remarks to the more receptive sister who sat by.

"Especially when one lives in the country should a husband have had some manual training," she went on. "For instance, last week we found it impossible to turn off one of the taps that fills the bathtub. A full stream of water ran from it all day. I telephoned Walter of the tragedy and he replied that I was not to bother for he would fix it as soon as he came home.

"When he reached home that evening he found that he could not do any more to check the water than I had done, and so he sent a plumber out from town the next morning.

"The plumber examined the leak, said that the washer on the tap had worn out, and that if I would give him a washer he would repair it at once. But I had no washer—what is a washer, anyway? And so he had to go back into town to get one. He returned two hours later, put on the washer, stopped the leak and sent us a bill for $7."

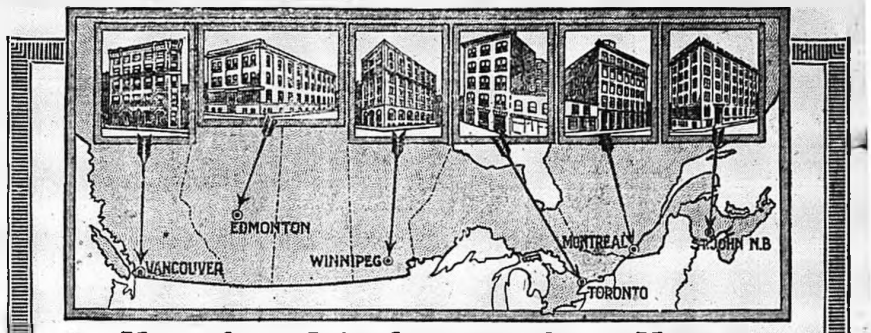
"But it was a peculiar sort of washer," interrupted her husband apologetically. "If it had been just a plain washer I could have done it."

His wife disregarded this explanation. "Then the laundry tubs became stopped up," she went on, "and though I worked at them with a hatpin and the poker, I could not open them. The plumber had to come out from town again. He brought with him a long stick with a rubber cup on the end of it, placed this cup over the vent in the tub, pressed, and lo, all was well. The bill for this piece of work was $3.50.

"I wanted a simple shelf put up in the bathroom and the carpenter who put it up charged $2.50 for that job. Sometimes I wish that I had married a carpenter or a plumber. It must be lovely to have a man who can use tools constantly in the house."

And as for the woman's husband, he put aside his book impatiently and arose. "Well, get me the nails and the boards and a hammer and I'll make that window-box for you that you've been pining for," said he.

Looking for a Farm?



When you are selecting a farm that you expect to make a permanent home, try to get in as many of the following requirements as possible: A situation for house and barn high enough to give good drainage and a sightly view. A running brook for watering stock, and for an ice dam. Good soft drinking water and plenty of it. A woodlot and orchard. A large well-planned house and barn. A retired situation, but with good neighbors; not too far from church, school or railway station. If you can find one with all or most of these conditions, buy it quickly and settle down for life.

War-Time Economy.

"Aw'm awa noo, Sandy. Do ye want onything frae the toun?" asked the goodwife as she lifted the reins from the horse's back.

"Sin snuff's dune, an' Aw wad like ye tae fetch me half an ounce," replied Sandy.

"Nay, nay! I canna allow sic extravagance!" exclaimed his wife. "Have ye no heard o' the increased price o' sneezin'? Juist tickle yer nose wi' a straw instead."

How Canada's Greatest Shoe House Supplies the Nation's Footwear

CONSIDER the amount of time and the infinite care you take when buying footwear to suit your own taste in regard to style, size, etc. Multiply your own individual needs by millions and you will get an idea of the immense task which confronts the makers of Canada's footwear, and the size of the organization it is necessary to maintain for that purpose.

The buying of a single pair of shoes is an event that occupies a person but a few moments two or three times a year—but to meet the accumulated demand of a nation's individuals, it requires the whole resources of a gigantic industry. Ames Holden McCready are truly "Shoemakers to the Nation." It is a title justified by their size and the importance of their business.

It may be a revelation to many Canadians to know that to supply them with proper footwear, this firm maintains huge factories each with many acres of floor space, and hundreds of intricate, almost human, machines—facilities and equipment sufficient to turn out 8,000 pairs of shoes every working day.

It requires a small army of workpeople, clerks and warehousemen, in addition to executives, buyers and travellers.

It requires much study and thought to plan styles and models of Men's, Women's and Children's shoes in their various grades and styles.

In order to secure the best results in the production of various kinds and grades, it is also necessary to specialize.

For example; Ames Holden McCready factories are separated into three distinct factory units, each a complete factory in itself.

One unit of our factories is devoted entirely to the manufacture of high grade footwear for Women and Children. Consider the great variety of styles in women's footwear, including high-top boots, oxfords and pumps.

Consider the many different patterns and lasts, the varieties and shades of leather and finish—then you will see what a great number of models are required to meet the widely different needs of Canadian women in the cities and towns and also in the country districts.

Another factory unit is devoted to making only the better grades and styles of Men's Shoes—shoes for professional men, lawyers, doctors, and all business men, whose occupations permit the use of fine leathers such as calf and kid.

The third unit specializes in sturdier types of shoes for heavy wear and rough usage. Shoes for farmers, lumbermen, miners, trainmen, and workpeople who require a heavier and more solidly-constructed boot.

In addition to the work of manufacture—the requirements of distribution are also tremendous. A manufacturer must not only make his goods economically and well—but he must deliver them—DISTRIBUTE them. Therefore, in addition to a force of 60 travellers constantly visiting the retail trade from coast to coast, Ames Holden McCready maintain, in the centres of population throughout Canada, immense stocks of boots and shoes ready for immediate shipment to the retailers in each section.

These warehouses are located in the following cities:

St. John, Toronto, Montreal, Winnipeg, Edmonton, Vancouver

Years of experience has taught us the kind and styles of boots which are required in each locality. No matter in what part of Canada you reside, no matter what particular kind of shoe you require, your retail dealer can procure it for you without loss of time.

And that is the reason why you will find, even in the outlying districts, that dealers selling Ames Holden McCready goods are up-to-date with stocks that are fresh and new, and which reflect the latest shapes and styles.

When you see the A.H.M. trade mark on a shoe, you know that not only is that mark an endorsement by the largest shoe concern in Canada, but that being the product of a highly organized industry, the shoe you are buying represents the utmost in value, style and wearing qualities which can be obtained at the price.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

The Treatment of Asthma.

The most common form of this disease is bronchial asthma, which shuts up the bronchial tubes and prevents air from moving in and out as it normally does.

There may be a spasm of the tubes, or the lining mucous membrane may be so swollen as to fill up the cavity of the tube.

Miners, potters, grinders, and millers suffer from this disease, their tubes becoming choked with dust while at their work.

Those who have troubles with their nose, enlarged tonsils, and certain forms of heart and kidney disease, may also be asthmatic; and children have it in the form of spasm of the larynx, when a gland in the neck called the "thymus gland" is diseased.

In hay-fever the mucous membrane of the nose is often so swollen that no air will pass through, and this swollen condition may extend down the throat and into the lungs, causing almost a continual asthmatic spasm.

Asthma is usually worse at the sea level and in a moist atmosphere.

A coming storm at the sea level, or unusual humidity, will bring on an attack.

So, also, will any unusual experience acting through the nervous system, such as anger, grief, bad news, worry, or fatigue.

With miners and those who inhale dirt and dust, the smaller bronchial tubes may become filled up and useless, asthma being persistent and more and more troublesome.

The object of treatment will therefore be to remove this acrid material from the tubes, reduce the swelling of the mucous membrane, and loosen the spasm.

There are remedies which are intended to relax spasm—these are mostly gases and vapors and they include compressed air, oxygen, vapor of chloroform and ether, and the powerful vapor of nitrite of amyl.

Cigarettes containing arsenic, belladonna, and stramonium, may also be smoked with advantage.

Useful also, are preparations of opium, the bromides, and chloral, though these are all dangerous.

To relieve the swelling of the mucous membrane, physicians often give quinine, strychnia, antimony and lobelia and some of the forms of electricity are also sometimes employed.

Serums and vaccines are coming more and more into use, as means of treatment, and there are those who think they have obtained good results from their use.

We must not forget that the mental influence has much to do with the effect of medicinal substances and that a medicine which is skillfully advertised, or is recommended by a friend, may have no intrinsic value.

Change of residence is the most valuable means of treatment with which I am familiar, and in making the change it is always well to get the advice of some one who is familiar with the influence of climates and who has no personal end to gain.

QUESTIONS AND ANSWERS

M. S.—Am unable to close my fingers on account of stiffness in the tendons resulting from a cut followed by blood poisoning. How can I get rid of the trouble?

Answer:—Your trouble is one which very often follows infected injuries. Such troubles can sometimes be relieved by a course of massage with manipulation of the stiffened tissues. There are various forms of apparatus which are made for this purpose.

A. B.—Is there any cure for hardening of the arteries, and what is the cause of this trouble?

Answer:—If you will send a stamped and self-addressed envelope, a copy of an article on this disease will be mailed you, which will give you a full account of the trouble.

Veal and boiled rice can be used by lining a baking dish with the rice, then filling it with chopped veal seasoned with onion, parsley, salt and pepper. Bake until brown.

HUNS GIVE FULL VENT TO HATRED

ESPECIALLY ON THE BRITISH NAVAL PRISONERS.

Seamen Subjected to Unbelievable Tortures by Captors Who Laugh At Their Sufferings.

Horrible as are many of the tales which have been published of German brutality to prisoners of war, there are many others still more harrowing if they could only be printed. And the worst tales of all could be told of the Hun treatment of naval prisoners. Fortunately these prisoners are comparatively few in number, but the Boche hatred of their enemies vents itself, for reasons which probably seem good to them, in greatest measure against the British navy. The firing by U-boats upon helpless crews struggling in the water or escaping from torpedoed vessels is nothing to their vile treatment if prisoners taken at sea.

I have been permitted to read some letters from English seamen which somehow have escaped the eyes of the German censors, says a war correspondent. Some of the stories one would not dare to quote. They are horrible beyond description.

The filthiest of stables or vermin infested cow sheds are good enough for the "English swine" from the sea, who have been the means of bottling up the German fleet and have stopped all commerce for Germany on the sea routes of the world.

Guards Laugh as Men Die.

Were it not for the parcels of food sent from England by the Prisoners' Aid Society they could not possibly live, and even the best of that food often never reaches them. To complain is to risk punishment for insubordination. Sentries and guards are encouraged by their officers to punish summarily, without any charge or sending them up for court martial, which is always a farce anyway. And those sentries, who would seem to be men selected for their lack of feeling, are never slow in taking advantage of opportunities that present themselves of inflicting the most inhuman tortures on their prisoners.

Picture a cell catching fire. Picture the prisoners beating on the bars for release. And picture the sentry, with sardonic grin, "sticking" them through the bars with his bayonet. That is what actually happened to two men. And their deaths were officially recorded as having been due to asphyxiation.

It recalls a story I recently heard in the American Y.M.C.A. Eagle Hut, which a wounded Canadian soldier told of a brutal Hun who killed a helpless wounded English soldier by sticking his bayonet again and again into his body, laughing and gloating over the blood as it dripped from the blade.

Forced to Make Munitions.

The naval prisoners of war are forced to work in coal mines, labor for which they are totally unfitted. Dislocated wrists and broken limbs are not infrequently the result. But what do the German slave drivers care! The class of work, however, to which they delight in putting the naval prisoners is the making of munitions. Naturally they rebel. But it is of no use; for refusal means for them one of the most terrible of punishments, or tortures—"the tree"—a method of crucifixion which recalls the days of the Inquisition, when, after being tortured by the rack until unconscious, the unhappy prisoner was revived to go through the torture all over again.

Here is how the punishment of "the tree" is described in plain and simple language in a prisoner's letter home, and which is vouched for by others who know as being a quite unexaggerated picture:

"A big party of Uhlans rode into the camp and surrounded the men (who had refused to work on munition making), and started pushing and shoving them about, and digging them with their rifles. The officer in charge, who could speak English, told the men that they were only prisoners of war, that they would have to put up with what they could get and do as they were ordered. He gave them five minutes to get to work or he would order them to be shot.

The "Tree" Punishment.

"The men were literally starving, so that nearly all gave in. They were marched back to work, which they had to do with nothing to eat until eight o'clock at night.

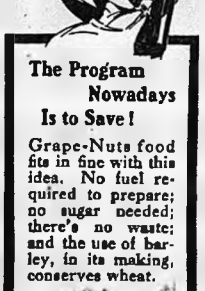
"But thirty-four men remained on the parade ground, refusing to make shells to kill their own people. They were not shot, but far worse. The officer sent them into the wood and ordered them to be tied to trees. Some were tied up, crucifix fashion; some were hung by one leg or one arm; some were made to stand on stools while their hands were tied to trees above their heads. Then the stools were kicked away from under them, and they were left hanging at the mercy of the mosquitoes, and the sentries who came around prodding them with their bayonets.

"After a time the German captain came round to view his glorious work. Finding one of our fellows in a faint, he raised his head and punched him in the face. Then he ordered him to be cut down, and he fell in a heap on the ground. Left lying there till he came to, they tied him up again.

"After two hours of this treatment the prisoners were marched back to camp and put in a barn without either food or blankets. For three days this treatment of 'he tree' was continued. The men were slowly dying of agony until we saw there was no use for them to stick to it any longer; so we advised them to give in, as they had done their best and it was no use going through all such unnecessary torture."

Johnny, Get Your Hoe.

Mr. A. Barnstead, organizing secretary of the National Committee on Food Resources of Nova Scotia, has sent the following, which was composed by Mr. George E. Graham, manager of the D.A.R., a subsidiary company of the C.P.R., and was sung with good effect at a public meeting held recently at Kentville, N.S.:



Johnny get your hoe, get your hoe, get your hoe,
Make your garden grow, make it grow, make it grow,
Plant your seeds from sea to sea,
Let them work for liberty.
Hurry right away, don't delay, start to-day,
Forward to the land with a right willing hand,
So we'll help defeat the Hun.
Now we've got him on the run.

Over there, over there, over there,
Send the food, send the food, over there,
For our brave boys need it, our brave boys need it,
The calls are coming everywhere.
So observe and preserve
Save the food, save the food, and conserve,
So we'll help win the cause of freedom,
And we'll plant, save and send, till it's over, over there.

Announced.

Kirsty Macdonald, who lived in a remote Highland parish, had a visit from her Edinburgh nieces, who were to spend a week or two with the old lady. So she determined to show them off on Sunday at the village kirk of Lochaber. The young ladies were costumes of the purest snowy white. At one point of his sermon, the minister, in speaking of the angels of heaven, said: "And who are they in white array?" To the consternation of the congregation, Kirsty said: "It's ma two nieces, sir, from Edinburgh."

Cream adds to the food value of baked apples.

The Program Nowadays Is to Save!

Grape-Nuts food fits in fine with this idea. No fuel required to prepare; no sugar needed; there's no waste; and the use of barley, in its making, conserves wheat.

Grape-Nuts

is economical, nourishing and delicious. Try a package.

For the Spring Wardrobe

Simple as can be is this dress for the kiddy. McCall Pattern No. 8128, Child's Dress. In 5 sizes; 2 to 10 years. Price, 15 cents.

This is a particularly nice model for the spring coat suit. McCall Pattern No. 8130, Misses' Coat Suit. In 3 sizes, 16 to 20 years. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

GIRLS! WHITEN SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

Increased Acreage in West.

Ample evidence that the farmers in the great grain growing areas between the Great Lakes and the Rockies are responding whole heartedly to the government's appeal for increased production, is contained in a detailed report of farming operations in Manitoba, Saskatchewan and Alberta received at the head office of the Canadian Northern here to-day.

It is pointed out that the late fall in 1917 and the early spring of this year have compensated largely for any shortage in farm labor at this critical time. Recent reports to the Canadian Northern indicated that the new breaking along its lines would be between three-quarters of a million and a million acres, and that sufficient fall ploughing had been done to facilitate early operations this year. The report just in from 238 points, shows that up to the week ending April 12th, there was pronounced activity throughout all districts served by the lines of the Canadian Northern in the west. The condition of the ground was given as good, there being not a single complaint in respect to the state of the soil.

Potatoes do not stain the hands if peeled when quite dry, and not thrown into water till afterwards.

Keep Minard's Liniment in the house.

ISSUE No. 19—'18

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers —It's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

When the linings of boots or shoes are worn through in the heels, use surgeons' adhesive plaster. Cut one piece large enough to cover both sides of the heel, warm slightly and press firmly in place. This also helps in shoes that slip at the heel.

Minard's Liniment Co., Limited.

Dear Sirs,—Your MINARD'S LINIMENT is our remedy for sore throat, colds and all ordinary ailments.

It never fails to relieve and cure promptly.

CHAS. WHOOTEN.

Port Mulgrave.

When there is too much icing for the cake put it on plain soda crackers. This makes a good sweet cake for the children.

Ask for Minard's and take no other.

Excellent pancakes are made of rye meal.

To revive patent leather rub well with a soft rag soaked in olive oil and milk, and polish with chamois skin.

Soldiers of the Land.

World in your keeping,
Soldiers of the Land.
Battlefields are yonder
Where the corn ranks stand!
To the Harvest Country—
Steady heart and hand,
And strength to the toilers for the harvest!

Patriots of the home fields,
To sun bright battle led,
With rain and light far bringing
A blessing to the bread;
By hands of the toilers
The world's great table spread—
A world to bless the toilers for the harvest!

MONEY ORDERS.

Send a Dominion Express Money Order. They are payable everywhere.

For White Shoes.

Now that the season for white shoes is again with us, keep a piece of art gum handy, as it is fine for taking off dirt, nor does it injure a shoe the least, it being so soft it wears itself away as it cleans. It will also remove spots of dirt from various fabrics.

Minard's Liniment used by Physicians.

A maple sugar sauce is excellent for puddings and waffles.

"Have a heart that never hardens, and a temper that never tires, and a touch that never hurts."—Dickens.

A Cure for Pimples

"You don't need mercury, potash or any other strong mineral to cure pimples caused by poor blood. Take Extract of Roots—druggist calls it "Mother Seigel's Curative Syrup—and your skin will clear up as fresh as a baby's. It will sweeten your stomach and regulate your bowels." Get the genuine. 50c. and $1.00 Bottles. At drug stores.

WOMAN'S NERVES MADE STRONG

By Lydia E. Pinkham's Vegetable Compound.

Winona, Minn.—"I suffered for more than a year from nervousness, and was so bad I could not rest at night—would lie awake and get so nervous I would have to get up and walk around and in the morning would be all tired out. I read about Lydia E. Pinkham's Vegetable Compound and thought I would try it. My nervousness soon left me. I sleep well and feel fine in the morning and able to do my work. I gladly recommend Lydia E. Pinkham's Vegetable Compound to make weak nerves strong."—Mrs. ALBERT SULTZE, 608 Olmstead St., Winona, Minn.

How often do we hear the expression among women, "I am so nervous, I cannot sleep," or "it seems as though I should fly." Such women should profit by Mrs. Sultze's experience and give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial.

For forty years it has been overcoming such serious conditions as displacements, inflammation, ulceration, irregularities, periodic pains, backache, dizziness, and nervous prostration of women, and is now considered the standard remedy for such ailments.

Cost more than twice as much as all the combined $2 attractions now showing in America.

Critics proclaim it the most astounding achievement of the ancient or modern stage

New York Herald: "'The Birth of a Nation' is to 'Intolerance' what the old one-reel motion picture is to the modern Feature Film.

New York Evening Post: "From the standpoint of sheer artistry, D. W. Griffith's 'Intolerance' may be regarded as the highest achievement the camera has ever recorded."

"New York Evening Mail: Never before has the American stage witnessed so stupendous a spectacle."

Since "The Birth of a Nation" this is the first and only production by D. W. Griffith.

TENTH CON. BRUCE

It is our sad duty this week to record the demise of one of the 10th of Bruce's most esteemed citizens in the person of Mrs Richard Atkinson, who departed this life on Sunday, May 5th. Up to ten years ago the deceased had always enjoyed good health, but sickness overtaking her about that time, it left her that ever since she had not been in very good health. While no doubt suffering much pain at times she bore it silently and attended to the household duties devolving upon her until shortly before her death. She was a member of the Baptist church, and although not able to attend at all times she was always interested in all that pertained to the welfare of the church. The funeral service was conducted by her pastor, Rev Mr Buckborough, who frequently visited her during her illness. The deceased, whose maiden name was Katherine Kennedy, was born in 1861 in the county of York. In 1883 she married Mr Richard Atkinson of the same county, and resided in that neighborhood for 23 years, afterwards locating in Bruce where she resided ever since with the exception of a short time which was spent in Port Elgin. A family of six children blessed the union, all of whom are living: Mrs Edgar Anness, 10th Bruce; Angus, of Wingham; Burt, of Toronto; Pte Roy Atkinson, of the 160th Batt, in England; Gladys and Zelta, at home. After the service at the house her remains were laid to rest in Stark Vale cemetery. The bereaved family and friends have the sympathy of the entire community, and a large number turned out to pay a last tribute of respect to the departed. Friends were present from Hamilton, Edgeley, Toronto, Unionville and Embro.

CASTORIA

GLAMIS

Watch for Poverty Night, May 28th.

Mr Dan McKinnon and family, of Ripley, visited at Mrs Gilchrist's on Saturday.

Mr and Mrs Kirktown, Miss Pearl and Alex motored to Markdale on Saturday, and will spend a few days with friends there.

Mrs Woodstock, who spent the winter with her daughter, Mrs Macklam in Ripley, returned on Sunday and will spend the summer at her home here.

Mr Hudson, of Saskatchewan, was calling on friends in the village last week.

Mr Alex McDowell was laid up with a sore hand last week.

Mrs Brockell spent a few days with her n...er, Mrs McKay, at the home of the late Mr Farquharson.

Mr Alex McKeeman, who is back from touring the west, called on friends in the village last week.

Quite a number from here attended the funeral of the late Wilfred Moffatt on Sunday afternoon. Much sympathy is felt for Mr and Mrs Moffat and family in their sad bereavement.

Thursday, the 23rd, is packing day for the Red Cross Society. Would like all articles in by Dinn.

The funeral of the late Mr Farquharson was held from the residence to Kincardine cemetery. His son from Saskatchewan arrived in Kincardine on the late train Friday night and met the funeral there.

FOR FLETCHER'S
CASTORIA

SECOND CON. ELDERSLIE

Watch for Poverty Night, May 28th.

Henry Schmidt had the misfortune to lose one of his working horses last week.

W J Allen went to Toronto on Saturday with a car load of cattle.

Hughie Campbell visited friends on this con on Sunday.

Mrs Rus Maxwell, who has been under the doctor's care for the past week, is able to be around again.

Miss Mary Allen has been laid up with an attack of tonsilitis.

Thos Snaith, jr, is getting things in shape to improve his barn this season.

Mrs Stewart of Cainsville, Mrs Kitchen of Brantford, sisters of Mrs A Dawson, also her niece and nephew, Mr and Mrs J Colwell and little son Frankie of Norwich, motored up and spent Sunday week at the Dawson home.

The seeding operations in this district are fairly well under way. If the weather is fine this week there will likely only be a few of the evening farmers who are not all finished up.

A T Lillico, son of Mr and Mrs A Lillico of this con, has passed his final exam at Osgoode Hall. Congratulations. Well done, Artie. Hope you will look out for fair play for your 2nd con friends.

The farmers here had broad sunny smiles on Saturday last as they returned with well filled purses after delivering their winter fed cattle.

Children Cry
FOR FLETCHER'S
CASTORIA

CARDILL

Watch for Poverty Night, May 28.

Rev. Perdue of Walkerton preached in Holy Trinity Church on Sunday afternoon.

Mr E Wittig spent part of the week in Elmira, Galt, and Toronto.

Our Minstrels put on a show at Allen Grove last Friday night and played to a crowded house. The proceeds, which amounted to over thirty dollars, goes to aid the Red Cross. They were served lunch at the end of the program at the home of Mr Herb. Pearson.

Death claimed one of our eldest and a respected citizen on Sunday afternoon when Mr Geo. Keyes passed to his reward, at the grand old age of ninety-one years, two months and twelve days. The late Mr Keyes has been gradually weakening for the past two years, but has always been able to go about. Sunday morning he was up as usual partaking of breakfast and dinner. After the latter he laid down for a nap which proved to be his last, the end coming peacefully while he slept. Mr Keyes has lived on the farm where he died for some sixty years or more, coming here from Frankford, Ont., where he was born. He was an English churchman, and loyal Orangeman, and was always to be found in the ranks on the twelfth until the last three or four years. Two daughters—Mrs Hilborn of Fullerton Calif., and Mrs P Clark, of Malta, Montana, are the only members of the family remaining. His wife died some forty years ago, and several of his children have also preceded him to the great beyond. The funeral service was held in Holy Trinity Church, and interment took place in the English church cemetery, Garland L.O.L. being in charge.

Quite a number from here attended the funeral of the late Wilfred Moffatt at Narva on Sunday last.

ELORA ROAD NORTH

Watch for Poverty Night, May 28.

In our last week's correspondence we were wrong in saying that Mr Stuart Winch had been notified to report for service. Stewart received no call but went to London and enlisted of his own accord, getting twenty days' leave which expires on the 16th of this month.

Mr Jas Bryce has been notified to report at London this week.

Miss Mina Brown, of Toronto, visited at Mr J W Brown's last week.

Farmers are through seeding with the exception of those who are putting in a large amount. A smaller acreage than usual has been sowed this year.

CANTIRE

Seeding operations have been held up by Sunday's rain. Although some are through there is a great deal still to be done. The ground is in the best condition in years, and with favourable weather grain should make a rapid growth.

Mr and Mrs John A McIntyre and family from Arran were visitors Sunday week at Mr Angus Bell's. They made the trip over in their new auto.

Mr and Mrs Harry Winch motored up to Barrow Bay on Tuesday of last week to attend the funeral of Mr. Winch's brother of that place.

We are sorry to report that Mrs. John Johnston is not enjoying good health.

Blackburn Bros. are erecting a building at the rear of their dwelling to serve as a woodshed and garage.

Rev and Mrs Wilson of Salem have been visiting members of their flock in this charge.

Misses Margaret and Isabel McKay are now enjoying a well-earned rest after a strenuous term at Chesley High School. These Cantire girls are always top-notchers at exams in the school.

Barn and Silo Roofed with Brantford Asphalt Roofing.

Resists Fire, Sheds Water, Wears Long

Flying sparks and embers from a burning building often cause roofs near by to catch fire, especially in a dry, hot season. Under like conditions, roofs covered with

Brantford Asphalt Roofing

are in no danger from flying embers, because any that fall on Brantford Asphalt Roofing die out harmlessly. Build a bonfire on a roof of Brantford Asphalt Roofing and the fire will not spread and the boards underneath the roofing will be protected in a surprising manner.

If a fire starts in the interior of a building Brantford Asphalt Roofing acts as a retardant and keeps the fire from spreading. Fire chiefs and insurance companies endorse its use in the most congested cities.

Brantford Asphalt Roofing does not absorb water, but sheds the heaviest rain with ease. Acid-proof and alkali proof. Reliable, durable, economical. Three weights—60 lb., 70 lb., 80 lb. per square.

Brantford Rubber Roofing
is the same quality as Brantford Asphalt, but has a smooth, rubbery surface instead of the sand. It is particularly suitable for verandah decks and floor coverings. Three weights—40 lb., 50 lb., and 60 lb. per square.

Standard Mohawk Roofing
is made of the same materials as Brantford Asphalt Roofing, but is lighter in weight. A thoroughly reliable roofing at a low price. Tested for years and has given entire satisfaction. Sanded on one side. One weight—40 lbs. per square.

Mohawk Rubber Roofing
The same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunk-houses, camp sites, even dugouts in the trenches. 35 lb., 45 lb., and 55 lb. weights.

Leatheroid Roofing
Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb., and 55 lb. weights.

Samples of any of these roofings and prices will be furnished on request.

D. H. COOPER

—An eclipse of the moon, partially visible in Ontario, takes place on June 8th.

—Doug Cottrill, late of the Royal Bank staff, has joined the 60th Battery of artillery at Guelph, and was home over Sunday. On Saturday evening about forty of his old friends on the 8th of Bruce motored over to his home on Clyde St., and presented him with a gold wrist watch, and spent a few hours very pleasantly. Mr. McCauley, a returned soldier, was present and acted as chairman. Mr. Jas. Pace read an address and the presentation was made by Mr. Alex Russell.

Death of An Old Resident

A quiet, industrious life was ended quite suddenly on Monday evening, when Mr. William John Watson passed away after an illness of only a couple of days, from obstruction of the bowels. The deceased was a son of the late William Watson, and was born in Vaughn Tp. over 67 years ago. The family came up to this part in 1854 and settled on the Elora Road south, on the homestead now occupied by Robert and David Watson. The deceased was a steady, thrifty farmer, and after acquiring a competence came to live in Paisley twelve years ago. In religion he was an Anglican and in politics a Conservative. He was unmarried, and survived by four brothers—Andrew, James, Robert A. and David; and three sisters—Mrs. E. Majury, Mrs. Blough and Sarah Ann. The funeral took place this Wednesday afternoon to Stark Vale cemetery.

Predicts a Bad Year

Our former townsman, and weather prophet of to-day, Mr. J. R. Bowes, in a letter to The Advocate briefly sums up his predictions for this summer. He says: "I expect to see a positive famine in Europe by this time next year. This is not going to be a good year for Canada. Heavy frost in June and August and very dry fall, so short grass. The drouth in our great west is going to be a killer."

Who Is to Pay for Returned Sugar?

Those who compiled the regulations as to holding of sugar made no provision for paying for the excess holdings that are to be returned to the dealers, and the latter find themselves not in a position to refund to householders the money to cover returns. As a carload of sugar was not long ago disposed of by one local mercantile house, it can be understood how they would be embarrassed by the return of say a half or three-quarters of that quantity. There has apparently been an oversight on the part of the authorities in respect to this point in the sugar schedule. If the merchants are to be put to the trouble of handling the sugar over again without pay they should not be required to do the financing as well. At this moment it appears as if the Food Control department might with advantage to all parties allow all to keep their sugar on hand, but report the quantity to a local officer, and later, if the Controller decides to collect these holdings that could be done readily.

I. S. CRUICKSHANK, the Tailor

—Miss Edna Hamilton visited her sister Miss Jean at Walkerton for a week.

—Mrs. Robt. Chalmers, of Port Elgin, spent a couple of days last week visiting her Paisley friends.

—Miss Mina Brown, who was home from Toronto for a few days' visit, left on Thursday for Calgary.

—Miss Mary McTavish, formerly of Elderslie, has returned to Chesley after spending a year in Toronto.

—Dr. Houston will be in Hamilton from Monday to Friday of next week, attending the Medical Association and other meetings of the curative fraternity.

—Mr. Armbrust, the new proprietor of Fisher's mills, was over from Cobalt for a couple of days this week. He intends being here permanently in a couple of months.

—Mrs. Robt. Brown has been in Walkerton hospital for a couple of weeks, after having an operation which was performed by Dr. Houston, assisted by Drs. Gage and Laird.

—The following is the report of work done by the Lockerby Red Cross workers since Jan. 1st: 62 pairs socks, 6 suits pyjamas, 33 flannel shirts, also 12 boxes sent overseas.

—Mrs. McAllister, of Owen Sound, was visiting at the home of her aunt Mrs. Wm. Dryden, Greenock, for a few days after coming out of Walkerton hospital, where she had an operation for appendicitis.

—Pte. John McNeill, of Elora Road north, who enlisted in London a few weeks ago, was home for the week end, and was presented with a wrist watch, fountain pen and purse by his friends before returning.

—Friends here have received word of the death of Mrs. Tomkinson in Toronto, which occurred on May 13th. The deceased was a daughter of the late Mr. Harry Ellis, formerly of Paisley. Her death was due to pneumonia, and she leaves a baby girl just a week old.

Barn Burned by Lightning

Mr. Rich. Daniel, of Lockerby, suffered the loss of his barn on Wednesday morning, the building having been struck by lightning and totally consumed. We learn that all the stock was saved, but implements, hay and other contents were burned.

Additions to Church Rolls

That there is something of a spiritual revival in this community is manifested by the additions to the membership of two of our churches this month. The sacrament of the Lord's Supper was administered in Knox church on Sunday morning, when sixteen new members were admitted to communion—fourteen by profession of faith and two by card. At the evening service in the Baptist church the ordinance of baptism was administered, eight young women and girls being immersed, and on Sunday evening next a number more candidates will be similarly received.

—Salem garden party June 27th.

—Good servant girl wanted at Balmoral Hotel. Wages $6.

—Gillies Hill garden party, June 20th.

—Special value in summer dress materials. A big range to choose from. Hunstein & Wittich, Cargill.

—Mare Lost—Strayed from Paisley, on May 21st, a bay mare. Finder please inform the undersigned. Paul Oltsher.

—How about tea? The wise buyers are stocking up now before the jump in prices. Ballachey, Laidlaw & Co.

Order Your Coal Early

Leave us your order for needed supply at once, so that we can have your bin filled before the cold weather comes on again. D. A. Lyon.

—Closing Shop for Two Weeks—The undersigned is obliged to quit work for a short time on account of ill health, and will close his blacksmith shop from Monday next to about 10th June. M. Andrew.

—If you want clothes becoming to you, you had better be coming to us! Large and well assorted stock of suitings for ladies' and gents' wear. Unexcelled price. G. B. Irwin, Ladies' and Gents' Tailor.

Gravelling Contracts to Let

A committee of Saugeen Council will be at the railway bridge, McArthur's sideroad, on Thursday, May 30th, at 2 o'clock p.m., to let a contract of grading and gravelling; also at McEwing's sideroad at 4 p.m., to let a contract of gravelling. G. Christie, Reeve.

Wall Paper

A DISCRIMINATING customer will find all they desire in variety of designs, novelty of colorings and general desirability of the goods we offer to suit their fancy. Our stock is full and complete. Eggs taken in exchange.

Amelia Merrow's Folded Hands

By Dorothy Donnell Calhoun

Part I.

Amelia Merrows sat in the bay window, her hands folded in her ample lap. The little sitting room was full of gray shadows, stirring noiselessly in tune with the snowfall outside. An exquisite odor breathed from the soft polish of old mahogany and the gleam of the brass andirons in the firelight. The red geraniums on the window sill gave out a spicy breath.

"It's most time for them to be coming," she murmured distressfully.

She pressed her face to the window-pane, peering out into the gray February dusk. Reassured she hurried into the kitchen and fumbled on the shelf for matches, striking three in her eagerness before the oil lamp on the table was lighted. Then holding it aloft she turned and looked with a silent farewell about the little room.

White scrubbed pine table, cherry yellow painted chairs, shiny tin pans met her gaze like the faces of old friends. She made a little pilgrimage among them, giving them tender pats and prods.

"We're going to miss each other," she told them dreamily. "It won't ever be the same again with a hired girl round. I'll have to sit in the other room and listen to her doing things wrong out here. My soul!"

Amelia drew a breath that was like a sob. "Forty-five years I've washed dishes and baked pies in this kitchen and now I've got to give up and fold my hands for the rest of my life because Abel thinks I'm too old to work any longer."

Down the road sounded a flurry of sleigh bells. Hurriedly Amelia arranged her face in a smile of welcome. Its plump curves readily took on smiles. She had never lamented long over the inevitable. "Abel wanted me to have a girl because he thought the work was too hard," she comforted herself as she hurried to throw open the kitchen door. "Men folks don't set so much store by fiddling round their chores as women do. Bless men folks!"

The hired girl was a tall, gaunt person with sallow cheek bones and a general drabness that matched her cheerless name, Lizzie Gray. Abel Merrows shook his grizzled head dubiously when he surrendered Lizzie to Amelia's care.

"One thing," he consoled himself, "a girl as homely as she is won't have any beaux round coaxing her away. She'll get a chance to fold her hands. I guess she deserves folding after all these years!"

In spite of his brave assurance Abel was secretly appalled at the vision his words evoked. Would he be acquainted with this new Amelia of the unfamiliar hands? A queer panic seized him as he plodded across the drifty yard. It would be strange, at first, not to see Ma bustling around dishing up supper, setting out one of her chocolate cakes, light as a feather, with strawberry jam between the layers.

It was in the nature of a pleasant surprise to find Ma herself stirring a savory saucepan on the stove as though no hired girl had happened. But being a man, indignation trod closely on the heels of Abel's relief.

"Where's that girl?" he demanded aggressively. "Why don't she get to supper, I'd like to know?"

Amelia tilted the saucepan of stew over the blue bowl, dipping out the dumplings with a careful spoon. Her cheeks were delicately flushed, her eyes shone with the joy of her re-prieve.

"Lizzie's gone to bed," she told him comfortingly. "The poor girl was all worn out traveling so far in the snow so I sent her right upstairs. You sit down and start in on your supper, Father, and I'll be right back. I want to run up with this bowl of stew so she can eat it while it's nice and hot."

The next morning the new hired girl had a stitch in her side and Amelia insisted on her remaining in bed. At intervals throughout the day, Amelia ran upstairs with doses of ginger tea and camomile. Abel's mild protest met with gentle indignation.

"Father! And you a deacon in the church, too! She may be a hired girl but it wouldn't be Christian of us to expect her to work 'round with a pain in her side."

Lizzie's stitch was a reprieve for Abel too. It put off somewhat the disquieting spectacle of Ma with her hands folded in awful unfamiliarity.

One week after her arrival the hired girl appeared in the kitchen but even then Amelia hovered over her, ready to take the broom and dishcloth out of her hands at the first symptom of relapse.

To be sure when Abel came into the house from his afternoon trip to the village for the mail he found her rocking ostentatiously in the sitting-room bay window but there was always something a little breathless and flurried about her as if she had just that instant untied her apron; sometimes there was a dab of flour on her cheek and once he thought he caught a glimpse of the egg beater hastily concealed behind the row of geraniums.

When a chocolate layer cake with strawberry jam made its appearance in Lizzie's bony hands Abel voiced his suspicions.

"You've been doing the cooking ever since Lizzie came, 'Melia," he re-proached her. "I'd know one of you layers if I met it in Africa. What's a hired girl for, I'd like to know."

Amelia nodded serenely. "She seems real interested watching me cook. You can't expect old heads on young shoulders and that reminds me, Father, I baked an extra cake and boiled a ham for sandwiches and I want you to take Lizzie down to the Methodist box social this evening. She ought to get acquainted with some young folks. We don't want her getting homesick, you know."

(To be continued.)

RADIUM AS AN ILLUMINANT.

A Light for the Aviator, Regardless of Wind or Weather.

The fighting aviator is now provided with a light for use at night. It illuminates his barograph—the instrument that tells the height at which he is flying.

Radium in combination with zinc sulphide furnishes the light, one advantage of which is that neither wind nor wet can extinguish it.

Compasses of warships have similar radium lights; and the sights of big guns likewise carry them—a convenience of obvious importance for night fighting. They are of special value where such guns are emplaced in pits.

The stuff used is, in effect, a luminous paint—the same material that is employed for the faces of watches and clocks. Of course, the quantity of radium is very minute, but it does the work.

Oddly enough, a chemically pure zinc sulphide will not absorb and give out light; it possesses this remarkable property only when it contains certain impurities.

When a little radium is mixed with it, however, the case is different. The face of a good "radio watch" (or clock) will preserve its luminosity for nine or ten years.

Sometimes disks of metal coated with radium paint and protected with transparent celluloid are fastened upon the hour numbers of a clock face, so that they may shine at night; and the hands are made luminous by like means. Safe combinations and even push buttons are illuminated by the same kind of paint.

The radium itself does not give out any light. But its "alpha" emanations, which are atoms of helium gas, strike the particles of zinc sulphide and cause the latter to glow.

Medical men are worried lest an increasing commercial demand for radium—for such purposes as those above mentioned—may absorb the supply needed so urgently in their own professional work. The available output is very limited. The greatest known deposits of radium ores are found in the Paradox Valley of Colorado and Utah.

Before the war these ores were exported to Germany, and the radium derived from them was fetched back to the United States and sold for $100,000 a gram. The U. S. Bureau of Mines is now producing it for about one-third of that selling price.

An Idolized Hat.

"The Hat of the Somme" is destined to be one of England's historic relics. Already it is preserved in the British War Museum.

In the attack which English troops made along the line on a certain day of the battle a squad of men in their excess of vigor forced their way far beyond the objectives and were cut off from their supports. One of the men, defying the Huns, put his hat on a stick and placed it over the parapet which he and his comrades had erected. They owned no flag, and desiring some rallying point cheered this battered felt hat.

Later in the day, when their comrades came charging to save them, only one man was alive. The battle continued for hours about this spot, and for three days thereafter the hat, whipped by bullets and riddled with shrapnel, clung to its staff until the British finally consolidated the position and saved it as a precious memento of gallant death.

Hurry the Early Potato.

For many years I have found it very profitable to grow Irish potatoes for the early market. So I recommend planting all that can be given just the care and fertilizing they need.

Employ good, rich, well-drained loamy soil, plant early, choose the best early varieties, spread the seed a week or two in the sunshine before planting, and give clean cultivation. Begin digging as soon as the tubers are nearing maturity, and close out the crop as early as possible.

POTASH FROM WEEDS.

Means Found to Utilize Objectionable Vegetation in Panama Canal.

The prevalence of water lettuce and water cabbage on the surface of the Panama Canal channel through Gatun Lake has created a serious problem because these floating plants become entangled in the ship propellers and lock machinery. It appears, also, that mosquito larvae sometimes escape being suffocated by the crude oil poured on the water by lodging in the roots of these plants and breathing through them. Analysis shows that this vegetation contains about five per cent. potash, and as this substance is much needed to fertilize local plantations, it is proposed to make use of these growths, which heretofore have been thought an unmitigated nuisance.

About the House

EVERY LITTLE MAKES A MUCKLE.

When you are asked to have a beefless meal each day and cut down your allowance of sugar to one lump for a cup of tea or coffee you scarcely realize what it means. When you are asked to eat fish instead of beef and substitutes for wheat it looks almost like trifling with a big subject. The average man's idea, if you are going to save in a big way, is to cut out everything you don't want him to eat. Canada's Food Controller started out with the idea of educating the people to save, not to do without altogether, and there is vast difference in the principle. You can only judge of the results of saving by waiting for a period and adding up your savings. The wealth of the French nation before the war largely consisted in the savings the people deposited in their banks, which aggregated a huge amount. It was out of these small savings that the huge indemnity after the Franco-Prussian war was paid.

Calculations on the basis of returns actually received show that the savings in December in the United States were for meats 22,733,860 pounds, and these had increased in January to 24,418,000 pounds. In wheat flour the saving was 9,989,000 pounds which in January had increased to 12,700,000 pounds. The U.S. Food Administration believes that the saving of wheat flour during the month of February amounted to considerably over 15,000,000 pounds. Multiply these figures by twelve and you get a fairly good idea what was saved to be sent to the Allies, and how many soldiers were fed on account of it. And nobody in the United States suffered from it. The same is true of Canada. From returns so far as they have been received show in public eating houses savings from 25 to 60 per cent. The use of fish has increased considerably over 100 per cent. That means that an equivalent in beef and pork was sent overseas. The moral is never mind what your neighbor does, do it yourself. If you have to come to rationing it will be time enough to call your neighbor to account.

Keep Household Accounts.

Since the cost of living has advanced so rapidly in the last few years, much attention has been paid to reducing certain items of expenditure. Such efforts are more or less futile unless we are able to draw deductions to aid us in the future.

I believe every housewife should keep accounts. She should know just what is spent each month for food products. The budget is a practical means of reducing expense.

There is a great advantage in marketing in person, and there is nothing more important than the utilizing of the leftovers in planning the meals for the day. It goes without saying that the selection of foods that give the greatest nutritive value for the least outlay is a step in the direction of economy.

The average housewife will reduce expenditures by keeping accounts each month of amounts spent for various food products. By comparing accounts for several months it will be possible to obtain the average amount spent for groceries.

This tends toward the keeping of budgets, and is the means of regulating family expenditures, as opposed to the haphazard methods of the past. It is possible to find what food products are most expensive and make some definite plan to lessen the expense.

Since meat makes up a large part of the ordinary family diet, any economy in the purchase of it will make a noticeable reduction in the food bill. By using meat substitutes which are less expensive, but as nutritious, the amount paid for meat is greatly reduced.

The use of cheese which is rich in protein as a meat substitute will prove satisfactory. Since cheese is a concentrated food, less is needed to furnish the necessary food requirement. Nut loaf is also an excellent substitute for meat, since it adds variety to the diet and is rich in protein.

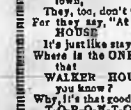
I find a great advantage to market in person. The housewife may see the foods before purchasing them. In this way it is possible to get the best that is offered for the price.

I always weigh articles that are sold by weight. In case the grocer gives short weight it should be discovered. Although the difference may be small, in a year's time it counts up, and the housewife has paid a certain per cent. of her allowance without any return.

Turn Food Waste Into Eggs.

Should all the worthless cats and dogs now consuming table scraps and more valuable food in several thousand Canadian homes—and farms as well as town; and cities are overrun with such uneconomic canines and felines—be replaced by a half-dozen laying hens for each dog and cat destroyed, there could be added to our food supply millions of dozen of eggs annually, replacing meat needed for overseas. This replacement could be made with little cost, as the expense of dog licenses, collars, chains, kennels, and the like would practically offset the first cost of the hens.

It is only fair to say that there are some dogs and cats that are worth their room and feed; but there are uncounted multitudes of roaming, flea-bitten, starving, bird-eating cats and sheep-chasing, poultry-killing, lawn-destroying dogs that should be supplanted by back-yard flocks of chickens as a war-winning aid.



When the millions of layers that would replace the dogs and cats had completed their year's work, each hen would furnish a nourishing family dinner as her final impetus toward hastening world-wide democracy.

The Practical Economy of Good Paint

Good paint is never an expense, but a saving. By its use you save your buildings from a steady deterioration in value.

Economy in painting demands the use of Quality Paint—Martin-Senour "100% Pure" Paint—the paint that protects and preserves.

The use of cheap materials is a waste of money—a waste of time.

MARTIN-SENOUR
"100% PURE" PAINT

wears longest, covers the greatest surface (900 sq. feet per gallon) and because of its even texture, takes least time and is easiest to apply. It is absolutely guaranteed—"100% Pure" White Lead, Zinc Oxide and highest quality Linseed Oil. It is admittedly the most economical paint on the market.

Take no chances. Make your investments secure by applying on your buildings, inside and out, protecting coats of Martin-Senour "100% Pure" Paint.

Write for "Farmer's Color Set" and "Town and Country Homes". Just what you'll need in planning your painting. Mailed free. 122

Worthy of the Flag.

Every boy in John's room sat very still. Miss Lee was choosing the boys that were to take part in the flag drill. On Empire Day the children were to give an entertainment, and the flag drill was to be the best part of all the exercises.

"I must have only the boys that always stand straight," said Miss Lee. "No one should ever carry the flag unless he stands very straight." Then she chose twelve boys. She chose Howard, who lived near John, but she did not choose John.

How disappointed he was!

"Maybe I never thought much about standing up straight, though, when I carried the flag," he said to himself.

That afternoon all the boys that had been chosen for the drill stayed after school to practice. John stayed too. He and Howard lived a long way from the schoolhouse and they always went home together.

"How I wish I had been chosen too!" thought John as he watched the boys drill. "Well, I can have the fun of practicing, anyway."

When he reached home, John took out his flag. He unrolled it very carefully then he began to drill as he had seen the boys do at school. Miss Lee had counted when the boys drilled, so John counted, very slowly: "One-two-three-four; one-two-three-four—"

"Let's see," he said to himself, "what did they do next?" He thought and thought. Suddenly he thought of something else too, and his face grew very red. "Ugh!" he exclaimed. "See how I am standing! As crooked as an apple tree!"

He rolled up the flag and wrapped the paper around it. Then he carried it into the house and put it away. He found a stick about as long as the flag and practiced with that.

The next day when the boys drilled, John watched them more closely, and after he went home he practiced again with his stick.

So he drilled every day. Sometimes Howard came over, and they practiced together.

One night, just before John started to practice with his stick, his little sister said: "Johnnie stands straight all the time now; doesn't he, Mother?"

"Do I, really?" asked John.

"Yes," answered his mother, "and you are growing tall very fast."

They did not know how glad John was. He went up-stairs and brought down his flag. He was sure, now, that he was straight enough to carry it.

On the day before the exercises one of the boys said: "Miss Lee, Arthur Chase is sick. He cannot be in the flag drill."

"Oh, Miss Lee," said Howard, "John knows all the drill. May he take Arthur's place?"

That afternoon John practiced with all the other boys. "You do it well, John," said Miss Lee. "You stand as straight now as anyone. You may take Arthur's place to-morrow."

So John took part in the drill after all. He was glad that he could do something on Empire Day, but he was even more glad that now he remembered always to stand straight enough to carry the flag.

HOW THE FIRST CANADIANS FARED

MEN "GOING OVER" NOW HAVE FEWER HARDSHIPS.

Member of the Fist Canadian Contingent Tells Story of Sufferings Of Early Days.

The men who are "going over" now will enjoy more comforts and receive more considerattion than did the first Canadian troops to be sent across the Atlantic to the battleline in 1914.

This is stating briefly the opinion of Sergeant G. C. Fisher, of the Third Battalion, Toronto Regiment, which was one of the first Canadian contingents to be shipped to England after the European war started in September, 1914. He is touring American cities with an exhibit of war relics.

"I was with the first Canadian contingent that went over," he said, "and at that time we did not have even uniforms. Our regiment did have the Webb equipment, which is the most complete contrivance for carrying the soldiers' household goods while on active duty that has been devised.

"We went over, a lot of greenhorns, all in civilian suits, and finally were taken to Salisbury, England, for training. Now Salisbury is a distinctly summer camp, and we had no other shelter than tents, yet we remained there through the fall and winter until February, 1915.

Initial Hardships.

"A good deal of the hardships the Canadians underwent was due to what has appeared to be a mistaken notion that the more hardships a soldier has to endure the hardier man it makes him. In practice, however, the theory was found a little faulty, and we had to undergo some real hardships, I can tell you. Things have changed since that time, and now they do everything for the soldier's comfort. They realize that he will still have enough of hardships left for him to understand that he is in a real war.

"In February, 1915, we got orders to go to France, and we were two days making the crossing to France. We were landed at St. Nazaire and immediately sent forward to Armentieres.

"You may imagine the comforts we had in making the crossing to France on a crowded steamship. I had to sleep in a coalhole all the way over. Then, when we were sent forward to the front, we were packed in cattle cars. The French cattle cars are not as large nor constructed like those you see in this country. There are only two small openings in the car, and there were forty-two men packed in each car. We all had been provided with goatskin coats before we started, and you may imagine the odor there was in that car from the wet goatskins worn by the men who were almost packed in.

"For two weeks after landing in France we did not have one hot meal. This was due to the inexperience of the commissariat. You see, we were all new at the business, even down to the commissary department. We did not enjoy the hardships, but we did not grumble and made the best of it.

"Now the men are carried to the front in regular passenger coaches, they are well fed and they are all well trained before they go into the trenches.

First Gas Attack.

"We were the first troops to receive the gas at the battle of Ypres, in April, 1915. This occurred at the second battle of that name on April 22. The men did not know what it was, and, of course, were unprotected with respirators or masks. They did not know the character of the gas, and, consequently, when they saw it roll over the trenches they thought they were playing safe by lying down.

"As a result, there were many of them either killed or permanently injured by the vapors. I know a little about chemistry and from the first whiff of it I came to the conclusion that it was chlorine. Consequently, that it was heavier than air. As a result of that line of reasoning I stood up, wet the sleeve of my coat from my canteen and breathed through that. I did not escape entirely, but I did not get badly gassed. I got enough, however, and every morning when I wake I have a strange sensation in my throat.

"At the battle of Ypres the gas took an awful toll. You can see that when I tell you that 14,000 Canadians went into the battle and we came out with less than 6,000. The killed and wounded numbered almost 10,000 men.

"Since then respirators, or gas masks, have been provided, and any man who fails to adjust his mask when the alarm is sounded is severely punished. There are not so many casualties from the gas as there was under this rule.

Crucified While Alive.

"While some of the tales of atrocities by the Germans may be unreliably told, I can tell you of an instance that came to my own notice. At St. Julien, in 1915, I saw two men from the Forty-eighth Highlanders pinned to a barn door by bayonets. I saw they both were dead, and from curiosity I looked carefully to see whether they had been pinned up in this inhuman manner before or after death. From my knowledge of the difference of the wounds and the blood flow, I saw that they had been transfixed in this monstrous manner while they were still alive.

"Is it any wonder that the Forty-eighth Highlanders have ever since refused to take a prisoner?

"There is a vast difference between the trench fighting in 1915 and in 1916. I stood in icy cold water up to my hips with nothing but the trench boots on my feet, doing sentry duty in 1915. Now the men are provided with hip boots, which keep out the water.

"In the early days of the war hundreds of men got what they call trench feet, which resulted from standing in the cold water for hours at a time and allowing the blood to become so sluggish that gangrene set in and the men had to have their feet amputated to save their lives. Now a soldier is punished severely if it is found that he has trench feet.

"The use of the hip boots, and the orders for the men to change their socks frequently, and to keep the blood circulating, when followed, prevent the gangrenous feet and so save hundreds of lives.

First Steel Helmets.

"In the early days we did not have the steel helmets, and while they will not stop a rifle bullet, they will protect the head from fragments of shrapnel. When they are worn at night in operations between the lines they are covered with canvas, in order that they will not be conspicuous objects when the Germans throw up their star shells, which make the lines as bright as day, and pick out any moving object, so the machine guns may be trained on them."

In a rear apartment of the exhibition there is a collection of war relics, and Sergeant Fisher pointed to a German whizz shell, and then explained that one like it had caused him to be withdrawn from the trenches to be a lecturer. It appears that one of those explosive missiles grazed his forehead, cutting into the bone and otherwise so wounding him that the optic nerve of the right eye was destroyed. Hence he is now out of it, as physically unfit, but he is a fine specimen of soldier for all that.

CHILDREN'S DISEASES.

Often Attack Grown Persons and Ravage Military Camps.

Most persons outside of the medical profession think of measles, scarlet fever and a few other similar diseases as affections of childhood, and are astonished when epidemics of them occur in the army camps. The truth is that these diseases are extremely contagious and that the human organism is especially susceptible to them. In thickly settled communities nearly everyone catches them during his childhood.

The same thing used to be true of smallpox, and in the tropical regions of yellow fever, until health officials from the United States, and others instructed by them drove it away — never, let us hope, to return. Now smallpox attacks adults chiefly because most children are protected by vaccination. The effect of vaccination wears off in some cases, and therefore the person may contract the disease in later life.

A person who has not had measles or scarlatina in childhood is very liable to take it in adolescence or in adult life, if he is exposed. That is why measles has made some ravages among our troops in the camps. The adult unprotected by a previous attack is, however, not quite so liable to catch the disease as a child is, for he has probably escaped because he possesses a natural immunity. If he is fortunate enough to have such a protection against contagion, he may be exposed over and over again without being attacked. Had it not been for instances of natural immunity, the great epidemics of black death in the Middle Ages would have exterminated the people of invaded cities, except for the very few who recovered from attacks.

The principal so-called children's diseases—the doctors call them the exanthemata, which means eruptive diseases—are scarlet fever, measles, German measles and chicken pox; whooping cough and mumps are also diseases of childhood, though they do not belong in the group of exanthemata. Smallpox belongs to the group but vaccination has removed it from the usual list of children's diseases. The child who has passed through all of these without mishap is to be congratulated, for he has been freed of a menace that would otherwise hang over his later years, and that might, when circumstances were favorable, make him an involuntary agent in the spread of a fatal epidemic.

For France.

She had been stricken, sorely, ere this came;
And now they wrote that he, her boy, was dead—
Her only one! Through blinding tears she read,
Trying to see what followed his dear name.
He had died "gloriously," the letter said,
"Guarding the Tricolor from touch of shame
Where raged the battle furious and wild."
Catching her breath, she stayed despair's advance.
She was a mother; but, besides—a child
Of France!
And after, though remembrance of past years
Dulled not to her fond vision nor grew dim;
Though every slightest incident of him
Was treasured in her breast, she shed no tears.
Her cup was full now, even to the brim.
And for herself she knew nor hopes nor fears.
So, toiling patiently, with noble pride
And lifted head she met each pitying glance,
She was the mother of a son who died—
For France!

Born Diplomat.

He was a polite canvasser that faced Mrs. Smart.

"Good morning, madam! Here is a polish for cleaning silver. Best on the market."

"Don't want any!" snapped Mrs. Smart.

"Sorry to have troubled you, madam, but I thought the lady next door was mistaken."

"What did she say?"

"She said I need not waste my time calling here, as you had no silver."

"The impudent thing! Give me half a dozen boxes!"

Meat, cooked or uncooked, should always be hung, and never placed flat on a dish save for carving.

RELIEF FOR FRENCH CHILDREN

AMERICANS ARE HELPING THE WAIFS OF WAR.

Toul is the Centre of a Work of Far-Reaching Benefit to Desolated, War-torn France.

Among the many war activities of which Toul is the centre the relief work undertaken for French children by Americans is one of the most touching. It is from Toul that much of our military work radiates, writes one of the United States workers.

When an appeal was sent out for help for 350 children herded together in an old barracks, dirty and with no sanitary appliances, eight emergency workers responded immediately, and the children are now being cared for under the very best of conditions. New buildings have been erected and modern improvements installed. The hospital, dispensary and refugee houses where mothers and children are cared for are well organized and in splendid running order. About five hundred children have been brought from the villages back of the lines where asphyxiating bombs are being dropped and are supremely happy in this safe shelter.

Dr. Maynard Ladd is in charge of the medical department and there are about thirty-five or forty American women, nurses, aids, playground instructors and other trained workers. Arrangements are being made to extend the work in many directions. Toul is to have 700 beds and other bases are being established in Nancy, Pont-a-Mousson and Luneville.

Two Objects in View.

"We have two points in mind in carrying out this work," says Dr. Ladd. First, the welfare of the children of France, and second, though equally important, the effect that such work will have on the morale of the French army. This may sound somewhat vague, but it is undoubtedly true that the French soldiers can remain in the trenches in a much better frame of mind when they know that their children are being given the best possible care. We are looking far into the future and have in mind conditions after the war, and the fathers in the trenches realize this fact, and with this vicinity being such a centre for all the allied soldiers the news of the work is rapidly spreading and it is bound to have its effect.

"There is no part of France where the French have shown such efficiency in relief work and there is also no part of France where the need has been so great. We have taken children from the villages all along the line where gas bombs were being dropped. In some cases the mothers are with them, but on the whole the work is confined to children alone. It has not been necessary to remove the mothers from the villages, as the adults can wear gas masks, but the little children do not use them successfully and therefore must be moved to places of safety."

Children Under Eight.

The military authorities try to remove all the children under eight years of age. Knowing that their children are in a safe place and are being cared for, the peasant women are urged to remain and harvest the grain in that district.

Dr. Ladd went on to say that he was increasing the work by opening a new hospital of 200 beds. "In fact," added Dr. Ladd, "the recent raids on Nancy have opened it for us. About forty beds are devoted to a maternity ward, which we had expected to open next week, but Mr. Mirman notified me that a bomb had struck a maternity hospital in Nancy, and twelve women would have to be moved immediately, so we rushed things up to meet that need. And within thirty hours after we received the notice the twelve women were comfortably installed in our hospital and a baby was born."

A special feature is being made of the recreation department, which is under Miss Cleveland, of the University of California, where the children are made happy in a dozen different ways and taught to play.

The dental department has been greatly developed recently under Dr. Stevens, a woman dentist.

Particular attention has been paid to the operating rooms, and every branch of the medical department has been made as perfect as that of any hospital in the cities.

And when the strife is fierce.
The warfare long;
Steals on the ear the distant Triumph song,
And hearts are brave again,
And arms are strong.

If you are mending a badly torn piece of embroidery, do as much as possible of the mending at the back.

A profitable idea for some farms is to add two to four pounds of alfalfa seed to the spring clover-seed mixtures. The farmer can get his whole farm gradually inoculated to alfalfa in this way, and also can increase the value of his hay crop both in quantity and quality. The alfalfa will stick with the timothy after the clovers have died out, provided the soil is not sour.

PLAYGROUNDS.

A Vital Necessity For the Maintenance of Health in Towns and Cities.

If the men of to-day in our cities and towns could be persuaded to look back to the days of their boyhood, and realize what the open air meant to them, there would be no need to plead for their support on behalf of playgrounds for our boys.

It is said that in "Who's Who in Canada," a compilation of the prominent men of this country, eighty-five per cent. of the names are those of men born on the farm. Only one valid reason can be given for this large proportion of country-born Canadians reaching prominence, and that is the healthy conditions under which they started life. Born beyond the crowded streets of our larger towns and cities, with plenty of good pure air and ample room for healthful play and recreation, they commenced their careers under conditions almost ideal for the building up of strong bodies and active minds, and in the strain of business cares this great handicap has told in their favor.

Conditions have changed, however, in this country, and we now have in our cities many thousands of lads without the opportunities that were available to our by-day leading men. Crowded streets, tenements, apartment blocks, and near-slums are accumulating, and in such unhealthy surroundings many children are reared. No space is available for their games except the street, and the long list of street accidents demonstrates the use that is made of them by the children in answering the call to the open.

The establishment of playgrounds for the children is one of our greatest social needs. True, some cities have opened playgrounds, and their popularity demonstrates how great is the need.

The expense of fitting up playgrounds is not great, and should be met by public appropriation. Healthful play to build up the body is as necessary as schools to educate the mind, and should receive a due proportion of attention.

The Duke of Wellington gave credit to the playing fields of Eton for the winning of the battle of Waterloo, and in this he paid a tribute to healthful play and emphasized the need of playgrounds that the boys of our cities—our coming men—may have the advantage of healthy exercise under safe and sanitary conditions.

Absence.

Since he has gone I oft remember now
How he found pleasure in the moonlight's sheen.
On quiet walks I often wonder how
The starlight sadly smiled—had he but seen!
To-night, far-drifted days come to my heart,
And silent gates of memory swing apart.

He always loved the high and lonely hills;
The Autumn leaves like fairies flitting by
To meet the zephyrs by the quiet rills,
A cedar standing lone against the sky;
To-night how bright the lamp of memory gleams,
And wonderful her charm—the gift of dreams.

Far-drifted days, sometimes I wonder now,
Since Time leaps high the pile of pensive years,
If he were but a dream that I allow
To lure me from grey rocks of care and tears.
But no! I hear him call from childhood's shore,
And longing lips are on my heart once more.

SEAGULLS AND SUBMARINES.

Behavior of Gulls Often Betrays the Presence of U-Boats.

Seagulls, like the land birds on the Western front, do not appear to fear the sights and sounds of war. The booming of cannon and the turmoil of conflict do not create any alarm in their feathered breasts. From time immemorial sea birds have apparently considered ships as universal providers of food, and observers have reported that after a heavy sea fight the seagulls collect in thousands, and dash down, quite undeterred by the conflict, to feed upon vast quantities of small fishes that, killed by the concussion, float upon the surface of the sea. Even before the battle is over the screaming gulls settle down to their feast amid the drifting wreckage and horrors of a sea battle. Seaplanes and airships cause them no fears, and after the Battle of Heligoland the British rescuers of the German sailors said that overhead the Zeppelins floated in midair raining disaster upon their boats, while all around them the gulls fought and struggled for the fish that dotted the surface of the sea unheeding the boats or airships. If, however, airships do not alarm the seagulls, they are considerably perturbed by the presence of submarines. In fact, it is possible to tell by the behavior of gulls where a submarine is passing under water. Their greatest danger lies in the depths of sea from sharks and such marauders of the deep, and no doubt to them a submarine is an enormous shark. A flock of gulls will wheel and scream over the spot, flying off suddenly with every evidence of dismay, and will not return until the intruder has departed.

WATCHERS ALONG THE COAST

HOW THE BRITISH ISLES ARE GUARDED.

Impossible for a Boat to Pull on to the Beach Unobserved by the Men in Blue.

From John o' Groat's to Land's End, England, and all around Ireland, thousands of vigilant, keen eyed coast watchers keep up the lookout for the enemy. They are on guard to make the shores of the United Kingdom totally inhospitable to German craft. It is the oft spoken opinion of many an inland inhabitant that certain sections of the British Isles afford a base for enemy U-boats; but these same inhabitants have little conception of the thoroughness with which John Bull sentinels his coast line. Mile after mile, sands, downs, cliffs and rocks are under the eye of alert individuals, navy men and volunteers—the latter civilians who have spent their lives by the sea.

Take a trip around the coast of England or Ireland and you will conclude that it is well nigh impossible for any boat to pull on to the beach without the ears and eyes of the men in blue pouncing down on the intruder.

Wiry, Strong and Alert.

The coast guards are all over military age, men who are wiry and strong, and sharp of eye. They do their job as second nature, noting each vessel as she passes, receiving the helliograph signals telling her name and reporting their information instanter to their chief. And tame as their work appears to the layman, it really is filled with considerable interest. They realize its importance. I met men at places in Cornwall who had been watching for three years and who had never seen a sign of the war beyond that which was brought to their towns by the men from the war ships or those in khaki, but they were ever alert.

If one coast watcher is better than another it is perhaps the man from the Scilly Isles who excels in his duties.

These wind-seared men look upon their particular section of the sea as much their own as the land on which they cultivate their vegetables. It is a desire with them not to miss anything. Their fathers, grandfathers and great-grandfathers were watch dogs on that area of the ocean. In peare time they watched for smugglers, but now it carries more of a thrill with it. They are beachcombers who delight in robbing a wreck and saving lives, but who more recently have hoped that it might be their lot to plunder some enemy craft.

His Eye on the Sea.

Go to St. Mary's and the coach watchers are up soon after dawn to relieve others. Even before he should be on duty he strolls along his post, the family telescope to his eye. It is said that they want to see what the sea has been doing while they have been resting. To the uninitiated the waters have the same paucity of interest they had the evening before. But men on the Cornish coast, rivals of the Scilly Isles watchers, declare with emphasis that those "blighters" at St. Mary's would spot champagne cork thrown overboard the previous night, and no blinking periscope will get by them.

RED GASOLINE.

French Army Now Using Gasoline Tinted Red.

All gasoline being used by the French army is being tinted red in accordance with a recent military order. The purpose of the order is to prevent the gasoline from getting into civilian hands by illegal means. A product has been found which will give it a distinctive color without injuring its qualities. In one of the army services at the front gasoline already has been tested with the result that the average consumption dropped immediately. This proved that not unimportant quantities of gasoline had been sold or given away to civilians. No person was found willing to have red gasoline in his possession.

For a considerable time now gasoline has been supplied only to those motorists who had absolute need of a car and who were expected to use the gasoline for a specified purpose. If, however, the gasoline thus delivered was employed for other purposes, the only punishment was to withhold further supplies. The officials have now authority to prosecute in the criminal court all persons who, having been supplied with gasoline for specific work of national importance, are found making use of it in their private interests.

The addition of apple sauce to pork, mint sauce to lamb, lemon juice to veal, and horse-radish to beef are all dietetically sound, and check bad results.

Use honey, maple syrup, molasses and brown sugar instead of granulated sugar. The first three of these cannot be shipped to our Allies in Europe as they require too much shipping space. Brown sugar cannot be shipped as it ferments. Use these commodities at home so that granulated sugar can be shipped abroad.

The Paisley Advocate

PAISLEY, MAY 22nd, 1918

—England expects that every man this year will do his duty.

—Premier Borden said to the big farmers' delegation at Ottawa last week: "You speak of solemn covenants and pledges—do you imagine for one moment we have not a solemn covenant and a pledge to those men who have been in the trenches, some of them for three years?" The promise of exemption was spoken in the national interest as we understood it then. The order-in-council passed recently abolishing exemption was also in the national interest as we understand it now.

—An optimistic outlook for Canada in the after-war conditions is contained in the Wall Street Journal which declares that the trade of the Dominion fell only $21,000,000 short of that of the United States exports in 1904. The article continues that the war debt of Canada will be well within the power of any government at Ottawa to deal with, as the country has the wares to sell to a world half starved for raw material, which must attract commerce in the first years after the war.

—People who complain because they cannot get some of the little luxuries they used to enjoy in the days before the war are asked to remember that their forefathers lived without sugar till the thirteenth century, without coal till the fourteenth century, without butter on their bread till the fifteenth, without tobacco and potatoes till the sixteenth, without tea, coffee and soap till the seventeenth, without umbrellas and lamps till the eighteenth and without trains, telephones, gas and matches till the nineteenth. It may particularly surprise many to know that there are people still living who well remember the first lucifer matches.

—Co-operative methods of handling certain household operations is one of the experiments that is bound to be tried out in these times of scarcity of domestic help. The Women's Institute at Brussels, for instance, are starting a community canning kitchen. Now, here is where the Institutes could do a great deal to lighten the labor of housekeeping and possibly help to keep down the h. c. l. Community laundries and bakeries should be a feasible way of disposing of much heavy work and irksome responsibility. There must be a really enormous waste of fuel alone in keeping a fire under every separate pot and pan used in cooking our food and washing our clothing. There is a chance for some fertile brained individual to work out plans for effecting saving on these items of household expenditure. A greater unity of spirit and aims in a community might work many reforms and bring about many improvements in our methods of life.

Register by June 1st

Men of 19 years of age and those who attained 20 years on or since 13th October, 1917, will register under proclamation on or before June 1st, 1918. Until the date of registration such men may be treated on enlistment as volunteers.

Tara Business Men's Meeting

The regular monthly meeting of the Tara Business Men's Association was held Monday evening. Discussion on Finances of Canada, Production, Early Closing, Thursday Half Holiday, Street Renovating and Grass Cutting, Regulation of Automobiles and Traffic, etc., took place, and a deputation to wait on the council was appointed to ask for aid along some of these lines. A committee was also appointed to wait on the Farmers' Club re production and farm help. It is the desire of the Association to assist the farmers in every way it can if they can in the way of securing help on the farms when so many of the young men are away at the front.—Leader.

Died at West Superior

The remains of Neil Beaton, who died at West Superior, Wis., on May 14th, arrived at Paisley on Saturday and were buried in Lovat cemetery, the funeral taking place from the home of his brother, Mr. Duncan Beaton, 12th Bruce. The deceased spent his younger days in this section. Upon completing the public he went to Markham, where he continued to study until he secured a second-class life certificate, and thereafter he went to Missouri and taught school for seven years in that state. Then he went into the lumber business, exploring new tracts for firms engaged in extensive operations. He was the eldest son of the late Arch. Beaton, was in his 70th year, and unmarried. The funeral services were conducted by Rev. G. C. Little.

"Intolerance" To-night

One of the most important attractions of the current season is D. W. Griffith's colossal spectacle, "Intolerance," which will appear in the Town Hall this (Wednesday) evening. In every respect this amazing work is absolutely different from anything ever before shown on any stage. Paris of the middle ages, Babylon of the reign of Belshazzar the magnificent, Judea of the time of Christ, are depicted with such realism that one finds it not difficult to believe one is actually viewing the picturesque life of these historic periods. To convey any idea of the immensity or splendor of the Babylonian scenes is impossible by written word. This thrilling episode in itself, with its palaces and temples, its mighty battles and thousands of people, comprises a spectacle of even greater magnitude than Mr. Griffith's former work, "The Birth of a Nation." And mighty Babylon is but one-fourth of the wonders of "Intolerance."

Poverty Night!

You are asked to kum to the Poverty Party given by the Organized Class at the

Baptist Church, Paisley Tuesday Ev'g, May 28

Kum in your rags, kum in your tags, but not in your velvet gounds, or you will be fined the usual some.

READ THE PROGRAMME AND ALL COME

There will be music and a good time throughout the evening.

Ice Cream and Kake Sold during the Evening

PROCEEDS FOR RED CROSS

—Farmers will have to look to the women this year for harvest help. Fifty thousand are said to be wanted, and if the young ladies respond to the call in sufficient number, the resultant health benefits from living close to nature will amply repay for any temporary inconvenience. The cosmetic counters would be the first to suffer, as the glow of color in the girlish cheeks would need no drug shop complexion stimulant.

—Lucknow Sentinel: We know of one man in this neighborhood who has one son buried in France and the other in the draft. They have a big farm and a big stock to look after. But this man says he is not going to quit. "I'll get hired help if I can, and if I can't myself and the wife will take off what we can, and the rest will have to go," he said the other day. That's the spirit which won British and American freedom, and is defending it now.

—Mrs. Robert Esplen, a pioneer settler of Arran, died at Bala, Muskoka, on May 15th. She had been living with her daughter for a few years past. Mrs. Esplen's maiden name was Catherine Currie, and she came to Saugeen about 1855 with her parents. Her husband died in 1896. She is survived by five daughters and one son—Mrs. Jas. Esplen, Arran Tp.; Mrs. Walter Knox, Allenford; Mrs. Joseph Thompson, Sarnia; Mrs. John W. Burgess, Bala; Mrs. Chas. Clay, Revelstoke, B. C.; Alex C. Esplen, on the homestead. The remains were brought down for burial in Burgoyne cemetery.

Sent in an Alarm

A lady phoned Chief Ferguson from Cultons on Tuesday night that a number of young men in her neighborhood who had been called out for military service were planning to "beat it." The Chief said he didn't take any stock in the yarn and didn't believe anybody would be foolish enough to think they could evade arrest if they did not show up when called, as their chances would not be one in a thousand.—Telescope.

Farmers to Hold, but Report Excess Flour

The Canada Food Board's order regarding flour has been amended so as to provide that farmers having a whole wheat flour on hand in excess of the amount prescribed by the order of April 25th, are required to report to the miller or dealer from whom it was purchased or by whom it was manufactured, the excess amount held by him. It is then the duty of the miller or dealer to report all such holdings to the Canada Food Board.

Voluntary Rationing in Our Homes

The chairman of the Food Board announces that each province in Canada has been asked to draft a standard of voluntary rationing for the homes. "Canada has food enough and to spare," he says, "and we are determined to do everything possible to win the war; I am confident that the people of Canada will come through in a noble way when necessity demands sacrifices. Canada has shipped overseas 62 per cent. more wheat of the 1917 crop to date than the average for the three previous years. We must reduce our consumption of wheat. The average consumption per head in the world is 5½ bushels per annum. In Canada it is 9 bushels." From these statements it will be understood that a normal obligation and responsibility rests upon every citizen to follow these regulations just as closely as circumstances will admit, and to use his or her influence to secure more general observance in private homes. If every Canadian realizes a personal duty to be a food controller, there will be an eagerness to adopt the suggestions and advice of the Food Board and not to shirk that food service which is necessary in order to feed those who are bearing the brunt of the fighting and suffering.

DANGER LURKS IN EVERY ONE OF US

We Are As Full of Deadly Poisons As A Germ Laboratory.

AUTO-INTOXICATION OR SELF-POISONING

"FRUIT-A-TIVES" Absolutely Prevents This Dangerous Condition.

The chief cause of poor health is our neglect of the bowels. Waste matter, instead of passing from the lower intestine regularly every day, is allowed to remain there, generating poisons which are absorbed by the blood.

In other words, a person who is habitually constipated, is poisoning himself. We know now that *Auto-intoxication*, due to non-action of the bowels, is *directly responsible* for serious Kidney and Bladder Troubles; that it upsets the Stomach, causes Indigestion, Loss of Appetite and Sleeplessness; that chronic Rheumatism, Gout, Pain In The Back, are relieved as soon as the bowels become regular; and that Pimples, Rashes, Eczema and other Skin Affections disappear when "Fruit-a-tives" are taken to correct Constipation.

"Fruit-a-tives" will protect you against Auto-Intoxication because this wonderful fruit medicine acts directly on all the eliminating organs.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

Spring Term from April 2nd

Central Business College Stratford, Ont.

Commercial life offers the great opportunities. Recent lady graduates of this school are earning as high as $1,000 per annum. The last application we received from an office man with some experience offered initial salary of $1440 per annum. Students may enter our classes at any time. Graduates in positions. Complete, short, practical and Telegraphy departments. Get our free catalogue.

W. J. Elliott, Pres. D. A. McLachlan, Prin.

QUESTIONS ASKED AT JUNE REGISTRATION

The following is the list of questions to be asked when the registration of man-power is made in June:

To Be Answered by Males

1. Name.
2. Address in full.
3. Age.
4. Date of birth.
5. Country of birth.
6. British subject (by birth or by naturalization).
7. If naturalized, when and where.
8. Single, married, widower or divorced.
9. Physical disability, if any.
10. Present occupation, regular occupation. What other work can you do?
11. If an employee, state employer's name, address and nature of business.
12. Do your circumstances permit you to serve in the present national crisis by changing your present occupation to another for which you are qualified if the conditions offered are satisfactory?
13. Were you brought up on a farm? Are you a retired farmer? Are you willing to do farm work? Can you saddle horses? Drive tractors? Use farm machinery?
14. If not a British subject to what country do you owe allegiance?
15. How many children under 16?
16. If registered under the Military Service Act, what is your serial number?

To Be Answered by Females

1. Name in full.
2. Address in full.
3. Age.
4. Race.
5. Can you speak English or French?
6. British subject (by birth, naturalization or marriage).
7. How many children under 16?
8. Are you single, married, widow or divorced?
9. Do your health and home ties permit you, if required, to give full time, paid work (registrant answering "No" to this question need give no further information; those answering "Yes" or in doubt should fill in the rest of the card, or must sign affirmation).
10. Do your circumstances permit you to live away from home?
11. What is your present main occupation? If in business as an employer state number of employees. If an employee, state name, business and address of employer. If full time voluntary worker state name of society serving.
12. State particulars of each if you have trade, profession, degree, diploma, scientific, special training.
13. State length of experience, if any, in general farming, poultry farming, dairy farming.
14. Can you drive a tractor? Drive a horse? Can you harness a horse? Do farm cooking?
15. Indicate any qualifications or practical experience which you possess not already recorded.
16. Do your circumstances permit you to give regular full time service without remuneration?

—See "Intolerance" this Wednesday evening in the Town Hall, Paisley.

REGISTRATION UNDER MAN POWER ACT

To the Editor:

The Canada Registration Board has been created for the purpose of carrying out the registration of the man and woman power of Canada in order that the information so obtained may be utilized to proceed intelligently with the mobilization of the entire resources of the Dominion towards the successful prosecution of the war. Data of military value will be secured, but the main purpose to be served by this census of all males and females in Canada of 16 years of age and over, will undoubtedly be the better distribution of agricultural and industrial labor to the end of securing the maximum results from the productive labor of the Canadian people, especially as regards the essentials of war.

Registration Day

Registration day will be on a Saturday in June, and will give every Canadian affected by the law an opportunity to perform his duty as a patriotic citizen. Registrars are appointed for every federal constituency; these in turn will appoint deputy registrars and assistant deputy registrars in sufficient number to register the entire population. Registration booths will be opened in all of the polling subdivisions, in conveniently situated places, such as schools, halls, etc. Each person who registers will be given a certificate of registration.

Volunteer Assistance

In order to facilitate this large task of registration, councils, school boards, boards of trade, fraternal organizations, Red Cross and patriotic societies are invited to assist the registration officials in every possible manner, by providing free of charge suitable buildings such as school houses, halls, etc., and by furnishing volunteer helpers who may assign their remuneration to the Red Cross or Patriotic Society if desired. The registration booths will be open from 7 a.m. to 10 p.m., hence the necessity of providing lighting facilities for the registration places.

Registration a National Duty

While non-registration entails many penalties of the most serious character, it is expected the Canadian people will look upon registration as a personal national duty, to be performed not out of a sense of compulsion, but rather in a spirit of pure patriotism, and as an act of encouragement to our gallant overseas defenders.

The few minutes required for registration, or one day's pay for services rendered donated by the willing workers will be a small sacrifice indeed compared to those now being made by Canadian manhood in the forefront of the battle line.

For the purpose of registration the south riding of the County of Bruce in the Dominion House, through its municipalities, has been divided into the usual polling subdivisions, with a registration booth in each poll at some school house or public hall, etc. Each polling subdivision will be in charge of a deputy registrar, with assistants under him to look after the work. These assistants in most cases will offer their services from patriotic motives.

This constitutes a registration district. I have been honored with the charge of registrar for South Bruce, a charge I felt I could accept with the confident expectation that all good citizens of this riding would co-operate in order to render the task less onerous and to bring it to a successful conclusion.

Education Necessary

It is particularly desirable that clergymen of all denominations, school teachers, employers, members of council and all others who by reason of their position in life have influence, should make known the requirements and the purpose of registration in order that no false conception of its import may gain ground, or impair its success.

The Call and the Response

The people of the County of Bruce responded nobly to the urgent demands of the war. Large numbers of our best young manhood have left and are still leaving for the front. They may be found in all parts of the army service. Many have made the supreme sacrifice, others have been wounded or invalided by sickness, all to the immortal renown of Canada. Shall we be less generous in showing our loyalty to the great cause by simply placing our names on record as an united people, on behalf of our own flesh and blood who are battling overseas for what we at home bountifully enjoy?

Let our message from this riding on registration day be one of sympathy and steadfast purpose to our soldier boys. In common with the rest of Canada let our answer to the calls of the registration board be the voice of an united people, conscious of the justice of its cause, and animated by a spirit to do all in its power to help that cause.

Thanking you very kindly for the space you have given me, I remain,

Very truly yours,

GEO. D. MacKAY,
Registrar for South Bruce for Canada Registration Board

Walkerton, Ont., May 16th, 1918

Gets Imprisonment for Hoarding

Robert Wright, of Niagara Falls, was sentenced on Friday last to two and a half years' imprisonment, when he pleaded guilty to unlawfully having eight sacks of flour and fifty-two cases of pork and beans, which were found hidden in a stable.

—On Friday afternoon, May 3rd, a tidal wave from the direction of Lake Huron came rushing into the harbor basin at Kincardine, without any apparent wind or storm, carrying everything that was loose before it. The water rose about four feet in the basin and repeated the action three times. Several years ago a similar occurrence transpired.

SAVE AND SERVE

Our soldiers who are taking a glorious part in the war had to undergo severe training before they were fitted for the hard duties of military service. Training and discipline have done wonders in the way of transforming raw and untried young civilians of this country into the fighting men of Canada's overseas forces, fighting men who are the peers of the veterans who make up the most renowned regiments of the British army.

Not all the people of Canada are expected to fight in this war; but all of them who are not for any cause incapacitated are expected in some way to serve, and serve to the very best of their ability. In the production of food, in the conserving of food, in the saving of money, in ministering to the broken soldiers and their needy dependents, we can all do much more than we have done to help this war. Only by strenuous exercise was it possible for the men of our army to make of themselves the hardy soldiers they are, and only by rigorous discipline was it possible for them to be brought to their present high efficiency as units in a fighting organization. And we civilians will come very far short of the war service we are expected to render if we too do not develop by strenuous exercise and by rigorous discipline the qualities that are needed for our service. Every man and every woman in this country ought to feel bound to get into the best financial trim for full war-time duty as a revenue-payer and as a lender to the Government. Unless the citizen practises self-control in the matter of working and saving he cannot do what a seasoned patriot ought to do for the strengthening of the nation's arms of war. To attain to the best financial trim the citizen must work faithfully and live sparingly. It is his duty to be as light as possible in his consumption of the staple foods that are needed for the Entente armies and to assist as far as he can in the production of such foods. By helping also to increase the supply of nutritious foods that are not suitable for transit overseas he adds to the store of provisions that can be used at home. Thus he increases food and saves food, and he saves money for the carrying on of the war. He saves much more money if he resists every temptation to spend upon luxuries, upon idle pleasure, and upon injurious pastimes. The lure of the bar has gone and with it has gone a very considerable resource of revenue. The man who spent freely on drink will tend to increase greatly his own prosperity and make himself far more useful to his country as a revenue producer than he was when he contributed freely to the Customs and Excise taxes upon liquor. Patriotism is a very strong sentiment with the great mass of our people. It is not too much to say that many a man whom consideration for his own welfare, love of his family, or business pride could not turn to habits of thrift has become a saver of his money in order that he may be an investor in his country's war bonds. If our people generally put themselves under the moral discipline that ought now to be the rule of life for every true Canadian patriot, it is marvellous what resources of food and money and every other necessary of war they can bring to their country's help.

In his Budget speech the acting Finance Minister made a very strong appeal to the Canadian people to produce and to save and to spend as a matter of war service. "The more," he said, "we save of our productions and of our services, the better able shall we be to meet our increased taxation, and the greater the opportunity of our people to purchase Government bonds. Of our imports from the United States there is a great volume of non-essentials and luxuries. In all probability if the United States would be partially reduced. The cost of remittances for our essentials from the United States would be less, and the cost of these essentials would be that much less to our importers and consumers, and a greater surplus would be available for payment of taxation and loans to the Government. We must learn to dispense with luxuries and possibly some of the things which we have been regarded as necessaries."—Mail and Empire.

THE ALLIES TO STRIKE BACK IN THE NEAR FUTURE

General Foch, as generalissimo of all the allied forces between the Adriatic and the North Sea, has control of allied armies totalling four million men, with another million in reserve or in course of training. The troops at the front include 1,200,000 British, 1,500,000 French, 250,000 Americans, and 1,000,000 Italians. He has demonstrated ability both as a defensive and as an offensive leader. Now his hour to attack. He is certain to take the offensive on a grand scale just as soon as the strength of his forces permits, or as the exigencies of the situation require a counter-thrust. A sustained offensive may not be made by the allies before midsummer or the fall, but present indications are that very powerful blows will be dealt by the allies during the next two months. This view is founded on (1) the fact that if the next terrific German onslaught completely fails the enemy's conditions probably will invite attack; and (2) the fact that if the enemy breaks through or gains any alarming success, vigorous counter-thrusts, not necessarily followed up, will be required to redeem the situation. The declaration of Field Marshal Haig a month ago remains true. The allies have their backs to the wall and must fight. They cannot afford to give ground to anything like the extent they did in March. It will be surprising, therefore, if they are not prepared to give the enemy tit for tat in the colossal struggle that is impending.—Toronto Star.

DIED

Watson—At Paisley, on May 20th, William John Watson, aged 67 years and 8 months.

THE UNREST IN INDIA

Rev. Dr John Wilkie, Home from Gwalior, Makes Interesting Address

Rev. Dr. Wilkie, the Gwalior missionary well known in Paisley, is in Canada, having recently returned from the Gwalior mission. In an address given at Owen Sound last week Dr. Wilkie, the Advertiser reports, touched on many matters of interest not only to mission workers but to the student of politics.

The unrest, he said, which has affected India for some years, is not understood in Canada, though it is in the Old Land. It is not only religious but political, the root of the trouble being the caste system. The Brahmins—the high caste—are at the bottom of it, because with the leaven of Christianity working in the country many of the lowest caste—the "untouchables," so-called—are being educated, and the Brahmins fear that their position as the ruling caste will be endangered if the process is allowed to go on. The Brahmins have always boasted that they have never been effected by any religious movement, that they have always been able either to break it up or absorb it. They are fighting now for Home Rule, which would enable them to hold their position of supremacy, and are working against Christianity, which is doing much to break down the caste system. He instanced one case where a man, the son of a scavenger—one of the lowest caste—had received an education and been placed at the head of a department in which he had Brahmins under him. They were compelled to submit to him and handle documents that had passed through his hands. Of course they hated him and would gladly see him deposed.

Difficulty also had been met from the Theosophists, who were being influenced by Mrs. Annie Besant, and had caused the British Government much trouble. The time was one of religious crisis, as the Christians were looking for the second coming of Christ, the Buddhists predicted the eighth reincarnation of Buddha, and the Mohammedans were expecting a return of the Mahdi.

The Christian missionaries had had a hard time at first. They—Dr. Wilkie and his fellow-workers—were denied entrance to villages, refused land, even for payment, and strongly opposed in every way. But in a miraculously short time all had changed, and land had been given them voluntarily and money subscribed for their work.

The work of the missionaries had not only been spiritual; in material things as well they had helped the people. Agriculture was the principal business of the natives, but agriculture of a very crude and primitive kind. With the old methods a man could cultivate only about five acres and produce a few bushels of inferior crop. Through the speaker's influence they had been able to obtain some modern implements and under the direction of Mr. Haughton, a graduate of Guelph Agricultural College, the people were learning new methods and becoming more prosperous.

There are many agitators in India, and there is scarcely a day that there is not some new religious movement, but the cheering fact is that in spite of agitation the trend of every movement is towards Christianity.

—Trustees in rural schools have now the power to vote money for medical and dental inspection of children's teeth. Many a man and woman would rise and bless the name of their parents if they had been thoughtful enough to have looked after their children's teeth when they were going to school. But in the pioneer days rotten teeth were uncommon and dentists were scarce. Nowadays very few children have a set of teeth that do not need treating, and the state steps in and gives school boards power to tax the whole section to look after the health of the boys and girls between 7 and 14 years of age.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

The Manurial Value of Clover.

The amount of semi-decomposed vegetable matter or humus present in our cultivated soils, sandy and clay loams, bears an intimate relation to their productive capacity.

Humus not only fulfills the mechanical function of rendering soils porous and more retentive of moisture, but furnishes also the essential medium for the activities of the bacteria which liberates plant food in the soil. Furthermore, humus constitutes the chief natural source of the soil's nitrogen supply.

Applications of barnyard manure may be considered the chief means employed in the maintenance of humus in the soil. Supplementary means are the growing and ploughing in of a green cover-crop such as rye, buckwheat, rape, vetches or clover. Of these, clover—where conditions are conducive to its satisfactory growth—is to be generally preferred. By means of its deeply ramifying roots, clover disintegrates and aerates the lower soil layers and brings up therefrom plant food supplies unattainable by other more shallow rooted crops.

An additional advantage which clover, in common with all members of the legume family, possesses is that of its ability to assimilate the free nitrogen of the soil atmosphere by means of minute bacterial organisms living and operating in small nodules on its roots. Thus clover gathers the greater part of its nitrogen from the air, and its phosphoric acid, potash and lime largely from soil depths beyond the reach of the roots of ordinary crops, consequently enriching the surface soil with these constituents for the benefit of succeeding crops.

How does clover compare with manure as a fertilizer? Barnyard manure of good average quality contains approximately 10 pounds nitrogen, 5 pounds phosphoric acid and 10 pounds potash per ton. Therefore 10 tons of barnyard manure would furnish about 100 pounds nitrogen, 50 pounds phosphoric acid and 100 pounds potash.

Experiments conducted at the Central Experimental Farm, Ottawa, have shown that a vigorous crop of clover will contain, at a moderate estimate, in its foliage and roots, from 100 to 150 pounds nitrogen, 30 to 45 pounds phosphoric acid and 85 to 115 pounds potash per acre.

A good crop of clover from one acre if it were turned under may, therefore, be deemed equal, in fertilizing value, to an application of ten tons of barnyard manure.

In the experiments referred to, 10 pounds per acre of common red clover was seeded down with various grain crops, while adjoining plots were seeded with grain alone. In no instance did the growth of clover depress the yield of grain with which it was seeded.

In the following year, fodder corn (Leaming) produced 8 tons, 480 pounds more after wheat with clover than after wheat without clover. After barley and oats, increases of 11 tons, 1280 pounds and 5 tons, 1440 pounds respectively, of corn, per acre, were obtained on the clover plots.

With potatoes the results were equally striking. After wheat, barley and oats with clover the increases were, respectively, 43 bushels, 20 pounds; 29 bushels 40 pounds and 24 bushels of potatoes, per acre, as compared with the yields from adjoining plots without clover.

The full benefits from clover will as a rule be noticeably persistent for several years.

On soils which are deficient in lime, a satisfactory growth of clover will be encouraged by an application of, say, two tons of ground limestone per acre. As a phosphatic fertilizer, designed to benefit both the grain and the clover 300 pounds of superphosphate or 500 pounds of basic slag, per acre, may be recommended.

Unleached wood ashes contain, on an average, from 4 to 6 per cent. of potash, about 2 per cent. of phosphoric acid and from 20 to 30 per cent. of lime. They are eminently suitable as a fertilizer for clover and, when procurable at a reasonable price, should be applied at the rate of from 25 to 40 bushels (1000 to 1600 pounds) per acre.

Spraying.

Unless many kinds of both useful and ornamental plants are protected from injurious insects and fungous diseases by spraying, the loss in fruit and vegetable crops may be very great, and, in the case of ornamental plants which would otherwise have attractive foliage and bloom, they may be rendered very unsightly.

The spraying of fruit trees should be begun just after the buds have broken in the spring and repeated at the times recommended in the spray calendars and pamphlets which are issued by both Federal and Provincial Governments and in which is given information in regard to the treatment of the different kinds of insects and diseases most likely to cause damage.

The apple scab causes, perhaps, more loss than any other plant disease in Canada, yet this can be controlled and clean fruit obtained, by thorough spraying with either Bordeaux mixture or lime sulphur. Other diseases and insects can be kept well under control also by the spray which has been found best for each.

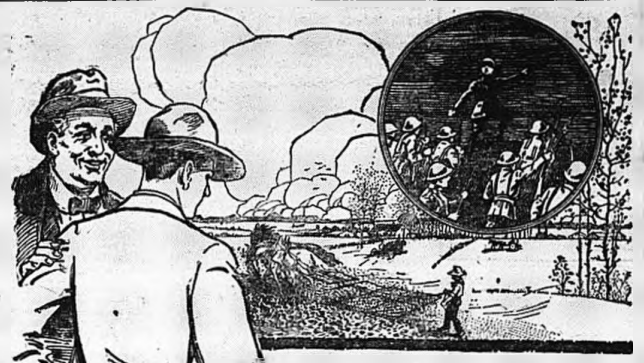
Spraying is a rather expensive operation and it should be done in an intelligent manner, otherwise it may be wasted money. For instance, if the spray to kill the codling moth, which affects the apple, is not applied within a very few days after the flowers fall, the sepals or lobes of the calyx will have closed over the opening or "calyx cup" in the end of the apple into which it is important to spray the poison. As it is in the "calyx cup" where most of the insects begin work, they are not likely to be poisoned if spraying is delayed and the apples will be wormy. A spray mixture or solution which will control one insect or disease may be of little or no use in controlling another. Arsenical poisons are the best for biting insects, while soap or tobacco sprays are best for those which suck their food and which have to be killed by contact, and certain sprays intended to kill insects will not control fungous diseases.

Get the spray pamphlets and study them carefully before spraying, but spray and spray thoroughly!

Killing Potato Beetles.

Spraying potato vines for the purpose of killing Colorado beetles should be done as soon as the work of the insect is noticed. This destructive insect is not hard to control. One part of Paris green mixed with 20 to 30 parts of air-slaked lime or flour, and used as a dust spray, affords the best results on young plants. It should be used when the dew is on, by means of powder guns or dust-spray machines.

The Paris green spray, prepared by mixing one pound of Paris green with 75 to 125 gallons of water and adding one pound of quicklime to the mixture, makes an effective spray. This spray will burn vines if the quicklime is omitted.



For the proper mixing and application of this spray a bucket pump or knapsack sprayer of good quality is sufficient for use in small gardens, but on a large scale a potato sprayer drawn by horses through the rows of plants is necessary.

Arsenate of lead serves the same purpose as Paris green, one pound combined with 15 to 20 gallons of water being more adhesive, it sticks more firmly to the leafage, and is much less likely to produce scorching than the Paris green spray.

Cleaning up the vines and plowing potato land in the fall after the crop has been harvested will aid in reducing the number of hibernating beetles.

If there were a dehydrating (evaporating) plant in every community, thousands of bushels of potatoes, etc., might be saved that may otherwise go to waste this spring.

As far as possible, the interior fixtures of a poultry house, such as roosts, nests, dust boxes, drinking fountains, feed troughs and grit boxes, should be so constructed as to permit them to be readily removed and cleaned.

The Beard that Grows Outdoors

on the face of an active, vigorous man, is a very different razor test from the beard which grows at a desk or behind a counter.

That's why three years' service in the trenches has done more than ten years' use in the cities to single out, for real, stiff shaving, the

Gillette Safety Razor

The man who doesn't get time to shave every morning—whose beard grows thick, sun-cured and wiry—he's the one who gets the most solid satisfaction out of his Gillette.

Such an edge as it offers you—always ready without honing or stropping! How easy it is to adjust it, with a turn of the screw handle, for a light or close shave, or a tough or tender skin! How neatly it works round that awkward corner of the jaw! And how good it feels as it slips through the stiffest beard you can put it up against!

There's certainly a treat waiting for you the day you buy a Gillette! Why not make it soon?

Horse Sense

A year's effort may be lost by neglecting brood mares at foaling time. In view of the time it takes to produce a foal, nobody can afford to neglect the mare and foal, even if it means staying up for a few nights.

In-foal mares should be provided with clean, disinfected box stalls, if possible, sometime before they foal. As soon after birth as possible the foal's navel should be tied and disinfected with iodine or some other good disinfectant. See that the foal's digestive apparatus and kidneys are in working order within twenty-four hours after birth.

Mares, after foaling, should be given water, not too cold and not in too large quantity. The ration for two or three days should be comparatively light, and similar in nature to that fed before foaling. A sound, pure-bred stallion should be used if the best results are to be obtained with next year's colt. A low service fee is too often the deciding factor with many mare owners in the selection of a sire. A low fee is usually a sign of an inferior stallion.

Colts from inferior or scrub sires will sell for much less than those sired by the sound, pure-bred stallion. A Wisconsin farmer for several years bred his mares to a grade stallion. He finally decided to patronize a pure-bred. Some time after he held an auction sale. Yearlings, two-year-olds and three-year-olds, all by grade sire, sold for $37, $55 and $76 a head respectively, while weanlings from the same mares, sired by a purebred stallion, averaged $101 each. Several Wisconsin farmers purchased a pure-bred stallion and placed the service fee at $25—$10 more than any competitor. A three-year-old gelding sired by him was sold to a dealer for $628, and not one went for less than $225.

"Our business in life is not to get ahead of other people, but to get ahead of ourselves."

"Not only to say the right thing in the right place, but far more difficult still, to leave unsaid the wrong thing at the tempting moment."—Sala.

The Dairy

"Mangels are the most valuable crop on the farm; they are one of the best feeds we know for making records," says the manager of a successful dairy farm. "We feed a cow weighing 1,200 pounds or 1,400 pounds, about forty pounds of mangels daily; larger cows get fifty pounds daily. We always plant about five acres of the long red variety, because we receive the greatest tonnage from those and they are the sweetest."

A deep, well manured, thoroughly prepared seed-bed is used. The ground is always fall plowed, as it makes it much easier to control the weeds while the plants are getting a start. The seeds are drilled with a garden drill in rows three feet apart, as soon in spring as the seeds can be put in the ground. As soon as possible the mangels are cultivated with a specially constructed hand cultivator. The first cultivation is the all-important thing with mangels. If you give them a fair start they will keep down the weeds themselves.

The mangels are constantly kept thinned out and are picked up in the fall before the frost if possible. They do not have to be dug like beets, as they are always at least three-fourths above ground when mature. Some years they have made from fifty-seven to fifty-eight tons to the acre. Roots were used in making nine of the ten highest records in the Guernsey breed.

Poultry

While growing stock must be plentifully fed with nutritious feed, care must be taken not to overfeed. Overfeeding is often worse than underfeeding.

Nests of sitting hens must be so situated that the hens can go on and off at will. Under no circumstances must these nests be in the regular hen house, unless one wishes to fight lice from the moment the chicks are born. Keep plenty of feed and water constantly before the broodies, and do not annoy them any more than is strictly necessary.

Be on the lookout for hidden nests. Hens that are on range are very likely to hide their nests at this time of the year, and thus many eggs are lost.

Do a little house cleaning. Get a broom and sweep down the cobwebs and gather up all the dirty litter and droppings that will be found on the floor. Droppings that accumulate on the dropping boards should be cleaned up at least once a week. Spray the house every month with a coal-tar product, like zenoleum, which will not only destroy vermin, but which will also kill all disease germs that may be lurking round.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Pre-Natal Instruction of Mothers.

We have only begun to consider the question of disease as the result of the terrible war in which all the world is now engaged.

We see how it has not only slaughtered millions of men, but has depopulated country after country.

We can as yet scarcely realize the ghastly effect it has had upon communities where the civil population is worn and weakened with woe and anxiety, and where there is, and will continue to be, hunger, thirst and nakedness.

Is there any power in medicine or sanitation which will stay it? Will there be doctors and grave diggers enough to go around?

The mind reels at the prospect. The men who are being killed and invalided are the virile, the active, the reproducers.

But suppose there was a chance for reproduction; the women are filled to the brim with hatred, bitterness, with suffering of every description—what is the chance for their unborn offspring?

What will be their inevitable inheritance, physically and mentally? Only recently has the importance of instructing expectant mothers in the hygiene of pregnancy been recognized as part of the duty of the Health Department.

What duty could more positively be paramount? No observant farmer needs to be told that his stock will bear better offspring if they are well cared for when pregnant, than if they are neglected or abused.

Why should there be a different result when the pregnant female is a woman?

From the moment a woman enters the pregnant state, she enters a new condition of being, physiological, it is true, but as liable to mishaps and derangement as the performance of any other function—digestion or assimilation, for instance.

The mother shares her blood current with her unborn child, and whatever it contains is contributed to the child's life.

An unhealthy mother in body, mind, or morals, cannot help impressing upon her child more or less of her peculiarities.

Wherefore, disease or emotional shock, or strain, of any kind, is quickly communicated to her child, often with a fatal result.

A pregnant woman should realize not only that she is carrying a child which is going to belong to her, but also to the state and to the world.

If she has this feeling, she will try very hard to take proper care of herself.

At her daily task she will spare herself as much as possible for the sake of her child; she will eat food that can be readily digested so that her child will have its proper share; she will try to get plenty of sleep; she will try to avoid worry, and exposure to wet and cold; she will not give way to anger, fear and hatred; and she will often consider that she is the only protector her child can have while she is carrying him within her body.

If women would realize this sacred trust, how much more they would get from this most beautiful of all physiological conditions, and they would bring into the world children who would not be handicapped by an inheritance which would cripple them more or less for life.

Pitiable, indeed, is the lot of the war baby, with all that is included in the thought; and how thankful Canadian women, who are pregnant, should be that they have been spared many of the ills which their less fortunate sisters, abroad, have had to bear!

QUESTIONS AND ANSWERS

J. B.—If you will send stamped and addressed envelope full particulars regarding eczema will be mailed to you.

A Farmer's Son.—1. The noise which you hear is produced by the combined action of fluid and air in the stomach. It often comes in connection with indigestion, and is not of very much significance, although it is annoying. 2. If, when the trouble occurs, you would add one teaspoonful of peppermint water to half a glass of hot water, and drink this slowly, it would dispel the gas.

T. B.—It is generally supposed styes are the result of infection. If the bowels are kept freely open, and the eyelids are frequently moistened with a solution of boric acid, it will relieve the trouble.

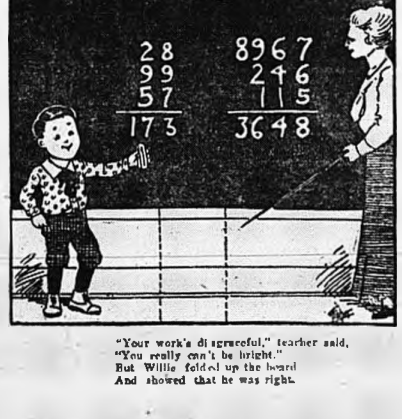
X.R.—Is it possible to cure a fibroid tumor of the abdomen by means of X-rays?

Answer—I think, I may say quite positively that it is not. The only successful way of treating them, as I have found in a long surgical experience, is by removing them.

Mrs. C. E. D.—Is rheumatism sometimes referred to as "growing pains?"

Answer—It is possible; but if that is the case, it is incorrect. I doubt if there is any such thing as "growing pains."

Make Money by Boarding Pets.



A country boy or girl, if he or she loves to care for animals, may combine profit and pleasure by keeping some city child's pets during the family's summer vacation or while away on a trip.

City people will pay well for good care given to prized pets during their absence. A Shetland pony, a canary, Angora cat or a fine blooded dog will prove a pleasant companion for the boy or girl on the farm, and requires little outlay for food.

If the animals are in first-class condition when the owner comes to claim them, he will recommend the keeper to his city friends, and in this way a good paying business can soon be worked up.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

"Your work's disgraceful," teacher said,
"You really can't be bright."
But Willie folded up the board
And showed that he was right.

CONSTIPATION is the most common ailment of the age, one responsible for many serious and often fatal diseases.

"RIGA"

PURGATIVE WATER

is the safest, surest and most economical remedy for its cure. It flushes the intestines and removes the accumulated waste matter which undermines health and endangers life.

On Sale everywhere: 25 cents the bottle.

THE MAKING OF AN AIRPLANE

THOUSANDS OF OPERATIONS ARE NECESSARY.

Some Details of the Intricate Factors Entering Into the Manufacture of Warplanes.

The time, labor and material which go into the making of a warplane are thus set forth by Lieutenant Colonel Hiram Bingham, Signal Corps, U.S.A.

Let me try to depict by a rough picture a plane in the making. Suppose, for instance, you were set to driving 4326 nails and 3377 screws. Undoubtedly that would be quite a task—a total of 7703 separate operations. Well, when you had reached the 5000 mark you could truthfully be told that you had done less than two-thirds of the work of this sort required for a single airplane. (These figures are for a training plane; for a French battle-plane 23,000 screws are said to be needed.) Somehow a plane looks so simple and floats so gracefully through the air that we lose all thought of the skill that goes into its making.

Must Use Little Metal.

Just recently we have received some figures of the material which is required for one of the simpler training planes. For instance, 921 steel stampings must be cut out, 708 forgings cast and 276 turn-buckles, all for a single machine.

Think, then, of the hundreds of thousands of such pieces needed for the thousands of planes in the American program and of how utterly hopeless for us the situation would be if those parts were not standardized, turned out by machinery in tens of thousands, and usable in scores of different factories on any kind of plane. The reduction of aircraft manufacture to the simplest, standardized quantity production basis has been one of America's great triumphs in the air and an achievement which very soon will be making itself felt.

But metal must be used in an airplane as little as possible. It is altogether too heavy, especially when a few extra pounds make all the margin in speed between victory and defeat. An engine of 300 horsepower is in itself enormously heavy to rise into the air; so that the rest of the machine must attain the very acme of lightness.

The Strain Exerted.

That very lightness, however, entails enormous strength and perfect adjustment. Think of the strain which is exerted on every wire and nut, every inch of linen and every bit of wood as this 300-horsepower mechanism rushes through the air at 150 miles an hour! Cyclones often do not go as fast, and we can easily picture what happens to a strongly built house when the air strikes it at that speed.

But if the strain is great simply because of high speed, what must it be when a plane suddenly careens downward, taking a tremendous pressure off one part and hurling it upon another. It is that kind of sharp, sudden, unevenly distributed shock which allows the slightest tap of a knife to crack an egg or the explosion of a depth bomb to crush in the unprepared side of a submarine. Obviously a plane must be built so skillfully and of such perfect material as to withstand not only the pressure of the cyclone speed, but also the added shocks of its sudden evolutions.

Airplane Spruce.

The one material which gives this double characteristic of strength with lightness is spruce; not the ordinary spruce, but a superselected spruce from the giant trees of the Pacific coast. Few would believe that this would present much of a problem with America's vast resources, but when one considers that only a small fraction of the very best spruce is usable at all, and that the war has vastly increased the demand for that, the difficulty will begin to appear. Let me explain this in detail:

The ideal trees for airplane spruce are the fine old patriarchs, scarce enough at best, which have a girth of about fourteen feet and run up 160 feet without a branch. Now, when this splendid wood is cut, 62 per cent is thrown out at once—the part in the heart where the grain is too circular and the part at the circumference where the grain is too coarse. Another 10 per cent. is culled out for various reasons and another 7½ per cent. lost to kiln shrinkage. This leaves us less than one-third of our original wood for further selection.

Of this third, however, only a small proportion is fit for the more delicate work. Less than 1 per cent. of it has the necessary length and strength for ailerons; 2.3 per cent. is fit for the wing beams; 4.6 per cent. for the long struts and the same for the landing gear. The balance can only be used for ribs and the smaller fittings.

These figures show why America's vast lumber resources are being strained to the limit to build our air fleet. They explain also why it has been necessary for the United States to take over the whole spruce output as agent for the combined Allied program and eliminate the ruinous competition which had prevailed among the English, French and Italian Governments.

Yes, Who?

The wounded Tommy was sitting up in bed when the nurse brought him his tea. He stared at his plate, and just as the nurse was leaving him, he said:

"Oh, I say! Who ever put the butter on this bread?"

"Why, I did," returned the nurse indignantly.

Tommy went rather red, and stammered:

"I— Oh, pardon, nurse, but—well, who scraped it off again?"

LEMONS MAKE SKIN WHITE, SOFT, CLEAR.

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

To a Butterfly.

I've watched you now a full half-hour,
Self-poised upon that yellow flower;
And little Butterfly! indeed
I know not if you sleep or feed.
How motionless! not frozen seas
More motionless! and then
What joy awaits you, when the breeze
Has found you out among the trees,
And calls you forth again!
—William Wordsworth.

Minard's Liniment Lumberman's Friend.

Worse Than He Realized.

It is told of Rufus Choate, the famous U.S. lawyer, that on one occasion he appeared in court in behalf of a certain blacksmith whose tools and stock-in-trade had been seized by a creditor.

So powerfully did the great advocate depict the wrong that he contended had been done to his client and so vivid was his description of the extent to which the forge had been stripped, that the blacksmith, who sat near by, was observed to burst into tears.

"Why, Tom," said a sympathetic friend, "what's the matter with you? What are you crying about?"

"Oh," replied the blacksmith between his sobs, "until Mr. Choate spoke I had no idea I had been so abominably t-t-treated!"

Bathurst, N.B. THOS. W. PAYNE.

Italy Spends Five Millions Daily.

The war is costing Italy $149,000,000 a month or, in round numbers, about $5,000,000 a day, says a recent despatch from Rome. In estimating the cost of the war the expenditure incurred during the ten months of Italy's neutrality for war preparations as well as the money spent during the thirty-three months of war up to the end of last February are taken into account. The estimate is only approximate, because besides the money actually spent for war expenditure payments made by the War Office and the Admiralty for extraordinary expenses due to the war are included in the calculation.

Ask for Minard's and take no other.

Chicken houses should be thoroughly cleaned and sprayed, and an effort made to get rid of all mites and lice. These pests affect the vitality of the flock, cause hens to leave their nests, and kill young chicks. Breeding stock should be carefully selected and well housed and fed to insure good hatches and strong chicks. Ample nests should be provided for the layers. Chicks should be protected from getting wet or becoming chilled. Guard against rats.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man, "Give me a small bottle of freezone." This will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly, and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.

If your druggist hasn't any freezone tell him to order a small bottle from his wholesale drug house for you.

Easy Enough.

Men own, with modesty becoming,
That they've no knack for law or plumbing
Or adding figures, art or preaching
Or banking, mayoring or teaching;
But I have never yet seen one
Who didn't think that he could run
A farm much better—though a bad one—
Than most men who have ever had one.

Minard's Liniment used by Physicians.

Canada Should Can Sardines

Canada imports annually, canned sardines valued at over $100,000. The major portion of these imports are from the United States, Norway, the United Kingdom and Portugal, in the order named. Oddly enough, only 20 per cent. of the New Brunswick catch is canned in this country. The remaining 80 per cent. is shipped to Maine to be canned by American canners. The Canada Food Board is at present taking active steps to have these fish canned in Canada. If this is done it will be, obviously, a distinct advantage to Canadian consumers.

Any banana can be used for making marmalade.

A Quick, Clean, Comfortable Shave Guaranteed

Every soldier shaves under difficulties—cold water, chilling atmosphere and a time allowance of about three minutes for the whole job. The AutoStrop Safety Razor overcomes all shaving difficulties—it is the only razor that is always ready for use—that always has a keen edge because it sharpens its own blades automatically. Strops—shaves—cleans—without removing blade.

Give him an AutoStrop—the gift of the hour.

AutoStrop Safety Razor Co. Limited

War and Population.

Theories as to the underlying causes of the great war are as numerous as guesses regarding the time when the end may come, and hardly a week passes that some person whose position gives his words more or less weight does not offer explanations on the subject. One of the latest is from Dr. C. Killick Millard, medical officer for Leicester, England, who says:

"Throughout the world's history overflowing populations have been a fruitful cause of political unrest and war. Germany's mad dream of world supremacy was fostered and, encouraged by her rapid increase of population during the last fifty years. If the fall in the birth rate had set in earlier—latest returns show that it is only slightly greater than in England—the present war might have been avoided."

MONEY ORDERS.

Buy your out-of-town supplies with Dominion Express Money Orders. Five Dollars costs three cents.

Kernel Wheat to Frost.

Little buns of barley,
Little rolls of rye
Send wheat across the ocean
To every good ally.

Keep Minard's Liniment in the house.

Did you ever stop to think that a farmer is a laborer and a capitalist? If he is to continue in that double capacity he needs a proper return from both work and money. In other words he should have "a good living and 10 per cent."

Apples will form the basis of almost any jelly.

A Cure for Bad Breath

"Bad breath is a sign of decayed teeth, foul stomach or unclean bowel." If your teeth are good, look to your digestive organs at once. Get Stuart's Catarrh Syrup at druggists. 15 to 30 drops after meals, clean up your food passage and stop the bad breath odor. 50c. and $1.00 Bottles. Do not buy substitutes. Get the genuine.

CUTICURA HEALS ITCHING ECZEMA

So Bad Could Not Sleep. Red With Water Blisters and Burning.

"I had eczema so bad I could not sleep. It first started on my arm, then I had it on my body so that I could hardly wear my clothes, and I had to stay in bed. My flesh was dark red with water blisters, and burning and itching.

"Everything I tried seemed to make me worse, and I had the trouble for nearly two years. I read about Cuticura Soap and Ointment, and I got them. They did me good right away, and now I am entirely healed." (Signed) Mrs. Peter McIntosh, French River, Ont., April 10, 1917.

How often such distressing, disfiguring skin troubles might be prevented by every-day use of Cuticura Soap and Ointment for all toilet purposes.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U.S.A." Sold everywhere.

NERVOUS PROSTRATION

May be Overcome by Lydia E. Pinkham's Vegetable Compound—This Letter Proves It.

West Philadelphia, Pa.—"During the thirty years I have been married, I have been in bad health and had several attacks of nervous prostration until it seemed as if the organs in my whole body were worn out. I was finally persuaded to try Lydia E. Pinkham's Vegetable Compound and it made a well woman of me. I can now do all my housework and advise all ailing women to try Lydia E. Pinkham's Vegetable Compound and I will guarantee they will derive great benefit from it."—Mrs. FRANK FITZGERALD, 25 N. 41st Street, West Philadelphia, Pa.

There are thousands of women everywhere in Mrs. Fitzgerald's condition, suffering from nervousness, backache, headaches, and other symptoms of a functional derangement. It was a grateful spirit for health restored which led her to write this letter so that other women may benefit from her experience and find health as she has done.

For suggestions in regard to your condition write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years experience is at your service.

SMOKE TUCKETTS ORINOCO

CUT FINE FOR CIGARETTES — CUT COARSE FOR PIPE

EBENEZER

The fine growthy weather of the past week has made the country change its appearance. The white blossoms, the green leaves and green grass mingled with the golden daadelions make a very pleasing scene to the eye. The spring grain is nearly all up, and is looking fine. Farmers are now sowing their root crop.

James and Walker Kirkland, of Allenford, motored down and spent a day with Mr. Robt. Kirkland.

Mrs. John Waltham and Miss Myrtle Fleming, of Coronation, Alta., are visiting Mrs. Waltham's brother here, Mr. Sam Fleming.

Mr. and Mrs. Robt. Quigley visited friends in Sullivan for a few days.

Mr. and Mrs. Busby and Mrs. Wm McFadden and family, of Port Elgin, visited at Mr. J. H. McFadden's on Sunday.

A couple of our young men enjoy motor trips to Chesley in the evenings.

Mr. Will Underwood, who has made his home at Mr. J. D. Poole's for a number of years, went to Toronto a couple of weeks ago and enlisted with the 70th Battery. While home on a week end leave his friends and neighbors presented him with a wrist watch and safety razor. Bill is one of our best young men and although only 18, he realized the urgent need of men at the front and went and offered himself, which shows that he is a loyal Canadian. We hope that he will be spared to come back to us and take up his work as a good citizen, which we will miss while he is gone.

GRESHAM

We are pleased to report that Jean Pauline Mewhinney, who was undergoing treatment in Toronto for her arm, is home and doing nicely.

Mr. Michael Nelson went down to Toronto last week.

Mr. Gale preached here and in Underwood last Sabbath very acceptably.

On Saturday the home of the Nelson family at the Goderich road on his line was burnt, we understand, through the stovepipe catching fire. The wind was very high, which apparently was the cause. There was little or no insurance. The family spent a few days with their son-in-law, Mr. Wm. Stanley.

Mrs. Peter Dobson and daughter visited the former's sister, Mrs. Winch, near Chesley, last week.

We regret to learn that our only first pioneer on this line, Mr. Allan McKinnon, is at present ill and under the doctor's care.

Mr. Fletcher, of the 10th is visiting his daughter here, Mrs. Jas. McKinnon. We are pleased to see Mr. Fletcher, who has been ill, looking so well.

Wedding bells are ringing on the 4th.

We are all sorry to learn that our teacher, Miss Hanna, has resigned, to take effect the first of June.

Mr. Smith is the new man in the interest of the Underwood creamery or this line, taking the place of Mr. J. M. Cameron.

CASTORIA. The Kind You Have Always Bought

Chas. H. Fletcher.

GLAMIS

Mr. and Mrs. Peacock and family, of Meaford, spent the week end visiting Mrs. Peacock's parents, Mr. and Mrs. Neil McFarlane.

Mr. and Mrs. H. Jackson and two children, of Holland Centre, spent Sunday at the home of the former's sister, Mrs. Nesbitt.

Mr. Edgar Pickard spent a couple of days with his sister, Mrs. J. K. McLennan.

Miss Pearl Kirktown, who spent a week in Markdale, returned on Saturday.

The Oddfellows gave an At Home on Friday night in honor of the boys who are leaving for London to train for overseas. Dancing was the chief attraction.

Two Mr. Downing's daughters came home last week from Niagara and Buffalo on a short visit to see their brother who was leaving for London.

Mr. and Mrs. Clark and family, of Dervie, were callers at Mr. Cunningham's on Sunday.

Mr. J. Robertson purchased a new Maxwell car.

Miss Abbitt, of Creemore, is visiting at Mr. Wm. Moffatt's.

Rev. Mr. Waddell, of Tiverton, and Mr. McCauley, of Glamis, exchanged pulpits on Sunday.

Mrs. Kirktown and two sons, of Holland Centre, spent the week end at Mr. Alex. Kirktown's.

Dr. J. McDonald, a former pastor of St. Paul's church, is to speak on Tuesday night in aid of the Y.M.C.A.

CASTORIA

PINKERTON

Mrs. Thos. Birrell is visiting friends in Toronto.

Rev. Jas. Gale preached in Underwood and Centre Bruce churches on Sunday last.

Mr. Geo. Needham has purchased a new Chevrolet touring car, and Mr. Dave Elphick a new Maxwell touring car.

Rev. and Mrs. Gale spent a few days at their former home at Alma.

Prof. Arch. McLennan is visiting his sisters, Mrs. A. Pinkerton and Mrs. A. C. McKee.

Miss Mertis Donnelly, of Toronto University, is spending holidays with her parents, Senator and Mrs. Donnelly.

Rev. Thos. Wilson, of Walkerton, will occupy the pulpit of the Presbyterian church here on Sunday.

WALKERTON

During the severe electrical storm on Thursday night, the lightning struck the big metal cross on top of the Catholic church here, and travelling down tore a big hole in the south side of the steeple, as well as ripping off a portion of the eave trough and burned out a part of the electric lighting system. Fortunately the church did not take fire, otherwise a costly conflagration would likely have ensued, as a terrific wind was blowing at the time. The storm, which was also accompanied by hail, broke in the bay window at Mr. Harry Trust's house, as well as blowing down a portion of the fence at the exhibition grounds. Considerable other damage is also reported in this vicinity.

Wm. Craig, a Dominion police officer and Inspector of Immigration for Canada, came up to Walkerton this week and drove from here into Brant township to investigate some cases of alleged disloyalty and rank pro-Germanism. Several cases, which were reported to the authorities, were gone into and just what the outcome of the Inspector's visit will be is not known. In the United States where such cases are proven the parties are immediately interned and their property confiscated, the Dominion Government, which has long been most lenient in this respect and confined itself largely to warning the parties, has now issued such drastic measures against anti-British utterances through the press or in public, that even the Lavergnes and Bourassas of Quebec are now mightily silent, and whether an example will be made of any gents up this way who are alleged to be babbling in a disloyal strain remains to be seen.

The town council has decided to sprinkle the streets of Walkerton this year instead of oiling them. A deputation composed of Messrs. H. M. Lavy, A. E. McNeil and W. A. Barrows addressed the council and asked that the roads be oiled, it being contended that oiling had it all over watering for keeping down the dust. However, as oil now costs 13½c a gallon, as compared to 10c per gallon last year, the increased price rather took the charm off the ordinance. The calling for tenders and sprinkling the streets resulted in Mr. Thos. McIntee asking $684 for the job while Mr. David George offered to do it for $400. As there was a difference of $284 between the two figures, the council broke the speed limit in handing the contract to Dave.—Herald and Times.

CARGILL

Mr. and Mrs. M. Dietrich, who have been visiting at Mr. Thos. Grice's, returned to their home in Chesley on Monday.

We congratulate Mr. Jas. Sparling, son of Mr. Henry Sparling, on his promotion to clerk on the G. T. R. staff at the Walkerton station.

Mr. Fred Grice has accepted a position with Mr. W. D. Cargill, and entered upon his duties on Monday.

Mr. Gray, of Toronto, visited his daughter, Mrs. Jas. Bricker, the end of the week.

Mr. and Mrs. Zeigler and Mrs. J. McKinnon, of Blyth, visited friends here on Sunday.

Rev. Farley, of Chesley, is to occupy the pulpit of Holy Trinity church next Sunday morning and evening.

Mrs. McFetrige, of Winnipeg, is visiting her sister, Mrs. Hunstein.

Mr. and Mrs. Harvey Neilly, of the 12th, Sundayed at Mr. John Reptke's.

Mr. John A. McKay spent Sunday in Port Elgin.

Mr. Melville Hall, from Cargill spent the week end at Mr. Joe. Foster's.

PRESENTATION TO JAS. CURRIE IN SAUGEEN

A very pleasant time was spent last Wednesday evening at the home of Mr. Dan Currie, when a large number of friends and neighbors gathered to present Jas. Currie with a gold wrist watch and gold fountain pen before he left to take up military training at London. Mr. Jas. Thomas acted as chairman. Mrs. Wm. Forrester read the accompanying address and the presentation was made by Mrs. Jas. Turnbull. Although taken by surprise, James made a suitable reply. The balance of the evening was spent in music and dancing.

FINED $200 FOR FAILING TO REGISTER

William Steffen, of Sebringville, was fined $200 and $2.50 costs for failing to register under the Alien Registration Act, in Stratford Police court. He at first stated he was a British subject, but as this left him liable to a charge of being an alien under the M.S.A., he pleaded guilty and stated he was born in Germany. Dominion police officers arrested him Monday night.

"You are enjoying all the privileges of the country and do not have to go to fight like a Canadian does for $1.10 a day," said Magistrate Makins in delivering sentence. "I think you can afford to pay a stiff fine and still be better off and I will therefore impose a fine of $200 and costs or four months in jail." The magistrate explained that the law allowed for a fine not exceeding $500 or six months' imprisonment or both fine and imprisonment.—Stratford Herald.

—Potato planters are busy.

—Southampton grocers following Kincardine, Owen Sound and Goderich grocers, are to put in at once the cash system. Southampton will begin the system June 1st. Paisley merchants are also considering the matter.

QUEBEC'S CHANGED ATTITUDE

While some Ontario farmers are getting into the limelight by their opposition to conscription, a remarkable change seems to be passing over the province of Quebec. The attitude of the French-Canadians towards conscription has been considerably modified and the enlistment records show that the call of duty is being heard and regarded by an increasing number of them. So sudden a transformation of opinion has caused considerable speculation in the province among all classes and several causes are believed to have been at work. For one thing the Nationalist propaganda has been suspended and the silence of M. Bourassa and his satellites and understudies has permitted other and quieter voices to obtain a hearing. Then the parish priests and other leaders of the French-Canadians have been emboldened to urge the obligation of obedience to the law.

Rev. Father Contois, parish priest of Terrebonne, said in a recent sermon:

"My brethren, we are at war. England and France are fighting side by side, and duty commands us to come to their support. At the last election conscription was established as a result of the verdict at the polls. The law is hard, but being the law of the land, must be obeyed. To-day we have in our midst agents of the Federal police. They will go to your houses, and you must receive them well. Use moderation. They are doing their duty, and there must be no wrath in your dealings with them, all of which will be to the honor of our parish."

Abbe D'Amours, who retired the other day from the editorship of the clerical organ, L'Action Catholique, during the 17 years he held that post was constant in his efforts to stem the progress of Bourassa's political and social views. His able pamphlet, entitled "Where Are We Drifting?" says the Montreal Gazette, was the first serious protest made by a member of the French clergy against the Bourassa school of French-Canadian politics. In it Father D'Amours proved conclusively that the very life of the people of Quebec is bound up in their adherence to British rule on this continent, and that a contrary assumption would be fatal to the national aspirations of his fellow-countrymen.

Other indications of a similar nature are also noted. Abbe D'Amours' policy has been maintained in L'Action Catholique under the new editor, Mgr. Eugene Roy, coadjutor to the archbishop, strongly supports the British connection. Yet further encouragement comes from the visit of Archbishop Mathieu of Regina, who brought a very important message to his countrymen in Quebec from the plains of the west. He informed both bishops and laymen that the past attitude of French Canada had caused unfavorable comment in the western provinces and should be altered. The whole Dominion will be advantaged if the province of Quebec falls into line and if there will be no disposition to encourage the continuance of misunderstandings or to dwell on the causes of dissension. Candid, fair, and free discussion and a genuine effort to reach a mutual understanding will do much to remove occasions of future bickering to alleviate the real or imaginary grievances.—Owen Sound Sun.

STATE-OWNED RAILWAYS IN CANADA

Negotiations in Progress for Acquisition of Grand Trunk and Grand Trunk Pacific

Negotiations for government acquisition of the Grand Trunk Railway and the Grand Trunk Pacific Railway were announced in the House of Commons on Wednesday by the Prime Minister. The Grand Trunk Pacific, he declared, was a national enterprise "to which the credit of the Canadian people has been committed, and in my judgment it is expedient to maintain it and not permit it to go into liquidation." The taking over of the Grand Trunk Pacific practically involved the taking over of the Grand Trunk as well. Confidential negotiations had been opened with the Grand Trunk Railway.

"We have," declared Sir Robert Borden, "made what we regard as a reasonable offer somewhat along the lines suggested in the Drayton-Acworth report, but somewhat more favorable to the Grand Trunk than the proposal made in that report. They have replied to us making a counter offer which was of such a character that we did not consider we could ask parliament to accept it." The government had then proposed that if no agreement could be reached the question should be submitted to arbitration without fixing any limit as was done in the case of the Canadian Northern Railway.

During the summer, Sir Robert added, a representative of the cabinet would be in London, and he had some "reasonable hope" that when parliament was again summoned the government might then be in a position which would involve the constitution into one system of state-owned railways in Canada of the chief railways in the country except the C.P.R.

Ultimate Nationalization

"It may be possible," Sir Robert added, "indeed, I think it is probable, that at some later date, but not in the immediate future, all the land transportation facilities in Canada, in the shape of railways, may so far as operation at least is concerned, be amalgamated into one system, carried on under one management.

The announcement came to the corpse of a general statement on the railway situation. In regard to the C.N.R., Sir Robert said it was not intended that Sir William Mackenzie and Sir Donald Mann should be on the board of directors. Sir Robert emphasized that while a road owned by the Canadian people must be subject to the direction and control of the people, yet it was absolutely essential that political influence should be eliminated from its administration. It was intended to operate the road through a reconstituted board of directors, consisting of the best men it was possible to obtain. Interference would not be tolerated, and every means available to the government would be used to operate the road properly.

Sir Robert gave a statement showing the financial standing of the system. Total liabilities were given as $430,864,377, as against assets of $82,0,432,885.

UNFORTUNATE FAMILY SPEND NIGHT IN THE RAIN

Farmer Refuses Employment to Man Because of Wife and Family

An unfortunate thing happened last Thursday night which might have been prevented, had a certain farmer residing near Wiarton exhibited a little more kindness of heart. Through government agency a man named Herbert had secured a position with the farmer, and accordingly on Thursday with his wife and three children. Finding that his new employe had a family, the farmer informed him that his services were not required, and turned him away from his place with practically no money and no place to go. Some one advised Mr. Herbert to come to Owen Sound where he might obtain work, and the family arrived here on Thursday. Having no money and no place to go, they spent the night on the west hill, where during the storm the children were heard crying, and a kind-hearted citizen took them into his home for the night. In the morning Miss Notter was communicated with, suitable quarters were found for them, and Mr. Herbert is now earning $3 a day at his new job. The Provincial Government should investigate more carefully such cases, and should know what reception a man will receive before sending him on such an errand, for in this case the results might have been serious.—Owen Sound Sun.

REGISTRATION RULES STRICTER FOR ALL MEN

Young Men Must Report to Post Office on Attaining 19 Years

It is announced by the Ontario registrar that the fine of $50 which will be levied if a man is found not carrying proper military papers, applies to all men of 19 to 45 years of age. Men of these ages are also liable to pay a fine of $100 if they fail to notify the registrar when they change their address. Those new Dominion Government orders come into effect on June 1. In regard to the order about carrying papers, it is pointed out by the registrar that having credentials at home will not answer. Proper credentials, showing how a man stands in regard to the Draft Act, must be actually carried by all men of these ages, and those found without them are liable not only to the fine but also to being retained indefinitely in military custody.

The 19-year-old men on going to the postoffice to send notice to the registrar of their attaining that age will be presented by the postoffice authorities with a receipt which will prevent their being arrested by the Dominion police. Later they will receive certificates from the registrar showing they have fully registered.

NEW TREATMENT FOR CONSUMPTION

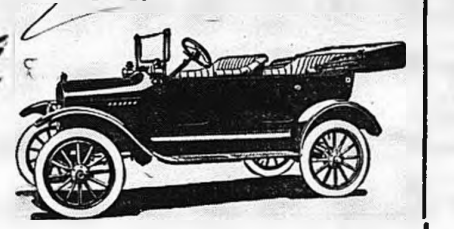
An Italian scientist is credited with a discovery which will revolutionize the treatment of consumption. Explaining his discovery, Professor Io Monaco said he had observed that sugar had a remarkable effect on the secretions of the human organism. After seven years of study of these phenomena he became convinced that the secretions of saliva, bile and the gastric and pancreatic juices were modified pronouncedly by the introduction of sugar. This gave him the idea of applying this method to the bronchial secretions of consumptives.

The first experiments made by this method on consumptive soldiers from the front gave results far exceeding his expectation, he reports. There was rapid improvement in most cases, and he obtained cures which appeared to be radical.

Professor Io Monaco explained that the bronchial secretion is an indispensible medium for the existence of the tubercule bacilli, and that an injection of saccharose secretion diminishes and finally disappears, the bacilli disappearing with it.

The Ford Saves the Hay and Oats the Horses Eat

IT HAS been estimated that five acres of land are required to maintain one horse for a year, and that the same five acres would produce nearly enough food for two people. If 50,000 Canadian farmers each replaced one horse with a Ford, 250,000 acres would be added to the Nation's source of food supply and enough extra food made available to feed 100,000 people.



Just think what a great service this means to the country at the present time and the benefit to the farmers from the sale of food produced on this acreage.

A Ford car also saves the farmer a week or more of valuable time each year, which can be used for further productive work. The Ford travels three times as fast as a horse and rig—costs less to run and keep, and is far easier to take care of. With labor so scarce and high priced, time means money, so do not delay in getting your Ford.

WHILE AT WAR

Women Suffer at Home

Toronto, Ont.—"I consider Doctor Pierce's Favorite Prescription the very best of woman's tonics. I suffered a severe nervous breakdown. I could not sleep, was weak and tired all the time. I took the 'Prescription' and a few bottles completely built me up and relieved me of my nervous condition. It is a good medicine and I am glad to recommend it.—Mrs. Alfred Shepfard, 220 Seaton St.

Niagara Falls, Ont.—"I can safely say that 'Favorite Prescription' did me a lot of good. I at one time developed women's trouble; my nerves were completely shattered, and I became weak. I had severe backache and pains in my side, extending down into my limbs. I doctored, but did not get relieved of my ailment and was down and out when I began taking Dr. Pierce's Favorite Prescription, and it so completely cured me and restored me to health and strength that I was able to do all my own work and others besides. I do recommend 'Favorite Prescription' to weak and ailing women; they cannot get a better medicine."—Mrs. John Lockhart, 28 Terrace Ave.

Favorite Prescription is an invigorating, restorative tonic, a soothing and strengthening nervine and a positive remedy for the chronic weaknesses peculiar to women.

This old prescription of Dr. Pierce's is extracted from roots and herbs by means of pure glycerine and is a temperance remedy of 50 years' good standing. Send 10c for trial pkg. of tablets to Dr. V. M. Pierce, Invalids' Hotel, Buffalo, N. Y., or Bridgeburg, Ont.

CARD OF THANKS

The undersigned desires to express his appreciation of the assistance rendered by neighbors who came to help save his property from fire on Wednesday of last week, also the sympathy received from friends and acquaintances in the loss.

Rich. Daniel

CARD OF THANKS

Mr. and Mrs. R. J. McGirl wish to convey their sincere thanks to their friends and neighbors for the generous help given to them when their house burned down on May 23rd.

CARD OF THANKS

The brothers and sisters of the late W. J. Watson desire to express their appreciation for the kindness and sympathy extended to them by friends and acquaintances in their recent bereavement.

—Mr. and Mrs. Harry Pocock and daughter, of London, were on a motor trip visiting at Mr. S. Stevenson's in Glamis and Mr. Jas. Brown's, Paisley.

—Mrs. A. Orr and children of Rudolph, Ohio, and Mrs. Boyd Barclay and son of Toledo, Ohio, daughter and daughter-in-law of Rev. A. Bine, are here visiting the latter for ten days.

—Lt. Ewart Munro, son of Mrs. R. Munro, of Port Elgin, and formerly of Paisley, was recently wounded. Lt. Munro was on the Clinton staff and enlisted with the Sportsmen's Battalion.

—The annual convention of the Bruce Presbyterial Missionary Society will be held at Southampton on Thursday, with sessions at 1 o'clock and 7 p.m.

Poverty Maketh Rich

The "Poverty Night" entertainment in the Baptist church on Tuesday will bring a nice sum for Red Cross purposes, as the proceeds amounted to $56. The fun started at the door, where those admitted were fined for what they wore and what they didn't wear. A good program was rendered, consisting of solos by Misses E. Melntyre and Mabel Stanley; duet by Betty Neilson and Lily Plaid; recitations by Jean Cameron and Howard Bine, choruses by the organized class of girls. Mr. F. S. McLachlan was chairman.

Colt and Tenton Clash

A German citizen of Bruce Tp. had a young member of an Irish neighbor family brought before J. C. Gibson, J.P., on Thursday last for using abusive language. It was a case in which the youth of Celtic blood had boiled over at what he assumed to be a jealous attitude on the part of the Teuton. The magistrate, however, could see nothing serious in the case, and advised the parties to shake hands and be friends again before he made any decision from the bench. This advice was eventually accepted, the plaintiff and defendant agreeing to divide even on the costs of the court. The dove of peace again hovers in the Vesta vale, and whether these representatives of different races resume amicable relations again, this will probably be a lesson to both, that they should control their tongues and tempers.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpariel line for first insertion, 5c per line for each subsequent insertion.

Amelia Merrow's Folded Hands

By Dorothy Donnell Calhoun

Part II.

Two days after the social, Abel came in from his chores to find the hired girl standing on the table in the sitting room, her gaunt person arrayed in a befuffled white muslin dress, turning slowly while Ma basted up the hem. Scraps of conversation floated out into the kitchen as he hung up his cap and overcoat.

"An' then he says, 'I'd be pleased to call,' he says." It was Lizzie's shrill soprano, toned to the pitch of pride. "He sez it just like that, Mis' Merrows —'I'd be pleased to call.'"

"Ruel Granger's a nice steady boy, Lizzie," Ma commented, evidently around a mouthful of pins. "I shouldn't wonder if he had intentions. There! That hem's ready to run on the machine. You go up and curl your hair and put that ribbon I gave you in the camisole and I'll have this done in a jiffy. Maybe you'd better lie down a spell. Trying on is tiring work. I'll call you, soon's supper's ready."

In the mirror over the sink Abel caught a glimpse of his face. It wore a slightly dazed expression. After supper he and Ma sat on the hard pine chairs in the kitchen listening to the creak of rockers in the next room where Lizzie in all the glory of the ruffled muslin, was entertaining her caller. Ma listened to the murmur of voices, her lips curving in the little secret smile women wear in the presence of love affairs but her shoulders had a weary droop. Abel eyed her anxiously.

"You look tuckered, Ma."

Amelia nodded cheerfully. "I am sort of tuckered. I guess I'll go up and go to bed. It's been a full day. That dress Lizzie's got on was one your cousin Emma left hanging in the spare-room closet last summer. It was all yellow and I had a sight of trouble doing it up and ironing out the ruffles. I thought she looked nice in it, didn't you, Father, now she's getting a little plumper?"

Whether from the ruffled muslin or the additional plumpness Ruel Granger soon progressed from the formal status of "calling on" the Merrows' hired girl through the intermediate stage known as "going with," to the pronounced attentions that belong to "keeping company." Lizzie began to crochet yards of lace while Ma, that her work might not be interrupted, washed the dishes and scoured the milk cans happily in the kitchen.

More often than not Abel would come down in the morning to find Ma building the fire and setting the coffee-pot on the stove.

"Lizzie was out till seven at the Ladies' Aid social; she would explain rather guiltily. "Young need their sleep."

At other times he would find Ma bent above the running machine, busily working over the seams of odd patches for Lizzie's adornment or baking a batch of sugar cookies for her to regale her admirer when he came to supper.

Having a hired girl would be a good thing, he told himself musingly, "if only it didn't make so much work. Ma don't really seem able to stand it. I don't know how folks that have two-three of them get along at all."

He was still puzzling over the problem that evening when Ma plumped herself down in the rocker across the hearth, determination in every kindly line of her soft old face.

"I been thinking, Abel," she said firmly. "Lizzie's going to be married in the spring and it's natural for a girl to want to buy some things to start housekeeping with. The fifteen a month we pay her doesn't go far these days. There's just one thing it's our bounden duty to do and that's furnish Lizzie's wages. It's as plain as day."

Abel groping in the mazes of his mind for words meet to express his views of Ma's guileless plan, found instead a familiar phrase that had done good service in their life together.

"Just as you say, Ma," he nodded feebly. "Just as you say."

Accordingly the hired girl's wages were raised and the weeks that followed were brimful of preparations for the wedding. Yards of unbleached cotton draped the sitting room; napkins, tablecloths in all stages of hemming, concealed Abel's pipe and farm paper from view. The air was redolent with the spicy fumes of baking fruit cake while Lillie continued to crochet endless yards of lace to adorn the trousseau Ma was making for her.

Ma was gently radiant. "If our little Ellie had lived, Pa," she told Abel, "we'd have wanted her to have a nice wedding."

In May Lizzie and Ruel were married. The little farmhouse overflowed with guests. Ma was everywhere, helping Lizzie dress, greeting the guests, arranging great platters of chicken salad and plates of cake on her best damask cloth in the sitting room, a busy, radiant little figure with excitement-pink cheeks and shining eyes.

Abel, jammed submissively into a corner of the bookcase, watched the simple ceremony wonderingly. He had always thought of Lizzie as homely but to-day in the dainty white dress Ma had given her she seemed oddly transfigured. Perhaps it was the bride-look that all girls, plain or not, poor or rich, wear on their wedding day; perhaps, he mused dimly, she looked beautiful to him because she was going away!

After Lizzie and Ruel were on their honeymoon trip to Centreville and the last guest had gone, Abel Merrows and his wife stood in the bay window, looking out across the fields, the sunset light red on their old faces. The breath of apple blooms crept about them from the jars and pitchers of the pink blossoms clustered in the room. Outside in the soft spring dusk a robin burst into song.

Shyly, Abel's gnarled old hand went out seeking Amelia's. He drew her toward him and kissed her awkwardly like a boy.

"Pa!" Amelia cried softly. "Pa! The idea—old as we are!"

But she was blushing like a girl. To cover her confusion she turned from the window and looked about the disordered room; the light of eager planning crept into her gaze.

"After all, I don't know as sixty-five is what you'd call real old," she said thoughtfully. "Pa, do you know, I don't believe I'll get me another hired girl—not right away. Now I've had such a nice rest and all, I shouldn't wonder if it would seem real pleasant to have something to do again!"

(The End.)

USING ELECTRIC HEAT.

Possible to Utilize Hydro-Electric Energy During Certain Hours.

The use of electricity for heating our homes has been the subject of much controversy during the past few years. The difference of opinion was principally due to the general way in which the subject was treated and the lack of definite detail in the various over-optimistic arguments advanced. The recent coal situation has brought about a more serious study of facts, and the figures now available show that, even if all of our numerous water-powers in Canada were converted into hydro-electric energy, the quantity would still fall short of that required to heat our homes during the winter.

To say that hydro-electric energy cannot replace coal entirely for heating purposes does not mean that it cannot be utilized or that it must be confined to raising the temperature of a cold room a few degrees in the late spring and early autumn. It may, indeed, stimulate the use of more easily available fuels, such as wood and peat. The principal objection to the use of many fuels for domestic heating is, that a fire cannot be banked up to last over night, say from 11 p.m. to 7 a.m. Now, this is just the period when a large portion of the hydro-electric equipment installed in the country is lying idle, and the surplus energy then available might well be used to supply heat in at least a few of our homes. This would not only mean a direct conservation of coal, but would render feasible the use of other fuels not requiring to be transported such long distances.

As an example, the hydro-electric energy used in the Montreal district is some 150,000 h.p. with a load factor of about 75 per cent. This "load factor" means that 26 per cent. of the total possible output during the 24 hours is unused, though it could be utilized at certain hours. In other words, during the six colder months, approximately 121,000,000 k.w.h. could be used for heating purposes, without the addition of a single horse-power in the present installations. This is equivalent to some 20,000 tons of coal.

One of the difficulties would be to prevent the energy being used for heating purposes except during the hours when very little energy is required for power and light. This could probably be accomplished by installing at the various heating services a disconnecting relay operated from the central station.

To England.

England, in thee not Europe trusts alone,
Not noble France and long-loved Italy
And murdered Belgium in her agony,
But the immense world, deepening zone on zone,
With all her crowding eyes, from far unknown
Haunts of our human race, looks up to thee,
In danger undismayed, because they see
Thy broad high-blazoned shield above her thrown.

London Sausage Sold Out.

The State sausage factory is booming, the entire product at present finds its way to the East End of London, but at present the factory is able to supply but part of the demand for its products, says a recent despatch from London. At the Ministry of Food it is denied that other factories will be opened shortly. Lack of raw material is given as the reason.

A little thick cream added to the horseradish when it is mixed will give it a delicious flavor.

The Smile.

Be it foul or be it fair,
Smile.
Never give in to despair—
Smile.
Drive ahead with all your might,
All the day and half the night,
Swear that you will win your fight—
And smile.

Has Dame Fortune thrown you down?
Smile.
Never mind her fickle frown,
Smile.
Just sit steady in the boat,
Down life's current smoothly float.
'Twill come right some day, you'll note—
So smile.

Sweet corn is a good substitute for wheat and meat. Have plenty of sweet corn in gardens having sufficient space. Corn requires too much room to make it worth while in small gardens.

A fruit gelatin may be made with almost any left-over fruit.

Leave It to Parker

THE postman and expressman will bring Parker service right to your home. We pay carriage one way. Whatever you send—whether it be household draperies or the most delicate fabrics—will be speedily returned to their original freshness. When you think of

Cleaning or Dyeing

think of PARKER'S.

A most helpful booklet of suggestions will be mailed on request.

About the House

THE NEXT SIXTY DAYS.

The next sixty days, we are told, will be very critical ones in the allied countries so far as food is concerned. If we are patriotic, if as would win the war, if we want our boys to come back safe and sound—everyone of us must help out on the food problem. It is an individual responsibility which rests on every man and woman of this country. It is absolutely necessary that we eat less of wheat, meat, fat and sugar.

Just now the wheat situation is especially critical. We must reduce our consumption one-third. Use only two-thirds or one-half wheat in breads, pie, muffins, cakes, and the like. Substitute in place of the wheat whatever you can get—potatoes, barley, oatmeal, buckwheat, cornmeal, etc. Use your own recipes, changing them to suit present conditions. Use less sugar and less shortening. Substitute one-half barley flour, corn flour or cornmeal, for one-half the wheat flour.

Here are some suggestive recipes.

Baking Powder Biscuits.—Two cups barley flour, two tablespoons fat, half teaspoon of salt, four teaspoons of baking powder, two-thirds of a cup of milk. Sift the dry ingredients together, rub in the fat, and add the liquid until a soft dough is formed. Roll to about three fourths of an inch thick, cut with a cookie cutter and bake in hot oven.

Cornmeal Bread.—One and a quarter cups of liquid, one and a half teaspoons of salt, two-thirds of a cup of cornmeal, one-quarter of a yeast cake, dry or compressed, in one-quarter of a cup of lukewarm water, two and a half cups of flour. Pour the liquid over the cornmeal and salt and heat to the boiling point. Cook twenty minutes in the double boiler or over hot water. Cool, add yeast and flour. Knead, let rise until double in bulk. Knead again, shape into loaf, and let rise in the pan until the bulk has again doubled. Bake for fifty minutes.

Potato Bread.—One and two-thirds cups of mashed potato, one teaspoon of salt, one-quarter of a yeast cake in two tablespoons of lukewarm water, three cups of flour.

Clean the potatoes, boil, pare, and mash thoroughly, add salt, and when cool add the yeast. Add part of the flour and let rise until very light. Add the remainder of the flour and knead thoroughly, making a very stiff dough. Let rise until treble in bulk and let rise in pan till double in bulk. Bake forty-five to fifty minutes. All the flour may be added at once, but the dough is difficult to handle.

Oatmeal Bread.—One cup of liquid, one teaspoon of salt, one cup of rolled oats, one-quarter of a yeast cake in one-quarter of a cup of lukewarm water, two and one-quarter cups of rye flour, two and one-quarter cups of white flour.

Scald the liquid, cool till lukewarm, add salt, yeast and sifted flour, mix thoroughly, knead, let rise till double in bulk. Knead again, shape into loaf, and let rise in the pan until the bulk has again doubled. Bake fifty minutes.

Note.—If you have a good rule for bread use it, but in place of one-quarter of the bulk of white flour use one of the other grains. This amount will not greatly change either the texture or the flour of the bread. The sponge may be set with white flour and the mixed flour worked in later. If potato is used as a substitute, allowance must be made for the extra water content, and enough flour added to make a very stiff loaf.

The Best Insurance

You Can Put on Your Buildings

is the protection that good paint guarantees. Fire Insurance does not prevent fire—it only partly reimburses you for loss sustained, should fire destroy your property.

Fire may never happen.

On the other hand, the use of good paint actually prevents a loss from decay which is not just a possibility, but an absolute certainty. The destructive effects of weather, upon buildings that lack proper paint protection, go on every second of the day and night.

MARTIN-SENOUR

"100% PURE" PAINT

is the greatest known protector of all building material against time and weather, because it is made only of pure White Lead, Pure Zinc Oxide, and Pure Linseed Oil.

You would not think of letting your Fire Insurance Policies lapse in order to save the yearly premiums. It would be even poorer economy to let your Paint Protection Policy lapse by neglecting to repaint your increasingly valuable buildings this season.

When you do paint use Martin Senour "100% Pure" Paint. It spreads easier, covers more surface, and protects longer than most other makes.

Write for "Farmer's Color Set" and "Town and Country Homes". Just what you'll need in planning your painting. Mailed free. 123

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

THE LURE OF A KITCHEN GARDEN.

For four seasons we have had a garden plot only 20 x 25 feet. On this small tract of ground we have grown all the vegetables, except potatoes and sweet corn, needed for our family of three persons. Furthermore, the surplus garden products given away would, if sold, have more than paid for all the roasting ears and potatoes that we bought. The results we have obtained with our small garden can be greatly increased where more garden space is available and there is the spare help to take care of it.

Last year in this little backyard garden we grew lettuce, radishes, onions, peas, beets, bunch and stick beans, tomatoes, cucumbers, red peppers, and celery.

Peas, to be at their best, should be gathered while still small and tender. Furthermore, the chemical changes that take place in this vegetable are more marked and more rapid than in almost any other. There is all the difference in sweetness and in flavor between peas that have been off the vine from twenty-four to forty-eight hours when compared with those gathered in the forenoon and served at the midday meal. So we say that for one who really cares for peas the best way to have them is to grow them.

In growing peas we have not found the strictly dwarf varieties best. Personally we prefer the semi-dwarf kinds, as they require less room and yield more abundantly. If bits of brush are not available for sticks, a few short kindling pieces may be driven into the ground on each side of the rows about 8 or 10 feet apart. Binder twine or cord of any kind may then be strung on these, a round being added from time to time as the vines gain in height.

Our little garden spot was not naturally fertile, but a few loads of manure the first year, followed by from 20 to 30 wheel-barrow loads of stable manure each year thereafter, keep it productive. In spading it we have always gone as deep as the spading-fork tines would allow. In the soft, mellow, humus-filled soil spading to this depth is a comparatively easy task. Beginning with good soil and deep tillage, the conservation of moisture, even in a dry season, is not difficult.

After each rainfall, and as soon as the ground was dry enough to be worked, it was stirred so as to prevent the formation of any crust and to provide instead a thorough dust mulch. A slight sprinkling of the garden every few days induces a shallow root growth, and more harm than good is done. We practice level planting exclusively, making no hills or ridges. With this method and in rich soil, rows may be only half the ordinary distance apart.

In planting the earliest vegetables we always plan to let later growths come in between. For this reason, to one unacquainted with our plan, it would seem that when the early lettuce, radishes, onions, beets, and peas are in the whole garden has been planted and that there is no room for anything else. A little later, though, rows of other vegetables are seeded right in between these, just as if they were not there.

By this time, it must be acknowledged, things are pretty badly crowded. In our little garden we have had 20 rows of vegetables all at once, with double plantings, such as tomatoes, set in the radish rows. Necessarily, this condition made even hoeing difficult, so that most of the work of cultivating, for the time being, was done by using a hand weeder and spading fork. Soon, though, the rows of radishes, early peas, lettuce and onions—ten in all—were removed.

In the meantime we had set 48 pot-grown tomato plants, each plant with a piece of paper wrapped around and extending from just beneath the soil to about two inches above, as a protection against cut-worms. A dozen red-pepper plants—more than we needed—had been started. By the time the first tomatoes were ripe, the garden is made up of beans, tomatoes, cucumbers, peppers, and perhaps some late beets. Again the garden seems full so that a visitor viewing it for the first time would conclude that we had grown no early garden.

By the time the bunch beans are gone, the taller varieties grown around the edge of the garden and allowed to trail on the woven-wire fence are ready for use, and continue throughout practically the entire season. Beans and tomatoes make up the most of the late summer garden, but before cold weather head lettuce and celery are growing between the rows of tomatoes. Celery, as every experienced gardener knows, heads best in cool weather only, the growth here being made principally in September.

While we enjoy growing all vegetables for which we find room, tomatoes afford us our greatest pleasure and largest profits.

For tomatoes the most satisfactory stake that we have ever tried consists of two pieces split from heavy boards, such as are used in shipping boxes. One piece is sharpened and this nailed to another. Two 4-foot pieces will give a 7-foot stake, allowing one foot for lap. The shoulder, formed where the pieces are nailed together, affords an excellent place on which to hammer when the stakes are being set. We keep all suckers picked off the tomato vines, allowing only one or two main central stems. During the growing season the vines should be gone over, suckered, and tied up every few days. Cloth strings—from rags of any kind—should be used so as not to cut or otherwise injure the vines.

In the autumn after having spread 30 wheel-barrow loads of well-rotted stable manure over the surface, the entire garden patch was spaded good and deep.

This fall clean-up and spading of the soil of the entire garden are of much importance for several reasons. The turning over and mixing of the soil and manure allows the rain and melting snow to fill the subsoil with moisture, the plant food in the manure is less likely to be lost by washing and leaching, and the insect pests that have hibernated in the leaves, rubbish, and top soil are in great measure destroyed. Last, but not least, the lower soil stratum turned up better receives the frost action, and in consequence is in condition to be much more easily brought into good tilth in the spring.

When the garden soil is handled as I have described, we find no advantage in reapading or preparing the seed bed much in advance of planting unless the spring is so dry as to endanger the moisture supply by evaporation. But should continued drying weather prevail before planting time, spading and a surface mulch check the escape of moisture. In any case, nothing is gained by trying to hurry plants into the ground before conditions are favorable for their growth.

From our little garden we have averaged annually $60 worth of vegetables. Furthermore, we have had vegetables of a quality such as we could not have bought on the market. Best of all, we have added to our health and happiness while doing our bit in food production and conservation.

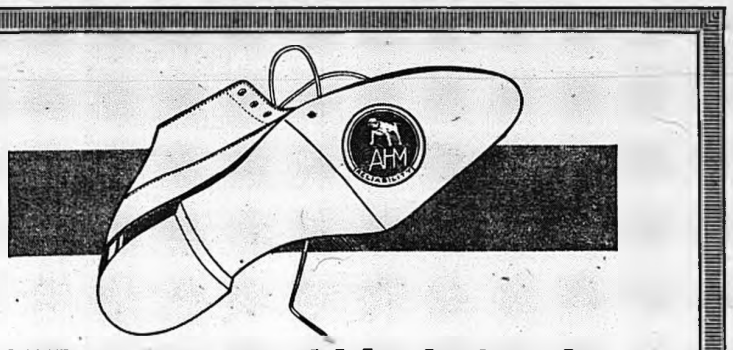
Have a Bird Sanctuary.

It is patriotic to save the birds. Birds eat insects. Insects destroy about $1,500,000,000 worth of grain, fruit, vegetables, and trees every year. Now the birds can save all that money but they can help to save a big portion of it. In the great scheme of nature, birds were created to keep the insects in check. They can do it and do it well.

But much mismanagement, lack of foresight and many other reasons, we have wiped out nearly ninety per cent. of our bird life. Now, it's up to us to use all means possible to bring back the right balance of bird life. When you destroy the balance of anything, something happens. The balance of bird life has been upset; that's one of the reasons why the farmers of the great potato bearing countries are compelled to pay millions for materials to kill potato-bugs. Quail, rose-breasted grosbeaks and other species consider potato-bugs the greatest delicacy, but we haven't enough of these birds to do the work.

What are the worst enemies of birds? Man, cats, English sparrows, red squirrels, continued rains and late cold weather in spring, floods, ice storms, rats, snakes, Cooper's pigeon, marsh and sharp-shinned hawks; and in some places blue jays, crows, grackles and cowbirds.

How can cats be prevented from getting birds? Get rid of the cats, or use tin funnel-shaped guards around trees and poles; also by planting a Dorothy Perkins rosebush around trees which contain nests.



What birds walk instead of hop? Blackbird, crow, meadow-lark, cowbird and ovenbird.

Should bird-houses be cleaned in the spring? The largest manufacturer of bird-houses and a sincere lover of birds says, "No," and we agree with him. Leave the houses alone.

Why get mad when an idea strikes you? It may be the making of you.

Why you should look for this Trade-mark on your Shoes

A TRADE-MARK is a manufacturers' signature. If a firm makes an article they are prepared to stand behind—they stamp it with their trade-mark. It is put on their goods so you may identify them. It stands to reason, therefore, that it is safer for the public to always buy "known" and "trade-marked" shoes rather than "anonymous" shoes.

Each working day of the year, the A. H. M. trade-mark is stamped on the soles of thousands of pairs of shoes for men, women and children, because we want you to know our shoes when you see them—because we are making a sincere effort to produce good values in footwear—because we believe you will find our shoes satisfactory—and buy them again and again.

Ames Holden McCready are Canada's largest makers of shoes. A H.M. footwear is sold by thousands of dealers in every part of Canada—and by the leading merchants in almost every town.

We make such a large proportion of the boots and shoes that the Canadian people wear that you are probably wearing A. H. M. shoes now. However, the next time you buy shoes, to make sure, look for this trade-mark on the sole.

We make many grades and styles of footwear, but no matter what price you pay for them you will find them excellent value for the money. You will find it profitable and satisfactory in future to always make this trade-mark your guide in buying footwear for yourself and your family.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Falling Of The Stomach.

I have been asked to write an article on gastroptosis, or falling of the stomach—what it means, and what are some of its symptoms.

The stomach is very movable, being in the upper part of the abdominal cavity, extending from right to left and held in place by the food tube or gullet, and by loose bands or ligaments attached to the diaphragm, to the liver on the right, and the spleen on the left.

Though so loosely held, it is in motion most of the time, particularly when food is churned about in it, and undergoing digestion.

The tissues of the stomach and its ligaments stretch easily and, lacking the resiliency of an elastic tissue, they do not return to their normal boundaries after a certain number of stretchings.

The stomach of a full grown adult holds one to three pints, and you can imagine how much it is distended and overtaxed by those who eat and drink to excess.

It is not unusual for guzzlers of beer, wine, whiskey, gin, etc., to drink several quarts at a sitting, and for those who are intemperate in eating, to eat far more than the proper capacity of the stomach.

The kidneys and intestines do their best to relieve such sinners, but all these organs are sooner or later involved in the penalties of over-eating and drinking.

Continued abuse of the stomach must ultimately result in persistent dilatation, the organ loses its natural shape, constant fermentation and gas formation balloon it into a great bag, and it encroaches upon neighboring organs and causes unlimited discomfort.

From dilatation to relaxation of the loose supporting bands of the stomach, is but a step.

When the bands begin to give way, there is nothing to bring them back to their normal state.

The more they are pulled, the more they stretch, and the less able they become to sustain the over-distended and over-weighted stomach.

Then the latter drops, sometimes horizontally and sometimes bow or stern, first the intestines can offer little resistance, and in time the stomach distands and drops until it reaches the pelvis.

Others who suffer with falling of the stomach are the people of lax fibre, who have little muscular strength to begin with, and who have been overpowered by hard work or improper food.

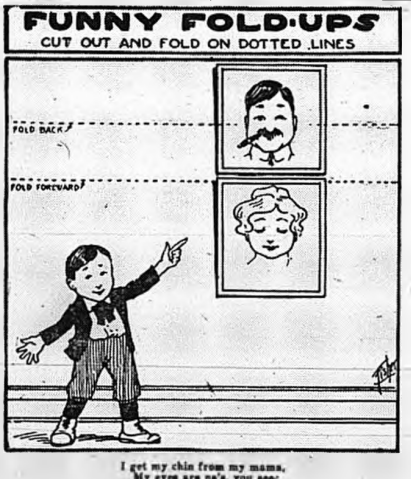
Included in this group, are hard-working women burdened with the care of families among the poor and neglected.

Only recently has this condition been accurately recognized, only recently have the stomach and its disorders formed a group of diseases for careful investigation.

The X-ray, and abdominal surgery, have illuminated the subject, and though we are far from getting ideal results in the treatment of many stomach diseases, we have certainly made great gains and will gain much more.

Some of the symptoms of falling of the stomach are general discomfort, want of ambition for ordinary duties, constipation and poor nutrition.

The treatment may be medical, surgical, or instrumental.



If the abdomen is opened, a reparative operation can sometimes be successfully done.

Many cases, however, are much relieved by a properly adjusted belt, and this should be tried in preference to an operation, when possible.

QUESTIONS AND ANSWERS

J. K.—Am weak and not able to do my housework well. Get very short of breath and my heart beats rapidly. I feel better when I can lie down and take a rest. Please tell me what is wrong with me.

Answer—My opinion would be that you are trying to carry a bigger load than you are able to carry. If you could get a rest for a few weeks, having somebody do your work for you, and just play and sleep for a time, I think you will get a new start. I should be glad to hear if you are able to do this.

I got my chin from my mama,
My eyes are pa's, you see;
So put them both together, and
The product—well, it's me.

Destroy The Cutworms.

Early though the season is, the insect world is already "on the job." Cutworms destroy thousands of dollars' worth of vegetable crops every years. Gardeners must aid in the campaign to save the crops by destroying these pests. Watch for their appearance as they are already at work. They cut through the stems of the young beans and tomato plants at the ground line during the night and leave the young plant dying on the ground. Investigation in the loose soil will generally discover the miscreant a few inches away, half an inch or so below the surface, when he can be summarily squashed. They can be killed wholesale by scattering along the rows poisoned bait made as follows: Bran, 20 lbs., cheap molasses, 1 quart; Paris green or white arsenic, half a pound; water from 2 to 2½ gallons. Mix the bran and Paris green (or white arsenic) thoroughly in a wash tub while dry. Dissolve the molasses in the water and wet the bran and poison with the same, stirring well so as to dampen the bran thoroughly.

War Time Cook Book.

An excellent war-time cook book has been issued by the Women's Institutes of Ontario and copies may be secured by writing to the Ontario Department of Agriculture for Circular No. 11. Various ways and means of saving and substituting are suggested.

The Paisley Advocate

PAISLEY, MAY 29th, 1918

CITIZENS' ORGANIZATION NEEDED

This village is very much in need of a stronger public spirit, a greater unity of purpose than is to be found at the present moment. The organization of a citizens' association or committee would undoubtedly promote our civic welfare.

Several questions in which everyone is more or less interested could best be discussed at public meetings, and lines of action outlined for the council to follow.

Our electric light service, for instance, is about the worst in the universe. Although we have no desire to be left in total darkness, and the illumination we have is preferable to that, yet we are accepting and paying for something for which we are not getting anything like value for our money.

Our waterworks fire protection is becoming a very expensive item, and in this, too, we are not obtaining the worth of our money.

Then there is the fuel problem. Coal is coming in now, but it is not being distributed in a way that will give every household a share in case of a shortage, and no concerted effort has yet been made to obtain wood. The every-man-for-himself system is liable to leave some people in the cold next winter. We should have a wood supply ensured by the purchase of a piece of bush in as convenient a place as possible.

To have a night watchman or not is another topic that can be threshed out.

There are some very dirty spots about town that should be looked after.

This is quite a docket already, but there are other matters that are sure to be neglected unless our citizens get together and express their views freely in favor of reforms and improvements they would like to see brought about.

We suggest that a public meeting be called at an early date to organize a citizens' association.

PAISLEY COURT OF REVISION

Court met at 9 a.m., May 27th, and heard the following appeals: Elwood Armbrust, assessed too high; Thos. H. George, has no dog; John H. Glover, assessed too high; Edward Greaves, says non-resident; James Stark, building assessed being removed; A. B. J. and Mrs. Simons, too high assessed on income.

Messrs. George and Stark only appeared in support of their appeals, other appelants not represented.

Pearce — Logie — That Elwood Armbrust's assessment be sustained.—Carried.

Logie — Forrester — That T. H. George's appeal be allowed.—Carried.

Logie—Skinner—That the assessment of Edward Greaves re income tax be sustained.—Carried.

Forrester—Pearce—That the appeal of James Stark be allowed.—Carried.

Skinner—Logie—That the assessment of Mr. and Mrs. Simons be sustained.—Carried.

Forrester—Skinner—That the appeal of J. H. Glover be adjourned until June 6th next at 8 p.m.—Carried.

Court adjourned accordingly.

Bowling Green Converted into a Garden

The local bowling green will this season be a productive piece of ground, that is if Messrs. I. Shoemaker and T. Muir have any luck in their planting operations. The club members are not devoting any time to the sport at home, and as a rent had to be paid for the new grounds leased for a green, the gentlemen named decided to make the most and best of the situation by going in for production of foodstuffs. Instead of big scores and loud hollers raised on the green in past seasons, there is a prospect of raising bags and bags of potatoes, along with bunches of radishes, onions and other crisp green goods.

Must Follow New Time

Owing to the difficulty caused by some of the country schools continuing to run on "old time," Inspector Craig of Fergus wrote to the Department for advice. He was told that there was only one time now, that set by the Government, and schools must open and close according to this time. There is only one exception and that is where trustees have the power to shorten the school hours so that schools may be dismissed before four o'clock, Government time. Where the new time is not observed teachers may be held liable for infraction of the school law. Those who have changed their clock to the Government time are experiencing very little difficulty.

Home Took Fire While Baby Was Attended

Mr. and Mrs. Richard J. McGill, Flora Road north, and their family of six children had their home destroyed by fire on Thursday forenoon. Mrs. McGill had been working in the summer kitchen but had gone to the front of the house to bathe the baby and put it to sleep, and when she returned to the kitchen about half-past ten o'clock, it was in flames. There was nobody near at the time except some of the younger children; as Mr. McGill was busy at seeding in a back field. Some of the neighbors hurried over in time to save what could be got out of the house, but the family lost a good part of their clothing, besides some household effects. Mr. McGill had been preparing to enlarge his house, having the excavation made for the foundation of an addition at the front, but now he is halting in his plans. There was $700 insurance on the burned house and contents. To be turned out of home in such short notice and under losing conditions is very inconvenient at the best, yet not so bad as if in the middle of winter. We are sure the public will sympathize with the family in their loss.

MEDICAL INSPECTION OF PUBLIC SCHOOL

Eyes, Ears, Noses, Throats, Etc., Thoroughly Examined by a Lady Doctor

"Gosh, dad, I never dreamed people were able to see like this," one little boy wrote to his father after having been supplied with proper glasses by Dr. McKenzie-Smith.

There is an excellent work going on, and the future generations will owe a lot to Dr. McKenzie-Smith and the other clinics with whom she is in touch. The work of inspecting the rural schools was first agitated by Miss Hodson and Miss Wilson of Parkdale. This idea so impressed itself upon the Women's Institute that they have put forward every effort to have the country benefitted by this intellectual and physical effort.

Dr. McKenzie-Smith's home is in Gravenhurst, and is situated near the school. Being very interested in children she watched them and saw how some of them would always have to regret the fact that although not absolutely physically perfect when young, yet attention had not been directed to their disabilities and they could not grow up to normal man and womanhood.

Two years ago this month one school was examined by doctors. Twenty-two children were operated on after this examination. On account of the war the work was allowed to drop until last fall. Since then schools have been examined in Rainy River District, Thunder Bay, Manitoulin and Brantford. So far this year those examined have been Peel Lincoln, Kent and Glengarry counties, Orillia and Wiarton. Under Dr. McKenzie-Smith's clinic there has been already 400 children operated on this year.

From Dr. McKenzie-Smith's enthusiastic words of her work, one can tell she is a very ardent worker. Out of 400 children operated on 50 were done free of charge. No child's operation cost over $12 and the lowest figure, with the exception of those done as a gratuity, was $3. Here a word must be said for the local doctors in all victinities. In every case they have shown themselves willing to heartily co-operate with the representatives and receive only a flat rate for their services.

Very little assistance was received by the government until just lately to help along this enterprise. The Women's Institute were allowed $50 per month in former times but since hearing the good that is being accomplished, the Women's Institute are receiving $2 a day. The money is being judiciously used and a great deal of good is resulting from it. In this town the operations necessary will not cost the public one cent.

It is a complete test the children are undergoing. They are measured for height, their ages taken, eyes, throat, teeth, nose, ear, heart and lungs are thoroughly analysed by these zealous workers. In the rural districts it has been found that over 72 per cent. of the children have decayed teeth, while 15 per cent. have lost the third molar, or permanent tooth. In towns 95 per cent. have decayed teeth. In the case of tonsils, in rural communities 3 per cent. require to be attended, to a per cent. of 28 in towns. The reason for the 10 per cent. difference is probably the case of the eyes 16 per cent are found in need of glasses.

Several benefits are to be derived from the visit if carried out, and they are important. Lighting, seating, ventilating are more important than the public realize. Walls that are decorated in dark colors, Dr. McKenzie-Smith advises changed and painted in buff. All the blackboards should be slate. This change is also advocated strongly.

Under the auspices of the Women's Institute since September, in Onatrio, there have been over 4,000 children examined in the public schools.

This lady doctor speaks very highly of the help given by the trustees and parents in her work, both here and in other places. She expects to finish the Wiarton school by Thursday noon with the aid she is receiving from the Women's Institute here. Up to date she has examined over 400 children since yesterday noon, and finds the average very good.

From here Dr. McKenzie-Smith goes to Fort William, Fort Credit and Albany to carry on her good work.—Wiarton Canadian-Echo.

Nine schools in the township of Downie, Perth Co., were visited by Dr. Annie Backus, upon application by the Women's Institute to the Department of Agriculture. The following is taken from the report furnished to the Stratford Herald by F. S Inspector Smith:

Nine schools in all were visited, eight public and one separate school. Before the inspection took place the trustees of each school were consulted and their consent was obtained, as each board was anxious to have the work undertaken. There were 273 pupils examined in all. There were found 48 cases of carious teeth, 43 with enlarged tonsils, 27 with adenoids, 4 with defective hearing and 7 miscellaneous cases. There were 115 notifications sent out to parents. In some cases the parents have taken active steps to have the defects corrected as far as possible. Besides the notifications sent to the parents, very helpful, practical and suggestive talks were given to the pupils of each school on how to keep healthy.

The value and kinds of food to use, the use of water externally and internally, the care of the mouth and nasal passage as a preventative of disease, such as scarlet fever, diphtheria, etc., was explained. Breathing exercises and how to use the lungs was also emphasized and the mode of standing erect and giving attention to the position of the body while sitting, standing, walking or reclining. Many useful hints conducive to good health were also given at a time in life when pupils can take advantage of them and grow to be stronger, healthier and happier men and women.

This test was made to show any rural township or community that at a very small cost visits of this kind can be made at least two or three times a year and the results prove a decided benefit to boys and girls, who otherwise have little opportunity, on account of lack of definite information, to attend to matters that would be a lasting source of help to them throughout their lives.

It is hoped that more rural municipalities will avail themselves of this opportunity at such a small outlay, as the making of a strong, vigorous citizenship in Canada ought to be our first concern.

We have the climate, the food and the people, but hygiene is frequently not well understood or taught. Sometimes the exact books in hygiene are taken up in such a way as not to be very helpful or practicable. From five to ten guides or maxims to health such as were given by Dr. Backus, practised and observed daily, would have more permanent and beneficial effect than all the contents of the text books from cover to cover.

Lights Cut Off at Hall

The electric light service of the town is one of the problems that we have before us in Paisley, and which is coming to a head. On Thursday last the lights were cut off at the town hall, in accordance, we understand, with instructions received from the Hydro-Electric Commission headquarters. This is the outcome of the council's action in declining to have wiring improvements done unless the Electric Light Co. first improve the plant, so that we are given a standard service. The feeling of the council seems to be that the contract for street and hall lighting should be cancelled, and some other means found for our public lighting. A system for that purpose only has been proposed, but not considered fully. There may be more definite action taken shortly, however. We are informed that the proprietors of the present plant have recently made more favorable offers to sell than heretofore. If this be so, it would be advisable to have it investigated with a view to acquiring the whole system by the municipality.

Bruce County Publishers Meet

The newspaper men had a meeting in Walkerton on Friday, which proved to be the largest gathering of the fraternity yet held in this county, twelve of the sixteen papers being represented. In the forenoon there was a joint session with the officers of the Bruce County Patriotic League, to discuss the project of continuing the publication of "Bruce in Khaki" which was issued for a few months by the 160th Battalion in England, but which became defunct when the corps was broken up to go to France. A committee of the League was appointed to wait upon the County Council at June session and ask for financial assistance from the council. A committee of the publishers are to estimate the cost of producing the paper in the county. Should "Bruce in Khaki" again appear, it will most likely be under the management of ladies identified with patriotic work, who will aim to make it a medium for keeping our boys at the front in touch with home. In the afternoon the publishers devoted a couple of hours to discussing matters pertaining to the business of the craft.

Bruce Telephone Notice

All toll calls not paid to central offices by August 1st will be sent to the township clerks and these will be added to the tax collector's roll for collection.

All ordinary conversations may be carried on on Sunday from 9 to 10.30 a.m., and from 2 to 3.30 p.m. Only doctors' and important calls to go through during other hours.

D. McNAUGHTON, President

Eating Places Licensed

Regulations issued by the Canada Food Board provide for the licensing after June 1 of all hotels, boarding houses, clubs, and other places where refreshments are served to 21 or more people each day, outside of the family of the proprietor. Fees range from $2 to $4, according to the estimated annual turnover. Resorts where ice cream is retailed will be charged an annual fee of $5.

A LIFETIME OF SUFFERING

Prevented by "Fruit-a-tives" The Wonderful Fruit Medicine

53 Marguerite St., Hull, Que.

"In my opinion, no other medicine is so good as 'Fruit-a-tives' for Indigestion and Constipation.

For years, I suffered with these dreaded diseases, trying all kinds of treatments until I was told I was incurable.

One day a friend told me to try 'Fruit-a-tives'. To my surprise, I found this medicine gave immediate relief, and in a short time I was all right again".

DONAT LALONDE

50c. a box, 6 for $2.50, trial size 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

Spring Term from April 2nd

PATRIOTIC FUND TO BE PROVIDED BY PARLIAMENT

The national executive for the Canadian Patriotic Fund held a meeting at Ottawa on May 16th, when it was decided that after March 1st, 1919, there will be no further campaigns for this fund, and that moneys required over and above what comes in by voluntary subscriptions will be sought from the government in the form of a grant to be voted by the 1919 session of Parliament. Branch organizations of the Patriotic Fund Asso throughout the Dominion are to carry on as heretofore until March 31st, 1919, each raising its annual quota, as in previous years, but after that no campaign for subscriptions from individuals or companies or provincial or municipal bodies should be requested by the head office. Some $30,000,000 has been collected, and while the fund has a considerable reserve, it is desired to keep this intact for the demands which will continue during the process of demobilization.

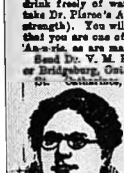
SELF DEFENSE



DEFEAT BACKACHE AND KIDNEY TROUBLE WITH ANURIC

Many people in Canada have suffered from rheumatism and kidney trouble and have found Anuric to be the most successful remedy to overcome these painful and dangerous ailments.

The lucky people are those who have heeded Nature's warning signal in time to correct their trouble with that new discovery of Dr. Pierce's called "Anuric." You should promptly heed these warnings, some of which are: spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as diabetes or stone in the bladder.

To overcome these distressing conditions you should take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal take Dr. Pierce's Anuric Tablets (double strength). You will, in a short time, find that you are one of the firm indorsers of 'An-u-ric, as are many of your neighbors.

Read Dr. V. M. Pierce, Buffalo, N. Y. or Bridgeburg, Ont., for trial pkg.

St. Catharines, Ont.—For several years I suffered with gravel and with uric acid, causing rheumatic pains. Nothing ever helped me until I commenced to take 'Anuric,' and the first thing I noticed was that the gravel had disappeared and has never made a reappearance. My general health has improved and I have a better nerve condition and my eyesight seems better, too. I used to have such dizzy spells at times I thought I would faint, but these no longer trouble me. My only regret is that I did not know of Anuric before." —Mrs. H. MARJORAM, 124 Albert St.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

W. H. BAKER, Paisley

WALKERTON

A fine bay Belgian stallion, which Irwin Bros. imported from the States about six weeks ago, died from paralysis of the bowels on Sunday morning. The animal was insured for $1200, but as it is estimated to have been worth nearly double that amount, their loss will be considerable.

Mr. W. H. Elliott of the Children's Aid here is putting lots of "pep" into his work, he having persuaded the Society to install an auto last week to aid him in his efforts throughout the county, and which he intends to pay for by putting on tag days and giving lectures over Bruce. Two wards were placed by the Society in good homes last week and two new wards were brought into the Shelter this week. Things are certainly commencing to stir in Children's Aid work here, and Bruce bids shortly to lead the province in this field of labor.

A Walkertonian, who was recently drafted into the army, came up Saturday on a visit to his parents here. After his friends had got through shaking his paws, two military police, who have been around town looking up defaulters and other variety of offenders under the Military Service Act, espied the raw recruit, and on questioning him as to whether he had been granted leave of absence from the camp, were assured by the local that he had. On demanding to see his ticket of leave the Walkertonian grew cheeky and passed them a bunch of warm words instead of the printed cardboard. Used to such camouflage, they brought him to his milk by showing him their badge and threatening to pull off an arrest unless they saw his card. Sparring for wind, the Walkertonian feigned that his ticket was at home, but finding that they were willing to come along and see it, and couldn't be shook "nohow," he confessed that he had slipped away from camp himself to the police. After arresting him they turned him over to Chief Ferguson, but a friend in town went bail and kept him out of jail until the arrival of a military escort on Monday, when he was taken back to London for trial.

Two local coal dealers have received word from the Dominion Fuel Controller to furnish a detailed statement of the coal they have delivered around Walkerton since April 1st, as a report had reached the Dominion Fuel Headquarters that an overupply has been going into certain cellars here. As it seems that only 70 per cent. of what parties have been usually in the habit of getting for the winter is allowed them under the new Fuel Law, people who have been storing up more than this supply would appear to be rendering themselves liable under the Act. Whether there are any or many who have been doing this in Walkerton will probably be shortly determined. While everybody is justified in getting in all the coal that the law will allow and thus provide against the possibility of a fuel famine next winter, yet undue hoarding is decidedly against the spirit of the law which seeks to allow all to get in a fair supply and thus spread the fuel around, instead of allowing it to get into the hands of a few and the rest going hungry. We think, however, that the Fuel Controller should regulate the freight rates, or whatever is causing it, so that coal wouldn't be selling in some towns at $9 a ton and up and in other towns at $11 or more.—Herald and Times.

BRUCE TP. COUNCIL

Underwood, May 25th, 1918

Bruce Tp. council met as per adjournment in the Tp. hall, Underwood, on May 25th, for general business and as a Court of Revision to hear and determine any appeals against the 1918 assessment roll. As no appeals had been filed against assessment, the work of the Court of Revision consisted in making a few corrections and changes in names and the addition of a few names omitted.

The different road committees submitted reports on the probable work required in their divisions this summer. This will largely consist in the erection of a number of new bridges and some repairs to old ones.

On account of portions of cons. 1 and 8 and east boundary being taken over as county roads, it was necessary to make some readjustment of road divisions along these roads, as follows: Div. 2, con. 1, to do their work on the line from Tiverton body to con. 2 road; divs. 3, 4, 5 and 6, being divisions on con. 1 between lots 6 and 25 inclusive, to do their work on sideroad east of beat going north. 350 rods of div. 1 road; divs. 7 and 8 to do their work on sideroad 30 1¼ miles north from con. 1 road; div. 42, from blind line between cons. 9 and 10 south to con. 6 road; divs. 43, 44 and 45, on sideroad east of beat going north 300 rods and south 300 rods from con. 8 road; div. 46, sideroad east of beat, about 1¼ miles; div. 47, sideroad divs. 47 and 38, on sideroad 30, south of con. 8 road, 1¼ miles to con. 6 road; div. 56, to take sideroad 30 north of blind line between cons. 11 and 12 to 12th con. road.

John Nelson was appointed pathmaster on con. 12 for div. 60 in place of Geo. Ribey.

A number of accounts were passed and council adjourned to meet on June 29th for general business.

J. G. MacKAY, Clerk

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of *Chas. H. Fletcher*

—A good thought planted in good mental soil may be likened to a good seed painted in the soil of the earth. Properly cultivated it will grow and bear the grain of valuable ideas. The first requisite for good mental soil is receptivity, or willingness to accept truth. Some one has defined genius as receptivity.

A FARMER'S VIEWPOINT

The farmers of Canada are nothing, if not persistent, and this is a good quality when always exercised in a right cause. The farmers of Canada are to-day face to face with a proposition such as never before confronted the world, and in which they are destined to play an important part.

The recent action of the promoters of the great farmers' demonstration at Ottawa, in taking their appeal to the Governor-General over the refusal of the Cabinet, for a hearing by Parliament is as unique as it is rare, and may have far reaching results. Only very few instances are recorded in British history where such action was taken and the results of which established certain rights of the people over the dictum of parliamentary cabinets. The right to a hearing has been granted by the Governor-General, and to-day the case is being debated, the purport of which debate asks that certain modifications be made in the order-in-council calling for withdrawal of labor from the farms.

The case for the farmers was well put at the meeting of farmers in Paisley Block, by Mr. Burnaby, President of the United Farmers of Ontario, and who organized the great demonstration at Ottawa last week. It has always been admitted that the duty of greater production was a difficult problem, in view of the withdrawals of the Sons of the Soil, and the unsatisfactory substitutes furnished by the various agencies to replace the vacancies caused by enlistment. The suggestion made by the farmers' representative appear feasible, in that they ask for the men to be left until after harvest, and that training could be proceeded with during the winter months, and the men be available for a spring campaign overseas.

The issue resolves itself to this: That the plan proposed assumes that the war may last indefinitely, and that the enemy may be held in check until such time as Canada's sons can take time to fight the common enemy. This cannot always be done. The enemy is attempting to reach a decision this year, even this coming summer, and man-power is needed to be the paramount issue information the government possesses must, of necessity, be more or less confidential, and no class is in a position to counteract it.

On the other hand, the call for greater production from the farmers has been insistent and this confusion of orders is responsible for the present predicament among the food producers. As stated before there is a great need for co-ordination of effort among the departments, and until this is accomplished discontent is bound to develop. If food is necessary to feed the troops, producers of food may have to be excused from service abroad, if not, the farmers will need to know the facts of the case and will be prepared to act accordingly.

Present inequality of distribution of farm labor is a great evil. Instances were related where young women were left alone on hundred acre farms, the men folk being conscripted; other cases where five and six men who happened to be just above or below military age remained on hundred acre farms. What is wanted is that the government should take some of the excess from the later and assist the former, and thus remedy glaring evils. Prejudice, of course, was evident, and much criticism indulged in that had been better left unsaid. We do not presume to advise the farmers nor the government other than to say that justice must be done to the boys at the front in supplying them with their greatest need, whether that be food or men.—Guelph Mercury.

Mr. Editor:

I noticed a good letter in your paper, "Why does God allow this war?" A beautiful story explains this to my entire satisfaction and may to some extent satisfy others of your readers.

Two ministers discussed that subject. One said "It was the devil's war." The other said "It was God's war." The first minister asked where God came in. Well, the explanation ran thus: "A man invented a beautiful airplane. He put it in a ten-acre field, stood beside it and explained it to many inquirers. Acting as pilot, he took several men into the air. The men greatly enjoyed the trip. It was repeated several times, when the men took hold of the wheel and undertook to run it. In a short time the men threw the pilot overboard and undertook to run the machine entirely. One day they were up some distance when a new trouble developed and the operators who thought they knew all about it lost control and the machine came down a mass of ruins and confusion."

The earth was formed by God; man was created by God. Man was placed on this earth and God gave him orders as rules for conduct, but man thought he knew better than God did. He has put God out of his life and business. God has no place, no Sabbath days kept holy, and now man has the earth upside-down, so smashed out of recognition that he hardly knows what to do—"behold the handiwork of man." When the airplane came down the pilot might be asked to fix it. When man sees what a failure he has made of earth and himself he may ask God to help him, to come back into his business, and re-establish some of God's commands may, and likely will, end the war. I once lived in good old Paisley, a Scotch and prayerful village, and we were very prone to think that because the Sabbaths were kept therein they were likewise kept in other parts of our Dominion, but I am sorry—yes, ashamed—to say I find that a great mistake. There has of necessity got to be many changes, and every man and every woman who is "carrying on" as per their usual mode of life can be said to be no better than a German. They are keeping our dear soldier boys in the ranks, when their changed attitude would aid materially in bringing about a more hasty and satisfactory peace. If they would say, "Here, Mr. Pilot, or (re erently) Mr. God, take me, take the earth as you made it, and use us as you will." Then, and not till many do such, will we be rid of a just punishment. We worry about the Christian state of our soldier boys, when plenty of them are living far nearer to God than we in the "rear home guards" are doing. Some time in future I may write of some things doing in other parts of the Dominion of Canada other than good old Paisley. Thank you for space.

A Reader of Advocate

—Young men of this district are required to mail their registration under the Military Service Act to the Deputy Registrar by June 1st, or within ten days after their 19th birthday. See official notice in this issue of The Advocate.

DANGER TO SYSTEM UNLESS ACTION IS TAKEN

Ignorance alone can excuse neglect of the health when all indications point to Kidney trouble. Everyone should know that from the hour the Kidneys fail to remove the poisons from the blood stream, those poisons are accumulating ready to cause sickness, pain and suffering.

How are you to know that the system is in danger from poisoning? One or more of the following symptoms should leave no doubt in your mind. If you are the victim of backache, pains in the back or sides, or Lumbago, be sure nature is calling for better Kidney action. Take Gin Pills.

At the first twinges of Rheumatism, swollen ankles and joints, or any other manifestation of uric acid poisoning, take Gin Pills. Dozens of Testimonials prove Gin Pills to be the sovereign remedy.

Take the warning given by constant headaches, restless nights, dizziness when you stoop, frequent chills, bladder, urinary trouble, or constipation, and turn to the remedy which is so sure that it is sold on the money-back guarantee—Gin Pills.

Gin Pills are sold by all dealers—50c. a box or 6 boxes for $2.50. A free sample will be sent if you address your request to the National Drug & Chemical Co. of Canada, Limited, Toronto; or if you live in the United States, address Na-Dru-Co Inc., 202 Main St., Buffalo, N. Y. 161

LAST HOURS OF THE "VINDICTIVE"

A FITTING END FOR BATTLE-SCARRED CRUISER.

Admiralty Story of Ostend Operation is Thrilling Account of Heroic Deeds of Naval Men.

The Admiralty has issued the following graphic story of the Ostend operation:

"Dunkirk, May 11.—The Sirius lies in the surf some 2,000 yards east of the entrance to Ostend arbor, which she failed so gallantly to block, and when in the early hours of yesterday morning the Vindictive groped her way through the smoke screen and headed for the entrance it was as though the old fighting ship awoke and looked on.

"A coastal motor boat had visited her and hung a flare in her slack and rusty rigging, and that eye of unsteady fire, paling in the blaze of star shells or reddening through the drift of smoke, watched the whole great enterprise from the moment when it hung in doubt to its ultimate triumphant success.

"The planning and execution of that success had been entrusted by Vice-Admiral Sir Robert Keyes to Commodore Hubert Lynes, who directed the previous attempt to block the harbor with the Sirius and Brilliant. Upon that occasion a combination of unforeseen and unforeseeable conditions had fought against him.

Surprise Perfect.

"Upon this, the main problem was to secure the effect of a surprise attack upon an enemy who was clearly, from his ascertained dispositions expecting him. The Sirius and Brilliant had him baffled by the displacement of the Stroom Bank buoy, which marks the channel to the harbor entrance. But since then aerial reconnaissance had established that Germans had removed the buoy altogether, and that there were now no guiding marks of any kind. They had also cut gaps in the piers as a precaution against a landing, and, further, when towards midnight on Thursday, the ships moved from their anchorage, it was known that some nine German destroyers were out and were at large upon the coast.

Night Favorable.

"The solution of the problem is best indicated by the chronicle of events. It was a night that promised well for the enterprise—nearly windless—and what little breeze stirred came from a point or so west of north. The sky was lead blue, faintly star-dotted, with no moon and a still sea for small craft, motor launches and coastal motor boats, whose work was done close inshore.

"From the destroyer which served the commodore for a flagship the remainder of the force were visible only as silhouettes of blackness—the destroyers looming like cruisers in darkness, the motor boats like destroyers, and the coastal motor boats shewing themselves as racing hillocks of foam.

Plodding for Goal.

"From Dunkirk a sudden brief flurry of gunfire announced that German airplanes were about. They were actually on the way to visit Calais, and over the invisible coast of Flanders the summer lightning of ruthless artillery rose and fell monotonously. 'There's the Vindictive!' Muffled seamen and marines standing by torpedo-tubes and guns turned at that name to gaze at the great black ship seen mistily through the screening smoke from the destroyers' funnels, plodding silently to her goal and end. Photographs had made familiar that high-sided profile, her tall funnels with Zeebrugge scars, always with the background of the pier at Dover against which she lay to be fitted for her last task. Nor was added to her the environment of night and sea and the greatness of the tragedy of her mission.

In Smoke Screen.

"She receded into the night astern, as a destroyer raced on to lay a light buoy that was to be her guide, and those on board saw her no more. She passed thence into the hands of the small craft whose mission was to guide her in the clouds of a smoke screen.

"After her control was demolished by a shell which killed all the occupants, including Sub-Lieut. Angus H. MacLachlan, and the upper and lower bridges and the chartroom, Commander Godsal ordered the officers to go with him to the conning tower. They observed through the observation slit in the steel wall of the conning tower that the eastern pier was breached some two hundred yards from the seaward end, as though at some time a ship had been in collision with it. They saw the front of the town silhouetted again and again in the light of the guns that blazed at them. The night was a patchwork of fire and darkness.

Conning Tower Hit.

"Immediately after passing the breach in the pier, Commander Godsal left the conning tower and went on deck, the better to watch the ship's movements. He chose a position, and called in through the slit of the conning tower his order to starboard the helm. The Vindictive responded and laid her battered nose to the eastern pier and prepared to swing her 320 feet of length across the channel.

"It was at this moment that a shell from the shore batteries struck the conning tower. Lieut. Sir John Alleyn and Lieut. V. A. C. Crutchley were still within. Commander Godsal was close to the tower outside. Lieut. Alleyn was stunned by the shock. Lieut. Crutchley shouted through the slit to the commander, and receiving no answer, rang for port engine full speed astern, to help the swinging ship. By this time she was lying at an angle of about 40 degrees to the pier and seemed to be hard and fast, so it was impossible to bring her further around.

"After working the engines some minutes Lieut. Crutchley gave the order to clear the engine room and abandon ship, according to the programme previously laid down."

Belgian Children Without Bread

Struck by the necessity of coming at once to the rescue of Belgium, in her now desperate plight, the Belgian Relief Committee in Canada have decided that the best way to help is to take under their care the children of Belgium; for this purpose the following two courses will be followed.

1. Establishment in Brussels of a Canadian Bureau. This bureau will be administered by Mr. Baetens, a member of the Commission for Relief in Belgium, who will look specially after the numerous orphans of Belgium, whose condition beggars description. Charity will be given in the name of Canada and in this way Canadian donations will not lose their identity.

2. Active help to the thousands of little Belgian children who have so suffered from privations as to have their health critically impaired. These children are taken out of Belgium into Holland, Switzerland and France, where they are looked after under the supervision of Mr. Berryer, Minister of the Interior of Belgium to whom the Canadian donations will be sent direct.

We need not dwell on how urgently funds are required to save these little ones from death, the cry "20 Days Without Bread" is eloquent enough.

Please send contributions to Central Relief Committee, 59 St. Peter Street, Montreal

Flax Seed Production.

The Colonial Secretary has requested that publicity be given to the fact that an arrangement has now been made with the Wayland Company of Winnipeg, to carry out the British Government's programme for flax seed cultivation in Canada. It is represented that the present situation in Russia and the greatly increased national demand for aeroplane fabric make it essential that every effort should be put forth to increase the cultivation of flax within the British Empire. Great importance is attached by the War Office to the success of Colonel Wayland's efforts to the end that the cultivation of flax seed in Canada receive all possible skill and care from the farmers concerned. In the present circumstances the production of flax seed is regarded as of equal importance with that of wheat or any cereal.

Milk is the chief food for lime. It is much richer in this than other common foods, one cupful of milk containing six and a quarter times as much lime as one egg and twenty-one times as much lime as two slices of bread. Lime in food is particularly needed by children because it builds bone and teeth. A little is also needed for the blood and other parts of the body.

BRITISH FLAG IN BIBLE LANDS

HISTORIC SCENES OF MIDDLE EAST CLAIM ATTENTION.

British Officer Gives Glimpses of Life in Palestine and Mesopotamia, Where Armies Advance.

A British soldier's letter, stating that he is on guard at the very manger in which Christ was born in Bethlehem; the advance of the British beyond Jericho, and the further victories in Mesopotamia, all call attention again to the historic scenes of the Middle East which are centres in the great war. It has been truly said that the war is a tremendous lesson in geography, and if the general reader will use his opportunity he can brush up his history amazingly.

Recently a British officer has written his impressions on visiting Jerusalem and Bethlehem after their capture by General Allenby's forces.

David's Tower.

"Our first point of interest," he says, "was David's Tower, which is, I believe, the oldest tower in Jerusalem. We visited an Armenian monastery showing two places where St. Peter was warming himself, a piece of original mosaic pavement and a piece of a pillar on which the cock that crowed stood. After this we went into the room in which the Last Supper was held, with pillars and arches, so that except for it being on the upper floor it did not agree with my childish imagination. I was told one interesting thing, and that was that the directions given by Jesus to his Disciples to find the room were very definite, because in this country no man ever carried water unless much carrying had to be done, it always being done by the women, so that when they were told to look for and follow a man bearing a pitcher of water there would probably be only one man doing it.

Garden of Gethsemane.

"We wandered out to a portion of the old wall from which we looked across the Valley Kedron to the Mount of Olives, and the Garden of Gethsemane," he goes on. "This garden is disillusioning, for now it is made up in neat paths and flower beds, which are not what I pictured. It has eight cypresses and some very old olive trees in it, one being said to be an original one, and is surrounded by a wall. It is quite small and at first one does not notice it, for one's eye is attracted to the large triangular garden above with a huge, and to me, unsightly, church in it. This proves to be the Russian Church, which was built as near to the garden as possible."

At Samson's Home.

"On arriving at the home of Samson," the officer says in another letter, "I could help contrasting the squalid native village with a few dirty inhabitants to the palace as depicted in the opera, 'Samson and Delilah.' I can conceive him pulling down any part of the village today, but not the huge marble pillars, as was supposed. Yet all things are possible, and I certainly saw the base of a pillar about two feet in diameter in one of the narrow streets, as if belonging to some prehistoric period. This is probably one of some Greek temple or even of a church of the Crusaders, for many traces of the Greek temples are being unearthed, one piece of mosaic of beautiful design and color in particular having been unearthed. This one is supposed to have a representation of our Patron Saint, St. George, and at present it is not decided whether it will go to Australia, whose sons claim to have found it or to the British Museum. I hope the former have it, as it is only fair that the young countries who have fought for us should have some relics of the past, and surely we have enough."

Valley of the Tigris.

Six hundred miles to the east another British column is pressing its way up the valley of the Tigris towards Mosul, by the ruins of ancient Nineveh. Here was the palace of Sennacherib and the reputed tomb of Jonah, with all that these names mean in the history of the world. These hot, dusty lands have had few visitors in modern times except men bent on scientific missions seeking to uncover the past and bring memen-toes to Western museums as tangible evidence of former civilizations.

The party carried tinned meats, rice, potatoes, and dates, and planned to buy fowl, eggs and native bread en route. Besides the heat of the sun, they had occasionally to endure clouds of tiny, biting flies that rose from the roadway. Animal life on the desert was rare, but occasional villages in the palms gave relief, though not particularly happy change. Storks were the chief birds, and their nests were characteristic sights in the village.

Strange Villages and Peoples.

The route has been popular through the ages for trade between north and south, but there is little now to attract people of Western tastes. The Kurds are a light people, blue-eyed, and commonly with flaxen hair. Their dress chiefly differs from the Arabs by the use of a turban of blue cotton. The large market town of Kifri is built of dark sandstone, and has a bazaar, roofed like those of Bagdad, though smaller. Kerkuk, farther north, is a dirty, unattractive city, with houses of stone, mostly covered with stucco. It is distinctly Turkish, and has a population of 25,000. The principal mosque in the city contains the tombs of Shadrach and Abednego, while Meshach also is said to be buried there, though the place of his interment is forgotten. There is also in Kerkuk a strong colony of Jews, who claim to be the children of the captivity of Nebuchadnezzar.

FRANCE AIMS AT BIG WHEAT CROP

UNUSED LANDS EXPECTED TO HELP RELIEVE SCARCITY.

Plan to Take Agriculturists From the Army is Favored Though Not Possible Just Yet.

No economic subject is of more importance to the French than that of wheat and bread. Crop conditions have much to do with the temperament of the French workman and capitalist alike.

The French are doubtless the greatest eaters on earth, and this means wheat bread, and white if they can get it, which at the present time they cannot. It is said that the only towns in France where white bread still exists are those in which British and American troops are quartered.

Senator Fagot of the invaded Department of the Ardennes, a big scale farmer himself, has given to the public some remarkable observations recently on the state of the wheat possibilities of France of the future. Frankly he admits climatological and meteorological elements which are beyond the power of man to control, and for this reason all the skill of the modern inventor should be exerted to beat nature when it comes to adverse conditions.

He proposes three salient procedures to accomplish this: increase the acreage, increase the quantity of farm labor, either manual labor or tractors, and increase the quantity and efficiency of fertilizers used.

His own personal views are worthy all French farmers' consideration. He says in part:

Big Increase Possible.

"It is quite possible for us to increase our wheat lands in France, as suitable soil in quantity is still uncultivated. Driven from my own region by the invaders, I have not been able to learn what might be done there in this respect, but I have taken the opportunity of studying other regions of our belle France. I have seen vast wheat lands, which for obvious present day reasons are left uncultivated, but I have not seen any fallow land which has not been turned over in an effort to produce some sort of a crop where cultivation had been practised before.

"It is probable that this uncultivated land is less favorable to wheat growing than the other, which is already growing grain, and this is perhaps the chief criticism. But all the same these lands should be put into seed as soon as possible, in the near future at any rate."

As for the question of farm labor, the authority is of the opinion that as many farmer soldiers as possible should be demobilized to aid the women and the old folks, who are largely responsible for such wheat crops as are being grown. He admits that circumstances of the moment may not allow this, but demands that the project should have more consideration than it has had up to now.

Changes Wrought by War.

A veritable revolution in the processes of French agriculture is certain if France is to bring back her wheat crop from thirty-eight or forty million quintaux to something more than double. Argentinian and American and Australian crops are keeping the Frenchman supplied with his daily bread at present, but with the difficulties of transport and other economic conditions the bread is getting darker and darker every day from the addition of other ingredients.

Butter is the natural accessory of bread, though the French never eat bread and butter as Americans do. All the same, for the average person it was the accompaniment of the morning breakfast roll. Now it too is absent from the hotel and restaurant table and allowed to be used only for cooking in these establishments. It has gone the way of soft cheeses.

It is still to be found in the shops, as are the cheeses. The argument in this plan of rationing is that the home feeder will have it at his disposition, and if he likes he may take a pat of it to his restaurant, as he does his lump of sugar, but he may not order it in a restaurant, not even as a hors d'oeuvre, of which it usually formed a part.

The same bread ration of the restaurant—100 grammes if your meal costs six francs, about a dollar at the present exchange—is supposed to make possible under the present difficult conditions of revitailement giving every house dweller his regular 300 grammes a day. The war has brought many changes in habits, but none more notable than this in breadeating France.

Our Common Task.

Now no man's loss is private; we share all.
Oh, each of us a soldier stands today
Put to the proof and summoned to the call.
One will, one faith, one peril! Hearts, be high,
Most when the hour is darkest! Come what may,
The soul in us is found, and shall not die.

The AUTOMOBILE

Painting Our Car.

Painting your own motor car may seem like a thankless task to many, and while somewhat of an undertaking it may be accomplished in a short while if the whole family buckles into the work. The actual painting is the smallest part of the work. It is cleaning the car and getting it ready for the paint that requires the most work.

Last year we painted our five-passenger car which was purchased new in 1913. It was the first time it had been repainted, and no doubt the task would have been much easier had it been done a year earlier. We did it near the latter part of May because the weather was warm and there was not much dust in the air.

The tools required were putty knives for scraping off old paint where necessary, thin-bladed case knives, steel wool for removing rust and paint, and sandpaper.

First we took the car apart, removing the top, mud guards and fenders from the body, and the body from the chassis. The body was put on a pair of trusses in the garage, and the chassis pushed outside to clean. The fenders and mud guards were taken apart so that every particle of rust could be removed. It is useless to try to make paint stick long to a rusted surface, and once begun it pays to do a thorough job.

The fenders and wheels were the only parts that had any water used in cleaning; all the rest was dry cleaned. These were first washed with automobile soap, then with clean water, and allowed to dry. The knives and steel wool were used to remove the rust and chipped paint, after which the surfaces were smoothed down first with coarse and then with fine sandpaper. The grease about the wheels was cut with gasoline and picked out of the corners with the point of a knife.

Where the paint on the chassis was firm and in good condition it was left, but was rubbed thoroughly with the steel wool and sandpaper.

The body was cleaned in a somewhat similar manner except that all the paint was removed with the blades of flat knives. This was the most laborious part of the work. The surface was rubbed firmly with the steel wool until it took on a shiny finish, then sandpapered, and rubbed clean with a dry cloth. It took practically two days to clean the car. When this was done the car was ready to paint.

We used the same colors of paint that were on the car originally, gray for the chassis and black for the body. We thought it would be less difficult to make a presentable job than if different colors were used. One reason for our success, I think, was due to the fact that we used the best automobile paint to be obtained. Good paint has a guarantee of service behind it, and is the cheapest in the end.

The first coat was rubbed on thoroughly, and allowed to harden about four days. It was very hard and dry when the second coat was applied. As the weather was clear and warm, it hardened quickly. When the second coat had dried there was not much gloss to it, but it had covered up smoothly all the scratches and inequalities of the body. A third coat was applied to the chassis, fenders, and mud guards. Wherever a tap was removed the threads were daubed with paint before putting on the tap to hold it tight.

About four days after the painting was all done the entire car was given two coats of a high-grade varnish. This gave it a fine glossy appearance which has helped greatly in preserving the paint and retaining the sheen.

THE SACKING OF LOUVAIN.

Brand Whitlock Describes Destruction and Murder by Germans.

Brand Whitlock, former United States ambassador, says in a recent article that some of the scenes he has been familiar with in Belgium simply appal the imagination. Those who read his description of Louvain's fate will understand his point of view.

"All over the city the soldiers began firing wildly at the facades of the closed houses; the people ran to their cellars in terror; the soldiers beat in the doors, turned the people into the street, shot them down, set fire to the houses. There were riderless horses galloping about; a mad, a blind, demoniac rage seemed to have laid hold on the Germans, and they went through the streets killing, slaying, burning and looting, torturing and massacring, and for three terrible days the vast and awful tragedy was enacted.

"The people were assembled in tragic groups between the tottering walls of burning houses; marched through choking, suffocating streets that were strewn with the dead bodies of men and of horses, the women and children weeping, screaming, imploring, and the soldiers compelling them to walk with their hands up, or making them kneel, or run, or kicking them, or striking them with their fists or with the butts of their guns, herding them through the streets, in the midst of the smoking ruins; while other soldiers, with wine bottles under their arms, went reeling past, crying out at the captives: 'und! Schwein! Schweinhund!'

"And so, for another day and another night the madness went on, the murder, the looting, the sacking, the riot and the burning and the lust; with soldiers pillaging the houses, bearing the wine in great baskets out of the cellars, to be guzzled in the street, while men and women and children were shot down and their bodies left to lie in gutters, or on the smoking ruins, or thrown into foul cesspools."

When a cake of soap is worn nearly thin enough to break stick it to the new cake by putting both in quite warm water, then press firmly together. When cold it will be one solid cake. This does away with small pieces of soap and there is no waste.

The Doings of the Duffs.

Now is the Time for a general cleaning out of the intestines if you wish to avoid: constipation, biliousness, pimples and other troubles so frequent at this season of the year. Use

"RIGA"

PURGATIVE WATER

the ideal saline purgative which flushes out the intestines, removes offensive waste matter, insures normal bowel action, pure blood and freedom from illness.

On Sale everywhere: 25 cents the bottle.

"There's a Reason"

THE WORK OF THE SHIP DOCTORS

THREE WEEKS IN THE DRY DOCK HOSPITAL.

A Navy Officer Tells How a Battered Cruiser Was Made Hale and Well Again.

The great cruiser was indeed in a pitiable state; she looked the epitome of desolation and misery as the fussy little tugs hauled her gently past the chequered forts at Spithead, and headed her tenderly towards that home of healing for such battered hulks as she—Portsmouth Royal Dockyard.

Her foremast was snapped off short, and her fire control top had completely disappeared; the fore funnel looked like a battered tin-can or a squashed concertina, and her bridge was a mass of twisted steel and splintered woodwork. The great fore turret looked as though attacked with a gigantic tin-opener; the colossal right twelve-inch gun was snapped off short, the daw edges of the steel showing like the teeth of a beast of prey. The midship funnel had completely disappeared with its casing, but the after one, strangely enough, had not received so much as a scratch on its paintwork.

"Bearing Her Blushing Honors."

The armored hull bore evidence to the straight shooting indulged in by the enemy. Circular holes indicated where the monster shells had passed clean through; deep dents showed where the resisting plates had turned them off. One projectile had carried a high-pressure turbine completely off its bed in the port engine room. Others had ruined boilers, so that eight out of a score could only be trusted to raise steam. But, damaged as she was, the great cruiser was triumphant also—a sixteen-foot square collision mat spread over her bows covered a gaping hole made when she, in her last extremity, lifted her ram and jammed it clean through the side of her insolent foe. After that, what did it matter if the foremost compartments filled with water, if the deck did slant downwards till every ripple sent a film of water streaming over the wrecked and shell-torn forecastle?

Her captain, unhurt by the fight, had gone almost grey-haired over the getting of the ship to the place where the three magnificent tugs met and took her in charge. And now, with a pilot on the bridge, with a tug ahead to haul her along, and one on each side to steer her, he was sleeping the sleep of utter exhaustion in a wrecked fore cabin.

Right up harbor went the battered ship, saluting as she passed the Victory, and seeming to receive a welcoming "Well done!" from that battle worn craft. Trim cruisers, patrol boats, destroyers, and submarines extended their sympathy and silent praise as she shogged by them, until at last she came to the great dry-dock designed for her reception. The foremost tug cast off and dropped behind, placing her nose gently against the cruiser's stern, and slewing her into position for entering the dock.

In the Dry Dock.

Then came dirty men in fussy little steamboats, and cast lines, which, when hauled upon, brought wire hawsers to the cruiser. These were made fast to bollards, and the other ends taken to hydraulic capstans ashore. Then slowly, carefully, these were hove round, and the battered vessel slipped inch by inch into her sick bed. The caisson at the end of the dock slid into place astern of her, the great pumps clanked, and the water became lower gradually, but quite perceptibly.

Hordes of grimy dockyardmen swarmed into her as the gangways were flung to the jetty; fussy little cranes slammed into the dock huge, square baulks of timber, sized and marked to fit each in a certain position and no other. They took these baulks, the "mateys," and they adjusted them so that, when at last the cruiser's keel rested on the chocks in the bottom of the dock, the baulks supported her on both sides, and prevented her canting over to one side or the other. And as the water receded and exposed more of her underwater hull, the mateys put in other rows of shores, till at last she was dry and high, ready for the healing hands of the ship doctors.

New Ships for Old.

This done, came a small army of other grimy men—fitters, turners, artificers of all kinds—with their small tool-boxes. Followed them a host of small and even dirtier boys.

Then arose the most awful din conceivable. Hammers ricketted away inside the ship, driving out old rivets; drills chopped through armored bolts like knives through cheese; saws cut away battered plating as though it had been tissue paper. The work went on day and night as if under a magician's wand.

And when at the end of their three weeks' leave—they had well earned the rest—the cruiser's complement returned to their ship, they found that not only had her wounds been repaired, not only was she fully equipped at all points and ready for immediate action if needs be, but the dockyardmen had hauled her out of dock and placed her head towards the Channel, had filled her bunkers with coal and her magazines with ammunition—in south, they had healed her and convalesced her, and passed her "Fit for General Service."

BUTTER FROM POTATOES.

Palatable Article Can Be Manufactured for Ten Cents a Pound.

Potato butter is recommended by the British ministry of food as a cheap substitute for butter, being made in England at a cost of less than ten cents per pound, as follows: "Peel the potatoes and boil until they fall to pieces and become floury. Then run through a fine sieve into a warmed basin fourteen ounces of potatoes and add two ounces of butter or margarine and one teaspoonful of salt. Stir until smooth and then mold into rolls and keep in a cool place. To make the appearance approvable use butter coloring, and if intended to keep beyond a few days a butter preservative should be added."

GIRLS! LEMON JUICE IS SKIN WHITENER.

How to make a creamy beauty lotion for a few cents.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

The Wings of the Aeroplane.

War conditions have afforded an excellent opportunity for farmers in certain sections of Canada to engage extensively in the production of fibre flax. They will thereby not only add to their sources of income, but will also be of direct and vital aid in the war efforts of the Allies. The mastery of the air is proving a great, perhaps the determining factor, in the struggle now going on. Aeroplanes are being built in vast numbers as rapidly as possible. As a covering for the wings of these, linen is the only material found satisfactory. Large quantities are also needed for machine gun webbing, ambulance and truck covers, thread for sewing uniforms, and a number of other uses. Were the supply of fibre flax for these purposes to fall short, as is threatened, it would directly and profoundly affect the success of the Allied forces.

Before the war, flax was imported into the United Kingdom mainly from Belgium, France, Germany, the Netherlands and Russia. The German supply is, of course, now cut off, while in 1916 France produced no flax for export, Belgium a mere fraction of its former supply, and the Netherlands about half its former quantity. Owing to conditions in Russia no exports of fibre flax can be depended on this year; Ireland, the great flax-producing country in the United Kingdom itself, cannot with the best of seasons and with the largest possible acreage under flax, commence to meet the demand for fibre.

The foregoing information is contained in a circular on flax growing issued by the Federal Department of Agriculture and that can be had free by addressing the Publications Branch of that Department, Ottawa.

Ask for Minard's and take no other.

Eat less Bread

YES! LIFT A CORN OFF WITHOUT PAIN

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.

Remembrance.

This is the sharpest pang to bear:
How I do not forget,
But wake to see her waiting there,
As if she loved me yet.

Oh, for an end of idle dreams
That stir a sleeping heart!
So far she is, so near she seems—
So near, so far apart!

The spring comes in; the lilacs bloom;
I hear the robin call.
But in this memory-haunted room
I miss her most of all.

After these many months of pain
Her face I shall not see;
I shall not hear her voice again—
She comes not back to me!

MONEY ORDERS.

The safe way to send money by mail is by Dominion Express Money Order.

Sugar Saving 25 Per Cent.

The recent sugar restrictions passed by the Canada Food Board will have the effect of saving about 100,000 tons, approximately 25 per cent. of our normal consumption. These restrictions are rendered absolutely necessary by the shipping and rail transportation situation. There is sugar in Cuba but we cannot get it into Canada. What we can get we must conserve for preserving time.

Keep Minard's Liniment in the house.

Eat More Fish.

Efforts have been made throughout Canada to produce and market more fish. This country has fish resources, which have been exploited commercially for the export trade, but only in the big cities have fresh fish been available regularly to private consumers. On the Pacific Coast and the Atlantic Coast, on the lakes of the West, on the lakes of Northern Ontario and the Great Lakes, fishermen will procure fish if the demand for it becomes regular and constant. Eat more fish and save meat for the men at the front.

I

Had ship's anchor fall on my knee and leg, and knee swelled up and for six days I could not move it or get help. I then started to use MINARD'S LINIMENT and two bottles cured me.

PROSPER FERGUSON.

Wheat Importation Insufficient.

The British Ministry of Food has cabled to the Canada Food Board: "Wheat importations are not arriving in quantities sufficient to meet our weekly requirements. Every effort that can be exerted in Canada to increase shipments of wheat and meat will be invaluable." The British Administry has prepared to provide ships to move all the wheat that Canada will spare. Only 34,000,000 bushels remain on the continent that can be possibly available for export unless consumption in the United States is very substantially reduced.

Heals like Magic—burns, cuts, chafing, blisters, piles, abscesses, sunburn, boils, bruises, and other inflammation. At dealers, or write to HIRST REMEDY COMPANY, Hamilton, Canada.

The Living Line.

As long as faith and freedom last,
And earth goes round the sun,
This stands—the British line held fast'
And so the fight was won.

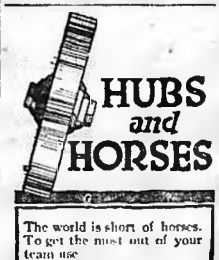
The greatest fight that ever yet
Brought all the world to dearth;
A fight of two great nations set
To battle for the earth.

That bleeding line, that falling fence,
That stubborn ebbing wave,
That string of suffering human sense,
Shuddered, but never gave.

A living line of human flesh,
It pulvered like a brain;
Swarm after swarm came on afresh
And crashed, but crashed in vain.

The world shall tell how they stood fast,
And how the fight was won,
As long as faith and freedom last
And earth goes round the sun.

Minard's Liniment used by Physicians.



Obligation to Save Food.

Every pound of food saved by each Canadian citizen is a pound given to the support of our army and the Allies. Every pound wasted or eaten unnecessarily is a pound withheld from them. It is a direct personal obligation on the part of each of us to someone in Europe whom we are bound to help.

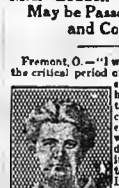
Let Cuticura Care for Baby's Skin



It's really wonderful how quickly a hot bath with Cuticura Soap followed by a gentle anointing with Cuticura Ointment relieves skin irritations which keep baby wakeful and restless, permits sleep for infant and rest for mother, and points to healment in most cases when it seems nothing would help.

Sample Each Free by Mail. Address post-card: "Cuticura, Dept. N, Boston, U. S. A." Sold by dealers throughout the world.

THAT CHANGE IN WOMAN'S LIFE

Mrs. Godden Tells How It May be Passed in Safety and Comfort.

Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared." — Mrs. M. GODDEN, 925 Napoleon St., Fremont, Ohio.

Such annoying symptoms as heat flashes, nervousness, backache, headache, irritability and "the blues," may be speedily overcome and the system restored to normal conditions by this famous root and herb remedy Lydia E. Pinkham's Vegetable Compound.

If any complications present themselves write the Pinkham Medicine Co., Lynn, Mass., for suggestions how to overcome them. The result of forty years experience is at your service and your letter held in strict confidence.

SMOKE TUCKETTS T&B

SECOND CON. ELDERSLIE

Andrew Young had the misfortune to lose one of his working horses last week.

Mrs. H. McKindless, who has been seriously ill for some time, is slightly improved.

Mr. and Mrs. M. McCallum, of 6th con. Brant, attended the funeral of the late Mrs. Dawson on Tuesday last.

Miss Flora Bell, of Sauble Falls, and Mrs. A. McCulloch, of Queen Hill, were visitors on this con. recently.

D. C. Lillico has returned to Toronto after spending a few months with his parents here.

Miss Jeffkins, of Elmwood, is visiting her uncle and aunt here, Mr. and Mrs. Robt. Jeffkins.

The well driller have started operations at S. S. No. 12.

J. B. Allen is preparing to build a straw barn this summer.

Miss Maud Dawson motored up from Stratford on Sunday to attend the funeral of her mother, returning on Friday.

John A. McDonald's friends will be pleased to hear that he is hale and hearty in Sunny Alberta, doing farm work near High River.

Pte. Russell McCulloch, who went overseas in December last, is now in the firing line in France.

Mrs. D. Keith visited recently at the home of her daughter, Mrs. H. Fiddis, Woodstock.

Pte. Geo. Fletcher, who is well known here, is ill in a hospital in France, suffering with trench fever and ear trouble.

Died—On May 19th, at her late residence, 3rd con. Elderslie, Bertha Smithson, beloved wife of Arch. Dawson, aged 53 years and 5 months. On Sunday as the sun was gently rising over the hilltops, the angel reaper softly came on the wings of the morning and peacefully carried to her everlasting 'Sabbath Home', the spirit of one who was well known and highly respected in the person of Mrs. Dawson. Deceased had been in failing health for some time, but the end came unexpectedly as she was seriously ill for only a few days. Mrs. Dawson, whose maiden name was Bertha Smithson was born in Cainsville, Ont., and spent most of her childhood in that neighborhood. Thirty-two years ago she was married to Arch. Dawson. They lived near Brantford and Burford for a number of years, but about ten years ago came to reside on this con. Deceased was of a quiet amiable disposition. To know her was to love her. Her life was spent in service for others, as she followed the example of the Master who "went about doing good." She was a member of the Presbyterian church, and until her failing health prevented was a regular attendant and worker of the 2nd con. S. S., especially in the service of song. She was an ardent lover of flowers, and the inmates of many a sick room were cheered by the fragrance and beauty of a boquet from her hand. She will be much missed in this community, and especially in the home circle, but her friends do not sorrow as those who have no hope as she testined a few days previous to her departure of her confidence in Christ. The funeral to Chesley cemetery on Tuesday afternoon was largely attended. Rev. Mr. More conducted the service. Besides three brothers and three sisters she leaves to mourn her loss her husband and three daughters—Mrs. W. Pepper, 1st con. Elderslie; Miss Mabel, at home, and Miss Maud, at Stratford Normal, who have the sympathy of this community. Her memory will live long in the hearts of her loved ones. "She hath done what she could and her works do follow her."

Children Cry
FOR FLETCHER'S
CASTORIA

CLAMIS

Mr. Jos. Cunningham spent a few days in Toronto and Alliston.

Miss Hennett, of Kincardine, was the guest of Miss Nettie Gunn during the holidays.

Miss McClung, of Lyndoch, spent the holidays at the home of her brother, Mr. J. C. McClung.

Those home for the holidays were Miss Mary McSween from Port Elgin, Miss Mary Webb from Chipewa, Miss Mabel Kirktown.

Mr. and Mrs. Yule and five children, of Southampton, spent a few days with the former's sister, Mrs. Jessie McDougall.

Mr. and Mrs. Tomlayson and family, of Port Elgin, were visitors in our village on the 24th.

Miss Akitt, of Creemore, was a visitor at Mrs. J. C. McIntyre's on Friday and Saturday.

Miss McDonald, of Ripley, was in our burg on Saturday evening.

Mr. Dick Kirktown motored to Markdale on Sunday.

Mr. and Mrs. Agar, of North Bruce, Sundayed at Mr. John Wrightson's.

Miss Kate McDermid returned to London on Tuesday.

The May tea given by Miss Mary Deehan in the hall on Saturday evening in aid of the Red Cross was a success. The nice little sum of $25 was realized.

Mr. McClung and family spent the 24th at Inverhuron.

Mr. Hugh J. McArthur has adopted another young boy from the home.

Miss Margaret Campbell, of Harriston, is spending some time at her home here.

Mrs. John Wrightson is visiting her friends at North Bruce.

Mr. McClung motored to Hanover on Monday.

The monthly shipment of the Red Cross on Thursday last consisted of the following articles: 42 pairs socks, 102 towels, 12 handkerchiefs, 6 wash cloths, 36 personal property bags, 12 suits pyjamas, 1 parcel of hospital cotton.

The ordination of Mr. J. E. McCauley takes place in the Baptist church on June 7th. Pastors and delegates from the different churches in the Walkerton Associaton will be present.

CARGILL

Miss M. Brownscombe, of Owen Sound, was a visitor at the home of her uncle, Mr. H. Brownscombe, over the holiday.

Mr. and Mrs. Wm. Grainger, of Stratford, spent over Sunday with friends here.

Mr. and Mrs. Peel, of Owen Sound, visited at Mr. Fowlie's on the 24th.

The Red Cross packed over thirty boxes for the boys overseas on Firday.

Pte. "Tabby" Hunt is here renewing acquaintances. "Tabby" is one of the first of the 160th boys to come back wounded. Besides having a bullet hole through his lung, his throat and tongue are partially paralyzed. We trust he may soon regain the full use of his limb and vocal organs.

Mr. Jas. Alexander, of Oshawa, spent over the holiday at his home here.

Miss M. Martin, of the Georgetown postoffice, and Master H. Everett spent the holiday at the former's home.

Rev. Mr. Storey is in Guelph attending the Methodist Conference. Owing to his absence there will be no service in the Methodist church on Sunday evening.

Mr. and Mrs. Manser, of Toronto, visited at Mr. Fred Grice's last week.

Mr. Grayson, of Toronto, spent over Sunday at Dr. Bricker's.

Mrs. Montgomery, of Conestogo, is twisting at Mr. R. Laughleen's.

Mr. and Mrs. R. Laughleen, Miss M. Scharbach and Mr. J. Montgomery motored to Conestogo on the 24th.

Rev. R. Perdue, of Walkerton, occupied Holy Trinity pulpit on Sunday last, and will preach here again next Sunday afternoon at 3 o'clock.

Mrs. Kaufman, of Tavistock, is visiting her daughter, Mrs. W. Russell.

Dr. Wittch, of London, visited his brother and sister here this week.

Mr. Mrs. and Miss Wildfong, of Kitchener, visited at Mr. Russell's the past week.

It is expected that a male choir will have charge of the singing in St. Andrew's church on Sunday evening.

One of the most successful concerts given in years was held in the evening, May 23rd, by Mr. M. Wildfong, Canadian Harry Lauder, and Miss Alma Wildfong, one of Canada's leading lyric sopranos. Miss Wildfong sustained her well deserved reputation as a song bird, which was in evidence during the rendering of a number of classic songs which were most enthusiastically received by the audience, being encored after each number. Mr. Wildfong gave a number of humorous readings and as an impersonator of Harry Lauder songs he has no superiors and few equals, being encored again and again. The receipts of the evening were $65 which goes to the aid of the Red Cross League.

While in training and also while on the battle field the late Lieut. Les Young, of the 71st Batt., composed several pieces of poetry. We have been given permission to publish these and will insert one from time to time in these columns. The first is as follows:

TO MOTHER

How can I stay and watch the others going?
How can I stay ignoring Britain's call?
How can I rest at home assured and knowing
Indifference means the Empire's certain fall?

'Tis not for love of travel and adventure,
I fain would heed the call from 'cross the sea;
But conscience will not cease to punch and censure
My cowardice in staying here with thee.

Oh, how I dread thy fatewell touch,
As I'll leave for fields of war;
"But I could not love thee half so much
Loved I not honor more."
Proud to fight for a mother, fight;
Country, King and others

Fade from my mind as I dream tonight
Of my beautiful noble mother.
Love for the beauty of nature, yes,
Love for a thousand things other,
But sweeter by far than aught of these
Is my love for my beautiful mother.

Some may share with a maiden fair
Their love as a faithful lover;
But all my love that I dare call love
Is my love for a saintly mother.
Love of my country means to me
The love of brother for brother;
And a fight for king can only be
But a fight for my talented mother.

Life is short, not always sweet;
Soon we pass from this to the other;
But how pleasant to die when the armies meet,
Protecting a beautiful mother.

Messrs. R. A. Fowlie, F. F. Baldon and H. Grice are passing the lists for subscriptions to the Y.M.C.A. Already they have some $150. They are anxious to procure all they can for this worthy cause, and if you have not been called on you likely will be shortly.

Mr. F. Baldon is away on a visit to his home in Pickering.

CASTORIA.
Bears the Signature of Chas. H. Fletcher. The Kind You Have Always Bought

WILLOW CREEK

Wm. Berndt, Reuben Wittig and Fred Schnittker motored over to Walkerton on Sunday.

Mrs. Berndt is still in Walkerton. Her son is doing fine. They expect to come home next week.

Mrs. F. Schnittker is going to Kitchener this week, where they will have a family reunion on the birthday of their mother, who is 67 years old.

BRUCE TP.

Mr. and Mrs. Geo. Fullerton and boys, of Paisley, Sundayed at Mr. Neil McDonald's, 10th con.

Mr. Joe Haney and Mrs. Haney, sr., spent the week end at Mr. Silas Haney's.

Mr. and Mrs. Samuel Brown and son, Mr. and Mrs. Hugh Ferguson, from Ashfield, motored up to Mr. W. H. rBown's on Sunday.

Messrs. Cecil McDonald and Norman McLeod went to London on Monday to report for military service.

Mr. Charlie Walmsley is visiting his sister, Mrs. Dan. Brown, at Walkerville.

Mr. W. H. Brown is erecting a new addition to his house.

Murdoch, the 12-year-old son of Mr. and Mrs. Angus McInnes, 10th Bruce, died on Friday last after an illness of about a month from a trouble in the head. The funeral took place on Saturday, to Lovat cemetery, Rev. M. Nellson conducting the services. Mr. and Mrs. McInnes and remaining members of the family have the sympathy of all in the loss of a bright young son and brother, this being the fourth break in the circle within a few years.

Avis—Shipley

A pretty wedding took place at the home of Mr. and Mrs. Edward Shipley, 6th Bruce, on Wednesday evening, May 22nd, at 6 o'clock, when their second youngest daughter, Isabel J., was united in marriage to Mr. Wellington Avis, of Underwood. The bride was given away by her father and entered the parlor to the strains of Lohengrin's wedding march, and took her place under an arch of smilax and apple blossoms. The Rev. Mr. Robinson, of Tiverton, officiated. The bride's gown was of ivory duchess satin with trimmings of lace and reed pearls, and carried a shower boquet of roses, white carnations and maiden hair fern. After congratulations the bridal party and guests, consisting only of the immediate relatives, entered the dining room where a repast was served. The groom's gift to the bride was a beautiful sunburst of pearls. The happy couple left on Thursday on a motor trip to Owen Sound, Shallow Lake, Chatsworth and other points, the bride travelling in a navy blue silk suit with hat to match. Mr. and Mrs. Avis are the recipients of numerous and valuable gifts showing the high esteem in which the young couple are held. On their return Mr. and Mrs. Avis will reside on the 6th con. Bruce.

EBENEZER.

Mr. and Mrs. Howard Henderson and family, of Chesley, visited at Mr. C. A. Thomas' on the 24th.

Mr. Earnie Grant has erected 100 rods of new fence which improves the front of his farm very much.

Mr. and Mrs. Robt. Quigley, Mr. Earle Grant and Mr. and Mrs. Frank Quigley motored to Mr. L. Maxwell's near Chatsworth, to attend the presentation that was given to the Maxwell boys who have both enlisted and commence training this week.

The young men of the Epworth League joined with the Mount Hope League and went to Arkwright on Saturday and built a new fence around the parsonage grounds, and also raised a new woodshed while there. Things are looking pretty nifty in and around the preacher's little farm.

Mrs. Earle Grant and children spent a few days visiting her parents, Mr. and Mrs. A. M. King of Arkwright.

The pulpit here will be occupied next Sunday by Mr. H. Collins, of Centenary, as Rev. Mr. Stapleton is attending Conference in Guelph.

Russell and Harold Fleming spent the week end with friends in Owen Sound and Derby.

Mr. and Mrs. Dright Potts visited friends at Arran Lake on Sunday.

Mr. and Mrs. Alfred Robinson attended the 4th con. of Arran picnic to Southampton on the 24th.

PINKERTON

Miss Ruby Gregg, of Wingham Business College, spent a few days at her home here.

Miss Aileen Pinkerton, of Stratford Normal, visited over the holiday at her home here.

Rev. R. M. Gale occupied the pulpit in Walkerton on Sunday, and Rev. Mr. Wilson occupied the pulpit here.

The Tiverton Dramatic Club kept up the good reputation they have earned as stage performers when they put on their excellent play, "The Finger of Scorn," in the C.O.F. hall here on Tuesday night. Each of the players performed their parts admirably, and although the play was padded with many points, it is so had a good deal of humor. A neat sum was realized for the Red Cross. Lunch was served by the ladies at the close, and the younger people enjoyed a few hours of dancing.

Mr. and Mrs. Cummins and family, of Molesworth, autoed up and spent a few days at the home of Mrs. Cummins' mother, Mrs. Jas Murray.

At a special school meeting held on Saturday evening, Mr. Dave Elphick was appointed a trustee to fill the vacancy caused by the death of the late Albert Pinkerton.

Mr. Wm. Knox reported for military duty in London on Thursday.

Mr. Jack Wilson has returned from Trout Creek, where he spent the winter.

In Birmingham War Hospital

Mr. Chas. McDonald, of 10th Bruce, had a letter last week from his son, Pte. Jas. McDonald, who was wounded on 30th March, and is now in the war hospital at Birmingham, England. Pte. McDonald says he was hit by shrapnel in the back, and although he was getting along well at time of writing, it would be a good while before he will be fit again. He hopes to get a trip to Canada before resuming service. He saw his brother Alex shortly before he was wounded. also Angus and Jim McIntyre, formerly of the 10th Bruce. "Don't worry, dad," he says, "I'm doing fine."

CANADA

MILITARY SERVICE ACT, 1917

PUBLIC NOTICE is hereby given that, by the effect of the regulations of the Governor General of Canada in Council of the 20th of April, 1918, and the Proclamation of 4th May, 1918, recently published, every male British subject resident in Canada, born on or since the 13th of October, 1897, who has attained or shall attain the age of 19 years and who is unmarried or a widower without children must, (unless he is within one of the classes of persons mentioned in the schedule of Exceptions to the Military Service Act) report as hereinafter directed on or before the 1st day of June, 1918, or within ten days after his 19th birthday, whichever date shall be the latter.

Such report must be in writing and must give his name in full, the date of his birth and his place of residence and also his usual post office address.

The report must be addressed to the Registrar or Deputy Registrar under the Military Service Act of the Registration District in which he resides (see below) and shall be sent by registered post, for which no Canada postage is required.

Young men so reporting will not be placed on active service till further notice. They must, however, notify the appropriate Registrar or Deputy Registrar of any change of residence or address.

On receipt of the report an identification card will be forwarded by the Registrar which will protect the bearer from arrest.

Punctual compliance with these requirements is of great importance to those affected. Fathers to report within the time limited will expose the delinquent to severe penalties and will in addition render him liable to immediate apprehension for Military Service.

ISSUED BY THE DEPARTMENT OF JUSTICE, MILITARY SERVICE BRANCH, this 15th day of May, 1918.

NOTE: The men required to report should address their reports as follows:

ONTARIO—To the Deputy Registrar under the Military Service Act, 1917, London, if they reside in the County of Essex, Kent, Lambton, Elgin, Middlesex, Oxford, Waterloo, Wellington, Perth, Huron, or Bruce.

To the Registrar under the Military Service Act, 1917, Toronto, if they reside in the County of Lincoln, Welland, Haldimand, Norfolk, Brant, Wentworth, Halton, Peel, York, Ontario, Grey, Dufferin, Simcoe, or in the Districts of Muskoka, Parry Sound, Algoma and Nipissing north of the Mattawa and French rivers (including the Townships of Ferris and Bonfield.)

To the Deputy Registrar under the Military Service Act, 1917, Kingston, if they reside in the County of Durham, Northumberland, Victoria, Peterborough, Hastings, Prince Edward, Lennox, Addington, Frontenac, Haliburton, Carleton, Dundas, Glengarry, Renfrew, Russell, Stormont, Grenville, Lanark, Leeds, Prescott, or the District of Nipissing south of Mattawa river (exclusive of the Townships of Ferris and Bonfield.)

To the Registrar under the Military Service Act, 1917, Winnipeg, if they reside in the Districts of Kenora, Rainy River, or Thunder Bay.

QUEBEC—To the Registrar under the Military Service Act, 1917, Montreal, if they reside in the County of Jacques Cartier, Hochelaga, Laval, Vaudreuil, Soulanges, Napierville, Beauharnois, Chateauguay, Huntington, Lapeairie, Argenteuil, Terrebonne, Two Mountains, Montcalm, L'Assomption, Joliette, Berthier, Maskinongé, St. Maurice, Three Rivers, St. Johns, Iberville, Missisquoi, Brome, Shefford, Rouville, Chambly, Verchères, St. Hyacinthe, Bagot, Drummond, Richelieu, Yamaska, Nicolet, Arthabaska, Sherbrooke, and Stanstead.

To the Deputy Registrar under the Military Service Act, 1917, Quebec, if they reside in the County of Wolfe, Richmond, Compton, Beauce, Bellechasse, Beauventure, Dorchester, Cape, Kamouraska, Levis, L'Islet, Champlain, Charlevoix, Chicoutimi, Montmorency, Quebec, Portneuf, Saguenay, Lothinière, Montmagny, Matane, Miganic, Rimouski and Témiscouata.

To the Deputy Registrar under the Military Service Act, 1917, Hull, if they reside in the County of Timiskaming, Pontiac, Ottawa and Labelle.

NOVA SCOTIA—To the Registrar under the Military Service Act, 1917, Halifax, if they reside in the Province of Nova Scotia.

NEW BRUNSWICK—To the Registrar under the Military Service Act, 1917, St. John, if they reside in the Province of New Brunswick.

PRINCE EDWARD ISLAND—To the Registrar under the Military Service Act, 1917, Charlottetown, if they reside in the Province of Prince Edward Island.

BRITISH COLUMBIA—To the Registrar under the Military Service Act, 1917, Vancouver, if they reside in the Province of British Columbia.

SASKATCHEWAN—To the Registrar under the Military Service Act, 1917, Regina, if they reside in the Province of Saskatchewan.

ALBERTA—To the Registrar under the Military Service Act, 1917, Calgary, if they reside in the Province of Alberta.

MANITOBA—To the Registrar under the Military Service Act, 1917, Winnipeg, if they reside in the Province of Manitoba.

YUKON—To the Registrar under the Military Service Act, 1917, Dawson, if they reside in the Yukon Territory.

Special Notice

Commence a course now before our Tuition Rates are increased.

ELLIOTT Business College

Yonge and Charles sts., Toronto requires more students in order to meet the demand made on this school for stenographic accountants, office clerks, teachers, &c. Our graduates are stepping into good positions as fast as we can get them ready. Open all year. Write us to-day for large catalogue.

W. J. ELLIOTT, Principal

ELORA ROAD NORTH

Mr. Arch. Bryce has gone to Vancouver in charge of a car load of horses.

Pte. Garnet Campbell was home from London for the week end.

Mr. Rich. McGill's house was burnt last Thursday morning. A large crowd gathered and everything was saved but the contents of one bedroom. Mr. McGill had bought the house on the Adams farm, intending to build an addition to his house, but now he will have to rebuild entirely.

The twenty-fourth passed quietly on this line. A picnic was held at the river back of Mr. McDougall's farm and those who attended report a good time.

Mr. John Rae spent Sunday in Tara.

Mr. Carl Winch went to Toronto last week and enlisted in the artillery.

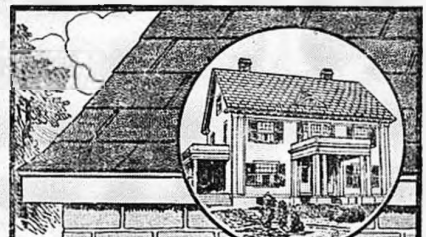
Mr. and Mrs. H. J. Rudolph, of Wroxeter, spent the week end visiting at the home of the latter's sister, Mrs. M. McMillan.

SIXTH CON. BRUCE

Our teacher, Miss Simpson, spent the 24th at her home in Listowel.

Mr. and Mrs. John Reptke went to Mildmay on Sunday to attend the funeral of Mr. C. Wendt.

Mr. and Mrs. Menno Roppel had friends from Stratford visiting them for a few days.



Mr. Joe Shipley was home for a few days.

Fatally Injured in Threshing Machine

Mr. John Bridge, of South Line, Kincardine Tp., met with an accident while threshing at his home on Friday last. It appears that he was running a one-man outfit, and was engaged in threshing with a gasoline engine for the motive power when his arm got caught in the machinery. He was taken to the hospital on Friday, but succumbed to his injuries on Tuesday morning. Mr. Bridge was unmarried and was in his 63rd year.—Review.

BORN

Webb—In Greenock, on May 26th, to Mr. and Mrs. Scott Webb, a son.

Home in Halifax roofed with Brantford Asphalt Slates

A handsome roof that defies the weather

An added touch of beauty to any house is a roof of Brantford Asphalt Slates, which are in soft, harmonious shades of reddish brown and dark green. The colors are permanent and unfadeable, being the natural shades of the slate just as it is taken out of the quarries.

It will also prove a very economical roof, because Brantford Asphalt Slates do not split, get loose, absorb water or rot. They are strongly fire-resistant and are classified as non-combustible by the fire insurance companies, and allowed to be used in cities where the most rigid fire-prevention By-laws are in force.

Brantford Asphalt Slates are very moderate in cost. The regular size of the slates and their pliability make them easily and quickly laid, thus saving time and cost of labor. Being made of high grade felt saturated and coated with asphalt, and with a surface of crushed slate, they make a roof that defies the elements and is a permanent part of the building, just like the walls and the foundation.

Brantford Asphalt Slates

are being used more extensively every year for city, country and summer homes, churches, golf clubs, stores, garages, and wherever an artistic effect is desired on a pitch roof.

If you are going to do any building this year or have an old roof that needs replacing, it will be to your advantage to investigate Brantford Asphalt Slates.

D. H. COOPER

Robbed a Store

Two Indians who are charged with breaking into Mr. A. Munro's store at Turner's Station were taken down to Walkerton last week by Constable Hearn, of Port Elgin. The store has been closed for a few weeks past, while the proprietor is working on the farm. The Indians are reported to have made quite a haul of goods, which were recovered by good work on the part of the constable.

Bruce Centre Series and Centre Bruce

Women's Institute

Mrs. H. R. Putnam's parlors were filled on Monday to hear Miss Gray's address, "What Women are Doing," which no doubt will give all who were present encouragement to carry on all lines of war work till peace is achieved. The district annual will be held this afternoon elected Mrs. D. McMillan, 1st Vice-Pres.; Mrs. W. J. McKenzie; 2nd Vice-Pres., Mrs. J. Carew; 3rd Vice-Pres., Mrs. W. J. McLean; Sec.-Treas., Miss Janet B. Scott. Press, Mrs. Jas. Lorne. The roll call showed 141 out of town delegates at the meeting. Southampton ladies entertained the visitors to dinner and supper in the church.

Paisley Boy Hitting the Huns with the Big Guns and Wins the D. S. O.

The unusual major mentioned in the following article sent from the front by Roland Hill, a Canadian Press correspondent, is unmistakably a former Paisley boy, Major Neil B. McLean, who, in a letter to The Advocate over a year ago, told how he came to be in command of a battery of imperial heavy artillery in France. This appeared in Monday's dailies: "Up and down this hard-fighting front you find Canadians in unexpected places. To-day I met a major in command of two of the biggest guns, mounted on railway trucks, hammering away at a German back area. He had been all through the greatest battle, and both of his pets are still in fine shape. The major came over with a Winnipeg battalion. He was engaged in educational administration in Manitoba, and knew nothing about gunnery, but he was not going back without having a whack at the war. At, although he knew nothing about gunnery, he did know a lot about mathematics, and when he was sent to a northern English munition works to see his guns in the making, he so impressed the Imperial authorities that he was given an immediate command. Since then he has been educating the Huns with ranges varying up to twenty miles, crossroads and railway stations being his specialty. During the first day of the Somme offensive he was at Rainel, and keeping one eye on the railway track behind the line and the other on his gun he watched the railway junctions right up to the moment the line had receded so far that he found the eighteen-pounder next alongside him. 'They thought it was time to get out,' he said, 'so we came back quite comfortably, managed to get a few rounds of gas when we got to Albert, and here we are again. Only about six officers in the battalion have received the military cross or D. S. O.

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles.

Hooper, Mrs. Cranston, Mrs. A. Scott, Mrs. D. Walks and Mrs. (Dr.) Struthers attended the Presbyterial W. M. S. meeting at Southampton on Thursday.

—Mr. A. Ball very acceptably occupied the Methodist pulpit on Sunday at both services, in the absence of the pastor. Mr. Ball has had a large experience in Christian work among the classes of people and people who are not reached by the churches of the city, and has been connected with some of the well known city missions for many years.

—Carnegie Rash, had a $5,000 fire on May 29th. One of the heirs was Miss Lottie Walker, daughter of Mr. and Mrs. Wm. Walker, of Paisley, who was engaged in the stillery business there. Her whole stock was burned, and there was no insurance on it. Miss Walker's many friends here will be sorry to learn of her misfortune.

—Mr. Wm. Rowand's black team became frightened at the sudden yelping of a dog one morning last week and ran away, dragging the wagon and a disk behind them at a hot pace. They stopped after falling on a cement crossing. One of the animals is doing a walking stunt on three legs since, having injured its shoulder, and will not help out the gardening plans any more this season.

—Enforcement of the Canada Food Board's regulations as to food conservation has been placed in the hands of the different provinces throughout the Dominion, in cases of convictions secured by the municipal police officers any fines imposed are to be paid to the municipal treasuries, and similarly where the provincial officers secure convictions the fines are paid to the provincial authorities. The anti-hoarding law is likewise enforced.

Bee Keeping Demonstration

A meeting for the benefit of those engaged in honey production was held in Paisley on Friday afternoon, at Mr. Jas. Miller's place, under the direction of Mr. John Sclirant of Aberdeen, the bee inspector for this district, who practically demonstrated the solution of many of the little problems that are to be overcome in handling the busy little insects. Mr. Schrank is one of the most extensive bee keepers in this section, and very successful in his operations. Men who desire to take up bee-keeping could not do better than consult him. This meeting was not advertised at all, and was attended by only a few who had learned of it beforehand.

ELDERSLIE COUNCIL

Gillies Hill, May 29th, 1918

Council met on above date as a Court of Revision. All the members were present except Mr. Fraser.

W. B. Bartlett appealed against the assessment of his lot, number 21, con. 11; John Eason appealed against the assessment of house and lot on his farm occupied by John Irwin. In both cases the assessment was sustained, and on motion of Messrs. Allen and Clement the roll was adopted and the court adjourned.

Council met for regular business. Minutes of last meeting read and adopted.

Clement—Thomson—That we procure the services of R. McDowall, civil engineer, to make a report on a mode of improving the draining of lots 5 to 15 on cons. 8 and 9, under sec. 77, s.s. Municipal Drainage Act. —Carried.

Oswald—Allen—That this board do now adjourn to meet again the first Monday in July at 10 o'clock a.m., for general business.—Carried.

R. C. PEARCE, Clerk

Fish—Fresh salmon Trout at 18c. lb. P. Oltsher.

—The W.C.T.U. will meet in Putnam's hall on Friday, June 7th, at 3.30 p.m.

—Wanted at once, an office girl. Main qualifications—accuracy at arithmetic, correct checking and copying of accounts. Apply in writing to Drawer 16, Paisley.

—Salesman Wanted—Lubricating Oil, Greases. Specialties. Part, part or whole time. Commission basis. Man with car or rig preferred. Riverside Refining Company, Cleveland, Ohio.

—Am making a visit to the city this week, and will have special announcement to make at next issue that will be of particular interest to the purchasing public. Watch for the bargains offered. A. BALL, General Merchant.

Presbyterial W. M. S.

The fourth annual meeting of Bruce Presbyterial Women's Missionary Society was held in Southampton on Tuesday afternoon and evening, May 28th. The President, Mrs. Wilson, of Walkerton, presided. The meeting opened with a service of devotion for the Empire and Allies. Reports from the secretaries of the different branches of work were all good, showing splendid progress in all departments and many progress in all departments and many members have been added, the total contributions for the year amounted to $2001, of which $475 was sent to the Provincial treasurer, Toronto. The offerings being distributed as follows: $117, and their contributions amounted to $167. Each auxiliary is responsible for the clothing for Indian boys and girls in one of the Indian Residential Schools. Three barrels of fruit and one bale of hospital supplies were also sent. Mrs. Wilson, Walkerton, one of the Presbyterial delegates to the Provincial, told of the work in that field. Mr. Waters, of Toronto, gave a very interesting address in which he said that the problems of reducing India's debt and of bringing the gospel to the people of that country. The old women there have a great influence, and in some ways rule the men. Mr. Waters mentioned Indian troops in the war, reminding his hearers that Lord Roberts' Canadian regiment in India. The women of India, he said, are longing for education as never before, and it is a great privilege for Canadian women to have a part in the making of a new India. At the evening meeting the same speaker told of the medical work in India. Officers were elected as follows: Hon. Pres., Mrs. R. Robertson, Paisley; Pres., Mrs. Reith; 1st Vice-Pres., Mrs. W. J. McKenzie; 2nd Vice-Pres., Mrs. J. Carew; 3rd Vice-Pres., Mrs. W. J. McLean; Sec.-Treas., Miss A. B. Dewar; Cor. Sec'y, Miss Janet B. Scott; Press, Mrs. Jas. Lorne. The roll call showed 141 out of town delegates at the meeting. Southampton ladies entertained the visitors to dinner and supper in the church.

HER DAY

The Old Man Is Right. It Pays to Stop a Bit and Listen to the Birds Sing

Slowly and with evident effort, Evelyn Barton opened her eyes. Through the mouth window the clear spring morning was calling and a flood of melody poured in from the cherry tree.

She had no sense of rest from the night. "I feel like an old woman," she said. Then she came upright with a jerk. It was her birthday! "How much little Evelyn Dawson used to love her birthdays!" she mused. "What a long, long way behind she has been left by Evelyn Barton."

As she slipped into her dark work dress, her face was white. "What a fool little Evelyn Dawson was to change to Evelyn Barton," she said to herself. She glanced down at the cheap cotton dress. "Who would have dreamed I should ever come to this? Dark clothes save money, though, and who is there to care?"

Turning abruptly, she went down to her morning's work.

As the clock struck six, John and the three men came from the lower field for breakfast. From the foot of the stairs she called Inez a little sharply. "If one expects to get Inez up at seven, one has to begin proceedings by six," she said to her husband. "She made me promise to see she was up by seven. She's going to a picnic."

"Seems to me," her husband said, "she's getting old enough to help. I'll warrant that when you were thirteen you knew something about work."

Evelyn Barton's white cheeks turned to flame. "There used to be something thought of, in my home," she said defiantly, "besides work. There was a time when I knew how to play." As she passed the coffee her hand trembled.

Her husband addressed his next words to Jim Winn, "Guess to-day and to-morrow will about finish the south meadow, eh?"

The older man nodded. "An' a pretty good job it's been, too," he said. "Seems like there's no place under the light o' day, where so many birds build as in the south meadow. It's the Lord's own truth that every time I stop a bit to listen to them I can work enough harder for an hour afterward to pay for the break."

Barton nodded. "I know that's your theory and I don't quarrel with a man who turns out good work. But as a general thing, a man who's plowing and planting and haying hasn't time to stop and listen to the birds."

Old Jim Winn arose from the chair. He was the best worker on the farm. "Well," he returned, "if he doesn't take time, now and then, the day's coming when God will say, 'Now son, stop!' and it'll be before his natural span o' life's been full rounded out." The old man stamped out noisily.

A moment later Inez sidled into her place at the table. Her hair clustered in bronze rings about her face and neck; her face was alight with life. "I don't want breakfast," she chirped, picking daintily at her oatmeal "but I want a lot of basket goodies, Ma. Got those hermits?"

Rising, Mrs. Barton glanced at the clock. Her mind worked rapidly. What was the use of wasting any more of life? "Yes—no! that is—what time does the northern train go out, Inez?"

"The northern train? Why? Going on a journey, Ma?"

Before her mother could answer, from the cherry tree came a burst of song so clear, so sweet, so joyous that mother and daughter lifted their heads a little to hear the better.

As the last note of the song died away, a look that was new to Inez but would have been readily understood in the old academy where Evelyn Dawson had reigned as queen of girls, dawned in her mother's eyes. She crossed to the window. "No, dear," she said quietly, "I'm not going on a journey although just for a moment I did think of it. I'm going to read poetry instead."

"Poetry?" echoed the child.

"You did not know your mother could do anything but churn and bake and sweep did you?" she said tenderly. "I'd almost forgotten she could, too. But now—when does your crowd start?"

"Eight o'clock," said Inez promptly.

"You'll have to hurry a little then," her mother's voice was matter-of-fact. "I have just made myself a present of the day. I'm going to play too, so you'll have to put up your own lunch."

"Me?" Annoyance, resentment, consternation, flared in the young face.

"—if you take any. It's quite time you knew how to put up a lunch and there's plenty of time for the first lesson."

In the next few minutes Inez found herself listening to directions for slicing bread, wrapping eggs and numberless other things. Then kissing her, Mrs. Barton watched her run down the path.

It was but a few minutes' work for Mrs. Barton to clear the table of food and stack the dishes compactly in the sink. She took a shawl and some pillows from the cedar box in the hall, went into the yard and spread them beneath the cherry tree. "Oh, heavenly!" she whispered as she stretched at ease and turned her eyes to watch the lazy little clouds overhead.

Next she followed the births journey of a butterfly all clad in gold and flame, fluttering among the nodding blossoms. "I haven't really—seen—a butterfly—for years," she murmured drowsily as she nestled luxuriously among the gay pillows.

The next thing she knew the clock was striking twelve and the men were coming up to the house. She wondered for a moment where she was. Then she remembered.

As she met the men on the front porch, John Barton suddenly recalled the fine dignity of bearing that had first drawn him to her.

"I was very tired," she explained simply, "and as it is my birthday I decided to make myself a gift of the day. I have not cooked dinner but I'll have a picnic lunch ready for you in a very few minutes."

A smile curved her lips but there was no answering gleam in John Barton's eyes.

It was a silent meal. This was the first cold dinner Evelyn had ever served to John Barton. He was very particular about his horses' weekly day of rest but it never occurred to him that his wife also might be glad of one.

"I suppose," he remarked curtly as the men arose from the table, "it'll be bread and milk for supper."

Steadily her eyes met his. "This is my day—the first one I've taken since I was Evelyn Barton, I believe," she answered quietly.

As the men cross the yard toward the meadow she watched them through the grove. How she had loved him! How sure she had been their love would last! How happy, in spite of the hard work, they had been at first. Now he grudged her even a day. She flashed away the tears and cleared the table, once more stacking the dishes. If she ran short, she could use the best set for once.

With fresh color in her cheeks she slipped into a clean dress and started for town. On the way she purchased two new magazines; she had not read one for ages. Then she went to the bank to draw from her own account. Next she lingered with enjoyment over the purchase of two bright colored house dresses. She wound up with a call on an old school friend and chatted until she felt like a girl again.

On her way home she treated herself to a dozen lovely carnations and when she reached home she went to the place and sitting down played softly almost reverently, a few nearly forgotten tunes. Steadily her spirits and her courage rose. She ran upstairs to put on the only white dress she possessed, fastened a carnation in her hair, another in her dress and taking a pail of lemonade from the ice box, went singing to the meadow as she had been wont to do fifteen years before.

"It's my day," she laughed happily as she came in sight of the men, "so I took time to bring you a cool drink."

But as John Barton's eyes travelled from the flowers in her hair, the fresh daintiness of the white dress, to the tips of her best low shoes, there was no hint of a smile on his face.

"Some work to wash and iron that dress, I'm thinking," he said.

"I'm going to wear it now and then," she replied. "I bought two light house dresses and some muslin for others. I'm going to give away those dark things."

As she reached the house door she turned, her gaze reaching slowly out to the field beyond. "I love you still, my dear," she whispered. "I love you enough to bear a little hurt to save us—both."

She used the best china for tea and the centre of the table glowed with flowers. The green hot baked potatoes and gravy but the sliced meat was cold, the only vegetable was a dish of pickled beets and the pies were cold; but the woman who served was cool and rested, steady of nerve and soul.

When the meal was nearly over Inez came flying in. "Oh," she cried, "we've had the dandiest day!" Then, with sudden remembrance, "You been reading poetry, Ma?"

John Barton's chair gave a little scrape. "No," he said suddenly, "your mother's been growing young! She's lost about fifteen years, somewhere to-day. Inez, you run over after you're eaten, and get Molly Lawton to come in and do up the dishes. The sink's stacked full. It's your mother's birthday and we're going for a drive."

Their eyes met as they had years ago. He pushed back his chair. "Reckon I'd better clean up a bit," he said. "Will you harness, Jim?"

"Aye, aye, sir!" Stamping a bit the old man went out into the spring sunset. "It pays," he said under his breath, "to stop a bit an' listen to the birds sing."

Eating More Fish in Canada.

As a result of the efforts of the Canada Food Board to increase consumption of fish in Canada, no less than 53 per cent. of the total catch in the western provinces since January 1, has been consumed at home, as compared with only 15 per cent. last year. This increased consumption has resulted in a very large saving of meat.

The high school boys of Glace Bay, N.S., last year raised 6,000 bags of potatoes on the old golf links. More than 2,000 entries were made at school exhibitions of back yard garden truck.

People in Great Britain going away for Easter had to take their ration foods with them this year.

Italians have perfected a process for making an edible oil, that also can be used in soap and as an illuminator, from grape seeds.

The Apple Tree.

On summer days a craving seized
Keeps luring me to blossom land;
It leads me through a dreamy mist
Back to the Witching Orchard way.

Along the barefoot-beaten lane,
Around the field of swishing grain,
Past bush and flower and shady nook,
Across the flower-tufted brook.

And then I see through misty eyes
The orchard old before me rise
And while the boughs in welcome bend,

I follow on down to the end.
Yes, yes, it lives—my apple tree,
And all the orchard laughs with me!
My tree! Ah, now I understand
The magic of that coaxing hand!

If We Return.

If we return, will England be
Just England still to you and me?
The place where we must earn our bread?
We who have walked among the dead,
And watched the smile of agony,
And seen the price of Liberty,
Which we have taken carelessly
From other hands. Nay, we shall dread,
If we return,
Dread lest we hold blood-guiltily
The things that men have died to free.
Oh, English fields shall blossom red
For all the blood that has been shed
By men whose guardians are we,
If we return.

A good scrapple is made of oatmeal and inexpensive beef.

PEERLESS POULTRY FENCE

About the House

Mrs. Brown Makes a Clean Sweep.

"What are you doing, Mrs. Brown; are you moving, or what?" Mrs. Simmons had stopped at the little front gate, her curiosity attracted by the sight of all the belongings of the Brown family scattered about the yard in the bright spring sunshine.

"Do you remember the lecture we heard on home-making last winter? I wrote down the little text and it has haunted me ever since; 'Have nothing in your home that you do not know to be useful and believe to be beautiful.' Most people might suppose that I was just doing an extra house cleaning, but I am really having it out with my own character. I say to something, 'Are you useful?' and then I say to myself, 'Have you enough strength of mind to get rid of it?'"

"I had to be feeling pretty firm before I could do it, but you know as well as I do that there is no sense in keeping a lot of stuff no one ever uses," Mrs. Brown continued. "I dust that chair, and we all stumble over it but no one ever sits in it. The old what-not is just a catch-all and is only in the way when we want to get near the window." Mrs. Brown was going critically from one article to another. "Now this little table with the drawers can be painted and will make a convenient place for my sewing things, but that rickety old stand is of no earthly use."

"But why did you bring everything out here?" asked Mrs. Simmons.

"It was easier to begin with a clean slate. Goodness knows, I'm tired of dusting all the little gimcracks, and I'm tired of seeing all the confusion. I took seventeen silly things off the mantel-piece. I am going to put back the clock and an old pair of candlesticks that look lovely, now that they are polished. It rests me just to think about it. Then I've taken down all the musty old calendars and such things that were tacked up on the wall. The hardest thing for me to know is what pictures I ought to keep, but I am sure the plain wall is better than the trash that was stuck around."

"Have you had the sitting-room papered, Mrs. Brown?"

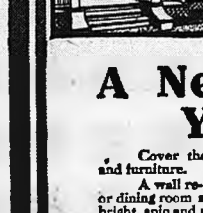
"Yes, with one of those lovely, almost plain papers the lecturer showed us. I've had it put right up to the ceiling, without any border. You can't imagine what a relief it is to be rid of that ugly, dark, big-figured paper. The room is so much more cheerful, and it looks larger, for some reason. Come in and see it."

The empty room certainly offered an inviting beginning.

"Take off your hat, Mrs. Simmons, and let us see what we can do with the furniture. Don't you think this blue Scotch rug is pretty with the tan wall? I am so glad I got it, instead of that red Axminster Jones tried to sell me. The floor looks pretty bad, doesn't it? I'd like to have a hardwood border outside the rug now, so I have sent for some of that patent floor covering and will have it fitted all around the edges, coming well under the rug, which lies in the centre. I chose a good wood color to look well with the blue rug and harmonize with the paper."

They went back into the yard and Mrs. Brown stopped before a shabby, comfortable old sofa. "Are you useful? Yes. Are you beautiful? No-o, except that there is something beautiful in being so 'comfy.' I know—a fresh-looking slip cover will fix you. If I can fit covers to the whole family I guess I can do it for a piece of furniture. I'm just crazy to show what I can do with slip covers and fresh paint!"

The two women carried the sofa inside. "Now that old what-not is out of the way we can have the sofa before the big window, with my little sewing-table at this end. Next winter we'll have it face the fireplace, with its back against the big table, so it will be convenient to the lamp and magazines."



Every piece of furniture was challenged in turn. Many were found wanting. Those that were saved were carried in and thoughtfully placed. Some were set aside for renewal by means of paint, but others were heroically discarded.

"What are you going to do with them?" said Mrs Simmons. To her frugal mind Mrs. Brown's wholesale elimination looked almost wasteful.

"I am going to send them to the Salvation Army. A lot of the stuff we don't need can be fixed up so it will be useful for some one."

Finally the two women sat down to survey the result. "I'd never know it was the same room," frankly admitted Mrs. Simmons. "But doesn't it look comfortable and restful!"

Mrs. Brown sighed contentedly. "It certainly does, and before long the whole house is going to show the effect of the same kind of treatment."

MARTIN-SENOUR 1000 PAINT & VARNISHES

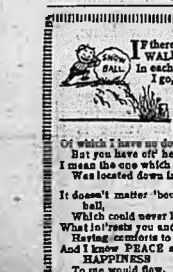
A New Dress For Your Home

Cover the scars of wear and tear on walls and floors and furniture.

A wall re-tinted—a floor varnished—a hall painted—a chair or dining room set re-stained—the whole house made fresh and bright, spic and span. There are

SPIC AND SPAN FINISHES

for every surface—for everything you want to "do over":



"NEU-TONE"—the washable sanitary, soft tone Wall Finish, in pleasing tints.
"WOOD-LAC" Stains make soft wood look like expensive Mahogany, Walnut, etc.
"MARBLE-ITE" Floor Varnish—for hardwood floors. Won't mar or turn white.
"LIQUID WAX"—for floors. Easily applied, Dries hard, Shines easily.
"SENOUR'S FLOOR PAINT"—the hard-drying paint for the floor that wears, and wears, and wears.
"VARNOLEUM" brightens up and protects Oil Cloth and Linoleum.

These Finishes have proved their worth and wear and economy in a great many homes. We have handled them for years and can guarantee results.

FRUIT JAR LABELS FREE—a handy book of them—printed in colors and ready gummed, given away. Write for them. 104

The MARTIN-SENOUR Co. LIMITED
GREENSHIELDS AVENUE, . . MONTREAL

Canuck BREAD MIXER

MAKES BREAD IN 3 MINUTES

Eliminates all grease, waste, Makes finer, whiter, more delicious bread, cake, etc., without touching the flour. Saves time and labor. Saves the Nation's food supply. Cleans itself. Can be used also as a mixer for potatoes, meat and slaw—batter, etc., as automatic dough.

Delivered all charges paid to your home through your dealer—your local price $3.75, your local rate $3.25.

$2.75 and $3.25

IF there was just one WALKER HOUSE in each town where I go,
My troubles then would last like that
Proverbial ball of snow.
Of which I have no doubt at all
But you have oft' heard tell.
I mean the one which people say
Was located down in—well!

It doesn't matter 'bout that snow ball,
Which could never last,
What is'nt'rests you and me is
Having comforts to us passed.
And I know PEACE and JOY and HAPPINESS
To me would flow,
If there was just one WALKER HOUSE
In each town where I go.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

GIVING NEW-GROUND POTATOES THE RIGHT START.

"Who knows best how to raise a good crop of potatoes on new ground?" I have raised a great many crops of potatoes and I invariably plant them on my new land. I have tried out many different methods and believe that I have arrived at a very close approach to perfection in this field; therefore, I respectfully offer what follows in my answer to the question at the head of this paragraph.

It is hard to do a good job of plowing on new ground because it is usually rough and contains a more or less bounteous crop of roots and snags; but anything that is worth doing at all is worth doing well; I always take some pains and do as good a job as possible.

Preparing the Land

Having the ground plowed, the next task is the harrowing; on this point I want to place special emphasis, because many a crop ladoomed to failure, or diminutive returns, because the seed bed was not properly prepared. In the case of a heavy June grass sod a disc is necessary to cut it up; the disc should be followed by a spring-tooth harrow to mellow the ground. My experience has been that usually a disc was not needed on new ground, because there was more briers and roots that sod. I use a steel framed harrow with adjustable teeth and the first time over the ground I set the teeth rather light; this picks up the most of the loose roots; the second time I set them a little deeper and the last time over the ground I go cornerwise of the field, which makes the marking out easy. If the ground is not very rough three harrowings will do, but I usually go over the land five or six times; work spent in preparing the seed bed is not lost. The first time over I follow the furrows, and thus avoid turning any of them back, as would likely be the case if the harrow were dragged cross-wise.

There are usually little hummocks, made by trees up-rooting years ago, we call these "cradle knolls." To level off a cradle knoll I stop the team just at the base of it and put my harrow teeth down to the last notch, then I stand on the frame and pull through. This takes off the top of the knoll and, stopping again and raising the teeth, we go on to the next one. A few doses of this will level off the knolls and put the ground in pretty good shape.

Putting in the Seed

The next step is the planting. While the drill method works very well in old ground, I prefer planting in checks in new ground for two reasons: First, the soil can be thoroughly stirred around the hill, promoting a healthy expansion of the tuber-cluster and killing the briers and grass that would otherwise line the rows. Second: When the crop is harvested there is no living thing in sight; the wild growths have been thoroughly subdued and the field is in excellent shape for any crop that I want to plant the following year.

As to seed: I always plant the nicest potatoes that I have, cutting the seed to two eyes and planting one piece in a hill; this is better than cutting to one eye first, because it eliminates the possibility of having blank hills occasionally; and second, because the larger piece of seed gives the plant a quicker and more vigorous start. If small potatoes must be used I would plant them whole or cut once in two.

How We Cultivate

The style of cultivator used depends upon the condition of the land and the equipment of the farmer. We generally use a riding cultivator; but when there are stumps or stones in the way or the ground is too rough, a regular five-tooth adjustable cultivator is the proper thing to use. With this style of cultivator we always go twice-in-a-row, that is, we cultivate both sides of each individual row. If the soil is very heavy the crop should be laid by with a double-shovel plow just before the plants commence to blow. This stirs the soil deeper than before and gives the hill plenty of room. If properly done, there will be no need of hilling them up.

Good Spraying Necessary

The matter of spraying is quite as important as any other step in the production of the crop. I always strive to prevent the bugs from getting a good start, especially just before the plants blow, as the little tubers are setting on about that time. It stands to reason that if the vitality is sapped from the plant at this critical period there will be fewer tubers set on and they will not be so vigorous as they will in the case of a healthy plant.

I graduated from Paris green several years ago, both because of the quality of work obtained and the matter of expense. I use nothing but arsenate of lead. The arsenate of lead does its work most thoroughly when properly applied and there is no danger of damaging the plants by using too much, as is the case with Paris green; the lead stays on the plant indefinitely while the Paris greed washes off with the first rain.

Use Lead in Paste Form

I prefer the lead in the paste form; I place two to three tablespoonfuls in a twelve-quart pail and fill it with water, then stir until the lead is all dissolved; I apply with a whisk-broom and keep constantly stirring the solution while I am applying it.

I wait until the first crop of young bugs begin to hatch and then I apply freely to every hill, being careful to get the dope well into the centre or heart of the plant, as here is where the young bugs first congregate; I treat every hill the same whether there are any bugs in it or not. When I am done the potato patch looks as if it had been whitewashed; the bug troubles is ended for some time. If there are no other potatoes near this one application is all that is required; but if your neighbor neglects his bugs they will often invade your crop and necessitate another application later on. I have never had to use more than two applications and usually only one. Last year I raised a patch of potatoes in an isolated spot and treated them in this manner; after a period of two weeks I carefully examined the plants and failed to find a single bug, young or old, in the whole patch; and I didn't see another one during the rest of the season.

Poultry

The location of the brooder is an important consideration. It should face the south, in order to receive the full benefit of the sun, for old King Sol is a great friend to newly hatched chicks. And it should be situated on a well-drained site, free from depressions which are likely to collect pools of water following rainstorms. If puddles form the chicks are almost certain to wade in them.

Strangely enough, water has a peculiar fascination for chicks, in spite to them under most circumstances. For example, following a thunderstorm, especially toward evening, a brood will scamper outdoors and commence wading in the puddles or go trudging through the wet grass and weeds. In a few moments they are wet and bedraggled, chilled to the bone and utterly miserable. The strongest will find their way back to the brooder and dry off, but the weak ones become confused, shiver and chirp for help and quickly perish.

Until they have received their first coat of feathers, chicks cannot withstand a wetting without grave danger, hence the attendant must lay his safety plans accordingly.

There is generally a certain percentage of the brood too stupid or too reckless to seek the shelter of the brooder at the approach of a storm. Instead, they seek some temporary shelter. If the brooder is raised above the ground they are likely to go under it. This makes a good refuge, if the spot on which the building stands is well drained. Frequently, however, the site quickly forms a puddle, in which event the chicks under the brooder are apt to fill a watery grave.

Since the majority of thunder showers take place toward evening it is a good plan to be on the lookout for them. If one is approaching, feed the brood a little earlier, if need be, in order to get them inside the brooder, and then confine the chicks for the night. Otherwise if the storm hangs on until dark and the chicks are scattered about the premises, they will not find their way to the brooder, or, if they so do, it will be at the expense of getting wet. Sudden rainstorms take a heavy toll of chicks each year.

Sharp Garden Tools.

Where the garden itself is not highly cultivated, the tools will be poor as a matter of course. But even people who think a lot of their gardens are sometimes very careless about the condition of their tools.

The proverb says, "If the iron be blunt, then must he put to it the more strength." Sharp tools greatly economize strength. I find that sharp bright tools that are tight to their handles add to the enjoyment one has in his work. To have a hoe slip readily through the soil, doing a nice clean job, contributes to one's self-respect and makes him proud of the work he is doing. If the hoes, spades, weeders, and other tools are once put in good shape, they can be easily kept sharp by the occasional use of a file; and with an old kitchen knife the rusty places can be scraped clean so that they will soon scour smooth.

By all means, let us furnish the boys with good sharp tools and show them how they can be used to best advantage and kept in order. Nothing so depresses a boy and disgusts him with gardening and farming as to be compelled to use dull and unsuitable tools.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Hair Remedies.

Civilization is responsible for bald heads. There may be diseases of the hairy scalp among savages, and others who never wear any head covering, but I do not remember to have seen any account of them.

Certainly, savages shave the hair from their heads, for what we call "cosmetic effect," or perhaps for fear it may fall out from diseases.

But such diseases as fevers, which result in loss of hair, are not very common among them as long as they are free from the vices and restraints of civilization.

We can therefore say that baldness is one of the ills which has come with social development.

Dandruff often causes baldness and means an excessive supply of the oily, greasy substance provided by the sebaceous glands to keep the hair smooth and soft under normal conditions.

When it is very abundant in the form of dry scales, or small oily lumps, it loosens the attachment of the root of the hair to its follicle, and the hair falls out or may be easily pulled out.

If there is an insufficiency of this same oily material, the hair becomes dry and brittle and breaks or splits off.

There are numerous diseases of the scalp in which the hair is lost.

When these diseases are cured, the hair will grow again in some cases, and in others it will not, its root structure having been destroyed.

The treatment of these diseases is an important branch of dermatology, and includes the treatment of baldness and diseased structure of the hair and its surrounding tissues.

Some of the preparations which have been advertised and used as hair remedies, have stood the test of years, and this is not an unimportant test in determining their valde.

If, after using such a preparation a few weeks, the hair gets longer and thicker or grows where it previously was absent, and if dandruff disappears, it is fair to say the preparation used had something to do with it.

Fashions in hair remedies change, like fashions in clothes. A few years ago, pomades and oils for the hair were popular, and oiled and scented ringlets were marks of beauty.

Such overdosing of the hair and surrounding tissues, probably caused much baldness, and perhaps that is why it was given up.

Hair that is dry and brittle needs oil; hair that is normal does not. Hair that is greasy from too much sebaceous matter, needs an astringent to dry up the excessive secretion.

Simple, diluted alcohol or bay rum will do this as well as expensive lotions and tonics.

If the hair has fallen out, and the root structure is not dead, stimulant substances, like cantharides or mustard or nux vomica, will often start a new growth and hair tonics containing these substances may be useful.

If the matrix and the sebaceous glands connected with the hair structures are dead, no tonic will revive them.

The treating of the hair, even by those who are skilled, is therefore in many cases a matter of experiment and it is wiser to get the opinion of a dermatologist as to what may be useful, than to depend upon one's own opinion or the recommendation of friends.

A. D.—Answer—This growth which you refer to, is called a "poly-pus," and is often accompanied by hemorrhage. I would advise you to go to a specialist in the diseases of women and have it removed. Usually the operation is not a difficult one.

A Vital Necessity In Peace or War

THE operations of Hydro-Electric and Public Utility Companies are a vital necessity to the industrial and social welfare of Canada, and are as essential in times of peace as in war.

This is one of the reasons we recommend the Bonds of well-managed Hydro-Electric and Public Utility Companies serving growing communities.

Send for list of Hydro-Electric and Public Utility Bonds yielding 6% to 8%.

MOTHER-WISDOM

How Careless We Have Been With Our School Housekeeping!

By Helen Johnson Keyes

It is foolish to pay taxes to educate our children, if at the same time and in the same place we weaken them and make them unhealthy so that they can not use to the fullest degree the education they receive. That is like trying to fill a bucket which leaks. If we try to fill up our community with the most usefully educated boys and girls, so that the next generation of farmers and farmers' wives will be the very best kind, and yet we leave a leaking hole in our schools, through which boys and girls slip out, because they are ill, shall we ever succeed in getting our communities full to the very brim with strong, efficient workers?

The leak in our school bucket is bad school housekeeping. There is just one way to mend the hole—employ people to keep our schoolhouses clean. It is less expensive than the waste of pouring education into children who are never going to be strong and many of whom will die, unnecessarily.

Count up the number of hours your children spend in school. It amounts to about twelve hundred hours annually. Almost half of their waking life for six or eight years—and longer than that if they continue beyond the elementary grades—are spent in whatever atmosphere and conditions the school offers. Yet how careless we have been of school housekeeping! The farm woman whose house shines from attic to cellar and from kitchen to parlor has yet sent her children to schools which received only a yearly cleaning!

Do They Still Use The Dangerous Roller Towel?

The injury to health is due to dust breathed into the lungs. Dust is of two kinds: organic dust, that which is thrown off by human beings and all animal life; and inorganic or mineral dust.

Organic dust is the kind which carries germs; but we are finding out that disease is only occasionally conveyed by the air, so that the part which this form of dust plays in illness is no longer considered to be very great. It is inorganic, mineral dust, when this becomes sharp and gritty, which is our real danger.

Dust of this kind is blown in at the windows and is brought in on the feet of the children and ground up into small particles upon the floors. Then when it is stirred up and mixed with the air it is breathed in, and it cuts and scratches the breathing passages and lungs, leaving upon them rough surfaces which are just what germs breed on. Colds, tuberculosis and many of the children's diseases thus find an opportunity to develop. Blackboards, chalks and slates also scatter these tiny, blade-like particles all around the rooms.

Windows must be open and dust fly in through them. Children must walk to school and—until we are as polite as the Japanese and leave our shoes outside—bring in the dirt upon their feet. Blackboards and chalk are almost necessary for school work. So what shall we do about it?

There is just one answer: We must employ some one to sweep the schoolhouse every afternoon when school is dismissed and to dust it in the mornings before the pupils arrive. The teacher is certainly not the person of whom this labor should be expected. Almost every community is able to furnish a strong girl or woman who will take pride in performing this health service faithfully and well for a suitable wage. Until this expense can be arranged for as a part of the school tax, all the parents represented in the school should share it among themselves.

Not all sweeping and dusting get rid of the dirt. The old-fashioned kind performed with a straw broom upon a dry surface, and a feather duster, merely sets it flying to alight in new places. Sweeping should be done with a bristle brush and the floors covered with wet sawdust, wet paper torn into bits, tea leaves, or other damp substance to which the dislodged dirt will cling and which can then be burned. A still better brush is the kind whose bristles are slowly fed from a little tank of kerosene (coal-oil). Very little dust can escape this weapon. A vacuum cleaner is by all means the most thorough cleaner there is, as will be seen when one is passed over a surface which is supposed to have been well cleaned already and yet picks up a generous and dangerous quantity of dirt.

The dusting of school furniture must be done with a damp or an oiled cloth. Dry dusting is merely a dancing party for the dirt!

Slates have been done away with in most schools, because doctors have shown us how harmful is the sharp, gritty dust which crumbles from them, when it is breathed into the lungs. The ordinary plaster-of-Paris chalk is also injurious and should be replaced by what is called the dustless crayon. It is not quite dustless but is an improvement upon chalk. Still better is it to substitute for a blackboard a paper roll known as a manuscroll. One thousand feet of paper four feet wide revolves in a large, standing frame upon rollers turned by knobs.

Play and gymnastics should take place out of doors whenever possible, for the fact stir up the dust which we wish to have lie quietly until the afternoon cleaning gets rid of it. When it is necessary to have recess and exercise indoors, the windows should be wide open.

If the schoolroom is cleaned every day and dusty implements are no longer used, not enough dirt will be created during the daily session to do any harm, provided the room is continually fed by fresh air from a window open at the bottom and drained of the old air by a window open at the top, or by some good patent ventilating device.

However, it must be kept in mind clearly that ventilation without cleanliness is not sufficient. A well-ventilated but dirty country schoolhouse has been found to contain more dust per cubic foot than a city living-room which is clean. As the city, of course, is far more dusty than the country, this shows the value of brush and cloth and reminds us, as so many conditions remind us, that the natural advantages offered by the country in the way of health must yet be added to by eternal human care and precautions.

Help your boy to be a prize winner this year in some line—pigs, sheep, corn, or something good. His whole life will be stronger for it.

Horse Sense

The Horse's Collar.

When fitting a horse with a collar, the animal should be standing in a natural position on level ground, with his head held at the height maintained while at work. The collar when buckled should fit snugly to the side of the neck, and its face should follow closely and be in even contact with the surface of the shoulders, from the top of the withers to the region of his throat. At the throat there should be enough room for a man's hand to be inserted inside the collar.

The style of horse collars are created mostly by the use of different materials in their construction. Such materials as heavy duck, ticking, and leather are used either alone or in various combinations.

All-metal collars may also be bought. The stuffing used in horse collars is coarse material, such as rye straw, curled hair, and cotton fibre.

The all-leather collar stuffed with seasoned rye straw, with a layer of curled-hair in the facing, is a satisfactory kind. The cost is somewhat greater than on the collar made wholly of duck or ticking with cheaper stuffing, but the service given by this collar is usually so far ahead of the latter that the all-leather collar proves to be the cheapest in the end.

The collar selected should be examined carefully every time it is going to be used. All dirt and sweat found on the face of the collar should be cleaned off and the surface which comes into actual contact with the neck and shoulder should always be smooth and hard.

In order to prevent galls and more serious conditions, it is not enough to give careful attention to the selection of the collar. The shoulder of the horse should always be washed and given special care when the animal is at heavy work. If the selection of the collar has been properly made and all of the other things in regard to this piece of harness looked after, the care of the animal's shoulder is a simple process.

Under these conditions washing the shoulder with soap and pure water, after the harness has been removed at the end of a day's work, and thoroughly drying the parts by rubbing them with clean cloths is all that is necessary.

The colt that is being broken to work in the spring should be stared in on light draft while the weather is still cool, so that his shoulders as well as the rest of his body may be toughened and put in good working condition before the hot summer weather.

Other common causes for diseased neck and shoulders on a horse where preventive measures should also be applied are implements with excessive tough weights or excessive movements in the tongue when the implement is being drawn, side draft of free-going animal hitched to a slow or lazy one, walking on a ridge or furrow that is too narrow, which may cause the animal to slip constantly or side-step, and in this way injure his shoulder. In addition to this the neck and shoulder are exposed to the usual mechanical or accidental injuries.

SMOKE TUCKETT'S
T&B PLUG

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Willie saw this funny sign,
And thought it very silly,
Until he folded it and found
The letters stood for WILLIE.

WOOL

Farmers who ship their wool direct to us get better prices than farmers who sell to the general store.

ASK ANY FARMER! who has sold his wool both ways, and note what he says—or, better still, write us for our prices; they will show you how much you lose by selling to the General Store.

We pay the highest prices of any firm in the country and are the largest wool dealers in Canada. Payment is remitted the same day wool is received. Ship us your wool parcel—you will be more than pleased if you do, and are assured of a square deal from us.

H. V. ANDREWS
13 CHURCH ST., TORONTO

The Paisley Advocate

PAISLEY, JUNE 5th, 1918

—The selection of Dr. J. H. Cody, of Toronto, as Minister of Education in the Hearst cabinet is hailed generally as a good appointment. Dr. Cody brings to the administration of the department splendid qualifications. Ontario is his native province; he received his education there in Ralph Connor fashion, he received his early education at Gait, graduating from the collegiate institute, he attended Toronto University where he had a brilliant career. He then went to Ridley College as classical master; three years later he went to St. John's College, and later was manager of the publishing and educational business of Rowsell & Hutchison. He studied at Oxford University. He studied at one of the universities of Scotland. He was at St. Mary's College, N.Y. Dr. Cody became curate of St. Paul's in 1896 and was made rector in 1903. In 1910 he was created canon, and archdeacon of York in 1912. He was elected Bishop of Nova Scotia but declined the preferment. It will be seen that Dr. Cody brings to the service of the province through the Department of Education a scholarship, wide experience as a teacher and rare gifts as a speaker. Since the war broke out few men in Ontario have taken a more active and outstanding part in patriotic work, particularly among the soldiers. Discussing his probable line of action, he said: "I am not starting off with any long or elaborate programme. I am starting in at once to try and master the details of the Department and to study the problems faced on the inside from the departmental standpoint, and I hope to give a fair amount of attention to the outside as well. I want to take various trips out into the province to come in contact with the general public, the trustees particularly, and also the teachers. One of my first steps would be to let the teachers realize that the head of the Department is a fellow-teacher, in close sympathy with them and earnestly desirous in every possible way to hearten them in their high and responsible calling. I regard the educational machinery of the province as a means to an end and not the end itself."

WHERE TO REGISTER ON JUNE 22ND

Saturday, June 22nd, is the day for registration of the human power of this Dominion. The presence of every person, male or female, from the ages of 16 years and upwards, is required at some registration booth within the electoral district in which they reside, to answer the prescribed questions. Following are the registration booths for South Bruce in the locality:

Paisley—Polling subdivision No. 1, Town Hall; No. 2, David Bell's shoe shop.

Elderslie—No. 1, McDonald's school house, S. S. No. 12; 2, Union school house, 3, school house north 1; 3, Smith's school house, S. S. No. 7; 4, Township Hall, Gillies Hill.

Bruce—No. 1, School house, S. S. No. 1; 2, school house, S. S. No. 3; 3, school house, S. S. No. 12; 4, Public Library, Cargill; 5, school house, S. S. No. 7; 6, school house, S. S. No. 17; 7, school house S. S. No. 10; 8, union school house, Elmwood; 9, school house, S. S. No. 4.

GREENOCK COUNCIL

McNab's Hotel, Chepstow, May 27, 1918.

Council met as per adjournment as a Court of Revision; all the members present, the reeve in the chair, and after taking oath of office and oath of said court, disposed of appeals as follows: Thos. York, town plot property, Paisley, assessment reduced $100; D. A. Comrie, Riversdale property and lot 11, S. D. R., assessment sustained; Jas. Cunningham, lot 27, con. 8, assessment reduced $100; trustees of public S. S. No. 3, against the withdrawal of lots west half 1 and 2, con. 4, and lots 11, west half 6 and 11, con. 5, from No. 3; S. A. Lot 16, con. 2, was held as public S. S. No. 3, as required notice of withdrawal was not sent to the clerk. Chas. Baechler against Tas. Fish, requiring assessment of dogs. No action taken, as appeal was entered too late. Witnesses, appeal against second dog which was killed shortly after assessment. Orr dog struck off. Thos. H. Purdy, appeal against the assessment of the several school teachers on salary, assessments were struck off. Wm. Ostrem, assessed for Alex Ostrem; assessment of lots 18 and 19, con. 1, changed from W. D. Cargill to F. A. Zeisler; Dan Cassidy placed as tenant on Mrs. Kemple's property, Riversdale; assessment of north half lot 16, con. 12, changed to Geo. Moffatt; Jos. Dettrisbe, Augustine Cassidy and Jerome Cassidy were placed on roll as farmers' sons.

Symon—Gilchrist—That the clerk be instructed to change the assessment roll in accordance with the decisions of this court, and that the reeve and clerk be instructed to sign the roll as the revised and corrected assessment roll of the township of Greenock for the year 1918, and that this court do now adjourn sine die.—Carried.

Council met at adjournment of Court of Revision. Minutes of last meeting were read and adopted.

The following accounts being found correct, were ordered paid: John J. Cassidy, bal. salary as assessor, $30, postage, etc., $1.85; John A. Forsythe, repairing, $ 75. S. D. & J. Wm. Coleman and J. Meaney, bal. expense of delegation to Ottawa, $11.60; M. McNab, room for meeting, $5, and special meeting April 3rd, $5.—Carried.

Symon—Gilchrist—That By-laws No. 573 and 573 be now read a second and third time and finally passed, being read distinctly and unanimously.—Carried.

By-laws duly read and finally passed.

A communication was read from the manager of the Royal Bank, advising the council that banks are to discontinue accepting taxes after July 1st, 1918.

A communication was received from the municipal council of the township of Pickering asking Greenock council to consider an enclosed resolution.

Gilchrist—Symon—That whereas the Dominion Government, their commissions, food and other controllers in the passing of legislation, in the regulating or in dealing the prices of commodities, advise and consult with the experts of the respective industries to be affected, therefore it is considered that the farmers be forthwith equipped with the ablest experts in every branch of their industry in order to aid the Government, their commissions and or controllers, in carrying out their necessary war time legislation or regulations. Be it therefore resolved that this council approve of the holding of a convention at some centrally located point in the province of Ontario of representatives from all the councils of the rural municipalities, adequately representing the farming community, for the purpose of discussing and, if deemed advisable, of creating an organization that will have at its disposal the ablest men possible, whose duty it will be to protect the interests of the farmers in all matters affecting them, whether it be legislation, transportation, arbitrary fixing of prices or otherwise; also to aid all legitimate farmers' organizations in all their aims; that the cost of such organization and its undertakings could well be apportioned among the various municipalities of the province according to their respective assessments; and it is suggested that such organization might be composed of the president of all legitimate farmers' organizations in the province and of one representative from each rural municipality, to be appointed annually by the council of each thereof.—Carried.

Symon—Campbell—That this council do now adjourn to meet at Riversdale on Monday, the 8th day of June, for the transaction of general business.—Carried.

Women, Prepare!

Thousands of women in Canada have overcome their sufferings, and have been cured of woman's ills by Dr. Pierce's Favorite Prescription. This temperance medicine, though started nearly half a century ago, sells most widely to-day. It can now be had in tablet form as well as liquid, and every woman who suffers from backache, headache, nervousness, should take this "Prescription" of Dr. Pierce's. It is prepared from nature's roots and herbs and does not contain a particle of alcohol or any narcotic. It's not a secret prescription for its ingredients are printed on wrapper. Send 10c for trial package to Dr. V. M. Pierce, Surgical Institute, Buffalo, N. Y., or Bridgeburg, Ont.

Hamilton, Ont.—"When I reached the critical period I was a nervous wreck and suffered with hot flashes and dizzy spells. 'Favorite Prescription' relieved me of all these ailments and brought me through this trying time safely. For women of middle age there is no tonic equal to Dr. Pierce's Favorite Prescription, and I never hesitate to recommend it to my friends."—Mrs. Annie Soules, 41 Hess St. N.

Stratford, Ont.—"I was greatly benefited by taking Dr. Pierce's Favorite Prescription; it was before twins came. I had become all run-down, was nauseated, very nervous and weak, and suffered with backache. Was not able to do anything for three months, when I began taking 'Favorite Prescription.' It soon gave me relief and it was not long when I was strong and healthy. 'Favorite Prescription' was surely a great help to me and I am glad to recommend it."—Mrs. L. J. Mantle, 61 Kent Lane.

WALKERTON

While in Owen Sound Tuesday, on his return from a trip to Manitoulin Island, Mr. Hank Irwin stepped onto an old board from which rusty nails were protruding, one of which punctured his shoe and penetrated deeply into his foot, anchoring him fast to the plank. The local horseman, however, did not stay long put out, for gritting his teeth, he painfully drew up his leg, and with something between a moan and a cheer, succeeded in freeing it from the timber. With a nail hole in his shoe, Hank arrived in Walkerton, and limping out of his car, looked like a casualty from the Red Cross wagon who had tried to kick the insides out of a German bomb, and had got shell shocked.

Mr. Malcolm McCallum, clerk of Brant township, is coming in for some hard knocking in some quarters and for some florid praise in others, for the stand he took at the recent North Brant Farmers' Club meeting at Malcolm, when he arose and stoutly opposed the protest the gathering was making at the Government's new order-in-council "conscripting farmers' sons" along with others of the 20-22-year-old class. Mr. McCallum, who has been a lifelong Liberal, took the stand that farmers had as much right as others to go out and fight for their homes, and in answer to some heckling from the crowd as to why he didn't go, declared that when his class was called he would be right in the vanguard with the khaki.

The Attorney General's Dept. of Ontario has requested Judge Klein to arrange with the legal profession, if possible, to have no jury trials at the coming sessions. It means saving forty-eight men from being drawn from Hanover next week, and as most of the jurors are farmers, this will leave the men during the summer on the land and not interfere with production at a time when help is already scarce. This course would also entail a big saving of expense for the country, for while juries are supposed to be free from prejudice they are not exactly free from cost. In a war time measure this is good, and no doubt most of the legal profession will comply with the request and have their cases tried by the judge.

Pte. Jack Anderson, of Cargill, formerly of the American Rattan factory here, and who was invalided home after being severely wounded at the front, laid an information last week before Magistrate Tolton against a reverend gentleman from Paisley, who he charged with making insulting remarks to him regarding his khaki clothes at the G.T.R. station, Walkerton, on May 21st. The case was set for hearing before Magistrate Tolton at Walkerton on Saturday last, but rather than have the matter aired in court the minister came down in the meantime with Anderson to Walkerton and settled by paying all costs of the action, together with Anderson's expenses to town, and the latter in turn withdrew the charge and, as it were, dropped the curtain on the affair.—Herald and Times.

D. D. CAMPBELL, Teacher

THE LATE PTE. JAS. McGILLIVRAY

Mr. Hector McGillivray, 12th Bruce, received a letter from a nurse in St. John's Ambulance Brigade Hospital in France, dated April 18th, giving some particulars of the death of his son, whose photo appears above. The deceased was brought to the hospital on April 15th, suffering from a very bad attack of pneumonia, and all that could be done was of no effect, his death occurring on April 16th. Before he became delirious he told the nurse about his home and friends. He was buried in the little cemetery at Etaples with full military honors.

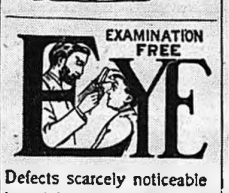
Found New HEALTH

Of greater value than gold and silver is health. Mr. Pye, in the leading district of Keewatin, Ont., 20 miles Continuous discovered something—that the high words of praise given to Gin Pills are true. Here is his story, in part.

"I had heard of your

Gin Pills FOR THE KIDNEYS

and decided to give them a trial at once, as I had been suffering for some time with my kidneys and urine. I sent my cheque out to get them (about 60 miles) and I am pleased to inform you that in less than 6 days I felt rather. In two days the pain had left me altogether. To-day I feel as well as ever. I did send my kidneys are acting quite naturally." (Full testimonial sent on request together with FREE SAMPLE of Gin Pills.)



All dealers sell Gin Pills on our Money Back Guarantee, 50c a box, 6 boxes for $2.50.

SINCLAIR'S HARDWARE

Canada's Registration

Its Purpose and Application

CANADA faces the gravest crisis in her history. Four years of war have taken from the Dominion a heavy toll in talent and labor, yet despite the shortage of man power, our Allies still depend on Canada to maintain her own fighting forces at full strength and to increase her exports of food and war materials, so vital to them, and to the successful prosecution of the war.

Every ounce by which Canada can increase her food production and every ounce Canada can save in her food consumption is needed for export to the Allies.

Should the war continue for another year, food cards and a rationing system may have to be instituted. It is the duty of Canada to be prepared for whatever situation circumstances may force upon her.

It is quite probable that before the war is won our Government may have to place restrictions upon the occupations in which men and women may engage. In such an event the Government wishes to be in a position to render all possible assistance in keeping our population usefully and profitably employed.

Registration Day, June 22nd

These conditions point to the necessity of Canada knowing the exact capabilities of her men and women at home.

All persons residing in Canada, male or female, British or alien of 16 years and over, will be required to register on June 22nd and truthfully answer the questions set forth upon the registration card.

It is not the Government's intention to conscript labour in any form, but to assist in directing it wisely, so that every available unit of human energy may be utilized to the best advantage.

The information procured through registration will be used—as an aid to the Military Authorities in providing the necessary to maintain "Canada's First Line of Defence"—to mobilize all units of available labor in the Dominion and direct them from less essential to more essential occupations—to establish and intelligently administer a system of food rationing should that become necessary.

21

THE COOLEST DEED OF THE WAR

ASTOUNDING STORY OF NERVE AND RESOURCE.

By a Man Imprisoned Fathoms Deep in a Sunken British Submarine.

The most amazing story of this amazing war has just been told. It is a tale of stark courage and dour clear-headedness in the face of the grimmest ordeal, by a stoker in a British submarine sunken fathoms deep, and it has been related by a writer who has obviously gleaned his facts from official news. In point of fact, the story is well known in naval circles, though it has never been published in detail before. No writer could do justice to this tale so convincingly as the hero himself, a stoker petty-officer (the sole survivor), whose highly „technical, matter-of-fact report needs no journalistic emphasis.

His First Impulse.

"At 10.30 a.m. on Tuesday," he states, "something was heard to come in contact with the boat forward, twice in quick succession. . . . I proceeded forward to ascertain the position of the leak. Finding no leak above the battery-board, I came to the conclusion that she was holed low down. My first impulse was to close the lower conning-tower hatch, and get a pressure in the boat, but the man were then going up the conning tower in the hope of escape. I put on a lifebelt, and closed the valve on the air-trunk through the engine-room bulkhead, as at this time I thought I would have to use the engine-room as a way of escape.

"I then returned to try to close the lower conning-tower hatch, but before I reached it water began to come down through it and the engine-room bulkhead scupper, so I shouted to the hands forward to come aft to the engine-room. There was no response. . . ."

All hands were dead except this cool-headed, iron-nerved stoker petty-officer, who had not the slightest intention of making the same finish. He was an engineer who knew every nut, bolt, and gadget of his boat, and he had a mind infinitely fertile in resource. His explanation of what he did is highly technical in spots, and bristling with conscientious details. It makes it difficult to realise that he was laboring for his life in flooded submarine at the bottom of the North Sea, with a crew of dead men and no more than one chance in a thousand of survival.

Juggling With Death.

"It was impossible for me to leave the engine-room door," he goes on to explain, "as it would have closed behind me, and would have been impossible to open again, owing to increase of pressure in the flooding compartment. I remained there, still hoping that some of the men might come aft, until the water rose to eighteen inches above the sill of the door, and chlorine gas began to come through from the middship compartment. I was then reluctantly forced to close the door, and proceeded to unscrew the clips of the torpedo-hatch above me as the only hope of escape through the deck. At this juncture the engine-room was in complete darkness, with the exception of the port pilot lamp.

"The water was slowly rising in the engine-room thro. . . the voice pipes, which I had left open to relieve excessive pressure on the bulkheads. The heat at this time was excessive, and therefore I rested a while, and considered the best means of flooding the engine-room."

A Great Ordeal.

This captive, penned like a rat in a trap, tried one expedient after another, each one failing him in turn—a refractory torpedo-hatch, impossible caps and traps, nuts that refused to budge—and yet he was undismayed and stubbornly resolute, splashing in the gloom to a place where he could "consider the problem once more." He returned to the hatch, crawling on top of the engines, in order to struggle with the exhaust and induction valves, using a steamer for a tool. This he had thoughtfully picked up in the engine-room before it was flooded. Hammering away at the fastenings, he knocked out one pin, but was unable to remove the other. He then dived under water and eased the wheel of the gearing, which sounds like a ticklish bit of work in itself, and bobbed up again to find that he could now drive out the remaining pin.

"I have always held the theory," he says, "that the pressure in a sunken, air-locked vessel can be greater than the external pressure, the deciding factors being the weight and shape of the sunken hull. I now discovered that the boat was flooding very slowly, and as a last resource I decided to open the scupper in the engine-room bulkhead. I anticipated chlorine gas generating from this water, which proved to be the case. Also, as the water came in, the air was escaping through the hatch. So I tried three times to open the hatch, and succeeded in raising it about half-way, but the air rushed out, and the hatch fell down again. So then I dived down, and retrieved the clip-bolts, and shipped two of them, and tightly secured them to the end of the dogs, the idea being to get sufficient pressure in the boat, then knock the bolts away, hoping to be blown out by the pressure.

Blew Himself Out.

"I then proceeded to put this idea into execution. The hatch flew open, but there was not enough pressure to blow me out, nor yet time for me to escape before the hatch came down again. I tried once more to lift the hatch with my shoulder, but it descended upon my hand. I managed to raise the hatch and free my hand, which was quite badly smashed. I now concluded that it was impossible to attempt to blow myself out by means of internal pressure.

"I allowed the engine-room to flood until the water was up to the coaming of the hatch. I then raised up the hatch and escaped, rising to the surface, and being picked up by H.M.S. P. . . ."

* * * *

This indomitable stoker petty-officer floated out through the square hatch-opening, after letting the compartment fill to the roof, and was picked up unconscious. The comment of the officer commanding the flotilla sums up one of the most wonderful feats in the whole story of submarine warfare:

"Although the man was fighting for his life, it is a wonderful example of unfaltering courage and perseverance, and of refusing to acknowledge defeat. He was by himself, in almost complete darkness, receiving electric shocks, and towards the end, suffering from the effects of chlorine gas and a crushed hand; and yet, in spite of continual disappointments, he worked on for nearly two hours, keeping his head to the last; and at the seventh attempt at opening the hatch he succeeded, and escaped."

The Captain's Garden.

His garden blooms as it was wont to bloom
These many springs,
And still, amid the larkspur and the broom,
A linnet sings.

But he will never plant and tend again
These borders trim,
To comfort through the sunshine or the rain
Our grief for him.

And yet his presence seems so warm and near
This quiet place,
That we who loved him feel less lonely here
A little space.

As if there brooded on each budding flower
His tenderness,
As if his spirit o'er each bird filled bower
Bent down to bless.

Prayer For Courage.

Why should I long for what I know
Can never be revealed to me?
I only pray that I may grow
As sure and bravely as a tree.

I do not ask why tireless grief
Remains or why all beauty flies;
I only crave the blind relief
Of branches groping toward the skies.

Let me bring every seed to fruit,
Sharing, whatever comes to pass,
The strong persistence of the root,
The patient courage of the grass.

Heartened by every source of earth
I shall not mind the wounds and scars,
Feeling the solid strength of earth,
The bright conviction of the stars.

Scotch Officer, His Report.

A Scotch colonel tells an amusing story wherein the chief figure was a young subaltern of his own nationality. The latter was one day on guard with another officer at Gibraltar, when the other fell off a precipice and was killed. The subaltern, however, made no mention of the accident in his guard report, but left the addendum, "Nothing extraordinary since guard mounting," standing without qualification. Some hours afterward the General came to demand explanations.

"You say, sir, in your report, 'Nothing extraordinary since guard mounting,' when your fellow officer has fallen down a rocky precipice 400 feet deep and has been killed!"

"General," replied Lieut. Sandy, slowly, "I dinna think there's anything extraordinary in that. If he had faun doon a precipice 400 feet deep and not been killed, I should ha' thocht it extraordinary, and put it doon in ma reesport."

The Function of Marrow.

A writer in the London Lancet suggests that marrow has a twofold function, not only to nourish the bone, but to supply a most important internal secretion. As bearing this out, he cites the mortality of 26 per cent. in "primary" cases of amputation high up the thigh when the patient is in the prime of life, with "secondary" cases in which the mortality is only 60 per cent. In the secondary cases, where a diseased condition has existed for some time, there is less shock, according to the writer, because the system has become gradually accustomed to getting along without the marrow in the thigh bone, which contains one-sixth of the total amount in all the bones.

Winning the war rests in part on the food loyalty and food sacrifice of the people.

THE SPIRIT OF THE FRENCH PEOPLE

IDEA OF SURRENDER IS ALIEN TO THEIR SOUL.

Every Soldier Willing to go to Certain Death Because Life is Dedicated to Country.

Two years ago the world was told that the French nation was tired of the war. A year ago Canada was told that the French nation was bled white; that it could hold up its end in the great war only a short time longer and that unless powerful reinforcements were sent to the battle front and new spirit injected into the French the war would end with Germany the conquerer, says a war correspondent.

I have been fortunate enough to see a great deal of the French people and the French soldiers during the last few months and I think I understand why France has been able to bear the brunt of the war and why France will continue to hold her place in the very front line until the Hun is defeated.

Surrender is a word as foreign to the vocabulary of the French polu as it was to the Old Guard of Napoleon. The spirit of surrender is as alien to the soul of France as it was to the life of ancient Greece. France knows that Germany will be defeated. She has never doubted it. She was just as confident when the Hun was slaughtering hundreds of thousands of his own men and soldiers of France as she is to-day when her line has been extended to the north to be prepared for any new onslaught the German may undertake.

As for fighting, the world does not need to be told of the fighting qualities of the French. Neither does the Hun. I have seen German prisoners freshly captured who say that Germany has been astounded at the vigor of the French; that the army authorities are vexed almost to the point of hysteria over the constant appearance of the French when the Hun feels he is just on the threshold of victory.

Willing to Face Certain Death.

You can't find a single Frenchman who is not willing to go to certain death any time, because he believes his life belongs to France and that France is living for generations to come. Before the French went into the great battle which raged for weeks on the Somme and on the plains of Picardy they had learned a special prayer. They don't know who wrote it. But they all know it. This is it:

"Men who, serving France in the exuberance and joy of youth; men who believe in human equality; men who vision idealism and justice and strive to bring it about; men who now rest in the grave—we salute you!

"You gave your all courageously to repulse an evil that was thrust upon our France, your very all, your life of peace at home, your hopes and your dreams. You did all this before us. And now since this monster evil demands more blood, more life, more of France's strength, we take your places asking when will those living be permitted to live. When will right return to the earth? We know not, but we do know and here promise you that you have not died in vain, that your sacrifice was not an empty thing, and that we and those coming after us are ready to pay the price of ransom for the future of your sons and ours and to come in succession after us. This we promise you, dead comrades in the name of France in the name of Christ. Amen!"

That simple prayer—on the lips of nearly every soldier who took his place in the battle line in latter March—furnishes the key to the French character as exemplified by this war. The Frenchman is fighting for the future. He is fighting for the comrades who have already died. He is fighting to drive out what he regards as the evil monster of all time. It is not exaggeration to say that the French is the master soldier of the war. No one denies it. The Hun is not in his class. The British, possessing as he does, every quality of the stern fighter, has not had the generations of training of the French; the American is just beginning to show what he has in him.

Long Hours Without Sleep.

Just after the Hun had begun his gigantic sweep against the French and British lines on March 21 I saw hundreds of miles of French trucks, supply wagons, artillery and every other paraphernalia of war trailing from all directions to the point where danger lay. I saw French camion drivers who had not had a wink of sleep for forty hours; teamsters who had been sitting exposed to the rain for two days and nights, going about their task just as cheerfully as if they were on a holiday. They were going to help France. France needed them.

In an officers' club in a certain part of France there was an orchestra composed of French soldiers who were on what was called an easy sector. They had been working hard for months. A tango singer also, who is well known in all the cities of France, sang usually every evening, clad in his rough private's uniform. But one evening the orchestra and the singers were gone. So were the waiters. Girls had taken their places.

"What has become of the musicians?" I asked the manager, a crippled French captain.

"Gone north."

And so they had. They left in the night. Several of them will never come back. They knew death awaited, but they were in a hurry to go just the same. At a small railway junction hundred of poilus appeared the first two days of the big offensive. They were on their way North too. I asked the French station master about them.

"They are on leave," he said, "but they think they ought to go to their regiments now that the big battle is started, and they are all going before their leaves are over."

Nation Tuned Up For War.

How such a spirit could survive after a nation has for nearly four years gone through what France has gone through is not easy for one to understand until he has an insight into the French character. The nation is tuned up to war. Its entire energy is focussed on war. Nothing else is thought of. Not a wheel turns in the entire country except to make something which is needed for war. In all France there is not a single pleasure automobile. There is no gayety. The civil population is subjecting itself to hardships which it hopes are just as trying as those of the men who are bearing arms.

If the war ends this year France will be happy. If the war continues five years France will still be giving the same demonstration of self-sacrifice and loyalty she has been giving for the last three years and a half. It is only the short sighted who believe the reports which one time were prevalent—that France was ready to quit—that she was wearied to the point of surrender. France is just as virile to-day as she ever was. She is ready to-day to make the same sacrifices she made at the Marne, the Somme and Verdun, but she knows she will never have to do so.

You might drive or walk for two hundred miles through any part of France and you would not see a single civilian except elderly men, boys, invalids or cripples. Every able man is in the army. Still the farms look promising in the spring sunshine. Not a foot of soil is being neglected. The "old folks" who had finished their life's toil and settled down in their little village home to watch their grandchildren grow up have put on the yoke again.

BREAD WITHOUT FLOUR.

Process Used in France to Change Wheat Directly Into Dough.

In France bread has been made without flour in a machine that transforms the wheat directly into dough. This machine has a large screw turning loosely in a case on the inner surface of which is a screw thread running in an opposite direction. Between the main threads on the cylinder are smaller threads, and the depth of the groove becomes progressively smaller from one end to the other, so that it will hold the entire wheat grain as it enters the machine, at the same time accommodating only the pulverised wheat at the exit.

The wheat is prepared by a thorough washing, after which operation about a pint of tepid water to a pound of grain is added, the whole mixture being allowed to stand for some six hours. Then the grains of wheat have swollen to twice their ordinary size. The mixture is then treated with yeast and salt and is poured into the machine. It falls between the threads of the moving screw, which simultaneously crush the envelop and body of the grain, making of them a homogeneous mixture that forms a smooth paste.

Bread made by this process contains a succession of holes whose size increases as they approach the crust, which is thin. The odor given off is said to be most agreeable.

An Idea Worth Trying

Not long ago, says the Milwaukee Journal, Prof. W. E. Ringle, a naturalist of Pittsburg, Kansas, discovered in a Kansas creek a bladderwort, a plant that is usually found in more northern streams. He took it to his laboratory and placed it in a jar that contained several thousand very small tadpoles, in order to aerate the water and do away with the necessity of changing it so often.

The tadpoles quickly began to disappear in a mysterious manner. An investigation resulted in the surprising discovery that the small balloons on the plant were traps and tombs for the tadpoles. The plant had devoured them. If it would consume tadpoles, there is no reason why it should not devour "wiggle-tails," the larvae of the mosquito, the naturalist thinks. One way of ridding a community of mosquitoes, therefore, appears to be to propagate the bladderwort in pools and streams.

Savory stews provide an excellent means of using carrots, onions, turnips and potatoes.

Potatoes give you the salts you need to build and renew all parts of the body.

Doctors say that the tired-out feeling—"spring fever"—often comes from a lack of fruits and vegetables.

Do not neglect double simples, both the tall and dwarf varieties. Sow seeds now of the newer varieties in the open ground, and they will soon be in flower. The new simples are much handsomer than the old fashioned varieties.

An Invocation to Ireland.

Come, Erin, come!
Come clad in armor as a warrior-queen—
Come, sword in hand!
Come with the Springtime, wearing of the green!
Shine on the land
Like Hope embodied, strength made manifest—
Make thy true betterness of soul thy test,
And, sacrificing all,
Ascend the height from which thou shalt not fall!
Come, Erin, come!

Come, Erin, come!
Break from the traitor's hold, the bigot's chains,
Come, proud and free!
Be thine own noblest self, and win thy share
Of triumph that shall be
When War's black thundercloads have rolled away
And Right sheds Light upon the world's new Day.
Thou wilt not shame
Thy highest nature or thy holiest name!
Come, Erin, come!

Come, Erin, come!
Heed not the babbler's tongue, the rebel's lie—
Take thou thy place
With nations armed to conquer or to die!
Glory and grace
Be with thee in thy coming! 'Tis thine hour
Of loftiest destiny and immortal power—
Show thyself great
In pardon for old wrongs and stings of fate;
Come, Erin, come!

Come, Erin, come!
The heavens are all a-fire with watching eyes
Bent upon thee,
Waiting the splendor of thy golden rise,
Star of the zeal
Face thou the foe with all thy fighting sons,
And set thy Harp to thunder of the guns
In song sublime
Ringing thy fame unto the ends of Time!
Come, Erin, come!
—Marie Corelli.

THE PROPHET WITHOUT HONOR

An Amusing Story Regarding the King and Queen of Italy.

The Italian sovereign might well be called the Harun-el-Rashid of Italy, so diverting are the adventures that befall him when he appears unexpectedly in his own dominions. It is safe to say, writes the Rome correspondent of the Pall Mall Gazette, that if he came to the gates of a French city with the Queen in an automobile he would at once be recognized, although in his own Lucca he is not always.

The King and Queen Elena, the other day, having outdistanced another motor car with their suite, were brought to a standstill at the gate of Lucca by one of the octrol guards. To the question whether he had anything contraband, the King replied in the negative, but the guard was not satisfied, and pointed to the three small bags, and asked King Victor to open one.

"Impossible!" declared His Majesty, with an amused smile. "My wife's maid has the keys."

Meanwhile the chauffeur had shown signs of great uneasiness, making faces and gesticulating furiously to let the man understand whom he had to deal with; but the guard thought that the signs, together with the King's refusal, meant that there was smuggling going on. At last, losing patience, he turned to the chauffeur.

"Speak! speak!" he said angrily. "What are you making faces about? It will not prevent me from doing my duty! That valise must be opened before you leave!"

"Quite right," said the King, "but—"

The chauffeur, unable to contain himself any longer, sputtered:

"Fool, can't you see that it is the King?"

As they went on Queen Elena turned to the King.

"But, Victor," she said with a laugh, "if you had opened the bag they might really have seized that—"

But what the guards might have found was lost in the toot! toot! of the horn.

The Red-Headed Saint.

"Remember, farther, that you are merely the stewards of your own gifts and talents. They are not to be used for your own advantage, or the satisfaction of your own ambition, but for the glory of God and the service of humanity. Seek to serve your fellow men, to gladden their hearts, to rejoice with them, for there is nothing more beautiful than this. God has put you into the world to do a certain work for the advancement of His cause and the felicity of His creatures. He has supplied you with the health, strength, talent and gifts necessary for your appointed labor. Be fully assured of that. Strive, therefore, to accomplish that which Heaven expects of you, and great will be your reward."

The foregoing pious injunctions are taken from a sermon delivered by the Kaiser in the days of peace, upon the occasion of the confirmation of two of his sons. Truly a versatile Prince is this fiend of Mephistopheles.

BRITISH TANKS ARE SUPERIOR

ENEMY LAND SHIPS CAME OFF SECOND BEST.

New Fast Cruiser Type Rolled Up German Line in Recent Picardy Engagement.

German tanks which made their first appearance on the western front during the recent German offensive came off second best in their encounters with the more powerful and better managed British tanks, says a London correspondent.

Full accounts have just reached the British General Staff here of the first pitched battle between German and British tanks, in which a squadron of six German land ships was routed completely by the British. The battle occurred on April 24 near Villers-Bretonneux, south of the Somme in Picardy.

Six German tanks appeared in front of the British line shortly before noon and started to roll up the flanks of the British infantry positions. A call for help was sent to the nearest British tank camp and a squadron, including both "male" and "female" tanks shortly appeared on the scene. A rough and tumble combat ensued.

"Female" Tanks Outfought.

The British female tanks, which appeared first, were outfought, but the arrival of the heavier male tanks completely changed the situation and the Germans fled after receiving a bad beating.

Meanwhile the British had brought up seven of the new fast cruiser type, called "Whippet tanks," which debouched and attacked the enemy's infantry positions on a ridge, rolling up the German line from the north. It developed that this ridge was held by a line of machine gun posts, while beyond the crest a large German force was massing in the open for an attack. The Whippets ran from shell hole to shell hole, inflicting terrible casualties and completely disorganizing the enemy's preparations for attack.

These seven tanks, each with a full crew of twenty men, inflicted more than four hundred casualties on the enemy in this engagement, while the casualties on board the tanks were only five men. The tanks left their base shortly before noon and were back at their base again by 3 o'clock in the afternoon.

British Machine Success.

An officer of the General Staff, commenting on this engagement to the Associated Press, said:

"The British tank has justified itself. The Germans have adopted them, but there is yet no evidence that they have any larger number available. With the start which we have in tank construction we should be able to preserve our superiority without difficulty.

"The results of our employment of tanks are most encouraging in view of the man power question and we ought to derive still more benefit from them in the future."

On the Western Front.

Sons of Britain! Hold them in your grip of steel,
With the courage of the bulldog that has been thy nation's weal;
Stand fast in all thy glory on the bloodstained fields of France,
Let not defeat discourage, your victories they'll enhance.

Sons of Scotia! Hold them; we are watching from afar.
We have read of you at Ypres, we know just what you are;
Your blood you'll shed like water, asking nothing back;
But to do your share of fighting beneath the Union Jack.

Sons of Erin! Hold them; when there's fighting to be done,
You stay there in the thickest; you are there when victory's won.
Heed not the false calumnies that are heaped upon your head,
Emblazoned on the scrolls of fame, behold your honored dead.

O, hold on! Hold on! Ye gallant sons with your backs against the wall.
There's a land that knows your dire need and answers to the call.
Hold them! We are coming! 'Tis the hand of Justice strikes
From the glorious land of Liberty, beneath the Stars and Stripes!

A Poet's Prophecy.

(Written about 1850.)

For I dipt into the future, far as human eye could see,
Saw the Vision of the world, and all the wonder that would be;
Saw the heavens fill with commerce argosies of magic sails,
Pilots of the purple twilight, dropping down with cooly boles;
Heard the heavens fill with shouting, and there rained a ghastly dew
From the nation's airy navies grappling in the central blue;
Far along the world-wide whisper of the south wind rushing warm,
With the standards of the peoples plunging thro' the thunderstorm;
Till the war-drum throbb'd no longer, and the battle-flags were furled,
In the Parliament of man, the Federation of the world.
—From "Locksley Hall," by Alfred Tennyson.

CAVALRY COMES INTO ITS OWN

ONCE MORE BROUGHT INTO PLAY BY OPEN WARFARE.

Splendid Sight as They Came Charging Across the Field as in Days of Old.

Despite the many efforts of army officials of the Allied nations to have cavalry regiments changed into light and heavy artillery, because of their incompetence in trench warfare, the recent successes of cavalry commands attached to General Haig's army in checking the German offensive emphasizes the farther need of the mounted organizations in this and future wars.

The cavalry had made history long before all Europe had arrayed itself to suppress the common foe of democracy. During the present German offensive the cavalry got its long-desired wish to distinguish and to prove to the world once again that mounted men still constitute a force to be reckoned with and that the service is not a useless adjunct of the army.

Valuable in Present Offensive.

These mounted organizations have at no other time since the beginning of the great conflict been able to play such an important part in this war as they have during the great battles which have taken place on the western front recently. They have been stretched along the battle line, filling in gaps, strengthening the line and covering the retirement of the infantry. During the first three days of the Tecton drive the mounted men accomplished valuable work, fighting mostly on foot. Dismounted cavalrymen held the Ollezy-Ham line, where the fighting was terrific, while the infantrymen withdrew. One party of dragoons was cut off all night, during which they were cut in the open battling for their lives. Finally, they cut their way through the enemy's lines at Jussy by main force.

On the 22rd of March the cavalry came into its own. On the horses were brought forward and the troopers began a series of spectacular feats.

When Noyon was first threatened cavalry was sent to hold the line of the Oise west of the town. The British infantry was forced to fall back on the 26th, and the cavalry was pulled back also with the intention of occupying the ridge near the village of Porquerticourt, in the vicinity of Noyon.

Canadian Cavalry Assist.

The Germans were also aiming to get a foothold on this hill. A race developed between the horsemen and the enemy infantry across the rolling ground. Both reached the forest at about the same time, but the cavalry lost no time and rushed through the forest against the Germans. An intense battle at close quarters ensued and the cavalry was doing great execution when the order came for them to fall back in order to cover the retirement of the infantry, which had succumbed to pressure at other points. The mounted men withdrew from the wood and brought up the rear, pausing often to fight rearguard actions with the hostly pressing enemy.

When word came from the British command that the wood northwest of Morvuil was filled with enemy infantry, who had brought forward great numbers of machine guns, which were mounted in every available vantage point, even in trees, the gallant horsemen were called upon to clear the wood out. They responded and came pounding up to the wood in a picturesque manner. Here part of them dismounted and went on foot, but the Canadian horse tore on into the forest and hurled themselves on the enemy. The Germans slowly gave way before the onslaught until the western part of the wood had been cleared.

Like Knights of Old.

The cavalry was again called upon on April 1 to attack the enemy. They did and no more splendid sight has been seen along the battle line than when they came charging across the field as in days of old and drove straight into the banks of machine guns scattered among the trees. The first charge gave the horsemen a foothold in the wood. They reformed and surged forward again. This time they got to the centre of the forest. Once more they drove their horses full-tilt against the German line. The latter held for a little and then sagged and broke and the British stormed their way clear through the wood to the eastern side, the enemy fleeing before them. Behind them the ground was strewn with German dead and wounded.

The Germans immediately reorganized for a counter-attack and here the horse gunners accomplished more gallant work. As the enemy massed in the open, the artillerymen poured large quantities of shell into their ranks, one battery alone firing 2,000 rounds at the target. For an hour the German infantry marched exposing themselves to the hail of death. They kept coming forward, but only a few reached the wood and the attack was smashed by the troopers.

DISCLOSURE BY HUN PAPER.

German Newspaper Reveals Vastness Of Spying System.

The extraordinary number of German "agents" and spies who are still working for the Fatherland in England, France, Spain, the Scandinavian countries and America forms the subject of an illuminating article in a recent issue of the Berlin Tageblatt.

Herr Theodor Wolff has apparently no intention of giving away any information to the enemy in the matter. He is merely concerned with the scandal of granting exemption from the new German taxation proposals to this army of shirkers who, "under the pretence of working for Germany, are living a life of luxury abroad and escaping military service."

The Tageblatt's unconscious revelations are as follows:

"The people who know what is going on are amazed to learn how enormous is the number of people who are working in Germany's interest in foreign countries. It will be extraordinarily interesting to hear something one day about their duties and their achievements.

"When the war broke out we were told in Germany that we had not done enough to make sure of the moral conquest of the world, that our resources in the matter of secret agents were too small and our methods too old fashioned. Instantly there arose a number of persons quick to understand the magnitude of the opportunity that was presented, and all these offered to help the Fatherland in this dire necessity.

"Every one who pretended that he had some relationship with foreigners was sent away with plenty of money. Adventurous plans (of which nothing more was ever heard) were greedily accepted, and we threw ourselves into a great propaganda work which was considered 'intelligent' and 'modern.'

"All this was supposed to win over the world and turn the hearts of foreign peoples towards us. In reality it spoiled the little that remained to spoil. In the remotest corners of the world, and still more extensively in neighboring countries, this work of 'information' was started.

"All it has shown is that Germany still has a large reserve of strong men of military age."

"JOY-RIDING" IN A TANK.

Anything But a Pleasurable Experience, Says a Correspondent.

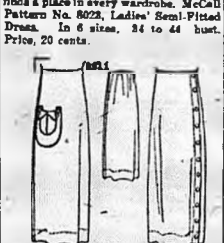
Joy-riding in a British tank means hanging on for dear life in a deafening roar of machinery while the machine lumbers up and down grades, alternately tossing its passengers first one way and then the other. A trial trip is thus described:

"We accepted with some trepidation, an invitation to make a journey in the machine. About half a dozen of us entered by the narrow door and were cramped up on the little platform which runs on each side of the machinery. We held on like grim death with our hands. For a few moments everything went well. Then there was an upward movement of the forepart of the tank and in a trice we found ourselves without a foothold and were suspended by our hands from the 'holdfasts.'

"The vessel jerked violently as she started on her downward course. In the twinkling of an eye we were thrown into the same position as before—only more so—with our legs dangling and our hands gripped in the effort to hold on and prevent being thrown all of a heap. We eventually emerged none the worse for the trip, but with a vivid impression of what must be the life of the gallant crews to whom our experience was a trifle as compared with theirs in the midst of shot and shell and with their own guns blazing away.

"The roar of the machinery in the confined space was terrific. The man with the strongest lungs, shouting in the ear of a man of the acutest hearing, could not make a syllable heard."

Canada's Peat Supply.



The known peat bogs of Canada, covering about 36,000 square miles, are estimated to be capable of producing twenty-eight thousand million tons of air-dried peat, which in fuel value would equal fourteen thousand million tons of coal.

Share your happiness with others, but keep your troubles to yourself.

For the Summer Wardrobe

The simple dress of silk or satin finds a place in every wardrobe. McCall Pattern No. 8023, Ladies' Semi-Fitted Dress. In 6 sizes, 34 to 44 bust. Price, 20 cents.

The tub skirt plays a very important part in the summer wardrobe. McCall Pattern No. 8211, Ladies' Two-Piece Skirt. In 7 sizes, 22 to 34 waist. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

PAIN? NOT A BIT! LIFT YOUR CORNS OR CALLUSES OFF

No humbug! Apply a few drops then just lift them away with fingers.

This new drug is an ether compound discovered by a Cincinnati chemist. It is called freezone, and can now be obtained in tiny bottles as here shown at very little cost from any drug store. Just ask for freezone. Apply a drop or two directly upon a tender corn or callus and instantly the soreness disappears. Shortly you will find the corn or callus so loose that you can lift it off, root and all, with the fingers.

Not a twinge of pain, soreness or irritation; not even the slightest smarting, either when applying freezone or afterwards.

This drug doesn't eat up the corn or callus, but shrivels them so they loosen and come right out. It is no humbug! It works like a charm. For a few cents you can get rid of every hard corn, soft corn or corn between the toes, as well as painful calluses on bottom of your feet. It never disappoints and never burns, bites or inflames. If your druggist hasn't any freezone yet, tell him to get a little bottle for you from his wholesale house.

What He Inferred.

A lieutenant was instructing his platoon in visual training. Said he to the first man: "Now tell me, how many men are there in that trench-digging party over there?"

"Thirty men and one officer," came the answer.

"Quite right," said the lieutenant after a pause, "but how do you know one is an officer at this distance?"

"'Cos he's the only one not working, sir."

The way to wealth is as plain as the way to market; it chiefly depends on two words, industry and frugality.—Benjamin Franklin.

SMOKE TUCKETTS

T&B CUT

When Summer Comes.

When summer comes with lovely face
And blushes o'er the world below,
With love and happiness agiow
And beautiful with charm and grace.

Away with all thats slow and base,
For hearts with laughter overflow,
When summer comes with lovely face
And blushes o'er the world below.

The merry brooklets fly apace,
The perfume-laden breezes blow;
The sweet and fragrant flowers grow
And in the sky the swallows race
When summer comes with lovely face.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

The Obvious Alternative.

A spoilt little boy of four years had been a source of considerable annoyance all through lunch.

At length one woman, an intimate personal friend of his too indulgent mother, turned to her and said:

"I can't think how you can let your little boy be so greedy and unruly at meal times. If he were mine, I should give him a good spanking."

"Oh," said the mother; "you can't spank the poor little chap on a full stomach."

"No," said her friend, "but you can turn him over."

Minard's Liniment Co., Ltd.

Gents,—I have used your Minard's Liniment in my family and also in my stables for years and consider it the best medicine obtainable.

Yours truly,
ALFRED ROCHAV.
Proprietor Roxton Pond Hotel and Livery Stables.

A Slacker's Alibi.

One of the recruiting canvassers in an English provincial town was a well-known magistrate. In most cases he succeeded in obtaining the promises he wished, but at last he met with a rebuff. It occurred when he knocked at a cottage door that was opened to him by a sturdy son of the soil.

"My man," said the magistrate in his most persuasive tones, "are you going to fight for your King and country?"

"No, I beant, sir," was the prompt reply. "And I be surprised at you askin' me for to do it. Two years ago come next month you yourself fined I twenty shillings for fighting wi' Bill Smith, and you said it wor wicked to fight, and I promised you as I wouldn't repeat the offence, and I allus keep my word."

Minard's Liniment used by Physicians.

What Germany Has Lost.

She has lost her high seas commerce.

She has, therefore, lost her foreign trade.

She has lost her last colony, with the successful conclusion of the East African campaign.

She has lost the respect and confidence of most of the nations.

She has lost her former leadership in many realms.

She has lost many of her patent rights, that were once a source of great wealth.

She has lost her supply sources of many raw materials that are essential to her industrial life.

She has lost millions of her sons.

She has lost her soul.

Keep Minard's Liniment in the house.

Eight of the olive trees in the historical Garden of Olives at Jerusalem are more than 1,000 years old.

Only One Mother.

Hundreds of stars in the pretty sky,
Hundreds of shells on the shore together;
Hundreds of birds that go singing by,
Hundreds of bees in the sunny weather.

Hundreds of dew-drops to greet the dawn,
Hundreds of lambs in the fragrant clover;
Hundreds of butterflies out on the lawn—
But only one mother the wide world over. —Cooper.

The increased cost of fine teas has tempted some to try cheap, inferior teas to their sorrow. It is a real economy to use Salada Tea, since it yields a far greater number of cups to the pound and, besides, has that unique satisfying flavor.

At School.

The young "pride of the family" had been to school for the first time in his short six years.

"What did you learn?" asked his mother, as mothers always ask on the afternoon after the morning before.

Little Johnny frowned.

"I didn't learn nothin'," he replied. "I have to go back to-morrow."

Minard's Liniment Lumberman's Friend.

It Was the Limit.

In connection with rationing, economy recipes, Government flour, and other similar abominations, Madame Melba, who has just been made a Dame of the British Empire, recently told an amusing story of a bride who made a war-time cake for her lord and master.

He ate of it and made a face. She ate of it and made another face. Then there was dead silence.

Finally the bride summoned up courage to falter, "I—I'm afraid, dear, I left something out of this cake."

"No, sweetheart," he gently replied, "nothing that you could have left out could make a cake taste like this."

MONEY ORDERS.

Send a Dominion Express Money Order. Five Dollars costs three cents.

A Shepherd's Pie.

Grease baking dish; cover bottom with mashed potatoes. Add layer of cooked minced meat or fish, season well and mix with meat stock or gravy. Cover with mashed potatoes. Bake long enough to heat through, twenty to thirty minutes.

Ask for Minard's and take no other.

To Keep Down Camp Waste.

The Militia Department has issued instructions for its conservation officers, which are calculated to keep wastage of foodstuffs to a minimum. The conservation officers are made responsible for the collection and proper disposal of all fats, bones, dripping, etc. The regulations cover a wide range of economies.

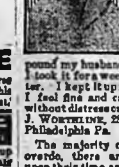
SKIN TROUBLE FOR 25 YEARS

On Hands and Fingers. Could Not Work. Cuticura Healed.

"After vaccination I was affected with skin trouble on my left arm and later it got in to both hands and my fingers. I suffered so much I was unable to do any kind of work, and it used to keep me awake at night. I suffered as a whole itching and burning, and my fingers were swollen.

"I had the trouble over twenty-five years when I read of Cuticura Soap and Ointment. I tried it with needless so I bought more, and now my hands are healed." (Signed) Miss A. Cattieau, Chamble, Canton, Que., Mar. 25, '17.



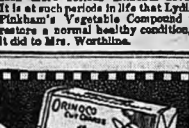
Use these super-creamy emollients for every-day toilet purposes, and prevent these distressing troubles.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

THIS WEAK, NERVOUS MOTHER

Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Philadelphia, Pa.—"I was very weak, always tired, my back ached, and I felt sickly most of the time. I went to a doctor and he said I had nervous indigestion, which added to my weak condition kept me worrying most of the time—and he said if I could not stop that, I could not get well. I heard so much about Lydia E. Pinkham's Vegetable Compound my husband wanted me to try it. I took it for a week and felt a little better. I kept it up for three months, and I feel fine and can eat anything now without distress or nervousness." —Mrs. J. WORTHLINE, 2842 North Taylor St., Philadelphia Pa.



The majority of mothers nowadays overdo, there are so many demands upon their time and strength; the result is invariably a weakened, run-down, nervous condition with headaches, backache, irritability and depression—and soon more serious ailments develop. It is at such periods in life that Lydia E. Pinkham's Vegetable Compound will restore a normal healthy condition, as it did to Mrs. Worthline.

CUT FINE FOR CIGARETTES — CUT COARSE FOR PIPE

CARGILL

Mrs. C. McPetrige, of Winnipeg, who has been visiting her sister, Mrs. Hunnisett, left for Montreal en route to Europe before leaving for her home in the west.

Her many friends here will be sorry to hear of the death of Mrs. R. Stevens (nee Addie Cousins), which occurred in Chesley on Saturday afternoon, due to tuberculosis. Interment took place at Elmwood on Tuesday afternoon. We extend to the bereaved husband and friends our deepest sympathy.

A male choir composed of members of the Presbyterian and Methodist churches led the singing in St. Andrew's church last Sunday evening.

Rev. Mr. Hagar, the newly appointed rector of Holy Trinity church, preached his initial sermon on Sunday last, and made a very favorable impression.

Mr. Mathers and Miss J. Allen, instructors at the knowledge factory, spent the week end at their respective homes in Palmerston and Worcester.

Mr. and Mrs. P. Brownsombe, Mrs. Green, Mr. and Mrs. John Reaburn and family were in Teeswater last Sunday.

Mrs. D. Cargill has a Chinese chef. He commenced his duties last week.

The bowlers held their annual tournament on the 24th of May. Cross on the King's birthday, and raised about $65 thereby.

Capt. Hanmore paid us a flying visit last week.

Pte. Bill Knox was here over the week end. Bill looks fine in the khaki.

The Masonic brethren held a banquet on Friday evening last, at which D.G.M. Jas. McDonald, of Tara, was present. Some of the brethren from Tara, Chesley and Walkerton were present.

Mr. Zeigler and family, of Blyth, visited at Mr. J. H. Brown's over the holiday.

ELORA ROAD NORTH

Mrs. John Miller, of London, is visiting at Mr. Thos. Irwin's.

Mr. and Mrs. H. R. Carter and Mr. and Mrs. E. J. Coheen, of Chesley, spent Sunday at Mr. Alex Ewing's.

Messrs. Jas. and Dave Bryce have purchased a Ford car.

Last Friday evening a large crowd gathered at Mr. John McDougall's to say farewell to his son Angus, who has enlisted in the Army Medical Corps. Angus was presented with a wrist watch and fountain pen by the neighbors, a signet ring by his aunts and uncles, and a safety razor by his own family. After a very good program lunch was served, the latter part of the night was enlivened by dancing and other amusements.

SECOND CON. ELDERSLIE

Miss Stewart, teacher in S. S. No. 12, has been re-engaged for next term at a salary of $620.

Will Young lost a young calf last week from lockjaw.

Mrs. Blain Fortune and children visited friends here on Monday.

Doris, the little four-year-old daughter of Mr. and Mrs. W. Patterson, got her hand badly hurt last week. She was playing around the windmill while it was in gear, and got it caught in the machinery.

Mr. and Mrs. T. Grice, Mr. H. Grice, Mrs. and Miss Loughleen, of Cargill, were callers at J. B. Allen's on Sunday last.

WILLOW CREEK

Mrs. Wm. Berndt ... returned home after seven weeks in Wellerton. We are glad to report that her son has recovered and is doing fine now.

Mrs. Fred Schnittker returned home this week from Kitchener.

The Y. P. A. is having a picnic this week in honor of those who are and will be called to military service.

Mr. Fred C. Schnittker will go to London to report for military service on June 11th.

Mr. L. Schnarr and family were in Hanover on Sunday.

Mr. and Mrs. C. E. Ritter and W. Berndt were in Walkerton on Sunday.

GLAMIS

The local Oddfellows and neighboring brethren marched to the Presbyterian church in a body last Sunday evening.

A car load of Mr. Neil Currie's friends motored up from Kincardine and spent Sunday with them.

Mr. Richard McKinnet and family, of Carkdale, spent the week end with friends here.

Mrs. Tulloch, of Bengeville, is visiting her parents, Mr. and Mrs. W. McKeown.

Mrs. Norman McLean, of the 2nd, was operated on last week. Dr. Lacy, of Galt, was the surgeon. At last reports she was doing nicely.

Mr. Cunningham returned from Toronto on Tuesday of last week, accompanied by his daughter, Miss Nina, who spent some time in Hamilton.

Mr. John Buchan left last week to visit friends in Hespeler and Detroit.

A car load of Mr. Kirktown's friends from Highland arrived on Monday evening.

Messrs. Alex and Dick Kirktown went to London on Monday for two new Ford cars which they have purchased.

Quite a number from here attended the Baptist Association held in Riverton this week.

Word came to Glamis of the death of Mr. Jack Beaton, eldest son of Mr. and Mrs. Walter Beaton, who died at his home in Viscount, Sask., on Friday morning, May 24th, after one week's illness. Jack was a bright, promising young man, and was well known here as the family lived here for a number of years before moving west. Much sympathy is felt for them in their trouble.

PUBLIC NOTICE

DOCUMENTS TO BE CARRIED

by every male person who is not on active service in any of His Majesty's Naval or Military Forces, or in the Naval or Military Forces of any of His Majesty's Allies, and who apparently may be, or is reasonably suspected to be, within the description of Class One under the Military Service Act, 1917, who for any reason may have claimed that he is not within Class One under the Act.

NOTICE is hereby given that, under the provisions of an Order in Council (P.C. 1013), of the 20th April, 1918, upon and after the 1st day of June, 1918, every male person who is not on active service in any of His Majesty's Naval or Military Forces, or in the Naval or Military Forces of His Majesty's Allies, and who apparently may be, or is reasonably suspected to be, within the description of Class One under the Military Service Act, 1917, by whom or on whose behalf, it is at any time affirmed, claimed or alleged that he is not, whether by reason of age, status, nationality, exception, or otherwise, within Class One under the Military Service Act, 1917, as defined for the time being or that, although within the said Class, he is exempted from or not liable to military service; shall have with him upon his person at all times or in or upon any building or premises where he at any time is,

AGE

If it be claimed that he is not within the class by reason of age, an official certificate of the date of his birth, or a certificate of his age signed by two reputable citizens residing in the community in which he lives and having knowledge of the fact; or

MARRIAGE

If it be claimed that he is not within the Class by reason of marriage, a certificate, either official or signed by two reputable citizens residing in the community in which he lives and having knowledge of the facts, certifying to his marriage and that his wife is living; or

NATIONALITY

If it be claimed that he is not within the Class by reason of his nationality, a certificate of his nationality signed by a Consul or Vice-Consul of the foreign State or Country to which he claims his allegiance is due; or a passport issued by the Government of that Country establishing his nationality; or

ACTIVE SERVICE

If it be claimed that he is excepted as a member of any of His Majesty's Forces or as having since the 4th August, 1914, served in the Military or Naval Forces of Great Britain or her Allies in any theatre of actual war and has been honourably discharged therefrom, official documents or an official certificate evidencing the fact; or

CLERGY

If it be claimed that he is excepted as a member of the clergy, or of any recognized order of an exclusively religious character, or is a minister of a religious denomination existing in Canada on 29th August, 1917, or as being a member of any other society or body, a certificate of the fact signed by an office-holder competent so to certify under the regulations of the church, order or denomination, society or body, to which he belongs; or

EXEMPTION

If it be claimed that he is exempted from or not liable to military service by reason of any exemption granted or claimed or application pending under the Military Service Act, 1917, or the regulations thereunder, his exemption papers, or a certificate of the Registrar or Deputy Registrar of the district to which he belongs evidencing the fact; or

OTHER CLASS

If it be claimed that he is not within the Class, or that he is exempted, not liable or excepted upon any other ground, a certificate of two reputable citizens residing in the community where he lives having knowledge of the fact upon which the claim is founded and certifying thereto;

FAILURE TO CARRY REQUISITE EVIDENCE

If upon or after the 1st day of June, 1918, any such male person be found without the requisite evidence or certificate upon his person or in or upon the building or premises in which he is, he shall thereupon be presumed to be a person at the time liable for military service and to be a deserter or defaulter without leave;

PENALTY

And he shall also be liable upon summary conviction to a fine not exceeding $50 or to imprisonment for a period not exceeding one month, or to both such fine and imprisonment; and moreover, any such person may forthwith be taken into military custody and may be there detained and required to perform military duty in the Canadian Expeditionary Force so long as his services shall be required, unless or until the fact be established to the satisfaction of competent authority that he is not liable for military duty.

FALSE CERTIFICATE

The use, signing or giving of any such certificate as hereinbefore mentioned shall, if the certificate be in any material respect false or misleading to the knowledge of the person using, signing, or giving the same, be an offence, punishable, upon summary conviction, by a penalty not exceeding five hundred dollars, and by imprisonment for any term not exceeding six months and not less than one month.

ISSUED BY THE MILITARY SERVICE BRANCH
OF THE DEPARTMENT OF JUSTICE.

Ottawa, May 22, 1918.

CANTIRE

Corn planting is now finished, and all growing is making a splendid start. Pastures are splendid, so let us hope there will be no more frosts to give things a backset.

Master Ernest Muir is nursing a very sore foot these days, the little fellow having stepped on a rusty nail.

Mr. and Mrs. Thomas Weir, Miss Maggie Muir and Mr. Robt. Aitken, all of Tara, were a party of motorists who spent the 24th at Ned Reid's.

Miss Margaret Watson, of Owen Sound, spent the week end at the home of her uncle, Angus Taylor.

Mrs. D. A. McIntyre is visiting friends in Toronto.

Misses Beadle and Elsie Smart, of Vesta, are visitors at the home of their sister, Mrs. John McIntyre.

Miss McCurdy, who has given entire satisfaction to the ratepayers of this section, has been re-engaged with an advance of fifty dollars in salary. The trustees know a good teacher when they get one.

Mr. and Mrs. A. D. McKay visited friends in Brant last week.

The merry sound of wedding bells will be heard in Cantire this week. Particulars later.

On Friday evening last neighbors and friends to the number of almost one hundred gathered at the home of Mr. and Mrs. Alex Hawkshaw to spend a social evening with them and their eldest son Sylvester, who was leaving next day for London to don the khaki uniform. After the guests had all arrived Mr. A. D. McKay very efficiently performed the duty of chairman, and in a neat speech informed the family of their object in meeting. After singing the national anthem Sylvester was called to the centre of the room and presented with an address, a fountain pen, a wrist watch and a purse of money. The address was read by Miss Margaret McKay and the presentation made by Miss Nettie Blue. The young soldier in a few short words expressed his thanks for these tokens of kindness from the people of the neighborhood. Short speeches were made by some of those present, all expressing sorrow at losing from the community such an industrious, clean young man, and all expressing the hope that he might be spared to come back and settle down on the farm he recently purchased. A feature of the evening was a short speech by Mr. Robt. Stothart, in which the latter presented to the many good qualities of the young man, and before sitting down handed him some silver coins and remarked if they were both spared to meet again to give him a gold coin. An excellent lunch was given by the ladies present, and the remainder of the evening was spent in music and song and tripping the light fantastic.

To Pte. Sylvester Gemmell:

Dear Sylvester—As you have been called to the colors in defence of liberty and justice, and the greatest tyrant and fiend the world has ever known, we, your friends down to our door to meet here to-night and spend a social evening with you before you take your departure for military camp life and subsequent hardships and battle fields. We feel loth to part with you, but we are proud to know that you are to be numbered with the heroic defenders of your country at home and abroad. When you leave the shores of Canada for France, Belgium or the fields of Flanders, where the Red Cross hospitals, clashing hospital ships, carrying and ministering presences are not, and ravaging women has attained the zenith of fiend work, and roused within the breast of every true Britisher a feeling to do his full share in crushing the monster of militarism, with his evil advisers, responsible for these awful atrocities. We feel we cannot let you go without some small token of remembrance, and ask you to accept this wrist watch, pen and purse of money as a reminder of the friends you left on Elderslie and the happy days we spent together. We wish you freedom from accidents, a safe passage overseas, and when the intense peace of the world has been assured we hope to have you back with us to give you the honor due you for protecting our homes. Good bye, and may God bless and keep you. Signed on behalf of your friends, Will Blackburn, Ed Berry, Archie McGillivray, James Blue.

GRESHAM

Rev. Mr. Morrison, of Toronto, occupied the pulpit in Underwood and Centre Bruce for the last two Sabbaths. Rev. Mr. McLaughlin, of Hamilton, will preach next Sabbath.

We are pleased to report that Mr. Lish Christie's little boy, who was injured, is doing nicely.

Several of the ladies of Centre Bruce auxiliary attended the Presbyterial meeting in Southampton last Thursday, and report a good representation from each auxiliary.

Messrs. J. McLean Young and John Fletcher motored to Kincardine last week.

Mr. and Mrs. Wm. Young spent the week end at Mr. Robt. Young's, Kincardine.

We are pleased to report that Mr. Allan McKinnon, sr., is getting better.

Mr. Stephens, of West Elgin, was over repairing his fences on the Mill farm.

Mrs. J. MacDonald and babe, of Toronto, are visiting at Mrs. Wm. Rose's.

A number from here attended the Oddfellows' service in Glamis and listened to a sermon by Rev. P. Reith, which was very highly appreciated.

—Mrs. Eagan, Dressmaker, has removed to the house lately occupied by Mrs. McLeod, and invites old and new patrons to call there. Apprentices wanted.

BRUCE TP.

Mr. Dan Sinclair was up from Niagara and spent the week end at Mr. John McIntyre's.

Mrs. Thornbburn, sr., is visiting her daughter, Mrs. John McDougall, Elora Road north.

Mr. and Mrs. Frank Mills and Mr. Ruttan, from Myrtle, spent Sunday at Mr. Thos. White's.

Mr. Charlie Walmsley has returned from Walkerton with a new Ford car.

Mr. and Mrs Jack Drummond, from Tiverton, Sundayed at W. H. Brown's.

Willie Christie, young son of Mr. and Mrs. Rich. Christie, met with an unfortunate accident last week, while driving a bull. The club struck a stone, when the team jumped and broke a whiffletree, then ran away. Willie was thrown from the seat and the club ran over his leg, cutting it badly. It is now under the doctor's care.

ARRAN COUNCIL

Council met May 25, at town hall, as Court of Revision, but as no appeals were filed, the roll was adopted. The revve then received communications from several ratepayers. General communications were received and filed. The plans and specifications of Bang's bridge were examined, and on motion of George and Thomas the clerk was ordered to advertise for tenders to be received until next meeting, June 8th, at 1 o'clock, p.m. On motion of Miller and George, each member of the council was appointed to supervise the cutting of weeds in their respective districts as follows: Polling division No. 1, C. A. Thomas, $20; No. 2, Fred George, $20; No. 3, Sam Miller, $15; No. 4, F. Jamieson, $20; No. 5 and 6, the revve, $20. This sum, $92, is a little more than the statute labor for three years at $1 per day. Councillor Scarrow was appointed to look after the repairing of Ed. Morrow's fence near Kennedy's bridge. Fred George, C. A. Thomas and Sam Miller were appointed a committee to have the Arran portion of the Ash ditch completed immediately, and the clerk was instructed to notify Michael Lawson to attend to his portion on lot 12 at once. Councillor George was appointed to examine the fence on lot 8, con. 4, and report to council at next meeting. Treasurer's statement showed a balance to the credit of the township of $6611.36. The following orders were issued, viz.: H. A. Vanstone, $1.50; statute labor book for clerk, $2; Municipal World, yearly book for council, $2.50; H. T. Potts, expenses to Ottawa re Arran-Elderslie boundary, $15.05; ... Kelly, repairing bridge on lot 8, con. 4, during winter, $3.25; ... Bell, sheep killed by dogs, $8; ... Bell, sheep, sum and team breaking road, $2; ... Bell, sheep, sum and team breaking road, $2; ... Bell, sheep, sum and team breaking road, $2; ... Bell, sheep, sum and team breaking road, $2; Cecil Taylor, sum and team breaking road, $2; Thos. Bell, sheep killed by dogs, $8; ... Bell, sheep killed by dogs, $8; P. Moller, repairing 11 s. r., $1.65; Edmund Lajeunesse until June 30, $25; ... Underwood, salary as assessor, $90; F. Scott, repairing road, $1; Geo. Thompson, breaking M. s. r., $2.25; ... Hall, Harrison & Son, plank for covering bridges, $104; Geo. Spence, material for repairing grader, $1; Harry Kennedy, drawing stone and putting railing on approach to bridge, $11.25; Jas. Mackie, ... looking after bridge during freshet, $1; T. Brewster, attending to bridge during freshet, $1; Moses Legge, repairing 25 s. r., $3.25; ... Kelly, repairing 10 s. r., $1.30; ... Kelly, during winter, $3.25; ... Bell, sum and team breaking road, $2; ... Bell, sum and team breaking road, $2; ... H. T. POTTS, Clerk

Different Kinds of Heat

Your furnace should not only give you plenty of heat, but the right quality of heat.

Some houses would be better without any heat than the kind their furnaces give them.

If you study the Sunshine Furnace you will know what the right kind of heat is and how to get it.

Full information about the Sunshine Furnace will be sent free to any address upon request to our nearest branch office.

A Very Costly Mistake

After two witnesses had been heard at the June session in Walkerton last week, the case of MacPhail vs. Nichols was settled out of court, by the defendant paying $800 damages and each defraying his own costs. The action was entered to recover damages for the death of a number head of cattle, which it was claimed were poisoned by saltpetre sold by defendant in mistake for Epsom salts.

To Overhaul the Electric Light Plant

Manager McNeil has received instructions from the proprietors of the electric light plant to proceed at once with the work of overhauling the whole system. The improvements to be made will include heavier wiring on the distributing lines in town, new poles, &c., also another section of concrete work on the dam. Light users will be glad to learn of the step being taken. We are safe in saying, however, that town people will not be satisfied with anything short of the service both night and day, so it will be as well for the proprietors to make provision for such in their plans.

Big Day's Butter Making

On Friday of last week the Paisley Creamery made 2,800 pounds of butter which is something of a record-breaker. This abnormal output was due to a break in the refrigerating plant on Thursday, which down on Thursday and crowded two days' work into one. The result was made by a force that worked from noon on Thursday, and operations were continued steadily until well on into the next night. It was a busy day with a good deal to show for it at the end. The output of the plant as well as the skill and experience in the art is demonstrated in the fact that none of the cream or butter was lost by delay.

Awarded the Military Medal

Word has been received from the front that Pte. Lawrence Putman, son of Mr. and Mrs. H. B. Putman, of Paisley, has been awarded the military medal for distinguished service and bravery on the field. Although the soldier has honored mentioned the subject in his last letter home, he did not give any particulars as to the service which brought him the award. Our readers will recall that Pte. Putman enlisted in the fall of 1915, when the calls for more men were first becoming urgent, leaving behind him good business prospects, also his young wife and child.

—Mr. Dan Munn, of Southampton, was in town on Monday.

—The late Wm. Watson's property on Albert St., has been purchased by Mr. Geo. Young.

—Mrs. Tribble and grandson, of Williamford, are guests of Mrs. Buchanan, Goldie St.

—Mrs. Rich. Dankle went to Walkerton hospital last week and had an operation for appendicitis.

—Of course, you won't miss Port Elgin's Dominion Day Celebration. Big programme of races. Concert at night. Come to the lake town for Monday, July 1st.

—Mr. Geo. M. McCurdy, of Vanscoy, Sask., in renewing his subscription, writes us as follows: "Well, prospects look fair for a good crop this season in this district, which is Saskatoon district. We had three inches of snow about the 24th ult. which made abundance of moisture. There have been some very heavy frosts in May which froze the wheat down, and the high winds caused some damage on the lighter lands. Am taking the crop on on spring. The prospects are good, and if we get the rain I look for 1 bush. per acre, putting it strong—a bumper. Help is very scarce and wages high, but I expect the same conditions apply to the west. And I don't want to take up too much space in your valuable paper, and as I never was a writer or any newspaper stuff, I will just end by wishing all you readers gave a prosperous year."

Elderslie Woman Dies Very Suddenly

Mrs. Annie Johnston, of lot 7, con. 11, Elderslie, passed away very suddenly and unexpectedly some time during Saturday night, from an attack of acute indigestion. Dr. Dennison was called — Dr. Gage on Saturday afternoon, while he was visiting a patient in the neighborhood. The deceased went to bed in her usual health on Sunday, but before the family had reached her she was beyond its aid. On Saturday evening she by down — a hearty, when she was found dead on Sunday morning. The deceased was 51 years of age, and was born in Bruce Tp., a daughter of the late Chas. Myles, and lived all her life there. Over 20 years her marriage to the late John Johnston, who predeceased her about eight years ago. She is survived by two sons and one daughter—William, of Elderslie; Wesley, Raleigh, of Chesley; and Mrs. Jas. Dudgeon, of Williamford, who have the sympathy of a wide circle of friends in their loss of a kind and good mother.

PAISLEY BRANCH

F. C. RYAN, Manager

—Wilkinson plows and repairs at F. Carter & Son's.

—Marriage licenses issued and money to loan. **T. M. George.**

—One Ford Motor Truck with covered top, in good condition for sale at a bargain. A. Ball.

—Full line of fine engagement and wedding rings at J. Shoemaker's jewellery store.

—Highest prices paid for hides and sheepskins. **M. E. McGregor, Butcher, Steele Block.**

—Highest price for beef hides, horse hides, calfskins, sheepskins, tallow, &c. **P. Ollifier,** Paisley Meat Market.

—E. Stevenson's quick healing salve is the best made. We have a choice line of tobaccos and cigars, stationery and school supplies. Agent for daily papers and magazines. Give us a call.

—Flour, Feed, Seeds, Grain—We keep a full stock of Five Roses and Stark's high grade flours, bran, shorts, Royal Purple calf meal, poultry foods and bonics. Always in the market for coarse grains. Morning delivery only. **W. Stark.**

Bruce Telephone Notice

All toll calls not paid to central offices by August 1st will be sent to the township clerks and these will be added to the tax collector's roll for collection.

All ordinary conversations may be carried on on Sunday from 9 to 10.30 a.m., and from 2 to 3.30 p.m. Only doctors' and important calls to go through during other hours.

D. McNAUGHTON, President

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles,

I. S. CRUICKSHANK, the Tailor

More's Drug Store

This is the place to get all requisites to fight the summer pest, such as **Paris Green, Arsenate of Lead** (in paste form), **Bug Death** (the great bug destroyer and fertilizer), **Bug Finish,** also a fertilizer, **Insect Powder** in packages and bulk, **Mosquito Oil** to keep the mosquitos away, and **Larkspur Lotion** for the boys. **Fly Shoot** for flies on stock, **Bluestone, Copperas, Hellebore, Crude Carbolic Acid, Formaldehide** and **Creolin.**

Water Glass for Preserving Eggs

—Mrs. H. McKerracher is visiting in Toronto.

—Mrs. Peter Scott visited friends in Port Elgin last week.

—Mr. A. Mathers, of Cargill, spent Sunday at Mr. H. S. Petrie's, North St.

—Mrs. Ball and babe, of Clinton, are visiting at the home of her father, Mr. J. S. Dewar.

—Big Patriotic Garden Party at Mr. A. Cormack's home on June 28th. Full particulars next week.

—Mr. and Mrs. A. E. Tanner and Elizabeth are away on a motoring tour to Toronto and other points.

—Miss Winnifred McArthur has returned to Toronto after spending holidays at the home of her mother, Mrs. D. McArthur, Lovat.

—Mr. J. A. McArthur made a motor trip to Oshawa last week, accompanied by Mrs. McArthur and children and Mrs. J. G. Hopper.

—Sergt.-Major M. J. Snowden, of the 75th Battery, Kingston, spent a few days at his home, 6th Bruce, before leaving for overseas.

—Misses Birdie and Myrtle Watson, of Detroit, are spending vacation at the home of their parents, Mr. and Mrs. S. Watson, Victoria St.

—Mr. Harvey Bell is home to take an extended holiday after being discharged from the flying corps. He has been in training for six months, but failed in the chief test given lately.

—The trustees of U. S. S. No. 2 and 8, Culross and Saugeen, have engaged Miss Edna Cumming as teacher for the next year at the salary of $650.

—Mr. and Mrs. John McGillivray, of Detroit, who were married on Thursday last, arrived here on Friday to visit at the home of his mother, Mrs. A. McGillivray, near the station.

—Mr. Wm. Watson of Chicago, Mrs. Alexander, Mr. and Mrs. C. Welsford of Goderich, were here for the funeral of the late Mr. Wm. Watson. Mrs. Welsford is remaining for a few days.

—"No longer dangerously ill" is the welcome official news received by Mr. Chas. McDonald, of 10th Bruce, regarding his son, Pte. Jas. McDonald, who has been in the First Birmingham War Hospital.

—Mr. and Mrs. Geo. Thompson and son John, of Lucknow, attended the funeral of the late Leonard Shewfelt, clerk of Kincardine Tp., on Wednesday last. The deceased was a cousin of Mr. Thompson.

—Mount Hope Garden Party, at the home of Mr. Wm. Gordon, on Monday, June 24th. First-class programme and general good time. Admission at gate 15c and 10c. Lunch and refreshments, extra, for sale on the grounds.

—Mr. Geo. Ritz, formerly of Walkerton, and leader of the 33rd Regt. band for many years, recently died at Long Beach, Cal., where he had gone in search of health. Mr. Ritz was manager of the Cargill woollen mill before going west to Brandon, Man.

—Among a list of young ladies who have graduated as nurses at Wellesley Hospital, Toronto, is Miss Mabel Hutcheson, a former Paisley girl, daughter of Mr. and Mrs. S. M. Hutcheson, now of Uxbridge.

—Friends here have received word of the death of Mrs. W. R. Stoddart, a former resident of Paisley and Walkerton, which occurred at Marion, Mich., on May 19th. The bereaved husband is a brother of Mr. John Stoddart and Mrs. W. R. Morrison, of Paisley. A family of nine children survive.

—Fresh Salmon Trout at P. Ollifier's butcher shop.

—A large assortment of Ladies' House Dresses just received. Hunsinger & Whitch, Cargill.

—For Sale—Frame house on lot 31, Elora Road north, Elderslie. Apply to R. J. McGill, Paisley R. R. No. 3.

—For Sale—White enamel baby carriage, in first-class condition. Upholstered in white corduroy. Apply to Mrs. T. Mair, Royal Bank.

—Auction sale of household effects at Glenlo, on Wednesday, June 26th, at 1 o'clock p. m. Miss McDermid and Miss Hendry, props.

—For Sale—One 30-h. p. gasoline engine nearly new, one inch pulley, all complete with box, hand made, cost $200, cash $120. Apply to W. G. Bryans, Paisley P. O., R. R. No. 3

—Our store will be closed the last three days in June for the transfer of business. Kindly remember this date, as we do not want to disappoint our customers. Batchelor, Laidlaw & Co.

—Gillies Hill Presbyterian church garden party will be held on Thursday evening, June 27th, in Mr. John Eason's orchard. Good programme. Tea served from 6 to 8 o'clock. Everybody invited. Admission—Adults 25c, children 15c.

Prof. Day to Address Shorthorn Breeders

A meeting of Shorthorn breeders of Bruce county is to be held at the farm of Wm. Hopper, Elora Road east of Paisley, June 21st, at 2.30 p.m. Prof. Day, recently appointed secretary of the Dominion Shorthorn Breeders' Association, will be present and address the meeting. All interested in Shorthorns are welcome. N. C. Mackay, Sec'y Bruce Breeders' Club.

Discontinuing Business

Closing Out Sale

A. BALL

Desires to express his many thanks the large number of purchasers who took advantage of the money saving opportunity offered in his closing out sale of General Dry Goods and Groceries and attended on the first two days, and begs to intimate that the sale will continue for the balance of this month. ***Special offerings for Friday and Saturday business,*** and extra sales clerks have been engaged to wait upon you promptly. . . .

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soils, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. A stamped and addressed envelope enclosed with your letter, for complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

"Blue Lights" in Dairying

We have been accustomed to speak of the "blue lights" in stock breeding, meaning thereby how to attain the highest merit in the individual's career. In dairying there are two ways of obtaining high potential values in the young breeding herd. Of course, there are really three ways, but only two are practical for the breeder of small means. The breeder who has considerable money to start with often goes into the dairy cattle business, not because he needs the money, but because he either wants a pastime or wants to leave some monument for himself which is very enduring and it is true that there is no more enduring monument than to establish a superb herd of dairy animals because with such an establishment it is a fact that many of these animals will become a matter of history and their offspring will march down through the ages as long as dairy cattle are kept, which will be as long as the civilization of man is in the progressive phase. One of the quickest ways to attain the blue with the breeding herd is to buy a bull with individuality and excellent breeding that may be placed at the head of the herd. It has been said by old breeders who realize the value of quality in the products they have to sell, that a man can put as much into a herd header as the combined value of all his cows. This advice is given out by so many good breeders of proven ability that the young breeder can do nothing better than to take the advice at its face value and invest in a bull whose quality cannot be questioned.

Another way which is some slower but just as effective, however, is for two or three breeders to combine and take the very best cows or heifers they have, at least two, and send them to a bull of unquestioned superiority for breeding. It is true that the service fees are sometimes very high, but this way of getting extra fine individuals is much less expensive than to try to buy males with the breeding and individuality that the young stock will have. Of course, the idea in sending these cows away is to secure, if possible, a male that can be placed at the head of both herds and the sending of two cows will in three times out of every four make it possible to secure the male. These two methods of securing extra good stock to continue operations with are both of them practical and have received the sanction of a number of practical breeders.

There are a good many registered scrubs in breeding herds all over the country and I have observed that the man who keeps only registered stuff is not likely to show progress materially better than the man who keeps only good grade stuff. It is not enough to keep stuff that is registered, it is imperative to keep the best of registered stuff. The surplus animals produced from a herd kept on this basis are always in demand while the surplus animals from a herd kept on the basis of registry alone very often drug and even opiate the market. Many people say, "If your registered stuff is all like that, quality grade stuff is plenty good enough for me and I would much rather have it." In this way the market for pedigreed animals is usually discounted for the poor registered breeders by the good grade breeders.

It is necessary sooner or later in order to have one's efforts crowned with success to get into the blue by securing a fine individual to place at the head of the breeding establishment. Progress secured through introduction of high-class females is pretty likely to be slow, especially if the herd header is not in the same class with the females that are brought in. Nothing is truer than that the herd header is the index to the value of the herd and this being true, one of superior quality must be secured either by outright purchase or indirectly by sending the cream of the females to a superior bull and depending upon getting a son of this bull as a herd header. Either one of the last two schemes are practical but the last one is the least expensive of the two and is probably best fitted for use among small breeders of small finances, especially if there are two or more living in close proximity to each other.

Horse Sense

The horse's stomach is small, therefore if it is to eat but three times daily, and has a large amount of labor to perform, his food should be concentrated. The amount of roughage the horse is able to take depends largely upon custom. However, better results will be secured and the animal will keep healthier and last longer if permitted to eat lightly of roughage and liberally of grain.

But what grain shall we feed? This is an important question, and the answer will depend upon circumstances. If we have oats we may as well feed them, if we are fortunate enough to possess corn and have no oats we need not buy them to mix with the corn in order to make a suitable ration. The old notion that a horse must have oats in order to do his best work must go, because there are a number of careful experiments which prove that if the horse is fed either ear corn or oats in equal quantities there will be practically no difference in results.

The ration adapted to the needs of the horse differs from that required by the cow. The cow must make milk from her ration and to do this requires a large amount of protein. Protein builds the body, and carbohydrates furnish heat and energy. The waste of the body of the horse must be repaired and some protein is needed, but the great demand is for food that will furnish energy. This is where corn excels. Barley will practically take the place of corn. Wheat bran may be given in small quantities with either of these grains, with good results.

Flower seeds, particularly annuals, are cheap and a beautiful flower garden may be had at a trifling cost by purchasing a few packets of seeds of annuals and sowing them now in well prepared beds in the open ground.

WOOL

Farmers who ship their wool direct to us get better prices than farmers who sell to the general store.

ASK ANY FARMER! who has shipped wool both ways, and note what he says—or, better still, write us for our prices; they will show you how much you lose by selling to the General Store.

We pay the highest prices of any firm in the country and the largest wool dealers in Canada. Payment is remitted the same day wool is received.

Ship us your wool to-day—and will be glad to mail you tags free on request.

H. V. ANDREWS
13 CHURCH ST., TORONTO

Hoos

Every hog that is killed in transit, due to overcrowding or mishandling, means a loss, at present prices, of probably more than $30 to the shipper as well as a waste of meat needed by the nation. Mortality in transit or after arrival at the central market can be lessened greatly in hot weather by the practice of the following simple precautions on the part of shippers and dealers:

1. When hogs are very hot, during or after a drive, never pour cold water over their backs.

2. Before loading, clean out each car and bed it with sand which, during dry, hot weather, should be wetted down thoroughly. Hogs in transit during the night only are not so likely to be hot from overheating as are the animals shipped in the day-time. With day shipments in hot weather it is highly advisable to suspend burlap sacks of ice from the ceiling in various parts of the car in order to reduce the temperature, and incidentally, to sprinkle the animals with cool water. The ice sometimes is placed in sacks on the floor, but the animals are likely to pile and crowd around the cakes so that only those close to the ice are benefited. The ice should be sufficient to last to the destination.

3. Do not overload. Crowding hogs in a car during warm weather is a prolific source of mortality.

4. The feeding of corn, because of its heating effect, before and during shipment in hot weather should be reduced to a minimum. Oats are preferable where a grain feed is necessary. The maximum maintenance requirement of hogs in transit for twenty-four hours is one pound of grain a hundredweight, or approximately three bushels of corn to a car.

Plowing with a Tractor.

After I had been plowing with a tractor for a while, I noticed that I was not finishing up the corners of my fields in very good shape.

Of course I plowed the main part of my field in lands, but I was leaving a good-sized headland, and when the strip on each side of the field was the same width as the headlands, I plowed around the field, throwing the dirt in toward the plowed field.

At first I would plow up to the corner while making these rounds, raise my plow as soon as I had them even with the last furrow, turn around, and drop them on a line with the furrow last plowed, and so on around the field, just as I had been used to doing with a team and sulky plow.

By plowing a short distance past the last furrow on the corner I found that I was able to make corners with no triangles of unplowed land as had previously been the trouble.—H.H.C.

Wagon Wisdom.

To choose a satisfactory farm wagon requires either experience or advice. There is a vast difference in wagons, and he who buys hastily is apt to regret it many times.

Naturally, your particular use for a wagon will be the first consideration, but in any case you have a right to expect durability even in a very light wagon. The wood should have been air-and kiln-dried. Demand the black birch hub, white oak spokes, felloes, bolsters, and bounds. The best straight-grained white oak makes good axles, and is highly recommended by some wagon makers. If I may advise, I should stand by the hickory axle every time. The metal parts may be of Norway iron or mild steel. For a hilly country, steel skeins will be better than those of cast iron.

If examination of the axle shows an undue number of holes, reject that wagon. Of course, the king bolt must go through, but aside from this prefer clips, for too many holes assuredly weaken this vital part of a wagon.

The tongue and whiffletrees may be of oak, but be certain to have a hickory doubletree. Of course, there must be a metal sleeve for the reach to pass through; metal plates or collars at the wear points greatly prolong any wagon's life.

The tongue and whiffletrees may be of oak, but be certain to have a hickory doubletree. Of course, there must be a metal sleeve for the reach to pass through; metal plates or collars at the wear points greatly prolong any wagon's life.

The best woods for the wagon box are yellow poplar and three-inch quarter-sawed yellow pine flooring—the former for the sides, the latter for the floor. The bottom should be reinforced beneath with strips of oak. It probably is unnecessary to remind anyone of the importance of tub irons to protect the box from the front wheels' friction in turning.

The resistance encountered in moving a wagon and its load is termed "draft." Reduction of draft always has been a primary aim in wagon-making. Naturally, the lighter a wagon can be, and yet be amply strong for the owner's purpose, the better—that is, as regards economy of horse power and time in transportation. But the size and shape of the wheels, the thickness and width of tires, etc., have a vast deal to do with draft. That wide tires favor easy progress of a load, because they distribute the pressure over a larger surface, is typical of a number of fundamental principles easy of discovery and of practical value.

It is commonly believed that placing the load well forward in a wagon lightens it, in effect. But this is true only when the wagon slopes to the rear. In an ordinary wagon, whose hind wheels are the larger, the greater weight should go to the rear; but there should be no great difference. The best general rule is to distribute the weight about equally, particularly as regards the sides.

Another simple little thing to know, handy in a pinch, is this way of tightening wagon spokes: Place a small stick against the hub for a fulcrum, and use another for a lever. Raise the felloe off the spoke, place a small piece of leather around the tenon, and allow the felloe to drop back in place. Keep this up until the wheel is tight.

The best of wagons require care. Wheels give out first; a good practice is to give them a hot oil bath about three times a year. Keep all wooden parts of the wagon well painted; this keeps out moisture and the resultant rot.—L. E. E.

His Girl.

The day you went away to France
I came back through the streets alone
With burning eyes and feet that dragged,
And for my happy heart a stone.
Folk passed me smiling, so I smiled,
To see how dark the world had grown.

I came home to my father's house
And stood beside the empty chair
Where you had stood and where we said
Our blind good-bys; the twilight air
Was full of you; I had not known
That life would be so hard to bear.

And yet—God hears!—no dusk not dawn
Could bring me peace had you not gone.

The Kimberley diamond fields were discovered in 1871.

FARM FIRE PROTECTION

By D. Williamson

"Well, you saved the barn, anyway," I said, consolingly.

"Yes—by sheer good luck," grunted the owner of Maple Grove Farm, picking a dented fire pail from the cinders. "The wind happened to be blowing the other way; that was all."

"Couldn't you get a fire stream on it? I thought you had a good water-supply!"

"I thought so, too. I had a pressure-tank in the pit under my shop, and a gravity-tank over it, on a high iron tower. But the fire started in the shop, and burst through the roof before we discovered it. In two minutes the iron supports of the tower were red hot and crumpled up—there the thing lies." He pointed to what looked like a blackened, tangled framework of a wrecked Zeppelin. "Of course, when the tower-tank fell it landed on the pressure-tank, smashing the valves off that; my gasoline engine and pump were in the shop, too; the fire-buckets had been carried off to slop the hogs—and there you are!"

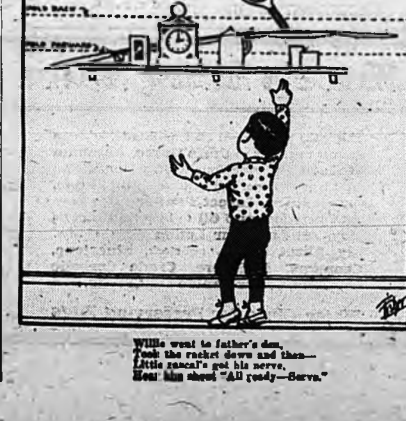
Now, all this isn't an argument against fire protection; precisely the opposite. My friend did not have a good fire system; and so he lost several thousand dollars' worth of farm buildings, with all their contents. Iron is far less fire-proof than stout timbers; it bends like wax, when hot, and should never be used for a tank-tower, unless set away off by itself. The pressure-tank should have been buried in the ground. The pumping-engine ought to have been in a small, isolated building. And so on.

In these war-times days a farm fire is as much a national calamity as the destruction of a munitions or a shipbuilding plant; and it's a patriotic duty for all of us to protect our farm buildings more carefully than we have been doing.

Common whitewash, with a little salt added, makes the best possible fireproof paint. Did you know that? In a large, connected mass of, farm buildings, fire partitions can be run up, so that a fire can be kept from spreading. These partitions should of course cut right through the roofs and frame walls, and can be made of brick, cement block, hollow tile or metal lath plastered with cement. All doors through such partitions must be tightly covered with tin on both sides.

Fire-extinguishers are good things to have handy.

If you have a water-system it should keep head enough to throw a good stream against the highest point of any building. A pressure at the ground of thirty pounds will shoot the water about forty feet in the air, using two-and-a-half-inch fire hose.



If you have only the ordinary garden hose, a very much greater pressure is necessary; the concern you buy your water-tank from will figure it all out for you.

But the best possible fire protection is a "sprinkler system"; there are dozens of good sorts on the market, and practically every factory, large or small, is equipped with one.

Then, there are all sorts of things you can do to keep fires from starting. When I visit an old farmhouse I always examine the chimneys very carefully; nine times out of ten I find gaping holes right through the brickwork, just under the roof! And then there's the danger of spontaneous combustion from greasy rags; the danger from lightning, etc.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Willie went to father's den,
Took the racket down and then—
Little rascal's got his nerve,
Here him shout "All ready—Serve."

A Vital Necessity in Peace or War

THE operations of Hydro-Electric and Public Utility Companies are a vital necessity to the industrial and social welfare of Canada, and are as essential in times of peace as in war.

This is one of the reasons we recommend the Bonds of well-managed Hydro-Electric and Public Utility Companies serving growing communities.

Send for list of Hydro-Electric and Public Utility Bonds yielding 6% to 8%.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M.D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnosis. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

M. E.—Will you please explain nerve trouble? How does it affect a person? Does it affect the heart?

Answer—Nervousness may be an evidence of diseased organs and tissues; or that the psychic part of the individual, the will, desires, emotions, senses, are out of joint and have gone on strike.

This term is dear to the heart of those who are nervous, and few of them would be willing to give it up for any other.

With doctors the condition is known under such terms as nervous excitement, neurasthenia, hysteria and hypochondria.

It is perhaps best expressed by the term "nervous excitement."

Nervousness from real disease, or from an impending event of seriousness and great importance, is easily understood, and it would be a rare person who did not suffer from nervous excitement under such conditions, even if he did not cry out and make a great time about it.

Again, a child with scarlet fever, with parboiled mouth and heated body, with unbalanced mind and uncontrollable restlessness, may have his nervousness or nervous excitement as a direct product of disease.

Or a child of high-strung parents and excitable temperament is denied a toy, or compelled to go to bed when he prefers to sit up, whereupon he cries and stamps his feet or breaks dishes or throws things at his mother's head.

This, also, is nervous excitement or nervousness, but has no direct relation to disease.

Or a woman cries or laughs immoderately perhaps over trifles, or is unable to keep quiet or has a fore-boding of evil, scolds, or finds fault continually, and we are compelled to say this woman is laboring under strong nervous excitement or simply that she is hysterical.

When nervousness proceeds from disease, we must cure the causative disease to get rid of the nervousness, and we cannot prevent it except as we prevent all exciting causes.

It may be an indication of insanity and show that mind and body require certain remedies, whether they are suitable hygiene or food or medicines.

When nervousness is unassociated with disease, the great thing is to train the will; to determine persistently not to give way until victory or death results.

Such a task is all the harder if the will was not brought under some measure of control in early life.

Nervousness may come to anybody, but it is far more common in women and children than in men.

It is less common in women who work hard, day by day, than in those who have been brought up in luxury and idleness and who spend their time in frivolity or in tasks which are of no consequence.

Children have it so often that it becomes a reflection on their bad inheritance or their bad bringing up.

The patent medicine makers deluge the market with all sorts of nostrums for nervousness.

Give them as wide a berth as possible; they are very apt to make things worse and give you a drug habit, besides.

Asafoetida is not a pleasant smelling drug, but a five grain pill will often cure an attack of nerves, and I never heard of its forming an asafoetida-habit.

Useful, also, are infusions of chamomile, pennyroyal, catnip, and other herb teas dear to our grandmothers.

It would be well if we went back to these harmless remedies, gatherings and drying herbs as our forebears did, and substitute them for the whole array of patent medicines.

Neurasthenia, called by foreigners the American sickness, is not a disease at all, strictly speaking, but only a collection of very uncomfortable symptoms, though it often leads to real diseases or may accompany them. It was first brought to notice by Dr George M. Beard in 1860.

It belongs to the intense period of life, particularly in men, is essentially nerve exhaustion and is thought to be due to a deficiency of oxygen in the blood. A neurasthenic is always tired always afraid something terrible is go to happen. Everything fatigues him or makes him dizzy or gr at him a headache, and he is unable to concentrate his mind upon anything apart from his own misery. Frequently he looks well except for a constantly anxious expression, and he may have fits of uncontrollable crying. He is forgetful and irritable, troubled with insomnia, or if he sleeps has bad dreams. His skin tingles, he has flashes of heat, his extremities are cold, his heart is weak and palpitates uncomfortably, his arteries throb, his vision is bad, his ears ring and he is annoyed subjectively by unpleasant tastes and smells. His digestive apparatus is constantly upset and he is always on the lookout for some new ache or ail.

Many causes may contribute to this condition which is based upon a weak nervous system. Among them are worry, grief, intense hurry to get rich, excesses of all kinds, atmospheric extremes, and unhealthful occupations. Indoor work favors it, and nervous, highly organized people are especially sensitive to it. It may last indefinitely but it never kills except as it leads up to some fatal disease. A change in surroundings may be all that is necessary to throw it off. Too often the will power is insufficient to fight it successfully.

The only medicines which are suitable in treating it are cathartics to regulate the bowels, and simple tonics. One who has it should breathe deeply, stay out of doors as much as possible, exercise moderately, sleep as much as possible by day as well as by night, and eat only simple food. Massage, baths, and sunlight are all helpful. Cheerful company, wholesale amusement, and change and occupation are useful measures of treatment. One should neither ridicule nor pamper a neurasthenic; he is really sick, but not so sick as he thinks he is. A good doctor or nurse who can win his confidence and guide him intelligently and kindly will serve as the best possible tonic for restoring his debilitated nerves.

Do You Guess Or Know?

One man says that one reason many farmers are not more prosperous is because they have the habit of guessing about matters of which they should have positive knowledge. He says many a farmer "guesses at everything—at the tonnage of his hay crop, never accurately knows unless hay is sold; at the cost of fencing, stone picking, plowing, cultivating, manure spreading, and the amount of fertilizer used on given fields; at the amount of and cost of feed per cow, and at the weight of milk returned; at the acreage devoted to certain crops, and at the expense of time and cash such crops represent; at the cost of equipment, repairs, and at the extent and actual value of stock and tools at annual periods. To such a farmer's mind an accurate inventory of property is only useful as preparation for an auction sale, and to debit and credit the crops he raises, for purposes of comparison and study, he considers a waste of time, plus foolishness."

Farming is a business and the only way to make an assured success in it is to conduct it on the same business principles known to be successful in other lines. One must learn to do his work "scientifically well" and know that he is doing it at a profit.

Mother: "I wonder how this book got in such a horrible condition!" Angel Child: "I heard papa say it was too dry for him, so I watered it."

Hundreds of Vancouver men, 40 years and over, have rushed to take advantage of the low rail rates to the prairies for the summer farm work.

T&B CUT

To the Men at Home.

No war is won by cannon fire alone;
The soldier bears the grim and dreary role;
He dies to serve the Flag that he has known;
His duty is to gain the distant goal,
But if the toiler in his homeland fair
Falter in faith and shrink from every test
If he be not on duty ever, there;
Lost to the cause is every soldier's best.

The men at home, the toiler in the shop,
The keen-eyed watcher on the spinning drill
Hear no command to vault the trench's top;
They know not what it is to die or kill,
And yet they must be brave and constant, too,
Upon them lies their precious country's fate;
They also serve the Flag as soldiers do,
'Tis theirs to make a nation's army great.

You hold your country's honor in your care,
Her glory you shall help to make or mar;
For they, who now her uniform must wear
Can be no braver soldiers than you are.
From day to day, in big and little deeds,
At bench, or lathe or desk or stretch of soil,
You are the man your country sorely needs!
Will you not give to her your finest toil?

No war is won by cannon fire alone.
The men at home must also share the fight,
By what they are a nation's strength is shown.
The army but reflects their love of right.
Will you not help to hold our battle line,
Will you not give the fullest of your powers,
In sacrifice and service that is fine,
That victory shall speedily be ours.

THE COINAGE OF WAR WORDS.

A Few of the Many New Terms Added to Our Language.

It is obviously impossible in limited space to mention more than a few of the more striking words which the war has given us, says an English writer. Let me begin with one in very common use, "camouflage." I cannot remember any instance of a foreign word so peculiarly un-English as this not only being so rapidly and universally adopted but also being so rarely mispronounced. I still often overhear knots of men who in their talk about the war refer to the Kayser, and the utter anglicisation of French battle names by public house military experts is perhaps the most charming feature of their discussions; but "camouflage" remains as French in sound in this country as in its own, and every one uses it. Here, however, it has become so elastic as to be the recognized term for any kind of pretence whatsoever.

Another French word which also gets its full value in the Anglo-Saxon mouth is "barrage"; but "barrage" has no general usage. The word "raid" is as old as the Scottish border, but will never again be employed, I imagine, except in association with attacks by air. At first we always said "air raid," but now "raid" alone is sufficient. Should the enemy find any other way of hitting at the heart of us there will be another word than "raid" to describe his efforts. And to these I would add that early flower of Armageddon speech, "moratorium," which for a while most of us took to be the name of a new liner.

Perhaps the most notable slang phase that the war has produced is "to get the wind up," meaning to upset, or "rattle," or put the fear of God into. But I speak only from the point of the homekeeping observer, aware merely of such expressions as get into London parlance. Soldiers on active service no doubt could supply columns of new terms.

THE ROYAL SILVER WEDDING.

King George and Queen Mary Will Celebrate 25 Years of Married Life.

The ninth year of King George's reign, which has just opened, will be marked by an event that has not occurred for well over a century—the celebration by a British monarch and his consort of their silver wedding while still on the throne, says a London despatch. The anniversary falls in the middle of July, and although the war will necessarily interfere with the commemoration of the day, arrangements already are in progress to mark the completion of the quarter century of married life.

The City of London, for instance, is raising funds which will be placed at their majesties' disposal for distribution among various war charities, and many other communities will follow this example.

While presents from public bodies will mostly be of this nature, it is probable that the Queen's bridesmaids will be permitted to give a personal gift. When King Edward and Queen Alexandra celebrated their silver wedding, the latter's attendants presented their autographs, bound in a silver book, enshrined in a silver casket of Danish work.

As was the case then, Queen Mary's bridesmaids are all alive to-day, though not all in England. They number ten—the Queen of Norway, the Queen of Spain, the Crown Princess of Sweden, Princess Victoria, three daughters of the Duke of Edinburgh, Princess Patricia, Princess Helena and Lady Louise Mountbatten.

HUN BRUTALITY TO PRISONERS.

German Gloats Over Shootings of Wounded British Captives.

Another account of German barbarity to prisoners comes from Switzerland. A neutral, formerly living in Berlin, met a sergeant in the German army who had seemed humane in the old days when he was a music teacher, but now gloated over the manner in which he and his companions had marched a large detachment of British wounded through Germany. The captors were mounted, the prisoners afoot, trudging 25 to 30 miles a day.

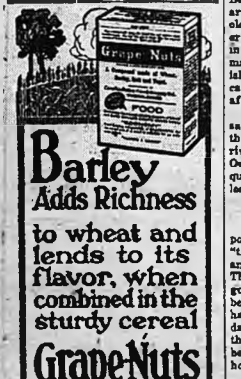
"When they lagged," the sergeant said, "we drew our revolvers and shot them down. Out of 900 only 170 arrived at our destination. That is war. Our German principle is to get peace quickly, and we must wage war ruthlessly. Those are our orders."

Not His Turn.

The Scottish character is a compound of vices and virtues in which "thrawnness" (Anglice "obstinacy") and modesty are strongly represented. The other day an officer was bidding good-bye to one of his men who had been awarded the D.C.M., and who had, in consequence, been granted ten days' leave. "Well, corporal," said the officer, "it's a proud mother that'll be waiting to greet you when you get home this time."

"What'll she be proud for?" queried the corporal, with a puzzled expression.

"Of your medal, of course," was the answer.



"But I don't think she knows. I've got it, sir," said the corporal.

"What! Haven't you told her?"

"Well, no, sir. You see it wasn't my turn to write.

Cuttings of chrysanthemums made now will make good plants for autumn flowering.

"A woman's insight is sometimes worth a life's experience."—Oliver Wendell Holmes.

Barley Adds Richness

to wheat and lends to its flavor, when combined in the sturdy cereal

Grape-Nuts

No prepared cereal food excels Grape-Nuts in nourishment, economy or digestibility.

"There's a Reason"

Designs for Summer Wear

There are very good lines to this Princess slip. McCall Pattern No. 8197, Ladies' Three-Piece Princess Slip. In 5 sizes, 34 to 42 bust. Price, 20 cents.

Daintily simple is this corset cover and petticoat. McCall Pattern No. 8345, Ladies' One-Piece Corset Cover. In 5 sizes, 34 to 42 bust. Price, 15 cents. No. 8117, Ladies' Three-Piece Petticoat. In 7 sizes, 22 to 34 waist. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond Street, Toronto; Dept. W.

GIRLS! WHITEN SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

Unlicensed Eating Houses Illegal.

On and after Saturday, June 1st, it becomes illegal for restaurant keepers to remain in business unless they have a license from the Canada Food Board. This applies also to boarding houses, serving twenty-four meals per day to outsiders, other than the household or members of the family.

Hard on the Lions.

The Rev. Charles H. Spurgeon's keen wit was always based on sterling common sense. One day he said to one of his sons:

"Can you tell me the reason why the lions didn't eat Daniel?"

"No, sir. Why was it?"

"Because the most of him was backbone and the rest was grit."

Increased Garden Acreage.

Mr. F. Abraham, Honorary Chairman of the Vacant Lot and Home Garden Section of the Canada Food Board, estimates an increased garden acreage of at least 200 per cent. over that of last year. Great efforts will have to be made to can, dry and store the surplus stock.

Keep Minard's Liniment in the house.

Save bacon until Berlin is taken.

Before putting delicate colored garments in the wash dip them in a pail of water containing a tablespoonful of turpentine and dry. This insures fast tints.

LIFT YOUR CORNS OFF WITH FINGERS

How to loosen a tender corn or callus so it lifts out without pain.

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called freezone, applied directly upon a tender, aching corn, instantly relieves soreness, and soon the entire corn, root and all, lifts right out.

This drug dries at once and simply shrivels up the corn or callus without even irritating the surrounding tissue.

A small bottle of freezone obtained at any drug store will cost very little but will positively remove every hard or soft corn or callus from one's foot.

If your druggist hasn't stocked this here drug yet, tell him to get a small bottle of freezone for you from his wholesale drug house.

Slacker Lands in Wartime.

The great menace of fire unquestionably is to the future of our timber supply. In the piney woods, particularly, repeated fires are fatal to the establishment of reproduction; while in the hardwoods the trees, though not always killed, are stunted and deformed and laid open to fungus and insect attack. As young growth seldom has an immediate commercial value, its loss is usually ignored—the fact that a crop has been destroyed, being overlooked. The loss in such a case is as real as if merchantable timber were destroyed—the destruction of a ten-year-old stand postponing under present conditions, the date of a possible harvest from fifteen to twenty years, if not indefinitely. At the same time, the land burned over has, to all intents and purposes, been rendered unproductive for a corresponding period. Herein lies the importance of fire protection from an economic standpoint, for no potentially productive land should be allowed to lie idle. The community has a right to and will, sooner or later, demand that it be producing something.

Minard's Liniment used by Physicians.

Perennial plants which usually give good satisfaction on the north side of buildings are saxifrage umbrosa, doronicum plantagineum, iris, oenothera biennis, hypericum calycinum, violets, Japanese anemones, ferns, lily of the valley.

Low-priced tea is a delusion for it yields so poorly in the teapot that it is actually an extravagance compared with the genuine Salada Tea, which yields so generously and has such a delicious flavor.

And Teacher Fainted.

"Good morning, children," said an arithmetic teacher. "How many of you have prepared an original problem in multiplication, as I requested?"

Only one hand went up.

"Well, William, you may give your problem and the rest of the class may solve it."

"If my baby sister is a year old now and weighs twenty pounds, and keeps on gaining two ounces a day until she is sixteen years old; and if the price of living doubles again in the next ten years, how much will my sister's graduation outfit cost? Mother says she would like to know."

MONEY ORDERS.

When ordering goods by mail send a Dominion Express Money Order.

Sufficient Sugar for Canning.

Housekeepers who are anxious about their preserves for next winter may take comfort. The Food Board announces that there will be sufficient sugar in the country for the preserving and canning season and that the maximum fruit and vegetable crops that can be produced in this country will be taken care of, so far as the sugar supply is concerned. To make sure of this, however, strict conservation will be necessary in the meantime.

The Magic Healing Ointment...

Soothes and heals all inflammations, such as burns, scalds, blisters, cuts, boils, piles and abscesses—sold for over 25 years. All dealers, or write us.

HIRST REMEDY COMPANY, Hamilton, Canada

My Boy.

With fife and drum the call has come;
at last you've got the chance
To strike a blow against the foe for
freedom and for France,
For all that England holy holds, our
own birthright of joy.
And I would I might be with you, O
my boy, my boy.

The world were but a sorry place of
sadly setting suns
Were we to face (ah, dark disgrace)
the triumph of the Huns;
Rather to smite by day and night
where their grim hosts deploy
And I would I might be with you, O
my boy, my boy!

I know you will not falter, and I know
you will not fail,
Though the Great Will save not from
ill and you should kiss the Grail;
Across the tide in prayer and pride I
send you this last ahoy—
And I would I might be with you, O
my boy, my boy!

The Itemized Account.

Tommy—Half of 'em we got with machine gun fire, half of 'em with rifle, then we fixed bayonets and killed another half of 'em!"

Funny Man—And what happened to the rest?

Tommy—Oh, we took 'em prisoners.

Minard's Liniment Lumberman's Friend.

"Boys flying kites haul in their white,
winged birds,
You can't do that way when you're
flying words,
Thoughts unexpressed may sometimes
fall back dead,
But God himself can't help them when
they're said."

—Will Carleton.

MINARD'S LINIMENT is the only Liniment asked for at my store and the only one we keep for sale.

All the people use it.

HARLIN FULTON.

Pleasant Bay, C.B.

Arsenate of lead is generally used in place of paris green for eating and chewing insects. It adheres better and is less likely to burn. Two pounds of powder or four pounds of paste are used to 50 gallons of water or Bordeaux mixture.

Ask for Minard's and take no other.

Milk is the best single food for the proper development of growing children. Expert dietician urge its liberal use; a quart of milk a day for each child is a good rule to remember.

Potatoes will bake more quickly, have a better flavor, and instead of shrinking up 50 the skins to the full if rubbed with dripping before baking.

W. F. YOUNG, P.D.F., 310 Lymans Bldg., Montreal, Can.

Absorbine and Absorbine, Jr., are made in Canada.

Cause of Early Old Age

The celebrated Dr. Michaelieff, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digests food properly it is absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Sligo's Syrup" after meals makes your digestion normal.

After the chicks are six weeks old hopper feeding is best, and the exercise they get in seeking feed is beneficial. The chicks know when they need feed and when they have had enough.

SUFFERED TWO YEARS WITH PIMPLES

Child Could Not Sleep Till Cuticura Healed.

"My little brother suffered for about two years from tiny red pimples. They appeared externally on his body but he had the greatest trouble under his ears. The skin was red and very sore and at the least touch he would give a howl of pain. After a few seconds he would have to scratch, and he was not able to sleep.

"A friend advised me to send for Cuticura Soap and Ointment. I noticed a change, and I used three cakes of Cuticura Soap and four boxes of Ointment when he was healed." (Signed) Louis Frank, 745 City Hall Ave., Montreal, Que., February 2, 1916.

Keep your skin clear by using Cuticura Soap and Ointment for everyday toilet purposes.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

THE MAKING OF A FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on with the reliability, accuracy, skill and cleanliness which attends the making of this great medicine for woman's ills.

Over 250,000 pounds of various herbs are used annually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is sterilized and as a final precaution in cleanliness the medicine is pasteurized and sealed in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydia E. Pinkham's Vegetable Compound which we are continually publishing attest to its virtue.

SMOKE - TUCKETTS

ORINOCO

CUT FINE FOR CIGARETTES — CUT COARSE FOR PIPE

—Although farming is the greatest industry in the Dominion, it is a recognized fact that the farming class have, in proportion to their numbers, fewer representatives in the House of Commons and the various Legislatures than any other class. At different periods in the past there have been spasmodic attempts—when there was some special stimulus for such movements—to organize a farmers' party. At no time, however, did the composition of the legislative bodies become greatly altered by the agitations. Campaigns in which special issues were introduced that were calculated to be of benefit to the farmers' interests have so far not been a success, and the rural voters invariably settled down again to supporting straight party candidates chosen mostly from the professional or business classes. Farmers' organizations have failed to maintain interest on the part of those who should be interested, and there has been no continued discussion, investigation and promotion such as is necessary to advance the farmers' interests and solve the farmers' problems. Since the institution of the farmers' club movement there is a promise of more virile and extended life, and one result may be the election of some of the strictly rural class to the parliament. The farmers have always made the great mistake of allowing others to do all the legislating and governing in this agricultural country, apparently being satisfied to escape "the responsibility." To-day, with the tariff question looming larger than ever before, the error of the past is becoming more apparent to the farmers themselves, and by the time another election comes around they may venture to occupy the field in many constituencies. The manufacturers are already actively preparing for a campaign in their interests, and unless the land-tillers are well organized the protectionists may become strongly entrenched in their position as after the great political contest of 1878.

—Hindenburg's four blows have given him command of the great avenues of approach to Paris from the north and east, the Oise and the Marne Valleys, and with a reasonably straight battleline the Crown Prince's army now stands in a front extending from Montdidier on the Avre to Chateau Thierry on the Marne, almost sixty miles away. Before seeking to bring about a decisive battle for the possession of Paris the enemy must endeavor either to drive or to manoeuvre the French out of the forests of Compiegne and Villiers-Cotterets, which stretch along the centre of the battlefront for a distance of over twenty-two miles from the city of Compiegne to Neuilly, south of the Ourcq River. While preparations are being made for this operation there may be diversions elsewhere, on the Somme and Flanders fronts, perhaps in the Argonne and Verdun sectors, but we may be reasonably certain now that they will be no more than diversions, and that the blow at Paris is the decisive event toward which all other events converge. While Hindenburg reckons up his territorial gains in the four battles of the past three months Foch totals his own losses and the estimated losses of the enemy, and expresses confidence that he has exacted the full price for the ground ceded. The enemy has failed in the vital thing—the destruction of the Allied armies. These armies are stronger, relatively to Germany's, than they were when the battle was joined, and their strength grows from day to day as American reserves pour their human freight into France. In the battle against time, which will bring unquestioned Allied superiority, Hindenburg loses. He seems incapable of forcing a decision within the short remaining period during which the power to strike will still be his.—Globe.

DON'T NEGLECT TO REGISTER

Help Make it Possible to Solve Canada's War Problems

Booths Open from 7 a.m. to 10 p.m.

Saturday, June 22nd, is the day when every man and woman in Canada over 16 years of age should fill out a registration card and receive a certificate of registration.

It is to be hoped that none who are able to go about will neglect this, as the penalties of neglect are severe.

The law says: "Every person who shall have registered shall at all times thereafter carry upon his person (this means also her) his certificate." This is in order that he may prove at any time that he is registered.

Any peace officer, police or constable may demand evidence of registration at any time, and the law further reads: "If any person so required shall, without reasonable excuse, refuse, neglect or fail to produce his registration certificate he shall incur a penalty of twenty dollars, and may if a male person, be, taken immediately before a justice of the peace to be dealt with according to law."

Other consequences of failure to register are that one shall be liable upon conviction to a penalty not exceeding $100, and to imprisonment for any term not exceeding one month, and moreover is a penalty of $10 for each day when he should have registered during which he may continue unregistered.

An unregistered person cannot vote, nor be employed by any person nor be paid for any service, he cannot have a travelling ticket, will not be allowed lodgment at any hotel. There are heavy penalties for the hotelman who will sell meals or lodging of the ticket agent who will sell a ticket to an unregistered person.

So the man or woman who hasn't a very good excuse will find himself or herself in a very awkward position if unregistered after June 22nd.

It is hoped that all will go to the registration booths prepared to answer the questions without hesitation. The law reads:

"If any person upon his registration refuses to answer any question submitted by his registration card, he shall be guilty of an offence and liable to a fine not exceeding one hundred dollars."

It is evident from the foregoing that the only sensible course is to be prepared to register and register promptly.

Those who become eighteen after June 22nd must register at the polling booth within thirty days after attaining the age of eighteen.

Everyone who has taken the time to reflect upon the serious nature of the present situation is anxious to do everything within his power to help on with the war. The most difficult problem facing many people is a determination of just what they should do. These services are at the disposal of the State, but so far the State has not indicated the way in which their services could be most acceptably employed. The information which will be obtained on Registration Day may help to solve this problem. If the war is prolonged and it becomes necessary to closely direct the activities of the civilian populations, the data disclosed by the registration cards will be made the basis for such direction. By knowing precisely the capabilities of the civilian population the Government will be in a position to effectively deal with all problems of man power as they arise.

From a Paisley Boy in the U. S. Army

Mrs. McInnes, of Ross St., who for fifteen years has been one of the most faithful teachers in Knox Sunday School, has received a letter from one of the old scholars of her class, Pte. Melville Kerr, who is in training with the U.S. army at Camp Taylor, Louisville, Ky. The letter was written after the young soldier had opened his travelling bag and found therein the Bible he had received from the teacher of the class in the corner of Knox church in 1904. Pte. Kerr expresses very freely his appreciation of the lessons there received from Mrs. McInnes, and assures her that she has been his warmest, though unexpressed friend for a good many years. Her teaching has been the means of bringing to him the knowledge that there is more pleasure in doing right than in throwing one's life away. We are pleased to know that Mrs. McInnes is still giving those helpful lessons. The letter is one that might give any A. E. F. soldier a good name in the army. The writer considers "Those boys who were in that class are now in the four corners of the earth—a number of them in France, some killed in the terrible struggle for the right, perhaps some of them prisoners, so I am told, others wounded, and still others fighting away. Perhaps there are others who for some reason cannot be. At any rate I am sure there is not one of them living but that thinks of you and your kind words at a Sunday School teacher. Suppose some one of all the young men in that class is this struggle for freedom and right. A mother's prayer is heard about her. Many may be trying for selfish ends, but they will be rewarded with the real prize. It will be there with the Crown of Life. God bless you, auntie. Percy and Wallace wrote a long time ago. I have been away for two years and Wallace for over a year in the trenches. Jack and myself are over here together. All the old boys in the

DISSOLUTION OF PARTNERSHIP SALE

One Week More

Don't miss this opportunity. Sale closes Wednesday, June 26th, and store will be closed Thursday, Friday and Saturday, June 27, 28 and 29.

Dishes

Our Total Stock of Crockery is on Sale

Plain and Fancy China Teapots, Crocks Lamps

And dozens of necessities for household use

Have you attended to your account? We need the money.

Ballachey, Laidlaw & Co.

Ladies Must Register Too

Many ladies are under the impression that they are not required to register. This is a mistake. Every man, woman and child in Canada over the age of 16 years must register. Ladies who are married and living with their husbands may register at their husband's booth, but they must register.

Hardship Hard to Define

The definition of extreme hardship is proving somewhat difficult to determine, but in general terms it is applied to all cases where the withdrawing of the man in question would cause a definite farm to cease production. This would include cases where the man taken is the last one left with the father dead. Extreme hardship is not being taken to mean financial loss or personal inconvenience or extra work on the part of those who are left. The men in Category A are being investigated carefully but the announcement was made from headquarters yesterday that all young farmers in the ranks in any of the lower categories who are able to establish proof that they are really needed on the farm are to be granted leave of absence till July 15. Such cases do not have to be passed upon by Ottawa officials, the local military hospital power to extend this date beyond July when it is thought necessary.

—Of course, you won't miss Port Elgin's Dominion Day celebration. Big programme of races. Concert at night. Come to the lake town for Monday, July 1st.

—It is hard for a hero to live up to his reputation.

BOYS OF 18 NOT TO SERVE YET

(Mail and Empire)

It may come as cheerful news to the youths of 18 to know that there is no immediate intention on the part of the Ottawa officials to call them to the colors just yet. It is understood that the present intention is to first call up those who have become 20 since October 12th of last year, and then the boys of 19 until later. The 18's, it is planned, will be allowed three months more in their 20th birthday when they will be called to the ranks and will be given sufficient training to have them ready to go overseas by the time they are 20. In the meantime now that all men from 20 to 22 have been instructed to report, attention will be directed to the older men in Category A. One lecture which is now taking up much attention on the part of the military officials is the applications which are coming in from young farmers between the ages of 20 to 22 or their relatives for leave for service for the summer's work. There have been so many applications of this nature received by the various commanding officers that only those of unusual emergency can be considered. Each C. O. has instructions to investigate only the cases where extreme hardship would exist if the man is kept in the army.

CLERK'S NOTICE OF FIRST POSTING OF VOTERS' LIST

Voters' Lists, 1918, Municipality of the Village of Paisley, County of Bruce

NOTICE is hereby given that I have transmitted or delivered to the persons mentioned in section 1 of the Ontario Voters' List Act, the copies required by said section to be so transmitted or delivered of the list, made pursuant to said Act, of all persons appearing by the last revised assessment roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly and at Municipal Elections and that the said list was first posted up at my office at Paisley, on the 7th day of June, 1918, and remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

Dated this 7th day of June, 1918.

J. C. GIBSON, Clerk of Paisley

NURSING THE WOUNDED

It takes strength and courage to nurse the wounded. Every woman should make herself fit for war's call at home or abroad. Health and strength are within the reach of every woman. They are brought to you by Dr. Pierce's Favorite Prescription. Take this medicine, and there's a safe and certain remedy for the chronic weaknesses, derangements, and diseases peculiar to women. It will build up, strengthen, and invigorate every "run-down" or delicate woman. It assists the natural functions.

At some period in life, a woman requires a special tonic and nervine.

If you're a tired or afflicted woman, turn to "Favorite Prescription," you will find it never fails to benefit. Sold in tablet or liquid form. Send Dr. Pierce, Pres. Invalids' Hotel and Surgical Institute, Buffalo, N. Y., (or branch, Bridgeburg, Ont.) 10c for trial pkg. tablets.

Toronto, Ont.—"I found 'Favorite Prescription' a splendid tonic for women. Some time ago I became all run-down, weak, nervous and could not eat or sleep. Had severe backaches, pains in my right side. I took Favorite Prescription and it completely built me up in health and relieved me of all the annoying pains and aches."—Mrs. Thomas Grantham, 425 Frost St.

Niagara Falls, Ont.—"During middle age, I began to go down in health. I would become dizzy, black spots would appear before my eyes. I also suffered with severe pains in the back of my head and my back ache continually. I was most miserable when I began taking Favorite Prescription, but by its use I came through this critical period in a good healthy condition. It is a splendid medicine for women at this time of life."—Mrs. W. F. Tentzel, 187 Bridge St.

CAPT. (REV.) JOHN MacNEILL'S LETTER

Advocate readers are always interested in that old Paisley boy, Rev. John Macneill, of Walmer Road Baptist Church, Toronto. Before his recent return from service with the Y. M. C. A. overseas Captain MacNeill wrote the following letter, which appeared in the Presbyterian and Westminster : "Do you know that I was the first Canadian to speak to American troops in France ; indeed I was perhaps the very first of all to bring them a message in the battle zone. It was the first week of September, and I was down among our Canadian railway troops in the Somme. There I found a company of American engineers, about 300 men. They were attached for the time being to the Imperial Engineers. They were very strange to it all. They were dumped down in the wilderness and had not found themselves. The vernacular of the war was strange. They asked what we meant by 'Blighty,' 'whizbang,' etc. When they told us of their plight we said 'I will be down Thursday night and we'll have a hand and a singsong and a speech and a good time.' Without the men knowing of our coming we drove up with a lorry to their camp about 5 o'clock. The Americans were lined up with their mess tins for supper. When we tumbled out with the band on the roadside and they saw what and who we were, they broke up the supper line, tossed their hats in the air, rushed out to meet us and cheered and laughed and danced a welcome such as only American boys can give. They took time then to eat a hurried supper. Then we settled down to business. There was no hut nor tent—just the open by the roadside, looking out on the indescribable waste of war, a country scarred and battered without a sign of civilised life. The band played. The boys' spirits rose and rose higher, came near the boiling point until with the first note of 'Dixie' they broke all bounds ; laughed, cheered, sang—not without dim eyes and thick throats, I think, while they fell into pairs by instinct and danced around on the grass, calling the band back again and again to the tune. And we sang 'Swanee River' and 'My Old Kentucky Home' and other good old songs. Then Capt. McDonald suggested a hymn, one we all knew, and another and another. They brought me a box to stand on and crowded round. You can imagine what a thrilling moment it was—for me at least. There was the vanguard of the great host of brothers, Behind the 300 I saw and heard the trampling millions. I heard them saying 'we are coming, Father Abraham, 400,000 strong.' I spoke of their coming and what it meant to us—to the world and to themselves. The same spirit of liberty which drew them away from Britain's side 120 years before now drew them back to her side again. Freely Britain conferred the blessing she made them, and she gloried in their liberty then achieved that flowed back now as a mighty flood. From this time on we were inseparable. My memory served me (it is not a bad old servant when I put it to the test) with some of Lincoln's great passages and some of Wilson's lofty words that were fresh in my mind. From that on, and on to Him and them, and His call and His pledge of power to every man in this great crusade who would have Him. When I closed with Julia Ward Howe's 'Battle Hymn of the Republic' we were ready, with uncovered heads in the silent evening hush—broken only by the occasional sound of guns—to dedicate ourselves afresh, not only to the cause, but to Him. That night at some expectis has not been eclipsed in my whole experience in France."

After Dennis' Scalp

Mr. Dennis Izzard, the Good Roads Superintendent in Bruce, and a former warden of the county, is likely to come the unkindest cussed man in Bruce if he don't get busy and fill up the ruts in the highways that the county has taken under its wing and incorporated in the Good Roads Scheme. People who are travelling over them and getting their innards shaken up are becoming as enthusiastic as a sick cat over the workings of the Highways Improvement Act in Bruce, and are commencing to wonder what the deuce the Ontario Government committee that they are torturing them so unmercifully. If they can't get help to go on with the work shamefully, why not drop the scheme for the present, and let the work be done by statute labor as of yore, for surely the ancient code they got sufficient attention to keep them passably fair, while under the new system every ratepayer and the bifaluting title of "Good Roads System," they are becoming festooned with ruts, humps and pitch-holes than a Chicago saloon is full of bums.—Herald and Times.

—Pte. Henry Leppard, a deserter who has been in hiding in the home of his parents, Mr. and Mrs. Walter Leppard, Mitchell, for the past month or so, was taken to London on Thursday afternoon. For harboring his son Mr. Leppard appeared before Police Magistrate Ward on Thursday morning and was fined $100, and if this is not paid in one week he would have to serve two months in the county jail. When his father was taken to the police court the young man gave himself up to the police. Constables Hodgson and Price had charge of the case.

THE CANADA FOOD BOARD SAYS

The farmers of Canada will very shortly have to undertake the harvest work with the help of green labor. In this connection they should remember that we are at war. They should adjust the work throughout the farm to suit the new conditions, and they should begin right in their own minds. The first adjustment necessary is to change the point of view from one of criticism, discouragement and fault-finding with labor conditions, to that of the soldier and war worker, and realize that we are going through a crisis the most serious the world has ever witnessed without any exaggeration whatsoever.

There used to be talk among farmers derogatory to the city man and other inexperienced laborers who sometimes sought employment temporarily on the farm. Such talk is out of place now, with the Germans sixty miles from Paris and every available man in Britain and France fighting to save not only his own country but this country as well. Such Canadian farmers forget that they themselves have been farmers all their lives and in war time they can't expect to secure men volunteering from the cities with an experience in farm work equal to their own. This is an impossibility. But it is not impossible that farm production of this country be increased, despite the shortage of experienced labor, that this is true is proven by the experience of this country in the manufacture of munitions.

When the war started Canada was absolutely inexperienced, unskilled in, and without the machinery for the manufacture of munitions. But the manufacturers got to work. They studied the problem and they solved it.

To-day Canada is turning out millions of dollars' worth of shells every month from the largest to the smallest, and the most minute mechanical contrivances in connection with fuses and time charges. Canada's record in the manufacture of munitions is one of the surprises of the war. It was not made by Canada saying "Canada Can't" but by adopting the motto "Canada Can." Canada did not refuse to try because of the scarcity of labor but set to work to organize and employed men and girls who had never been inside a factory before. They accomplished the impossible. These inexperienced helpers were speedily taught their parts and the result is shown in the production of munitions in Canadian factories now known all over the world—not excepting Germany.

The result of organization and the willing war-time spirit in Great Britain is equally convincing. Great Britain last year, largely with inexperienced labor on the land, increased her cereal production by 830,000 tons, its potato production by 5,000,00 tons. The cultivated area was increased altogether by 1,000,000 acres. In 1917, 1,000,640 men were taken from industrial organizations and placed in the army. The War Office replaced them with 804,000 women, and yet the production of guns was increased 30 per cent., air craft 250 per cent., while the shipping tonnage amounted to 1,165,000 tons additional.

The best recent illustration of what can be done in an emergency when only inexperienced men are available is that of the battle of Picardy, when the fifth army under General Gough was overwhelmed and outnumbered. It looked inevitable that the Huns would break through and capture the city of Amiens, which would have meant the interruption of railway communication between channel ports and Paris, cutting off the British from one of their chief bases of supplies. General Gough, however, saved the situation. He called upon all classes of men behind the lines, whether they were soldiers, cooks, camp followers, railway construction men, Chinese laborers, medical service men, transport men, or whatever they were and organized them to fill the breach. With these men he succeeded in doing what the fifth army failed to do—he held the line ! With no training in trench warfare, and no fighting organization before that time, General Carey gathered them together, and this nondescript gathering of troops kept the lines back for six days and nights until re-inforcements arrived. General Carey did not say, "I can't use this untrained class of men," but he set to work without a moment's hesitation to make the best of them, and he succeeded in saving the British army and its allies from a desperate crisis.

Similarly, if the Canadian farmer makes up his mind that these are war times and war measures are necessary there is absolutely no doubt he can utilize to a tremendous advantage, the man power and the woman power of the towns, where people are only too willing to go to his assistance if they are organized to do so. He must not expect them to be experienced and to know as much as the details of farm work as he does. It has taken him a lifetime to acquire his information. Townspeople have spent their lives at different work, but with his knowledge of farming and his intimate acquaintance with his farm and all its needs he should have the ability to organize inexperienced help and to show each helper his or her particular job and how best to accomplish it. A few hours' patient, tactful instruction in any particular line of work will very soon enable a greenhorn to "carry on," as they say in the army. By patience and consideration the farmers of Canada can, without question, effect an organization from green hands to skilled hands that will not only surprise themselves but will also be of tremendous benefit to the Empire by the increased results of their harvest.

A CRIPPLE FOR THREE YEARS

Helpless In Bed With Rheumatism Until He Took "FRUIT-A-TIVES".

MR. ALEXANDER MUNRO

R.R. No. 1, Lorne, Ont.

"For over three years, I was confined to bed with *Rheumatism*. During that time, I had treatment from a number of doctors, and tried nearly everything I saw advertised to cure Rheumatism, without receiving any benefit.

Finally, I decided to try 'Fruit-a-tives". Before I had used half a box, I noticed an improvement; the pain was not so severe, and the swelling started to go down.

I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place".

ALEXANDER MUNRO.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Quality Counts Every Time

ELLIOTT Business College

Yonge and Charles Sts., Toronto, has lately been asked to fill positions worth from $1000 to $1570 per annum. The demand for our graduates is five times our supply. Boys of 14 to 19 years of age and young ladies are in great demand when properly prepared. No vacations. Enter now. Write for prospectus.

W. J. ELLIOTT, Principal

CANADA PART OF BAIT TO GERMAN CAPITAL

India and Australia Also—Kaiser Promised to Parcel Out British Empire

Of all the revelations which have stamped Germany as the greatest criminal in history none is more important than the pamphlet written by August Thyssen, formerly the leading manufacturer of steel in Germany, says the Wall Street Journal, which goes on :

He is known to practically all the directors of the American Iron and Steel Institute. Until the beginning of the war Herr Thyssen possessed huge mines, iron works, docks and seven harbors in British India, in other British colonial dependencies, as well as in France and Russia, all of which have been sequestrated by the governments of these three powers as property belonging to a German foe. The pamphlet falls into two part :

"In 1912 the Hohenzollerns saw the war had become a necessity to the preservation of the military system, upon which their power depends. In that year the Hohenzollerns might have directed, if they had desired, the foreign affairs of our country so peace would have been assured in Europe for at least fifty years. But prolonged peace would have resulted certainly in the breakup of our military system. The emperor and his family clearly understood this, and they therefore, in 1912, decided to embark on a great war of conquest.

Promised 30,000 Acres

"But to do this they had to get the commercial community to support them in their aims. They did this by holding out to them hopes of great personal gain as a result of the war.

"I was personally promised a free grant of 30,000 acres in Australia and a loan from the Deutsch Bank of three-quarters of a million dollars at 3 per cent. Several other firms were promised special trading facilities in India, which was to be conquered by Germany, be it noted, by the end of 1915. A syndicate was formed for the exploitation of Canada. This syndicate consisted of the heads of twelve great firms ; the working capital was fixed at one hundred million dollars, half of which was to be found by the German Government.

"There were, I have heard, promises made of a more personal character. For example, the "conquest of England" was to be made the occasion of bestowing upon certain favored and wealthy men some of the most desired residences in England, but of this I have no actual proof.

"These promises were not vaguely given. They were made definitely by Bethmann-Hollweg on behalf of the emperor to gatherings of business men, and in many cases to individuals. But not only were these promises made by the chancellor ; they were confirmed by the emperor, who on three occasions addressed large private gatherings of business men in Berlin, Munich and Cassel in 1912 and 1913. I was at one of these gatherings. The emperor's speech was one of the most flowery orations I have listened to, and so profuse were the promises he made that were given half of what he promised to be fulfilled, most of the commercial men in Germany would become rich beyond the dreams of avarice."

—The village of Teeswater has made provision for a fuel supply for next winter by purchasing 36 acres, of bush in Culross Tp., at a cost of $695.

—It's the lazy man who prays for things he won't work for.
